Note of appreciation

Canada owes the success of its statistical system to a long standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- P preliminary
- r revised
- X confidential to meet secrecy requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published

Acknowledgements

This publication was prepared in the Transportation Division under the general direction of Gord Baldwin, Director; Bruce Meyer, Assistant Director and Doug O’Keefe, Chief, Multimodal Transport Section.

This publication has been produced using a new technology known as Smart Publishing. The able assistance of Marc Pelchat, Victor Ho, Dany Brazeau, Guy Berthiaume, and Monique Deschambault, all from Dissemination Division, and Antoine Chrétien and Jean-Robert Larocque, from Transportation Division, contributed to this being the first Statistics Canada publication using this technology.

The following persons also contributed directly or indirectly to the preparation of this publication:

Marine transport unit:

Nicole Allard	Sean Hanratty
Bonnie Armitage	Colette Joly
Peter Bailie	François Mainville
Diane Bastien	Martin Monette
Sylvie Carrière	Suzanne Poirier
Lyne Gingras	Joanne Kennedy

Systems section:

Gary Roberge
Gilles Boivin
Kevin Ringuette

Dissemination and marketing:

Antoine Chrétien
Ron Chrétien
Jean-Robert Larocque

Shipping in Canada - Annual review, 2000	16
Related products	24
Statistical tables	
1 Domestic and international shipping - Tonnage loaded and unloaded, 1991-2000	26
2 Domestic and international shipping - Containerized cargo tonnage loaded, unloaded and percentage share of total, 1991-2000	26
3 International shipping - TEUs (Twenty foot Equivalent Units) handled at leading Canadian ports, 1991-2000	27
4 International shipping - Cargo tonnage loaded and unloaded, annual variation and containerization rate by Canadian region, 1991-2000	28
5 International shipping - Cargo tonnage loaded, unloaded and annual variation by foreign region, 1991-2000	29
6 Domestic and international shipping cargo tonnage loaded and unloaded at leading Canadian ports by commodity, 2000	31
7 Major commodities loaded by Canadian region, tonnage and top port of loading: international shipping, 1999 and 2000	36
8 Major commodities unloaded by Canadian region, tonnage and top port of unloading: international shipping, 1999 and 2000	38
9 International shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region and by foreign region, 1999-2000	40
10-1 Domestic and international shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region - Agriculture and food products, 1999-2000	41
10-2 Domestic and international shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region - Minerals, 1999-2000	42
10-3 Domestic and international shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region - Coal, 1999-2000	43
10-4 Domestic and international shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region - Fuels and basic chemicals, 1999-2000	44

Table of contents – continued

10-5	Domestic and international shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region - Forest and wood products, 1999-2000	45
10-6	Domestic and international shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region - Pulp and paper products, 1999-2000	46
10-7	Domestic and international shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region - Primary and fabricated metal products, 1999-2000	47
10-8	Domestic and international shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region - Machinery and transportation equipment, 1999-2000	48
10-9	Domestic and international shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region - Manufactured and miscellaneous goods, 1999-2000	49
11	International shipping - Cargo tonnage loaded, unloaded and annual variation, by province and foreign region, 1999-2000	50
12-1	Number of movements, vessel capacity and tonnage transported by province or territory and port: international shipping - Newfoundland and Labrador, 2000	52
12-2	Number of movements, vessel capacity and tonnage transported by province or territory and port: international shipping - Prince Edward Island, 2000	52
12-3	Number of movements, vessel capacity and tonnage transported by province or territory and port: international shipping - Nova Scotia, 2000	53
12-4	Number of movements, vessel capacity and tonnage transported by province or territory and port: international shipping - New Brunswick, 2000	53
12-5	Number of movements, vessel capacity and tonnage transported by province or territory and port: international shipping - Quebec, 2000	54
12-6	Number of movements, vessel capacity and tonnage transported by province or territory and port: international shipping - Ontario, 2000	55
12-7	Number of movements, vessel capacity and tonnage transported by province or territory and port: international shipping - Manitoba, 2000	55
12-8	Number of movements, vessel capacity and tonnage transported by province or territory and port: international shipping - British Columbia, 2000	56
12-9	Number of movements, vessel capacity and tonnage transported by province or territory and port: international shipping - Northwest Territories, 2000	56

Table of contents – continued

12-10	Number of movements, vessel capacity and tonnage transported by province or territory and port: international shipping - Nunavut, 2000	57
13-1	Number of movements, vessel capacity and tonnage transported by province or territory and port: domestic shipping - Newfoundland and Labrador, 2000	58
13-2	Number of movements, vessel capacity and tonnage transported by province or territory and port: domestic shipping - Prince Edward Island, 2000	58
13-3	Number of movements, vessel capacity and tonnage transported by province or territory and port: domestic shipping - Nova Scotia, 2000	59
13-4	Number of movements, vessel capacity and tonnage transported by province or territory and port: domestic shipping - New Brunswick, 2000	59
13-5	Number of movements, vessel capacity and tonnage transported by province or territory and port: domestic shipping - Quebec, 2000	60
13-6	Number of movements, vessel capacity and tonnage transported by province or territory and port: domestic shipping - Ontario, 2000	61
13-7	Number of movements, vessel capacity and tonnage transported by province or territory and port: domestic shipping - Manitoba, 2000	61
13-8	Number of movements, vessel capacity and tonnage transported by province or territory and port: domestic shipping - British Columbia, 2000	62
13-9	Number of movements, vessel capacity and tonnage transported by province or territory and port: domestic shipping - Northwest Territories, 2000	63
13-10	Number of movements, vessel capacity and tonnage transported by province or territory and port: domestic shipping - Nunavut, 2000	64
14	Domestic and international shipping - Cargo tonnage loaded and unloaded at 50 leading Canadian ports by sector, 2000	65
15	International shipping vessel capacity (gross tons (GT)), cargo tonnage transported and number of movements by flag of registry, 1991, 1999 and 2000	66
16-1	International shipping - Cargo tonnage loaded and annual variation by commodity and by Canadian region, 1999-2000	67
16-2	International shipping - Cargo tonnage unloaded and annual variation by commodity and by Canadian region, 1999-2000	73
17-1	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Wheat	79
17-2	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Corn	80

Table of contents – continued

17-3	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Barley	81
17-4	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Rye, oats and other cereal grains	82
17-5	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Fresh, chilled or dried vegetables	83
17-6	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Fresh, chilled or dried fruit and nuts	84
17-7	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Colza seeds (canola)	85
17-8	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Other oil seeds and nuts and other agricultural products	86
17-9	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Feed, cereal straw, eggs and other animal products	87
17-10	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Meat, fish, seafood, and preparations	88
17-11	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Milled grain products and preparations, and bakery products	89
17-12	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Animal or vegetable fats, oils and flours	90
17-13	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Sugar	91
17-14	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Prepared foodstuffs (not elsewhere classified)	92
17-15	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Alcoholic and non-alcoholic beverages	93
17-16	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Limestone	94
17-17	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Stone, sand, gravel and crushed stone	95

Table of contents – continued

17-18 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Salt	96
17-19 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Sulphur	97
17-20 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Other non-metallic minerals	98
17-21 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Iron ores and concentrates	99
17-22 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Copper ores and concentrates	100
17-23 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Aluminum ores (bauxite)	101
17-24 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Other metallic ores and concentrates	102
17-25 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Coal	103
17-26 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Crude petroleum	104
17-27 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Fuel oils	105
17-28 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Gasoline and aviation turbine fuel	106
17-29 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Coal coke and petroleum coke	107
17-30 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Other refined petroleum and coal products	108
17-31 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Alumina	109
17-32 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Other basic chemicals	110

Table of contents – continued

17-33	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Potash	111
17-34	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Fertilizers (excluding potash)	112
17-35	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 1999-2000 - Other chemical products and preparations	113

Foreword

The 2000 edition of *Shipping in Canada* represents a departure from previous years. This is the first version that has been produced specifically for electronic viewing, with tables that are designed to fit one screen width and to be scrollable.

The content of the publication has also changed to focus solely on statistics related to the transportation of cargo by the marine mode. Financial and operating data on the Canadian domiciled water carriers will be available through an occasional publication, the *Service bulletin - Surface and marine transport*. The decision to release these statistics in separate publications is due to the fact that the data from the two surveys become available at different times of the year and, with the advent of electronic publishing, it was decided to no longer delay the release of one data set while the other was still in preparation.

The content of the tables contained in this edition has also changed both to fit the new format and to reflect the implementation of a new commodity classification known as the Standard Classification of Transported Goods (SCTG).¹ Reference year 2000 is the first year that the marine cargo statistics were collected using this new commodity classification. Similarly the analytical text for the publication has been revised to reflect the new commodity classification and also to reflect in more fully the economic environment, particularly in the context of the Canadian port industry.

1. More information on the Standard Classification of Transported Goods is available at: <http://dissemination.statcan.ca/english/concepts/commodities.htm>.

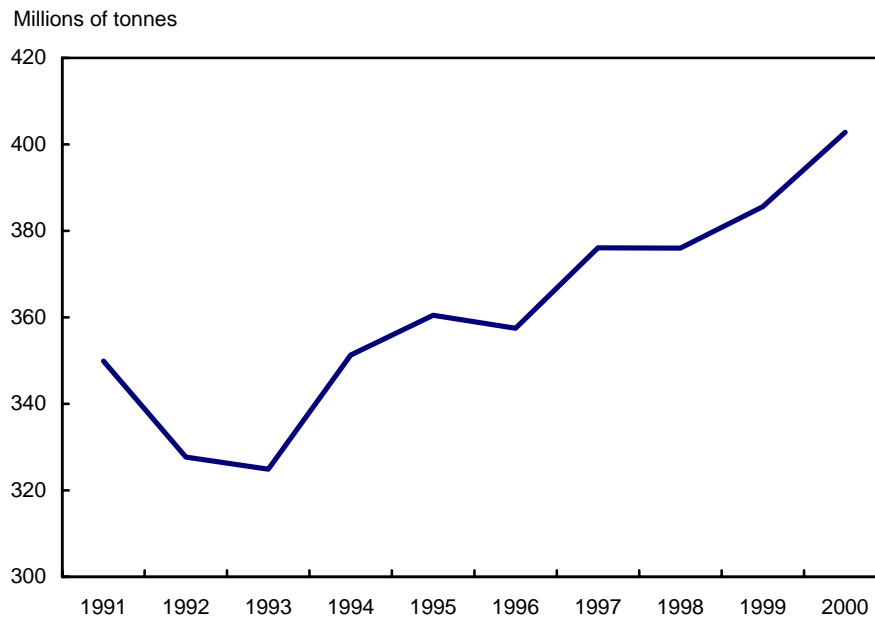

Shipping in Canada - Annual review, 2000

A vibrant North American economy in 2000 was reflected in the freight handled by Canada's ports and marine terminals. The Canadian economy experienced its ninth consecutive year of growth in 2000 with a 5.3% increase in real gross domestic product over 1999. Inflation remained fairly low with an increase in consumer prices of 2.7%. The unemployment rate dropped to 6.8%, the lowest rate experienced in the past 25 years, while unit labour costs in the business sector increased just 2.6%. Merchandise trade with the United States increased 12.3% to \$627.2 billion on a balance of payments basis, spurred on by a Canadian dollar that averaged 67.3 cents U.S. Merchandise trade with countries other than the United States also increased 19.1% to \$161.6 billion.¹

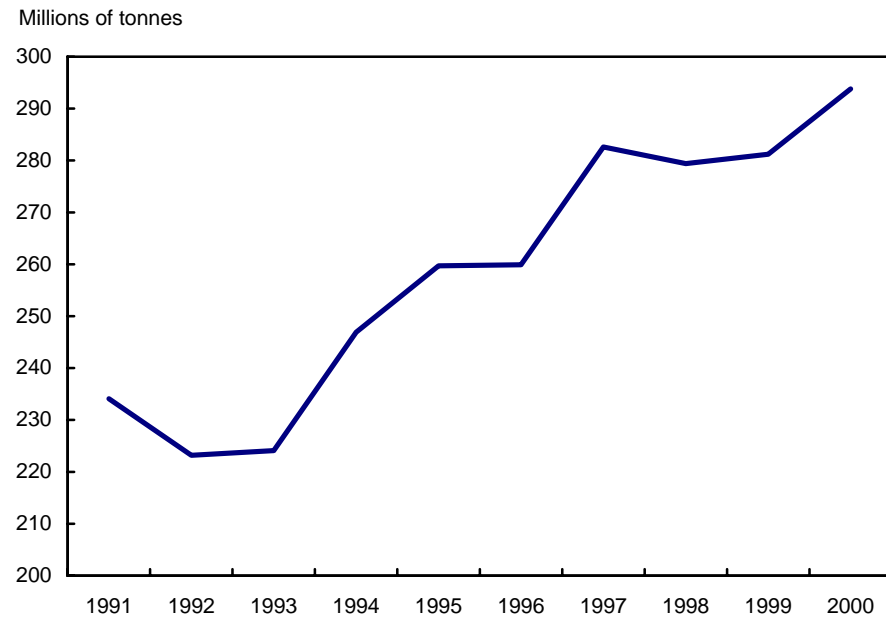

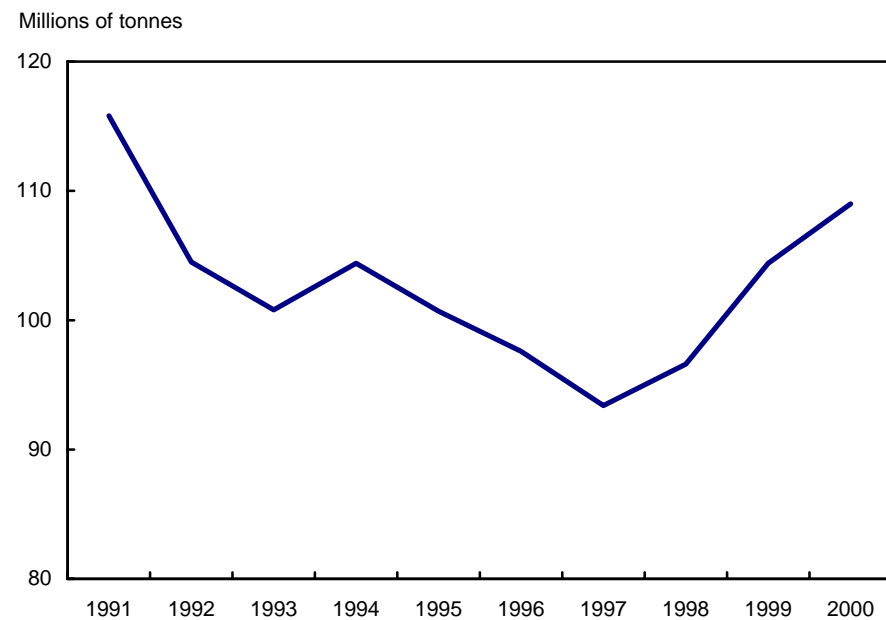

The decade from 1991 to 2000 saw a 15.1% increase in the total tonnage handled by Canadian ports and marine terminals. International cargo (between Canadian and foreign ports) actually grew by 25.1% over this period, while domestic cargo (between two Canadian ports) declined by 5.9%. Note that coastwise cargo is handled twice by the Canadian port and terminal system, once when loaded and again when unloaded. While domestic cargo represented 33.1% of the total cargo handled by Canadian ports and marine terminals in 1991, by 2000 this share had declined to 27.1%.

Chart 1

Total cargo handled at Canadian ports and marine terminals

¹ All data in this paragraph are taken from the Canadian Economic Observer, Historical statistical supplement 2000/01. Statistics Canada cat.no. 11-210-XIB, except for the average value of the Canadian dollar which was calculated based on data provided by the Bank of Canada.

Chart 2**International cargo handled at Canadian ports and marine terminals****Chart 3****Domestic cargo handled at Canadian ports and marine terminals**

The total tonnage of cargo handled by Canadian ports and marine terminals in 2000 increased 4.5% over 1999 to a ten-year record of 402.8 million tonnes (Mt.). International cargo increased 4.5% from 281.2 Mt. 1999 to 293.8 Mt. in 2000, while coastwise or domestic cargo increased 4.4% from 104.4 Mt. to 109.0 Mt.

International marine cargo

Over 187.8 Mt. of cargo destined for foreign countries was loaded at Canadian ports and marine terminals in 2000, an increase of almost 8.2 Mt (4.6%) over 1999. Significant increases in shipments of crude petroleum, wheat, iron ores, and sand, stone and gravel were partially offset by declines in shipments of corn and coal. Canadian ports and marine terminals unloaded 105.9 Mt. of international cargo in 2000, 4.4 Mt (4.3%) more than in 1999. Inbound shipments of coal, iron and steel, and other refined petroleum and coal products accounted for most of the increase.

Canada - United States cargo

Canada's marine traffic to and from the United States reached 108.5 Mt., in 2000 up 6.4% over 1999. Cargo shipped to the United States increased 8.4% to 64.7 Mt. while cargo arriving from the United States increased 3.6% to 43.8 Mt.

Three commodities accounted for the growth in traffic to the United States. Crude petroleum shipments to the United States jumped 34.6% over 1999 to 12.3 Mt. in 2000 due to a combination of increased production in the oil fields off Newfoundland and greater transshipments of North Sea crude. Shipments of stone, sand, gravel and crushed stone were up 30.1% to 6.6 Mt. with increases to U.S. ports on the Atlantic and Gulf, Great Lakes and Pacific coasts. Iron ore and concentrates bound for the United States increased 15.3% to 9.6 Mt. in 2000, perhaps due to a recovery of iron ore demand in the U.S. arising from the imposition anti-dumping duties on foreign steel. While most of the iron ore traffic (5.0 Mt.) was bound for U.S. ports on the Great Lakes, almost all of the increase was bound for ports on the Atlantic and Gulf coasts.

Inbound coal shipments from the United States increased by 1.4 Mt. over 1999 to 20.1 Mt. in 2000 due mainly to unloading of coal at Nanticoke from U.S. ports on the Great Lakes.

Ships registered in Canada handled 51.6% of the Canada-United States cargo in 2000, down from 55.1% in 1999. Canadian-flag ships were especially dominant on the Great Lakes with 91.4% of the cargo exchanged with U.S. Great Lakes ports. U.S.-flag ships carried 7.5% of all Canada-U.S. cargo, down from 8.1% in 1999. Foreign-flag ships carried the remaining 40.9% of Canada-U.S. cargo in 2000.

Canada - Overseas cargo

Canada's marine traffic to and from overseas ports reached 185.2 Mt., in 2000 up 3.4% over 1999. Cargo shipped to overseas ports increased 2.7% to 123.1 Mt. while cargo arriving from overseas ports increased 4.8% to 62.1 Mt.

Demand for Canadian wheat in Asia and the Middle East led to a 20.6% increase in loadings of wheat bound for overseas ports to 16.8 Mt. in 2000. Inbound shipments of iron and steel products from overseas ports jumped 42.6% (1.2 Mt.) from 1999 to 3.9 Mt. in 2000. Most of the increase in these products came from Asia (up 59.3%) and Europe (up 30.3%) and were received by the ports of Sorel, Windsor (ON), Fraser River and Hamilton.

Canadian-flag ships handled just 0.1% of the cargo exchanged with overseas ports in 2000, about the same share as in 1999.

Domestic cargo

The 109.0 Mt. of domestic freight handled by the ports in 2000 was the highest quantity recorded since 1991. Crude petroleum shipments between the offshore oil platforms and the island of Newfoundland accounted for most of the increased traffic. Domestic crude petroleum handled by the ports reached 9.7 Mt. in 2000, 3.9 Mt. more than in 1999. Other notable increases in domestic traffic were for wood chips (up 8.7% to 15.3 Mt.), limestone (up 21.6% to 7.3 Mt.) and logs and other wood in the rough (up 14.4% to 8.2 Mt.).

The increase in crude petroleum shipments had a major impact in the Atlantic Region. Atlantic ports handled 21.3 Mt. of domestic cargo in 2000, 24.3% more than in 1999. Wood chips and logs drove an 11.8% increase in traffic in the Pacific Region which handled 33.0 Mt. of domestic marine cargo. Domestic cargo handled by ports in the Great Lakes and St. Lawrence regions declined by 5.3% and 5.5% to 28.0 Mt and 26.5 Mt. respectively. These declines were due mainly to less domestic coal and stone, sand, gravel and crushed stone shipped between Great Lakes ports and less iron ore and concentrates and wheat being exchanged between Great Lakes and St. Lawrence ports.

Canadian port traffic

Nineteen Canadian Port Authorities² (CPAs) were created under the Canada Marine Act of 1998 based on their potential to be financially self-sufficient. The 19 CPAs handled 60.6% of the total international and 43.8% of the total domestic cargo handled by Canadian ports and marine terminals in 2000³.

The quantity of international cargo handled by the CPA's has increased throughout much of the last decade from 158.9 Mt. in 1991 to 178.0 Mt. in 2000, an increase of 12.1%. In comparison, international traffic handled at non-CPA ports and terminals grew from 75.3 Mt. in 1991 to 115.7 Mt. in 2000. The rapid growth in traffic at these non-CPA facilities was due mainly to transshipments of North Sea crude petroleum through an east coast port to the U.S. eastern seaboard, increased imports of U.S. coal for thermal generation of electricity at a Great Lakes' facility, and exports of crude petroleum from offshore wells on the east coast.

The past decade saw a decline of 19.1% in domestic traffic reported for the 19 CPAs from 59.0 Mt. in 1991 to 47.8 Mt. This decline was most noticeable for wheat shipments and petroleum products (fuel oil, gasoline and aviation turbine fuel). The decline in wheat may have been affected by changing trade patterns that reduced the quantity of wheat that originated at a Great Lakes' CPA port and was transhipped overseas through ports on the lower St. Lawrence. The decline in petroleum products movements appears to reflect a modal shift to the rail mode for these products. In contrast to the decline in domestic traffic at the CPAs, non-CPA ports and terminals saw an increase in their domestic cargo of 7.8% over the decade, from 56.8 Mt. in 1991 to 61.2 Mt. in 2000.

2. Vancouver, Saint John, Montréal, Sept-Îles, Québec, Halifax, Prince Rupert, Hamilton, Fraser River, Thunder Bay, Windsor, Ont., Belledune, Trois-Rivières, Nanaimo, Toronto, Saguenay (Chicoutimi), Port Alberni, St. John's, North Fraser River.

3. The quantity of cargo reported to Statistics Canada may vary, in some cases quite significantly, from the statistics reported by individual port authorities due to differences in coverage and information sources. Users should consult the section on Survey Methodology and Data Quality for further information.

Vancouver had a record year in 2000, handling 75.3 Mt. of marine cargo or 18.7% of all cargo handled at Canadian ports and marine terminals. Vancouver was the leading port for both bulk cargo and containerized freight. Four bulk commodities accounted for almost 60% of Vancouver's total tonnage: coal (26.9 Mt.); wheat (8.4 Mt.); sulphur (5.4 Mt.); and potash (3.8 Mt.). The four products were almost exclusively for export and all increased over 1999. The coal shipments were up slightly as demand for Canadian coal in the key Asian and European markets remained relatively unchanged. Increased shipments to the Middle East, Asia and South America caused a 25.5% jump in wheat handled by the port. Overseas shipments of sulphur were up 1.5% as demand in Asia, particularly in the People's Republic of China, continued to be strong. There was also a significant increase in sulphur shipments to Australia and New Zealand. Increased demand for Canadian potash in the People's Republic of China also resulted in a 15.2% increase in potash shipments from Vancouver to overseas ports.

Vancouver handled a record number of international containers in 2000 with 1.2 million twenty-foot equivalent units (TEUs), almost 43% of the containers handled at Canada's ports. Eighty-seven percent of containers were laden with cargo weighting almost 10 Mt., an increase of 10.7% over 1999. Interestingly while the number of outbound laden TEUs exceeded the number of inbound laden TEUs by 20%, the weight in those outbound units was almost double the inbound units. Outbound containers carried more neo-bulk commodities such as lumber, woodpulp and grains while inbound containers carried goods that were more consumer oriented.

Sept-Îles (including Pointe-Noire) handled 23.3 Mt. of cargo in 2000 an increase of 10.9% over 1999. International cargo handled by the port reached 19.0 Mt. in 2000 up 16.5% from 1999. The quantity of iron ore handled by the port rose 8.9% over 1999 to almost 21.0 Mt. due to increased demand in the United States. Domestic cargo handled at Sept-Îles/Pointe-Noire declined by 8.6% to 4.3 Mt. due mainly to an 18.5% decline in domestic shipments of iron ore.

Montréal (including Contrecoeur) handled 20.0 Mt. of cargo in 2000, a slight decline from 1999 due mainly to lower quantities of liquid bulk commodities primarily fuel oil and gasoline, and dry bulk, particularly salt and other non-metallic minerals. Montreal handled a record number of containers in 2000; - 941,887 TEUs with a record 8.9 Mt. of international containerized cargo. The port continued to be the number one North American gateway port for European containerized cargo, handling 8.5 Million tonnes of this freight in 2000. (The port of New York/New Jersey was the second port with 7.9 Million tonnes of European container cargo in 2000 based on data provided by Marine Administration of the U.S. Department of Transportation.).

The total tonnage handled by the port of Saint John, New Brunswick, declined 2.3% from 1999 to 19.2 Mt. in 2000. Shipments of bulk liquids, particularly crude petroleum, gasoline and aviation fuels and dry bulk, mostly potash, were responsible for the decline. International cargo, which accounted for over 90% of the total tonnage handled at Saint John, declined just 1.2% to 17.4 Mt. in 2000 from 17.6 Mt in 1999. Domestic cargo declined 11.7% from 2.1Mt. in 1999 to 1.8 Mt. in 2000 due mainly to decreased demand for crude petroleum from Canadian sources. However, international containerized tonnage rose 13.3% over 1999 to 318 kilotonnes (Kt.) in 2000 due to increased traffic between Saint John and South America, Oceania and the Middle East.

Total cargo handled by the port of Québec (including Lévis) fell 3.9% from 1999 to 15.7 Mt. in 2000. International cargo, which accounted for almost 85% of the total cargo declined only slightly (0.7%), down to 13.2 Mt. The main reason for the decline in international cargo was a decline in shipments of corn from U.S. Great Lake ports that was transshipped through Québec to overseas ports in 1999. This was offset by an increase in inbound shipments of crude petroleum which reached 7.6 Mt. in 2000. The port handled 18.2% less domestic cargo in 2000, down to 2.4 Mt. due to lower loadings of fuel oil and unloadings of wheat.

The total tonnage handled at the port of Halifax declined 3.4% from 1999 to 13.8 Mt. in 2000. International cargo accounted for 11.0 Mt or 80% of the total cargo. The decline in total traffic was mainly attributable to a decline in crude petroleum inbound from the North Sea and Venezuela. Halifax handled a record quantity of containerized international freight in 2000, with 4.2 Mt. and 513,531 TEUs.

Hamilton handled 11.8 Mt. of marine cargo in 2000, up 3.3% from 1999. The increase was due entirely to international traffic which increased 17.3% to 5.7 Mt. Domestic traffic was down 7.1% to 6.1 Mt. in 2000. Iron ore and concentrates played a significant role in both the increase in international traffic and the decrease in domestic traffic. International shipments of iron ore increased by 509 kilotonnes (Kt.) of which 179 Kt. was outbound international. Iron ore unloaded from other Canadian ports declined by 369 Kt. (6.8%) from 1999.

Fraser River Port handled almost 11.0 Mt. of marine cargo in 2000, with significant increases in both domestic and international cargo handled. Domestic cargo accounted for 7.4 Mt. or 67.8% of the total tonnage handled by the port. A 17.0% increase in domestic traffic was driven by increased shipments of forest products (notably woodchips and newsprint) and limestone. The port handled a record 3.5 Mt. of international cargo, up 21.9% over 1999. Iron and steel, logs and other wood in the rough and cement were the main commodities contributing to the increase in international traffic, but there were significant increases across a wide number of commodities. This broadly based increase was due to the establishment of new container liner services at Fraser River. The total quantity of containerized freight rose to a record high of 491 kilotonnes, an increase of 55.7% over 1999. This increase in container traffic caused Fraser River Port to become the fourth largest container port in Canada in tonnage and TEU terms.

A jump in shipments of Canadian agricultural products to Europe drove a 7.9% increase in international marine cargo at Thunder Bay. The total international cargo handled in 2000 was 4.2 Mt. However the gains in international cargo were more than offset by an 8.4% decline in domestic cargo. The domestic tonnage dropped to 4.6 Mt in 2000 due mainly to declining outbound shipments of wheat and coal. The combined domestic and international cargo handled at Thunder Bay totaled 8.8 Mt. in 2000, which was 1.3% less than in 1999.

The total cargo handled at Prince Rupert Port declined 5.5% from 7.6 Mt in 1999 to 7.2 Mt in 2000. The closure of a British Columbia coal mine and the elimination of an ocean carrier service for pulpwood caused a dramatic decline in the loadings of these two commodities. International cargo continued to dominate the traffic at Prince Rupert Port accounting for 99.2% of the total cargo. Almost all of this cargo was outbound to ports overseas.

The Port of Windsor (Ontario) handled almost 5.4 Mt. of marine cargo in 2000, down 1.3% from 1999. However, international cargo, which accounted for 54.1%

of the port's total traffic, was up 2.5% to 2.9 Mt. Domestic cargo declined by 5.4% to 2.5 Mt. Domestic and international shipments of salt, one of the port's major commodities at 1.5 Mt. in 2000, declined by 11.2% on reports that shipments normally shipped by barge were moved by truck during the first 3 months of the year. Inbound shipments of iron and steel rose almost 52% to 458 kilotonnes. Over 97% of this steel was inbound from international sources. Shipments from the People's Republic of China and India accounted for most of the increase. The quantity of stone, sand, gravel and crushed stone handled at Windsor also declined by 1.3% from 1999 to 1.3 Mt. This decline was due entirely to domestic traffic as international shipments of stone, sand, gravel and crushed stone actually increased. Windsor also handled 1.1 Mt. of limestone in 2000, almost the same quantity as in 1999.

The total tonnage reported for the North Fraser River port increased 4.9% over 1999 to 4.1 Mt. in 2000, all of which was reported as domestic traffic. The 3 main commodities handled at the port were wood chips (1.7 Mt.), logs and other wood in the rough (1.5 Mt.) and stone, sand, gravel and crushed stone (708 Kilotonnes). The North Fraser River is the major port for tug and barge and log boom traffic on the Pacific Coast. Some of this traffic is loaded and unloaded within the port while some of it is transported through the port to other points on the Fraser River. There are significant differences between the statistics reported by the North Fraser River Port Authority and this publication⁴.

The port of Trois-Rivières handled 2.3 Mt. of marine cargo in 2000, a 2.2% increase over 1999. International cargo, which accounted for almost 80% of this total, rose 8.9% from 1999 to 1.8 Mt. in 2000. The increase in international cargo was due mainly to increased inbound shipments of coal, fertilizers and non-metallic minerals. Alumina continued to be the dominant international cargo with 504 kilotonnes unloaded in 2000, 4.4% more than in 1999. Trois-Rivières handled 484 kilotonnes of domestic cargo in 2000, down 17.1% from 1999 due mainly to declining shipments of woodpulp.

A total of 1.9 Mt. of marine cargo were handled by the port of Nanaimo in 2000, down 15.9% from 1999 with declines in both domestic and international cargo. The total domestic cargo declined by 10.4% to just under 1,159 kilotonnes while international cargo declined 22.8% to 787 kilotonnes. Shipments of forest products were mainly responsible for the decline in domestic and international traffic.

The total cargo handled by the port of Belledune declined 15.4% from 1999 to 1.9 Mt. in 2000 due mainly to a decrease in coal and coke received from foreign ports and lower shipments of non-metallic and metallic minerals to foreign ports. The port handled a total of 1.6 Mt of international cargo and 253 kilotonnes of domestic cargo in 2000.

Toronto handled 1.7 Mt. of marine cargo in 2000, an increase of 6.2% over 1999. International shipments of iron and steel and sugar from foreign ports were responsible for most of the increased traffic. The port handled 898 kilotonnes of international cargo and 831 kilotonnes of domestic cargo with 99.5% of the combined cargo being inbound to the port.

The port of St. John's, Newfoundland and Labrador handled just over 1.0 Mt of marine cargo in 2000, an increase of 8.5% over 1999. St. John's plays an important

⁴ These differences are due to differences in the coverage (e.g., Statistics Canada's survey is a threshold survey that may exclude some traffic operating on the river), survey definitions (Statistics Canada survey counts cargo that is actually loaded onto or unloaded off from a marine conveyance within the port) and differences in the levels of response from the marine community.

role in the provisioning of the island portion of the province. Over 95% of the total cargo or 971 kilotonnes was domestic cargo with cargo arriving from Montreal, Halifax and Saint John (NB) accounting for over 85% of the domestic cargo.

The port of Port Alberni handled 874 kilotonnes of cargo in 2000, up 10.0% over 1999. Domestic traffic increased 22.0% to 683 kilotonnes while international cargo declined 18.4% to 191 kilotonnes. Logs and other wood in the rough received from the pacific coast accounted for all of the increase in domestic tonnage while lumber shipments to foreign ports accounted for the decline in international cargo.

Saguenay Port (Chicoutimi) handled almost 414 kilotonnes of marine cargo in 2000, up 3.2% over 1999. The port handled 335 kilotonnes of international cargo, up 8.3% from 1999 as increased shipments of basic chemicals from foreign ports more than offset a decline in outbound forest product shipments. Domestic cargo declined by 14.4% to 78 kilotonnes due to a lower quantity of salt arriving at the port's facilities.

Data quality, concepts and methodology

Introduction

The statistics in this publication were collected under the authority of the *Statistics Act* (Revised Statutes of Canada, 1985, chapter S19). The statistics are derived from two surveys: the Coastwise Shipping Survey (Survey Number 2751) and the Marine International Freight Origin Destination Survey (Survey Number 2791)¹. The purpose, populations, data sources, and data quality for these surveys are discussed in the following sections.

Purpose of the surveys

These surveys collect data on:

- Coastwise or domestic marine transport - the carriage of cargo by ships between Canadian ports in Canadian waters; and,
- International marine transport – the carriage of cargo between Canadian ports and foreign ports in the United States or overseas.

The information collected in these surveys includes the description and quantities of commodities loaded and unloaded at Canadian ports and marine terminals by vessels calling at those facilities, and the origin and destination of those commodities. Data are aggregated for publication of commodity traffic by Canadian port and foreign country of origin or destination.

Statistics Canada uses these data as one input to Canada's System of National Accounts. The data are also used by Transport Canada, other federal departments, provincial ministries, transportation companies, consulting firms, universities and foreign governments. This information is used to analyse transportation activities, for marketing and economic studies, and to assess the industry's performance.

Survey populations

For each survey it is possible to define a target population as all the units (e.g., ships) for which data were intended to be collected and a survey population as all the units for which the survey actually provides data. The survey population may differ from the target population when it is not possible to identify or to survey all of the units within the target population.

The target populations of the Coastwise Shipping Survey and the Marine International Freight Origin Destination Survey are all ships that carry cargo between Canadian ports or between Canadian ports and foreign ports.

1. For more information see Coastwise shipping survey <http://www.statcan.ca/english/sdds/2751.htm>; and International Freight Origin Destination Survey: <http://www.statcan.ca/english/sdds/2791.htm>

The Coastwise Shipping Survey population is somewhat different from the target population. It consists of ships engaged in domestic shipping at Canadian ports, with the exception of:

- i. cargo vessels less than 15 net register tons (NRT);
- ii. tugs or other vessels under 15 gross register tons (GRT);
- iii. Canadian naval ships;
- iv. fishing vessels;
- v. research vessels;
- vi. ballast movements for towboat and ferry operators on the West Coast ports;
- vii. cargo carried in trucks and rail cars on domestic vehicle ferries.

This limited survey field may have a significant impact on the statistics reported for some commodities, regions and ports such as the Pacific Coast, where a number of tugs that are under the GRT threshold are engaged in the towing log booms. The exclusion of ferry traffic will also affect the statistics for cargo transported to and from islands such as Newfoundland, Prince Edward Island and Vancouver Island. However, this cargo should be reflected in statistics collected for freight transported by the truck and rail modes.

The survey population for the Marine International Freight Origin Destination Survey includes vessels engaged in international shipping at Canadian ports with the exception of (i) fishing boats registered in Canada or abroad, (ii) maintenance and service ships such as icebreakers, (iii) research vessels and (iv) other non-commercial vessels such as hospital ships.

Data sources

Data for the Coastwise Shipping Survey are collected directly from the owners, operators, agents or officers of ships engaged in domestic shipping. The data are reported on one of two questionnaires, either the *S.1, Domestic Shipping Report* or the *S.4, Towboat and Ferry Operators Shipping Report*. The operators of cargo-carrying ships arriving and departing Canadian ports or marine terminals complete these reports for each such arrival and departure. The S.1 Report provides the following information: vessel name, country of registration, the vessel's gross and net registered tonnage, cargo description, tonnage and ports of loading and unloading. The S.4 Report is used only on the West Coast by operators of tugs, cargo barges and ferries for monthly reporting of coastal shipping. These operators do not report ballast movements. The S1 and S4 Reports are sent to Statistics Canada each month.

Information on international shipping is collected from the A6 General Declaration and manifests required by the Canada Customs and Revenue Agency (CCRA) for each ship loading or unloading cargo in Canada that either originated in or is destined to a foreign country. Local CCRA employees send copies of these documents to Statistics Canada. In some cases, shipping lines or port authorities send equivalent reports to Statistics Canada. Form A6 and its annexes provide information on: the vessel's name and country of registration, registered gross and

net tonnage, and information such as the description of the cargo, tonnage and ports where commodities will be loaded and unloaded. These variables constitute the database for statistics on international shipping.

Data quality

All statistical surveys are subject to errors. The total error of a survey is defined as the difference between the survey estimate and the actual value for the target population. Survey errors can be classified as “sampling” or “non-sampling” errors. The marine transport surveys are censuses and are therefore not subject to sampling errors.

There are four main types of non-sampling errors:

- i. Coverage errors (when the survey frame does not thoroughly cover the target population);
- ii. Response errors (when a respondent provides inaccurate information);
- iii. Non-response errors (when a respondent does not respond to all or part of the questionnaire) and,
- iv. Processing errors (errors made during data capture, coding, and editing).

The Coastwise Shipping Survey is thought to be more affected by coverage errors than the Marine International Freight Origin Destination Survey. The survey population is smaller than the target population due to the size threshold and the various ship types that are exempted (e.g., vehicle and rail ferries) and the practical difficulty of identifying the fleet of all ships that are active in the domestic transport of cargo. With respect to the Marine International Freight Origin Destination Survey, customs rules apply to all ships arriving from or departing for foreign ports. However, Statistics Canada has only limited tools for identifying missing shipping documents.

Both surveys have significant exposure to response error, particularly in terms of the reported commodities. The marine carrier of domestic and international cargo is not always able to provide descriptions that are sufficiently detailed to accurately code the commodity. Terms such as general cargo are often used in cases where the carrier is unsure of the exact contents of a container or when there are a number of commodities being transported in one shipment. As result, residual categories such as “Other manufactured and miscellaneous goods” and “Other chemical products and preparations” may be overestimated while the true commodity is understated. Respondents may also use incorrect conversion factors in estimating the weight of a shipment.

Non-response errors are expected to have more of an effect on the Coastwise Shipping Survey. Shipping reports are not submitted for all vessel traffic Canadian ports. It is known that there is a significant amount of under-reporting for the Pacific Coast and the Mackenzie River. While it is assumed that the reporting to the Canada Customs and Revenue Agency of international traffic is fairly comprehensive, there are occasions when reports are not forwarded to Statistics Canada, particularly for ports in the Canadian Arctic and other remote areas that do not have local customs offices.

Both surveys are subject to processing errors during data entry, including errors in transcribing and coding information and in converting cargo quantities from

non-weight units (e.g., barrels or cubic metres to kilograms). Errors may also be introduced during editing and imputation procedures that are used to correct data that appear to be erroneously reported or partially reported. A number of techniques are used to detect and resolve these errors including micro and macro analysis of the data for congruency and consistency with information acquired from other sources (e.g., cargo statistics from port authorities and economic statistics from other Statistics Canada divisions).

Appendix I

Glossary

Terms related to reporting forms

A6 General declaration: A6 General Declaration: This is an administrative document which is submitted along with supporting cargo reports to Canada Customs and Revenue Agency (CCRA) for every vessel arriving from or departing for any port or place outside Canada. The A6 General Declaration provides such information as name and nationality of vessel, net and gross register tonnage, next/last port of call, and cargo particulars such as tonnage loaded or unloaded, and handling port.

S.4 Towboat and ferry operators shipping report: This report is used principally by members of the British Columbia Council of Marine Carriers to report the domestic shipping activities of tug, barge, scow and ferry operators on the west coast. The report is filed on a monthly basis and excludes ballast movements.

S.1 Domestic shipping report: This report is completed by ships' officers or operators of vessels engaged in domestic shipping arriving at or departing from Canadian ports. It contains such information as: vessel name, net and gross register tonnage, commodity description and tonnage, ports of loading and unloading. This is the principal source of data for the production of domestic shipping statistics.

Terms related to cargo

Ballast movement (arrival or departure): An arrival at a port is considered ballast if there is no cargo unloaded from the vessel at that port. A departure from a port is considered ballast if there is no cargo loaded on the vessel at that port. Ferry (passenger and cars) movements also count as ballast movements since there is no loading/unloading of commercial cargo.

Commodity: Cargo loaded or unloaded is classified according to a structure based on Statistics Canada's Standard Classification of Transported Goods (SCTG).

Lightering: This term refers to the loading/unloading of cargo in a harbour rather than at a dock or wharf. Cargo tonnage is included with port totals.

In-transit cargo: Foreign cargoes handled at Canadian ports en route for or from a third country. Since tonnages are included in port totals, the statistics do not necessarily reflect import and export tonnages, but are rather focused on port activity.

Terms related to ports

Destination: The port of unloading of cargo is considered the port of destination. This is not necessarily the point of ultimate destination of cargo, which may be

inland. Relative to the international shipping sector, this is the foreign port or country of unloading and not necessarily the ultimate country of destination.

Origin: The port of loading of cargo is considered the port of origin. This is not necessarily the point of actual origin of cargo, which may be inland. Relative to the international shipping sector, this is the foreign port or country of loading and not necessarily the actual point of origin.

Handling port: The Canadian port of loading/unloading of cargo. This does not necessarily coincide with the Customs Port, or the municipality of the same name.

Atlantic region: This region consists of Canadian ports on the Atlantic Ocean and Arctic Waters, and that portion of the Gulf of St. Lawrence which is east of the inland waters as defined in the Canadian Shipping Act.

Great Lakes region: This region consists of Canadian ports located along the St. Lawrence river west of the Ontario-Quebec border, and on the Great Lakes.

Pacific region: This region consists of Canadian ports located on the Pacific Coast.

St. Lawrence River region: This region consists of Canadian ports located on the St. Lawrence river from the Ontario-Quebec border eastward, along the north shore to 63° west longitude and along the south shore to Cap des Rosiers.

Terms related to vessels

Gross register tonnage: The capacity in cubic feet of the spaces within the hull and of the enclosed spaces above the deck of a vessel, divided by 100. This is the figure as reported on the A6 General Declaration or the S1 and S4 reporting forms.

Net register tonnage: The gross register tonnage (as defined above) minus the capacity utilized by propelling machinery, fuel, and personnel accommodation.

In ballast: A vessel is considered arriving or departing "in ballast" if no cargo is loaded when leaving a Canadian port or no cargo is unloaded when arriving at a Canadian port.

LO LO: an acronym for "load on, load off".

RO RO: An acronym for "roll on, roll off".
