Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has added new uses on field corn, popcorn and sweet corn to the product labels of Primextra II Magnum Agricultural Herbicide and Primextra II Magnum, containing technical grade atrazine. The specific uses approved in Canada are detailed on the labels of Primextra II Magnum Agricultural Herbicide and Primextra II Magnum, *Pest Control Products Act* Registration Numbers 29358 and 25730, respectively.

Corresponding maximum residue limits (MRLs) were proposed in the consultation document published on 18 November 2010, Proposed Maximum Residue Limit PMRL2010-59, *Atrazine*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRLs was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRLs for atrazine take legal effect in Canada as of the publication date of this document.

Established Maximum Residue Limits for Atrazine

Common	Residue Definition	MRL	Food Commodity
Name		(ppm)	
Atrazine	6-chloro- <i>N</i> -ethyl- <i>N</i> '-(1-methylethyl)-1,3,5-	0.2	Field corn, popcorn grain,
	triazine-2,4-diamine, including the		sweet corn kernels plus
	metabolites 1,3,5-triazine-2,4-diamine, 6-		cob with husks removed
	chloro-, 1,3,5-triazine-2,4-diamine, 6-	0.04	Eggs, fat, meat and meat
	chloro-N-ethyl- and 1,3,5-triazine-2,4-		by products of cattle,
	diamine, 6-chloro-N-(1-methylethyl)-		goats, hogs, horses, poultry
			and sheep, milk

A complete list of all pesticide MRLs established in Canada can be found on the Maximum Residue Limits for Pesticides Web page in the Pesticides and Pest Management section of Health Canada's Web site.
