Starts and Completions Survey System (SCSS)

The Starts and Completion Survey enumerates self contained dwelling units in new structures designed for non-transient and year-round occupancy. Thus, conversions are excluded from the survey. The number of units under construction at the end of a period as shown in this report takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has been made, construction may cease, or a structure when completed may contain more or fewer dwelling units than were reported when construction commenced.

A start, for the purpose of this survey, is recorded when the footing has been installed, that is when the concrete has been poured for the whole of the footing around the structure. A completion, for the purpose of this survey, is the stage at which 90 per cent of the proposed construction work on a dwelling unit has been performed. For example, the home no longer needs a finished stucco coat, and carpeting/flooring are considered complete.

For multiple-dwelling structures, the definition of a Start or Completion applies to the structure rather than to the individual dwelling units therein.

Definitions of Dwellings Categories:

Single - Detached - This type contains only one dwelling unit which is completely separated on all sides from any other dwelling or structure.

Semi-Detached - This structure contains two dwellings separated by a common wall extending from the ground to roof or by a garage.

Apartment - A self contained dwelling unit situated above or below one or more units with which it may share common hallways and access to the outside.

Row - A ground oriented dwelling unit attached to two or more similar units so that the resulting row structure contains three or more units. The following types of units are included in this category; ground-oriented dwelling units containing three or more units; and maisonettes, garden homes, townhouses and carriage homes.
