The purpose of this document is to notify registrants, pesticide regulatory officials and the Canadian public of Health Canada's Pest Management Regulatory Agency's (PMRA) re-evaluation initiation schedule for 2010–2013.

Over time, changes in science, policy and pesticide use practices will occur. The *Pest Control Products Act* requires the PMRA to initiate re-evaluations for each registered pesticide on a 15-year cycle, based on the date of either its initial registration or the most recent major decision affecting the registration. Re-evaluation is the review of registered-pesticide active ingredients and their end-use products on the basis of updated data and information to determine whether, and under what conditions, their continued registration is acceptable. The PMRA considers potential risks as well as the value of pesticide products to ensure they continue to meet modern standards established to protect human health and the environment. The available information regarding each pesticide is assessed and any necessary risk-management measures to further protect human health and the environment are proposed in a public consultation document before a final decision is reached. For more information on the PMRA's new approach to re-evaluation, please refer to Re-evaluation Note REV2010-18, *Re-evaluation Program*.

Table 1 presents the PMRA's re-evaluation initiation schedule for 2010–2013. Registrants who plan to discontinue products or uses of these actives are asked to inform the PMRA's Re-evaluation Management Directorate as soon as possible. Note that this schedule may change in response to emerging issues that require priority action.

Chemical Name (on PMRA record)	CAS No.
Chlorimuron-ethyl	90982-32-4
Clethodim	99129-21-2
Cyfluthrin	68359-37-5
Cyromazine	66215-27-8
Dimethomorph	110488-70-5
Dimethoxane	828-00-2
d-phenothrin	N/A
Fludioxonil	131341-86-1
Flumetsulam	98967-40-9
Fomesafen	72178-02-0
Fosetyl (Aliette)	39148-24-8
Glyphosate*	1071-83-6
	38641-94-0
	81591-81-3
	70901-12-1
	114370-14-8
	34494-04-7
Imazamox	114311-32-9
Imidacloprid*	138261-41-3
Isoxaben	82558-50-7

Table 1Active Ingredients to be Initiated in 2010–2013

Chemical Name (on PMRA record)	CAS No.
Lambda-cyhalothrin	91465-08-6
Nuclear polyhedrosis v. (gypsy moth)	N/A
Octhilinone	26530-20-1
Paclobutrazol	76738-62-0
Parachlorocresol	59-50-7
Propamocarb	25606-41-1
Prosulfuron	94125-34-5
Pyridaben	96489-71-3
Quinclorac	84087-01-4
Sodium omadine	15922-78-8
Sulfosulfuron	141776-32-1
Triadimenol	55219-65-3
Triflusulfuron	126535-15-7
(Z)-11-tetradecenyl acetate	20711-10-8

*initiated in 2009
