Federal government expenditures on scientific activities, 2005/2006^p

This bulletin presents recent statistical information on the performance and funding of federal government expenditures on scientific activities, 2005/2006. The statistics presented are derived from the survey of science and technology (S&T) activities of federal departments and agencies. The data in this publication are consistent with expenditures of departments and agencies as reported in the Main Estimates 2005/2006, but do not reflect changes to 2005/2006 spending plans which may result from supplementary estimates or other departmental planning decisions.

Highlights

- ▶ The federal government's S&T spending intentions for 2005/2006 are \$9.1 billion. For each dollar spent by the federal government, 4.9 cents are spent on scientific and technological (S&T) activities including 3.1 cents spent on research and development (R&D). This compares to 3.6 cents spent on S&T and 2.3 cents on R&D for every dollar back in 1994/1995.
- ▶ Compared to 2004/2005, there is no increase in total S&T expenditures, however funding to the higher education sector is expected to increase by 16%. Decreases in intramural expenditures, funding to business enterprises and Canadian non-profit institutions counterbalance the increase.
- ▶ In 2005/2006, 63 cents of every S&T dollar was spent on R&D, the second highest proportion of the past 10 years. An expected \$5.8 billion will be devoted to R&D in 2005/2006. This includes intramural performance (activities carried out primarily by the federal government) and extramural funding (activities managed and performed by non-federal organizations) of research and development.
- ▶ In 2005/2006, 52% of the total S&T expenditures will be spent on activities performed by the federal government itself. Of total planned government R&D spending, the federal government will perform \$2.1 billion or 37%.
- ▶ The federal government departments with the largest estimated expenditures on S&T activities in 2005/2006 are the Natural Sciences and Engineering Research Council, the National Research Council, the Canadian Institutes of Health Research and Statistics Canada, which together account for one-third of the government's total expenditures.

Statistique
Canada

Canada

- Federal government R&D funding to the higher education sector is expected to exceed \$2.5 billion for 2005/2006. Of this amount, the three granting councils, the Canadian Institutes of Health Research, the Natural Sciences and Engineering Research Council and the Social Sciences and Humanities Research Council will account for almost three-quarters.

The questionnaire on scientific activities is designed to correspond as much as possible to the system of budgetary estimates used by the federal government. This is done to ease the response burden, assist in editing and, most importantly, to produce comparable data for policy planning and program evaluation. Thus the questionnaire covers the same time span as the Estimates including: proposed estimates for the coming fiscal year, i.e. 2005/2006; forecast expenditures for the current fiscal year, i.e. 2004/2005 and, actual expenditures for the past fiscal year, i.e. 2003/2004 (also reported in the Public Accounts).

As well as the expenditures attributable to program budgets, there are additional costs attributable to scientific activities which must be included if a full picture of the resources devoted to science activities is to be obtained. These include other sources of funds and other S&T costs which are defined below:

Budgetary sources - as expressed in the Main Estimates:

- Own departmental budget.
- Other federal agencies - transfers into the program from other federal government departments and agencies, net of transfers out.

External sources:

Income from other sources such as industry and provincial governments.

Other S&T costs:

Non-program costs (indirect costs) are costs that are not part of the budgets of scientific programs and include services provided by other departments, such as:

- accommodation by Public Works and Government Services Canada and own department
- employer's share of health and employment insurance premiums paid by Treasury Board
- employee compensation under Workers Compensation Acts paid by Social Development Canada
- cost of legal services provided by the Department of Justice Canada
- cheques issue cost by Public Works and Government Services Canada
- overhead - portion of a central administration program costs attributable to scientific activities

1. Environment Canada resources include large one-time grants and contributions to initiatives outside of the department which did not result in increases in departmental expenditures (\$60M for Climate and Atmospheric Sciences in 1999/00, \$50M for the Sustainable Development Technology Fund in 2001/02, \$50M for the Canadian Foundation for Climate and Atmospheric Sciences and \$125M for the Sustainable Development Technology Fund in 2003/04 and \$100M forecasted for the Sustainable Development Technology Fund in 2004/05).

2. Includes \$200 million for indirect costs of university research.

3. Includes \$225 million for indirect costs of university research.

4. Includes \$245 million for indirect costs of university research.

5. Includes \$260 million for indirect costs of university research.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- p preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published

Science and technology (S&T) = research and development (R&D) + related scientific activities (RSA)

Note: Due to rounding, components may not add to totals.

This publication was prepared by **Yvonne Tremblay**, under the direction of **Lloyd Lizotte**, Subject Matter Manager, Science and Innovation Surveys section, Science, Innovation and Electronic Information Division.

<http://www.statcan.ca:8096/bsolc/english/bsolc?catno=88-001-X>

Current publications of the Science and Innovation Surveys Section include:

Industrial Research and Development, 2005 Intentions, (with 2004 preliminary estimates and 2003 actual expenditures) to be released in December of 2005, catalogue No. 88-202-XIE, annual. It presents statistics on research and development (R&D) activities performed and funded by Canadian business enterprises. The report covers current and capital expenditures on R&D, R&D as a percent of performing company revenues, R&D expenditures by province, country of control of company, personnel engaged in R&D and payments for technological services.

<http://www.statcan.ca:8096/bsolc/english/bsolc?catno=88-202-X>

Federal Scientific Activities, 2004/2005, Catalogue No. 88-204-XIE, annual. It presents statistics on the federal government's activities in science and technology (S&T). It covers expenditures and person-years by type of science, performing sectors, provinces, Federal departments and agencies.

<http://www.statcan.ca:8096/bsolc/english/bsolc?catno=88-204-X>

Note of appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact Statistics Canada toll free at 1 800 263-1136. The service standards are also published on www.statcan.ca under About Statistics Canada > Providing services to Canadians.
