

## EXECUTIVE SUMMARY

Source: Shutterstock

Germany has shown one of the strongest economic recoveries in Europe. The country is also sixth on the list of the fastest growing pet food markets globally and is expected to be valued at US $\$ 2.2$ billion in 2014.

While the German Gross Domestic Product (GDP) experienced an unprecedented decline during 2009, value and volume sales of pet food remained relatively unaffected. Few German consumers were willing to cut back on their pet's nutrition, as they perceive their animals to be extended members of the family. Pet ownership in Germany is predominantly seen in younger and older demographics.

The importance of pets in Germany is expected to increase over the coming years. For example, the cat population is expected to increase to 9.5 million by 2015 . This will cause cat food sales to perform well in the foreseeable future. It is important to note, however, that at this time there are many pet owners seeking more value and turning to lower cost products in a bid to reduce costs.

As the German economy continues to improve, pet owners will increasingly purchase higher quality products and those with added value. Euromonitor analysts anticipate some pet foods, such as dry formats and those aimed at the various stages of a pets life, will perform well. As well, pet owners who shifted from branded to unbranded pet food products, are likely to shift their purchasing preferences back towards branded products in the future.

## DID YOU KNOW?

- PET HUMANIZATION IS DRIVING PET FOOD PURCHASES.
- CANADA RANKS 24TH IN EXPORTING DOG AND CAT FOOD PREPARATIONS INTO GERMANY

## CONSUMER TRENDS

- Pet humanization is driving product purchases in Germany. Pet owners are looking for products which "support a healthy immune system", "develop softer coats", and "promote healthier skin" in an effort to improve their pet's overall health.
- A number of German pet owners are switching to private label products and finding they meet their pets' basic needs, particularly with the higher-end, more premium labels. This trend has resulted in a high penetration rate of private label across pet foods, especially in sales of cat food. Private label penetration into the German pet food sector, based on the percentage of retail sales for the past five years were; $32.6 \%$ in $2005,34.1 \%$ in $2006,35 \%$ in $2007,35.4 \%$ in 2008 , and $35 \%$ in 2009.
- Private label aside, the German pet food market consists mainly of large multinational players. These companies benefit from large marketing and innovation capacities, as well as a fairly loyal customer base.
- The organic pet food market in Germany has been witnessing the same trends as the packaged foods market over the last few years. A recent survey showed that 1 in 4 consumers who purchase organic food for themselves would be happy to purchase organic food for their pets as well.

## RETAIL TRENDS

- Fressnapf accounts for approximately one-third of total pet food sales in Germany. The chain has a total of 777 stores in Germany and 1,114 more spread across Europe. The company's global pet care banner sales for 2009 were US $\$ 1.3$ billion. The organization's central warehouse is located in Krefeld and is Europe's largest pet supply distribution outlet.
- Smaller independent retailers are struggling and there has been some consolidation as larger chains, such as Edeka (15,000 outlets in Germany) regularly acquire these smaller businesses. Edeka currently owns $25 \%$ of the grocery market. The superstore-like environment has meant small independent pet shops are losing sales, falling from a $25 \%$ share in 2000 to less than $15 \%$ in 2009 . This trend is projected to continue in the near future.
- Discounters are also a top performer as they help further the presence of private label.
- The trends seen in the packaged food industry will filter down to the pet food industry, including age-specific, and health-related pet foods.
- Price wars have been dominating the retail industry in Germany over the past year, pitting grocery chains against discounters, supporting the claim that consumers are still price-conscious in general.

## MARKET DATA

- While there were some fluctuations in the German pet population, the overall number of pets has increased, rising from 70 million animals in 2000 to 72.6 million in 2009 . The increase was most notably amongst cats, the population of which has increased from seven million in 2000 to 8.3 million in 2009.
- The increase and forecasted growth in the overall pet population in Germany is being attributed to two factors: the only growing demographic in the country is pensioners, coupled with a steady decline in birth rates.
- This rising pet population continues to contribute to an increase in the overall market for pet food, both in value and volume terms, although some categories such as bird and fish food have been underperforming compared to products such as cat or dog food.

- After falling by $5.7 \%$ in 2007 , the volume of pet food imported into Germany followed signs of the country's economic recovery, with positive growth of $0.1 \%$ in 2008, and $0.6 \%$ in 2009.
- The most popular packaging for both dog and cat food is metal food cans ( 400 g size) or aluminum trays ( 100 g size), followed by flexible packaging, such as stand-up ( 100 g size) or plastic pouches $(50 \mathrm{~g}$ size).

## INDUSTRY COMPETITION

- The Global Trade Atlas lists the following top five countries exporting dog and cat pet food preparations for retail into Germany for 2009: the Netherlands-CAD $\$ 314.7$ million, France—CAD $\$ 214.1$ million, Liechtenstein-CAD $\$ 108$ million, the United Kingdom—CAD $\$ 60.3$ million, and Austria-CAD $\$ 42.9$ million. Canada ranked 24th on the list, exporting CAD $\$ 204.1$ thousand during the same time period, slightly up from the 2008 total of CAD $\$ 199.9$ thousand. There is much to do to fill the gap between import opportunities and Canadian exports to this market.

- German law places no restrictions on the means used to distribute imported goods in the country. Thus, foreign businesses can select the distribution channel/s best suited to their product and preferred degree of involvement in the German market. The most common distribution channels consist of wholesale and retail enterprises, trading houses, merchants, commercial agents, distributors and, finally, subsidiaries in Germany.
- There are over 85 pet product suppliers in Germany. Below is a list of some of the important ones (Pet Product Suppliers Inventory, www.petproducts1.com):
- Bewital Gmbh \& co. Kg., phone: +49-2862-5810—Import and distribute.
- Christian Steinbach-zoobedarf-heimtiernahrung, Inhaber Ralf Steinbach 7, Wabern, Germany, phone: +49-5683-99850-import pet food, production and distribution.
- Fressnapf Stelberg Gmbh, Troisdorf, Germany, phone: +49-2241-404470—pet food import, export, production, and distribution.
- Wh-Pet Products GMbh, Brusseler Str. 1048455 Bad Bentheim, Germany phone: +49 5924 2552 40, wholesaler of pet foods
- Scharnebecker Muhle Diha Gmbh, Kringelsburg 121379 Scharnebeck, Germany, phone: +49 4136912 40, wholesaler of pet foods
- Systemhandel Vertriebsgesellschaft Fur Food, Aubere Sulzbacher Str. 4790491 Nurnberg, Germany, phone: +49 9119598060 . Distributor of pet food.
- Technoplan Consult \& Vertriebs Gmbh, Rechbergstrl 1173101 Aichelberg, Germany phone: +49 71649422 30. Distributor of pet food.
- Verhoeven Handelsgesellschaft Mbh, Erich-wolf-Str. 1863840 Hausen, Germany phone: +49 602225653 . Distributor of pet foods.
- Raiffeisen-Warengenossenschaft Twistringen Eg, Konrad-Adenauer-Str. PF 125527239 Twistringen, Germany phone: +49 4243929 60. Wholesaler of pet food.
- Heinrich Nagel KG (Gmbh \& Co.), Monckebergstr. 17 PF 10472920095 Hamburg, Germany phone: +49 4030951 40. Wholesaler of pet food.
- Jokisch Schnellgerichte Gmbh, Hinter Den Kirschkaten 2623560 Lubeck, Germany phone: +49 4515831 90. Wholesaler of pet food.
- Allco Heimtierbedarf Gbh \& Co. KG, Muggenort 2127321 Morsum, Germany phone: +49 423 3932 00. Distributor of pet food.
- Becker-Schoell Aktiengesellschaft, Im Kalten Brunnen 1472666 Neckartailfingen, Germany phone: +49 7127932 73. Wholesaler of dog and cat food.
- The number of premium pet food products on the shelves is growing, as consumers' demand for gastronomy and gourmet products is increasing. These consumers want natural and organic ingredients for their pets. Some examples of this trend are Gourmet Eiersouffle (egg soufflé flavoured cat food), or certified organic products such as Defu Bio-Organic, advertised as free from genetically modified ingredients, certified organic, without preservatives and free from industrial meat. The market for organic pet food and pet food that is "free from" undesirable ingredients such as GMO, as well as products with unusual premium flavours are expected to become increasingly important.
- Segmentation of the 362 new pet food products launched in 2009 supports the trend towards healthier, more natural pet foods, with the most popular claim being "no additives/preservatives" in 142 of the new pet food products launched. The next most popular claim was in the "aids digestion and urinary tract" category, with 75 new pet food products. The "helps skin and coat" claim was found in 66 new products, followed by "vitamin and mineral fortified" in 48 of the 362 new pet food products launched.
- A breakdown of the 2009 new product launches by sub-category, shows that wet cat food had the most launches with 109. Following in second place was dog snacks and treats with 57 new products, dry cat food with 54 , wet dog food with 52 , dry dog food with 48 , and cat snacks and treats with 42.

## DOG FOOD

- As of 2009, 13.3\% of German households owned a dog, a number that has remained unchanged since 2005. However, the dog population has grown from 5.3 million in 2005 to 5.5 million in 2009. Current estimates for 2010 indicate that the dog population is unchanged.
- Ownership of smaller dogs is becoming more widespread, because, as opposed to larger dogs, owners can treat them more like children.
- In 2009, German dog owners purchased prepared dog food over non-prepared, $60 \%$ of the time.
- Dog treats and mixers, with an estimated Cumulative Average Growth Rate (CAGR) of $15.5 \%$ between 2005 to 2010, had the greatest volume growth in the dog food/treat industry in Germany. Following closely behind was dry dog food with a CAGR of $14.9 \%$ over the same time frame. Wet dog food also experienced growth with a CAGR estimate of 9.1\% from 2005-2010.
- When taking a look at value growth between 2005 to 2010, we see a CAGR of $21.2 \%$ for dry dog food, followed by $16.8 \%$ for dog treats/mixers, and a CAGR of $11.5 \%$ in value for wet dog food.

## CAT FOOD

- As of 2009, $15 \%$ of German households owned a cat, a number that has remained unchanged since 2005 . However, the cat population has grown from 7.6 million in 2005 to 8.3 million in 2009. Current estimates for 2010 places the cat population at approximately 8.5 million.
- In 2009, German cat owners purchased prepared cat food over non-prepared $97 \%$ of the time.
- Dry cat food, with an estimated CAGR of $7.8 \%$ between 2005 to 2010, had the greatest volume growth in the cat food/treat industry in Germany. Following closely behind was cat treats with a CAGR of $6.7 \%$ over the same time frame. Wet cat food experienced slight growth with a CAGR estimate of $3 \%$ from 2005 to 2010.
- Looking at value growth between 2005 to 2010, we see a CAGR of $8.1 \%$ for dry cat food, followed by $6.3 \%$ for cat treats/mixers, and a CAGR of $3.9 \%$ in value for wet cat food.

## OTHER PET FOOD

- Within the other pet food category, Germans are shifting away from birds, the population of which declined to less than 3.5 million in 2009, towards fish and small mammals. In 2009, the fish population increased to 52.8 million (from 52.03 million in 2008), while the small mammal population reached 2.4 million (from 2.32 million in 2008). Hamsters and guinea pigs are particularly popular and are seen as ideal "starter pets" for small children. Fish are seen as a "man's pets" as they are the only pets which one can 'upgrade', for example by buying a larger fish tank, accessories, plants, or stones.
- Fish food sales remain steady, increasing minimally by approximately $1 \%$ in 2009 to US $\$ 92.6$ million. Small mammal/reptile food sales are expected to increase by over $2 \%$ to US $\$ 162.3$ million in 2010.
- The German other pet food sector has seen a small increase in the demand for small mammal and fish food, however, growth in the bird food subsector has remained stable with value sales falling in 2009. This dip contributed to the less than stellar performance of the sector overall.
- When taking a look at sales volume, small mammal/reptile food reached $41,242.5$ tonnes in 2009, up from 40,073.10 tones in 2008. Current estimates for 2010 show volume sales reaching 43,107 tonnes. In addition, small mammal/reptile food was the strongest sales performer in the other pet food sector, reaching US \$158.8 million in 2009, and is predicted to reach $\$ 162.3$ million in 2010.
- Small mammal/reptile foods' percentage of volume and value growth from 2005 to 2010 is predicted to reach $3 \%$.
- The unit price of other pet food increased marginally from US $\$ 4.75$ to US $\$ 4.78$ per kilogram in 2009.
- The other pet food market is fragmented with limited brand loyalty and lack of perceived added-value amidst many branded products.
- Since 2000, the purchases of other pet food in Germany have migrated from being predominantly bought in pet shops ( $33 \%$ ) to now being made through pet
 superstores (39\%).
