Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has added new uses on sweet corn to the product label of Impact Herbicide, containing technical grade topramezone. The specific uses approved in Canada are detailed on the label of Impact Herbicide, *Pest Control Products Act* Registration Number 28141.

A corresponding maximum residue limit (MRL) was proposed in the consultation document published on 24 February 2010, Proposed Maximum Residue Limit PMRL2010-14, *Topramezone*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRL was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRL takes legal effect as of the publication date of this document and is in addition to the MRLs already established for topramezone.

#### **Established Maximum Residue Limit for Topramezone**

<b>Common Name</b>	<b>Residue Definition</b>	<b>MRL (ppm)</b>	<b>Food Commodity</b>
Topramezone	[3-(4,5-dihydro-3-isoxazolyl)-2-methyl-4-(methylsulfonyl)phenyl](5-hydroxy-1-methyl-1 <i>H</i> -pyrazol-4-yl)methanone	0.01	Sweet corn kernels plus cob with husks removed

A complete list of all MRLs established in Canada can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
