Real Domestic Product, January 1973 – Advanced Information.

Real domestic product increased 0.6% in January following a 0.4% advance in December.

The major contributors to the increase were wholesale and retail trade, transportation, manufacturing and agriculture.

For trade, the January increase followed marginal declines in the two preceding months. In retail trade the major contributor to the increase was department stores. Other notable gains were registered by clothing stores; liquor, beer and wine stores; and furniture, radio, T.V. and appliance stores. Output of fuel dealers dropped in January.

In transportation increases were widespread – air, rail and pipeline transport and urban transit all increased substantially. For rail transport, increased carriage of wheat was the major factor in the advance.

Manufacturing output increased in January for the fifth consecutive month with both durable and non-durable manufacturing recording increases. Within non-durables, beverage manufacturers reported the most significant advances, followed by notable increases in the rubber, petroleum and coal products and "other food processing" industries. Pulp and paper and industrial chemical manufacturers registered the strongest decreases. In durable manufacturing, all but two major groups advanced. Output of cement, concrete products and ready-mix concrete all increased substantially. Increases in production were also recorded by iron foundries, iron and steel mills, and manufacturers of communications equipment and electrical industrial equipment. A decrease in exports was associated with a decline in output of sawmills and planing mills. Production of motor vehicle manufacturers also decreased.

Agriculture output increased, reflecting mainly expectations of larger grain crops for 1973 as a whole.

(continued)

The major decrease in the month occurred in electric power, gas and water utilities where both electric power and gas output declined.

For further information, order the January issue of *Real Domestic Product* (61-005, 20¢/$2) or contact Miss A. Ansmits (613-992-1329), Industry Product Division, Statistics Canada, Ottawa K1A 0Z8.

INDEXES OF REAL DOMESTIC PRODUCT

(1961=100)

(Seasonally Adjusted)

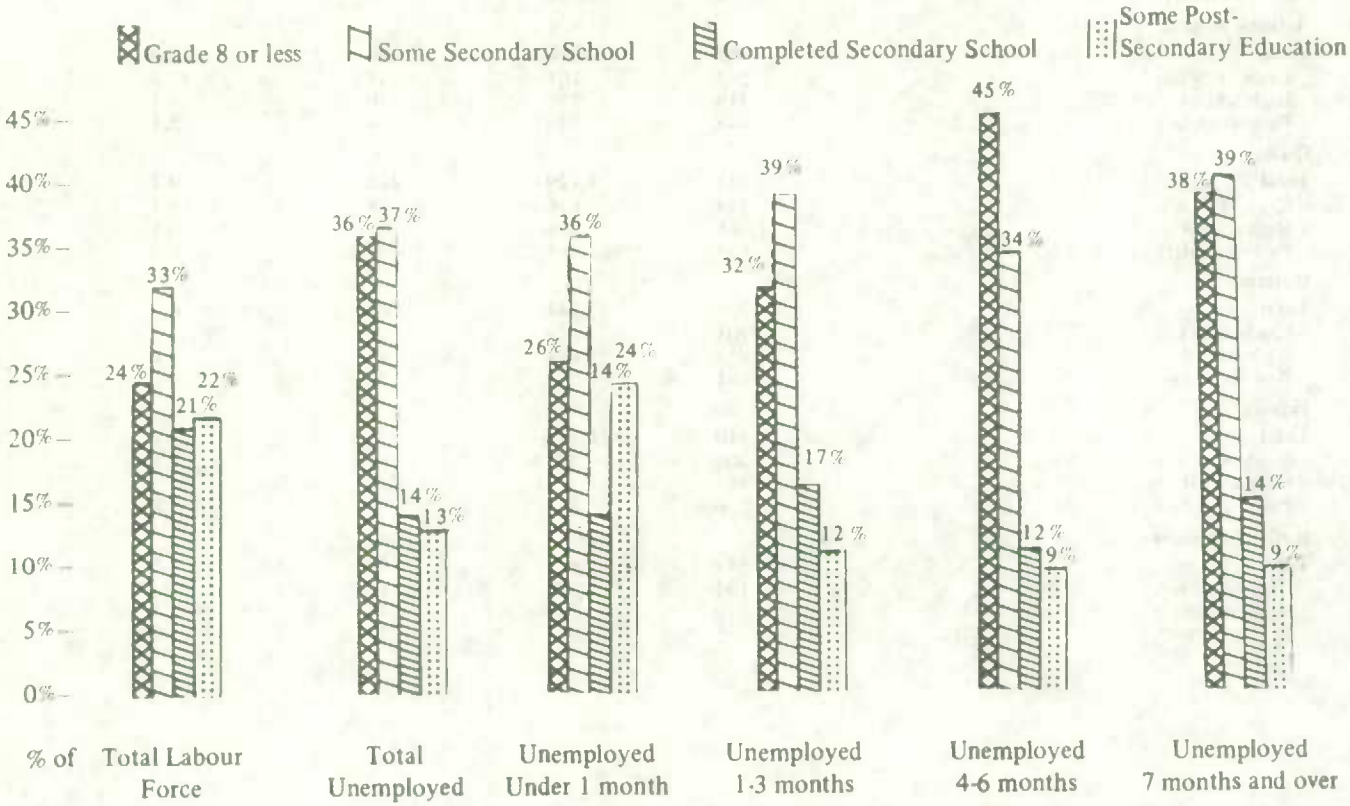
Education Levels in the Labour Force, April 1972 – The Labour Force, February 1973 (71-001, 30¢/$3).

A special survey was added to the regular labour force survey in April 1972, inquiring into the education levels attained by the respondents. A detailed report appears in the February issue of The Labour Force, released March 26.

Education Levels in the Labour Force and Among the Unemployed
April 1972



(see table on next page)

Canada's Foreign Trade in Crude Petroleum Fuels and Electricity, 1968-1972 – Published only in the Statistics Canada Daily and Weekly.

More than 90% of Canada's exports of crude petroleum, fuels and electricity went to the United States in 1971 and 1972 – but less than one-fourth of our imports originated there.

Exports to the United States rose 140% to $1,592 million in 1972 from $657 million in 1968. Crude petroleum accounted for 63% ($1,008 million) of these exports in 1972, and 68% ($446 million) in 1968; natural gas accounted for 23% ($363 million) and 26% ($173 million); and fuel oil and electricity for 11% ($183 million) and 4% ($29 million). Other energy exports included radioactive ores, petroleum and coal products, coal and coke, and gasoline.

During the five-year period, exports to overseas markets were very small – 9% of the total in 1972, 5% in 1970 and 7% in 1968 – in spite of exports of coal to Japan, which began rising in 1970 and exceeded $100 million in 1972.

On the other hand, imports from countries other than the United States increased to 77% ($805 million) of the total in 1972 from 67% in 1968. Crude petroleum accounted for 85% of these imports from "other countries" in 1972, fuel oil for 13%, and gasoline and petroleum and coal products for the balance. The chief sources of crude petroleum were Venezuela ($360 million), Iran ($70 million), Saudi Arabia ($55 million), Nigeria ($54 million) and Libya ($41 million). Our main suppliers of fuel oil were Venezuela ($48 million) and the Netherland Antilles ($31 million).

Imports from the United States rose to $236 million in 1972 from $185 million in 1969 (1968 figures are not comparable due to a change in reporting freight and handling charges). Coal and coke accounted for 85% ($202 million) of energy imports from the United States in 1972, and 72% ($134 million) in 1969.

More detailed coverage back to 1961 will be published in May issue of *Canadian Statistical Review* (11-003, 50¢/$5). For further information contact Mr. W.M. MacLeod (613-992-8896), External Trade Division, Statistics Canada, Ottawa K1A OV5.

Sums of rounded components may not add up to rounded totals.

Further information will be contained in *Summary of Imports* (65-005, 20¢/$2).

Local Government Employment, October-December, 1972 (72-009, 50¢/$2).

Municipalities employed an estimated 210,404 "general services" employees at the end of December 1972, up from 205,142 a year earlier. Their gross payrolls for the quarter increased to $402 million from $377 million.

Local Government Finance, Actual, 1970 — Advance Information.

Actual gross general revenue raised by local governments in 1970 from their own sources — real property and other taxes, sales of services, licenses, permits and other charges — increased by 9.4% over the previous year to $4,272 million. Transfers from other governments continued to become more important as a source of financing local government operations in the year, reaching 43.5% of total gross general revenue of $7,557 million, as compared with 41.8% of 1969 gross general revenue of $6,712 million. Particularly noteworthy was the increase of 18.8% in conditional transfers from provincial and territorial governments to $2,893 million or 38.3% of total gross general revenue.

Gross general expenditure in 1970 at $8,033 million showed an increase of 10.5% over 1969 as compared with the 12.6% increase in revenue. For the first time in many years education expenditure grew relatively more slowly than total expenditure to $4,038 million, an increase of 9.6% over the previous year. Education however, remained far and away the most important single function of local government with 50.3% of total expenditure as compared with public works (11.7%), protection (7.8%) debt charges (7.1%) and sanitation and water supply (6.7%). The other functions — general government, health, welfare, recreation and community services, contributions to own enterprises and miscellaneous expenditures — each amounted to less than 5% of total gross general expenditure.

Full details of these and other financial management statistics of local governments will be published in *Local Government Finance, Actual*, 1970 (68-204, $1). Pending release of the publication further information can be obtained from A.G. Kerr, Public Finance Division (613-994-9906) Statistics Canada, Ottawa K1A 0Z7.

Weekly Railway Carloadings, , 1973 – Advance Information.

Railways in Canada loaded 4.33 million tons of revenue carload freight during the 7-day period ending March 21. This was 8.3% more than in the comparable period of 1972. Year-to-date loadings increased 14.8%.

For further information order the March issue of *Railway Carloadings* (52-001, 20¢/$2).

Railway Carloadings, February 1973 – Advance Information.

Railways in Canada employed 300,356 cars in moving 16.6 million tons of revenue carload freight in February. This was 6.2% more cars and 9.4% more tons than in February 1972 in which there was an extra day. Interchanges between Canadian carriers and non-carload traffic are not included above. Receipts from United States connections, in terms of carloads, rose 14.3% and related tonnages were up 12.7%.

Commodity movements of significance in February 1973 included coal, pulpwood chips and logs.

For further information, order the February 1973 issue of *Railway Carloadings* (52-001, 20¢/$2).

Railway Operating Statistics – January 1973 – Advance Information.

Beginning in 1973, statistics for this monthly series have been reduced to those of six major railways. Previously, data for 24 railways were reported. The six lines now covered account for over 95% of total operating revenues. In January these railways showed revenues of $159.5 million. This represented a 23.4% increase over the $129.3 million shown by the same six lines a year earlier. Railway expenses (including taxes) rose only 12.6 to $152.2 million from $135.2 million and, as a result, a net income of $7.3 million was experienced as opposed to a deficit of $5.9 million in January 1972.

Revenue freight ton-miles were up 28.1% to 10.1 billion, while revenue passenger-miles (including commuter and non-commuter traffic) dropped 25.9% to 128.3 million.

For further information order the January 1973 issue of *Railway Operating Statistics* (52-003, 20¢/$2).

Electric Power Statistics, February 1973 – Advance Information.

In February 1973 net generation rose 9.1% to 22.0 billion kwh. from 20.1 billion kwh. a year earlier. There were increases in net generation in all provinces with the exception of Nova Scotia where there was a decrease of 13.2%. The largest increases were 135.4% in Newfoundland and 38.3% in New Brunswick. Hydro generation increased 13.6% while thermal production declined 1.1%.

For further information, order the February issue of *Electric Power Statistics*, (57-001, 20¢/$2) or *Energy Statistics Service Bulletin* (57-002, $3), or contact Ian Cavanagh (613-992-4021), Manufacturing and Primary Industries Division, Statistics Canada, Ottawa K1A OV6.

Oil Pipe Line Transport, January 1973 – Advance Information.

Canadian oil pipe lines received 3.02 million barrels per day of crude oil, condensate, pentanes plus and refined petroleum products in January. This was 15.7% more than the 3.61 million B/D received a year earlier. Domestic oils increased 18.3% to 2.53 million B/D, and imported oils 3.8% to 489,000 B/D.

For further information, order the January issue of *Oil Pipe Line Transport* (55-001, 20¢/$2), or *Energy Service Bulletin*, Vol. 8, No. 21 (57-002, $3 a year), or contact André Côté, Energy and Minerals Section, Statistics Canada K1A 0V6 (613-992-4021).

Iron Ore, February 1973 – Advance Information.

Canadian mines shipped 1.18 million tons of iron ore in February 1973, compared to 1.02 a year earlier. This brought the year-to-date output to 3.28 million from 2.82 million.

For further information, order the February issue of *Iron Ore* (26-005, 10¢/$1), or contact Art Symons (613-992-0491), Manufacturing and Primary Industries Division, Statistics Canada, Ottawa K1A 0V6.

Steel Ingots, Week ended March 24, 1973 – Advance Information.

Preliminary steel ingot production for the week ended March 31, totalled 287,594 tons, an increase of 1.7% from the preceding week's total of 282,919 tons. The comparable week's total in 1972 was 239,818 tons. The index of production based on the average weekly output during 1967 of 183,227 tons equalling 100 was 157.0 in the current week, 154.4 a week earlier and 130.9 one year ago.

Report on Livestock Surveys, Pigs, March 1, 1973 (23-005, $1 a year).

Total pig numbers were estimated at 6,997,000 on March 1, for all of Canada except Newfoundland. This was 2% fewer than a year earlier, with numbers down 3% in the West and unchanged in the East.

Sows and gilts were unchanged, farrowings down 2%, and sows to farrow up 1%.
