

# SENIORS' HOUSING REPORT

## Quebec

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: 2011

## Highlights

- The vacancy rate in Quebec, which was measured at 8.1 per cent in February, changed little from a year ago.
- The result reflects stability of supply and demand.
- The market for Spaces requiring heavy care tightened once again: the vacancy rate went from 7.1 per cent to 2.8 per cent this year.
- It cost an average of \$1,466 per month to live in a retirement home in the province.
- The retirement homes surveyed attracted 17.6 per cent of the population aged 75 years or older.

## The vacancy rate remains stable in 2011

According to the latest survey of retirement homes conducted by the Canada Mortgage and Housing Corporation (CMHC), the vacancy rate for standard spaces (places that require less than an hour and a half of medical care per day) remained relatively stable in Quebec in 2011. The vacancy rate amounted to 8.1 per cent in February compared to 8.4 per cent over the same period in 2010.

The fact that the vacancy rate remained stable despite the slowdown in the construction of new residences reflects the temporary slowdown in demand which we have often discussed in recent years. Indeed, during the last decade, Quebec has seen its' population aged 75 and over grow rapidly. The construction sector has managed to meet the increase in potential demand, but because of the decline in births during the years of the Great Depression, the province is now going through a period of slower growth in the group of 75 and over.

Figure 2

Source: CMHC

On the supply side, there has been, for some years now, a trend toward the construction of larger buildings. Although the units may be available for rent before the end of the work, it is not uncommon that some of them are still vacant at the time of the survey, that is to say at least 12 months after completion. Thus, the arrival of several homes at the same time lengthens the duration of absorption, which promotes relaxation of the market.

On the demand side, in addition to the phenomenon of slowing population growth, the steady increase of new substitute products also helps to keep vacancy rates at their current levels. The traditional rental market - which excludes the cost of meals and medical care - and that of condominiums available for rent are also able to meet the needs of some elderly clients, which hinders demand on the retirement home market.

## Marked tightening in homes with heavy care

Although the growth of Quebec's population aged 75 and over is slowing down, people who make up this cohort are aging and thus require more care. In 2011, the market for rooms with heavy care has tightened again: the vacancy rate, which went from 11.7 per cent in 2009 to 7.1 per cent in 2010, fell to 2.8 per cent this year. These are places where residents receive more than an hour and a half of medical care per day. The survey counts approximately 5,000 places with heavy care, which represents just over 5 per cent of the universe of inquiry. As for the average rent, it is estimated at \$ 2,621. In the Montreal CMA, the average rent amounts to \$ 3,253, while in the Quebec City area it is \$ 2,454. It will be important to follow this market segment whose importance will increase in coming years (see Table 1.3).

## Varying situation in the regions

As for previous years, market conditions vary significantly on a regional basis. Given the importance of local supply and demand conditions, this phenomenon is not surprising. For example, the sudden opening of a residence in a less populated area can often raise the vacancy rate to a high level. Moreover, the housing preferences of seniors in another region may limit the demand - and supply - of residences.

And so, although most areas show a vacancy rate between 5 per cent and 10 per cent, a number of markets experience contexts closer to the extremes. This applies to areas of Gatineau, Saint-Hyacinthe, parts of the west of the Montreal CMA, where the vacancy rate is relatively high, and the regions of Saguenay, Abitibi-Témiscamingue, Lower St. Lawrence and North Shore, where the market is rather tight (see Table 1.1)

## In large urban centers

Again, the results of the rental market survey in the Quebec retirement homes market differ greatly from one census metropolitan area (CMA) to another. Like last year, the Saguenay region has the lowest vacancy rates for standard spaces (4.6 per cent) among the six CMAs in Quebec and the Gatineau region which is faced with the highest (19.3 per cent). The result recorded in the Montreal area is similar to the provincial average, while Trois-Rivières and Québec stand out, with a rate of 6.6 per cent and 6.2 per cent respectively. Finally, the Sherbrooke CMA posts a rate of 7.0 per cent (see Table 1.1). It should be noted that within these regions the state of the market can vary widely. These differences reflect, among

others things, the preferences and constraints of elders in the various districts, as well as development possibilities in these neighborhoods. Also noteworthy is the low willingness (and ability) of seniors to migrate from one district to another.

Although the vacancy rate is relatively low in the region of Saguenay, the market eased once again this year. Estimated at 1.6 per cent in 2009, the vacancy rate rose to 3.4 per cent last year. According to the 2011 survey, the rate now stands at 4.6 per cent. This variation can be observed in all market segments. It is in the areas of Chicoutimi and La Baie where the market has relaxed. In Jonquière, the market remained stable. According to the survey, the vacancy rate rose in buildings where the average rent is more than \$ 1,200. For homes where the average rent is more than \$ 1,600, the vacancy rate approaches 6 per cent. In 2011, the average rent for standard places in the CMA is \$ 1,378.

In Gatineau, the addition of new places had pushed up the already high vacancy rate standard spaces in 2010 (which increased from 17.2 per cent in 2009 to 21.3 per cent in 2010). Although some absorption has occurred this year, the market is always very relaxed, since according to the survey, over 19 per cent of places are still vacant. The decline reflects market changes in the western part of the CMA. The decline in the vacancy rate in this region is solely due to the tightening of the apartments in the one-bedroom segment (11.4 per cent against 29 per cent in 2010). Moreover, the breakdown of the overall result by the other unit types reveals divergent trends. The private room and two-bedroom apartment segments show significant increases,

while the bachelor category remained stable. The particular situation of Gatineau is also observed in homes whose rent exceeds \$ 1,200. For buildings whose rent is lower, the vacancy rate is considerably lower (6.7 per cent). Currently, the average rent in the CMA is \$ 1778, the highest of provinces' CMAs.

For two years, the Québec region has seen its market relax after years of strong construction in 2007 and 2008. In 2011, a tighter market prevails. In response to the recent slowdown in supply (housing starts were less than half in 2009 and 2010), the vacancy rate went from 8.1 per cent to 6.2 per cent this year. This decline is observed in almost all sectors of the CMA. Only in the South Shore was the vacancy rate up this year. Apart from semi-private rooms, all market segments recorded a decline in vacancy rates in 2010. Moreover, the situation is widespread across all rent ranges. At the time of the survey, the average rent for a standard room in the Québec CMA was \$ 1,590.

With a vacancy rate estimated at 8.5 per cent, and unchanged from last year, the situation of the Montreal CMA is emblematic of that of the province. However, as with other major centers, the current market conditions differ at the zonal level: the vacancy rate is below 4 per cent in the western part of South Shore, but it reaches 15 per cent in the western part of the island. The same applies to the evolution over the last year: a combination of easing and contraction. This disparity is also observed through the analysis of vacancy rates by unit type: Stability on the side of the apartments, decline in the segment of private rooms and a rise in the case of bachelor units. As in previous years, the room and

board segment (13.2 per cent for the category single room) shows a vacancy rate well above that of the apartments (5.9 per cent for one bedroom apartments). Although a number of places less than half of one-bedroom apartments, the room and board segment (8,952 places) is an important category. There are also differences in the evolution of vacancy rates by rent ranges (see Table 1.2). The average rent in the Montreal CMA is estimated at \$ 1,561. And so, despite the overall stability, the Montreal CMAs' particular results exclude all generalizations and require a detailed analysis.

After a relatively stable situation in 2010, the market for retirement homes in the CMA of Trois-Rivières eased slightly this year (6.6 per cent compared to 5.1 per cent in 2010). With the exception of the periphery, this easing is observable in all sectors of the region. However, vacancy rates vary widely geographically (see Table 1.1). In terms of market segments, the results show a rather uniform picture: only the private room segment records a falling vacancy rate. In Trois-Rivières, the bachelor segment is important to consider given its importance in the CMA universe: while in the other CMAs, this sub-market represents half the places of the one-bedroom apartments, in Trois-Rivières it is equally as numerous. The evolution of this market segment (from 4.3 per cent to 6.0 per cent this year) has thus contributed to the overall result. According to the 2011 survey, the average rent in the region is \$ 1,308.

In the Sherbrooke area, stability of supply continues to bring down the vacancy rate in retirement homes. Amounting to almost 10 per cent in 2009, the vacancy rate descended

to 7.8 per cent last year. In 2011, it is estimated at 7.0 per cent. On a neighborhood basis, the market is tighter in the city center and in the western part of the City of Sherbrooke. In the Sherbrooke area, the market is greatly influenced by that of private and semi-private rooms. Indeed, the CMA is known for the large segment of such places (1,707 against 1,118 places in the one-bedroom apartment segment). It is therefore not surprising that the average market rent (\$ 1,284) is comparable to that of the rooms (\$ 1,223).

## The universe

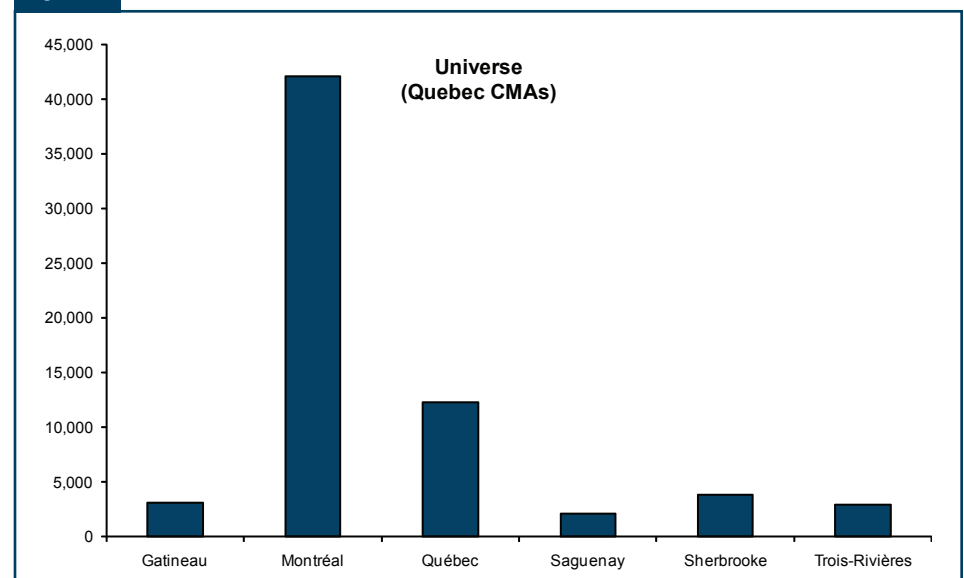

In Quebec, the market for retirement homes is much more developed than anywhere else in the country. Indeed, the more than 92,000 places which are part of the 2011 survey amount to about half of the Canadian total. Even Ontario, which has a population of persons aged 75 and over that is one and a half times that of Quebec, counts half that number. Another barometer of the importance of this market is the rate of attraction.

This indicator, which measures the proportion of people aged 75 and over living in a residence, clearly shows the relative popularity of this type of housing in Quebec (18 per cent against an average of 5 per cent for the rest of Canada).

At the regional level, the CMAs detain nearly two-thirds of the places listed. About 50 per cent of places are situated in the Montréal area; however this does not translate into a higher capture rate. The CMAs of Trois-Rivières (22 per cent) of Québec (23 per cent) and of Sherbrooke (26 per cent) have higher rates than Montréal.

The distribution of places by unit type reveals the dominance of private and semi-private rooms (35 per cent) and of one-bedroom apartments (35 per cent). Although not negligible, bachelor apartments (17 per cent) and two-bedroom apartments (13 per cent), have a lower market share.

Figure 3

Source: CMHC

## Capture rate remains stable

As mentioned in the section on the survey universe, the capture rate (formerly known as penetration rate) is an important statistic in the analysis of the retirement home market. According to the 2011 survey, the capture rate (17.6 per cent) had not changed since the previous year. This result is not surprising given the stability of the market over the past year.

In large urban centers of Quebec, there is some variation in the capture rate. First, the regions of Montreal, Gatineau and Saguenay show a rate similar to the provincial average. On the other hand, the CMAs of Trois-Rivières, Québec and Sherbrooke stand out with a rate that exceeds 20 per cent. In the case of Sherbrooke, the rate reached 26.2 per cent (see Table 1.4).

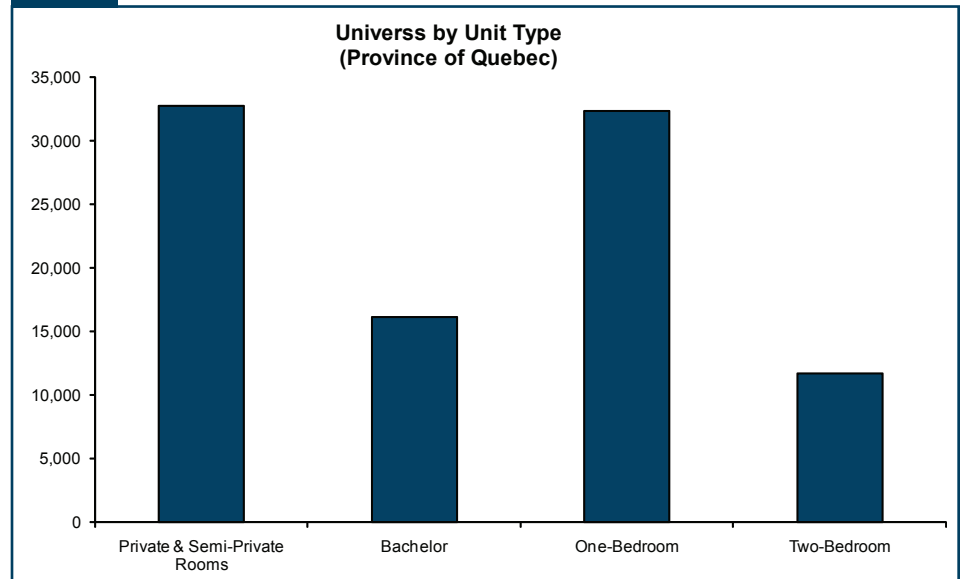

It will be important to monitor the capture rate over the next decades, as it will assess the extent to which retirement homes "capture" the attention of the baby boomer cohort.

## Rents

According to the 2011 survey, the average rent for a standard place in a retirement home amounted to \$ 1,466. This estimate is comparable to the average rent of a private room as well as of a one-bedroom apartment, segments that make up a significant market share. The two-bedroom apartment segment present an average rent of \$ 1,855 according to the 2011 survey. With an average rent of \$ 1,286, the bachelor segment is the most affordable.

The analysis of vacancy rates by rent

Figure 4

Source: CMHC

ranges contains no surprises. The vacancy rate in homes where the rent is between \$ 900 and \$ 1,600 (a category which makes up more than 60 per cent market share) is between 7 per cent and 8 per cent, which is around the provincial average. The buildings for which the average rent is less than \$ 900 (these make up less than 6 per cent market share) have a rate of 10.4 per cent. Homes whose

rent exceeds \$ 1,600 post a rate of 9.6 per cent.

Great caution is necessary when comparing rents in this market, as the composition effect is significant.

## Services and Amenities

As mentioned in the previous section, the retirement home market is

Figure 5

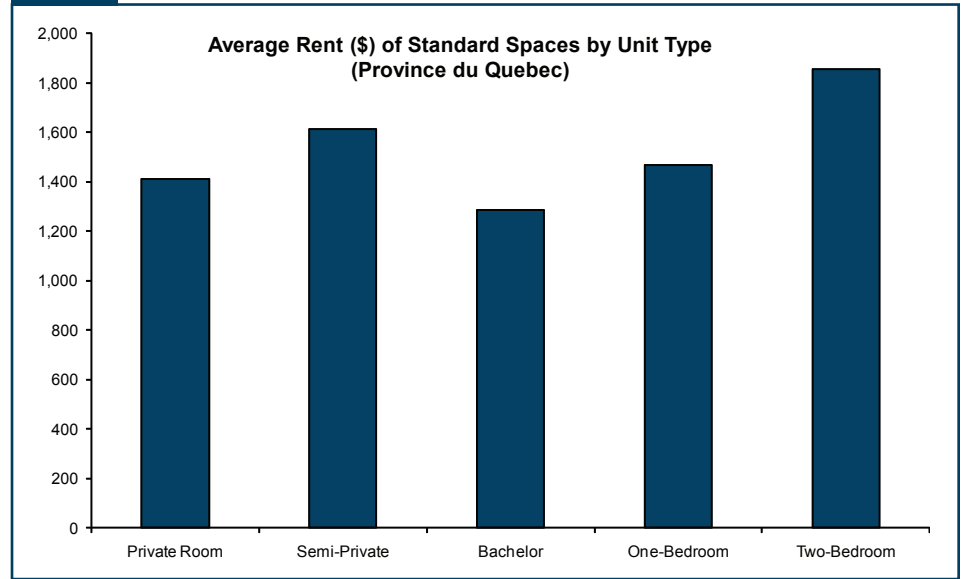

Source: CMHC

complex because of the wide range of services that are offered. It is therefore imperative to take into account this diversity. Tables 2.4 and 2.5 show the proportion of buildings where some services and amenities offered.

For the entire province, the vast majority of residences require that a meal package be taken and about 50 per cent provide specialized medical services on site. According to the survey, the supply of such services is greater in larger CMAs (Montreal, Quebec and Gatineau).

As for amenities, between 13 and 38 per cent of homes in the province offer them: a pharmacy, transportation, pool, spa, movie theater, exercise room, internet. And as in the case of services, the supply is greater in larger centers.

## Methodology

Canada Mortgage and Housing Corporation conducted the National Seniors' Housing Survey in February and March. This annual survey began in 2009. The survey was conducted in all centres in all ten provinces.

The survey targeted private or non-profit residences where the majority of residents are 65 years of age or older and have access to additional services not offered in traditional rental structures. Examples of such services include meal service, housekeeping and laundry. To be eligible for the survey, a residence must provide an on-site meal plan. (This eligibility requirement differs from the previous year's survey, which required either on-site meal plan or on-site medical services).

However, the survey excluded seniors' residences which provide high levels of healthcare (defined as 1.5 hours or more of care per day) to all of their residents. Nursing homes and long-term care homes are examples of residences that were not included in the survey. As well, residences with less than 10 units were excluded in Québec, Ontario and the Prairies, and with less than 5 units were excluded in Atlantic and British Columbia Regions.

Survey data were obtained through a combination of telephone interviews and fax and email responses. Information was obtained from the owner, manager, or residence administrator. Survey results reflect market conditions at the time of the survey. Survey results have been weighted to adjust for non-responses, to ensure that they are reflective of the universe. 2009 data in this publication may differ from what was published last year, due to survey zone changes in 2010. The level of statistical reliability is noted in the data tables. For more information on the reliability of the data please click [here](#).

All statistics published, excluding information on new market supply, include only those residences that have been in operation for at least one year.

## Definitions

**Space:** A space is a residential area that is rented out. Examples of spaces include: one-half of a semi-private unit, a private or bachelor unit, a one-bedroom unit and a two-bedroom unit. In most cases a space is the same as a unit. The exception is the case where a unit has been divided to rent to multiple residents. Semi-private and ward units are an example of this. Unless otherwise indicated, data for spaces are for all unit types.

**Standard Space:** A space occupied by a resident who does not receive high levels of care (i.e. the resident receives less than 1.5 hours of care per day.) Regional terms for this type of space vary across the country, and, in cases where there is no additional charge for additional care, it is possible that the standard space estimate includes some units with additional care.

**Heavy Care Space:** A space where the residence provides 1.5 hours or more of healthcare per day to the resident. Examples include Alzheimer, Dementia and mobility support residents.

**Respite Space:** A space used to provide temporary accommodation for a senior who normally lives in another place and not at the residence.

**Non-market or Subsidy Space:** A space where the rent received for the unit is less than market rent or where the resident occupying the unit is subsidized.

**Rent:** The rent refers to the actual amount residents pay for their space and all mandatory services. Charges for additional non-mandatory services are excluded from the rent. For vacant spaces, the rent is the amount the owner is asking for the space.

**Vacancy:** A space is considered vacant if, at the time of the survey, it is physically unoccupied and available for immediate rental.

## Acknowledgement

The Seniors' Housing Survey could not have been conducted without the cooperation of the property owners, managers, and residence administrators. CMHC acknowledges their hard work and assistance in providing timely and accurate information. As a result of their contribution, CMHC is able to provide information that benefits the entire housing industry.

## Confidentiality

All information provided through this survey is kept strictly confidential and only used by CMHC to generate statistics and data sets that do not allow for the identification of individuals, households, businesses or buildings.

## CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.
