Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has added a new use on rutabagas to the product label of Aliette WDG Systemic Fungicide, containing technical grade fosetyl-aluminum. The specific use approved in Canada is detailed on the label of Aliette WDG Systemic Fungicide, *Pest Control Products Act* Registration Number 24458.

A corresponding maximum residue limit (MRL) was proposed in the consultation document published on 29 January 2010, Proposed Maximum Residue Limit PMRL2010-04, *Fosetyl-aluminium*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRL was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRL takes legal effect as of the publication date of this document and is in addition to the MRLs already established for fosetyl-aluminum

## **Established Maximum Residue Limit for Fosetyl-aluminum**

Common Name	Residue Definition	MRL (ppm)	Food Commodity
Fosetyl-aluminum	aluminum tris ( <i>O</i> -ethylphosphonate)	15	Rutabaga roots

A complete list of all MRLs established in Canada can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
