# YOUR LINK TO THE HOUSING MARKET 

Canada Mortgage and Housing Corporation

## Stampede of New Home Construction in July

Despite the many distractions that come with Stampede, Calgary homebuilders in July recorded a 31 per cent gain in new home construction over the previous year. Total residential construction in the Calgary Census Metropolitan Area (CMA) reached I, I30 units in July, up from 865 recorded in July 2002. This brings the year-to-date total to 8,596 units, II per cent ahead of the corresponding period last year.
Local builders started 74I single-family homes in July, up two per cent from production witnessed a year earlier. This represents only the first time in five months that single-family starts in the Calgary CMA outperformed the previous year. While the gain appears promising, it is unlikely the start of another run of increased activity. Single-family building permits in July were 12 per cent lower than the previous year, pointing to weaker activity in coming months. August of last year will be especially difficult to compete with, considering almost I,000 single-family homes were started at that time. July's single-family starts bring the year-to-date total to 5,107 units, five per cent fewer than the first seven months of 2002. Despite the decline, the single-family home building industry is enjoying the third best year in history,

surpassed only by the first seven months of 1998 and 2002. After seven months, construction within city limits is down four per cent, while Cochrane recorded the largest year-over-year decline among municipalities at 55 per cent.
With the decline in starts to-date, it appears that builders are having an easier time getting clients in their homes. To the end of July, 5,035 homes have been completed, the highest total for any January-July period on record. Single-family absorptions are also on a record-setting pace, with 4,892 units absorbed to the end of July. Despite the surge, inventories have recorded a modest increase in recent months. At the end of July, the number of units in inventory sat at 709 units, 33 per cent higher than the previous year and the highest total since November of 2001. Spec homes are responsible for the majority of the increase to-date. At 282 units in July, the number spec units in inventory outnumber the previous year's total by 161 . Buyers in July are enjoying the strongest spec home count since November of 2001.

Meanwhile, multi-family starts continued their strong performance in July, recording a nearly threefold increase over the previous year. Multi-family housing starts, including semidetached, row, and apartment units, totaled 389 in July, up an impressive 180 per cent from July of 2002. July's performance added to the year-to-date gain, which, to the end of June, sat at 39 per cent. In the first seven months of 2003, construction began on 3,489 multi-family units, boosting the year-to-date gain to 48 per cent. While impressive, a gain of this magnitude is not expected to prevail by year-end. In fact, CMHC expects multi-family construction to moderate in the coming months. With migration cut in half

from the previous year, job creation down by a similar margin, and resale listings up 50 per cent year-over-year, the market can not continue at this pace without some additions to inventory down the road.
At the end of July, the number of complete and unabsorbed multiples sat at 456 units, 26 per cent above levels reported one year earlier. Semi-detached inventories were nine per cent lower than the previous year, while row and apartment inventories recorded respective increases of 22 and 47 per cent. With 5,229 multi-family units under construction up 28 per cent from July 2002, it is unlikely that all will be absorbed upon completion. Over the last six months, the percentage of units absorbed at completion has been around 80 per cent, pointing to higher inventories in the future.

## RESIDENTIAL CONSTRUCTION DIGEST

CMHC`s monthly Residential Construction Digest delivers all the housing statistics you asked for, right down to the local market level! We have designed this product with your input, to meet your needs. You told us you wanted a detailed breakdown each month of housing statistics for single and multi-family markets, broken down by price range and by area of the city.

The Residential Construction Digest delivers!
Each month, over 60 tables reveal the housing market in great detail: Housing trends made crystal clear, to help you identify new opportunities. For added convenience each report is distributed electronically in PDF format with hotlinks allowing you to quickly get the information you need with a click of your mouse.

Each Report is Available for the
Low Annual Price of $\$ 350 .{ }^{00}$ plus GST
To subscribe to, or receive a free sample of, the Residential Construction Digest, please call (877) 722-2642.
