

HOUSING NOW

Vancouver and Abbotsford CMAs

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: July 2011

Vancouver CMA

In June 2011, there were 1,344 housing starts across the Vancouver Census Metropolitan Area (CMA), an increase compared to the same month a year ago. During the first half of the year, construction started on 8,472 new homes, an increase of 23 per cent compared to the same period last year. Housing starts increased

most notably in Coquitlam, Langley, Richmond and North Vancouver.

The rise in housing starts is largely due to the construction of multiple family homes (townhouses and apartments), which increased from last year's totals by over fifty per cent. During the first half of 2011, construction of new multiple family homes reached over one thousand units in the Cities of Vancouver,

Surrey and Richmond. A majority of new developments in these areas are located in close proximity to retail and service amenities, major transportation routes and transit systems.

The rise in housing starts has led to an increase in the number of homes under construction. Since the beginning of the third quarter of 2010, the total number of homes under construction has grown an average of two per cent per month. Developers have begun construction on larger scale multiple family developments that were approved during the latter half of 2010. Also, improving pre-sales in various projects and neighbourhoods in the CMA have encouraged developers to look at future developments, thus potentially bringing more supply to the market.

Abbotsford CMA

Total housing starts in the Abbotsford CMA were up six per cent to 253 starts during the first half of 2011. Like the Vancouver CMA, a surge in multiple family home starts helped boost total housing starts over last year's number. As a result, single detached housing starts were below last year's totals. Both major centres that make up the CMA (Abbotsford City and Mission) recorded total housing starts above last year's figures.

Greater Vancouver Resale Market

In the first half of 2011, there were 18,881 sales (single detached, attached and apartments) in Greater Vancouver¹ through the MLS®² system, a ten per cent increase over the 17,133 sales recorded during the same period last year. Housing sales were steady during the second quarter, averaging 3,292 sales per month during this period. The total number of new listings for the first half of the year was 34,958, five per cent below the 2010 year-to-date number of 36,973. With higher sales and a lower number of homes

listed for sale, the residential housing market has been fluctuating from balanced to seller's conditions in Greater Vancouver through the first six months of the year.

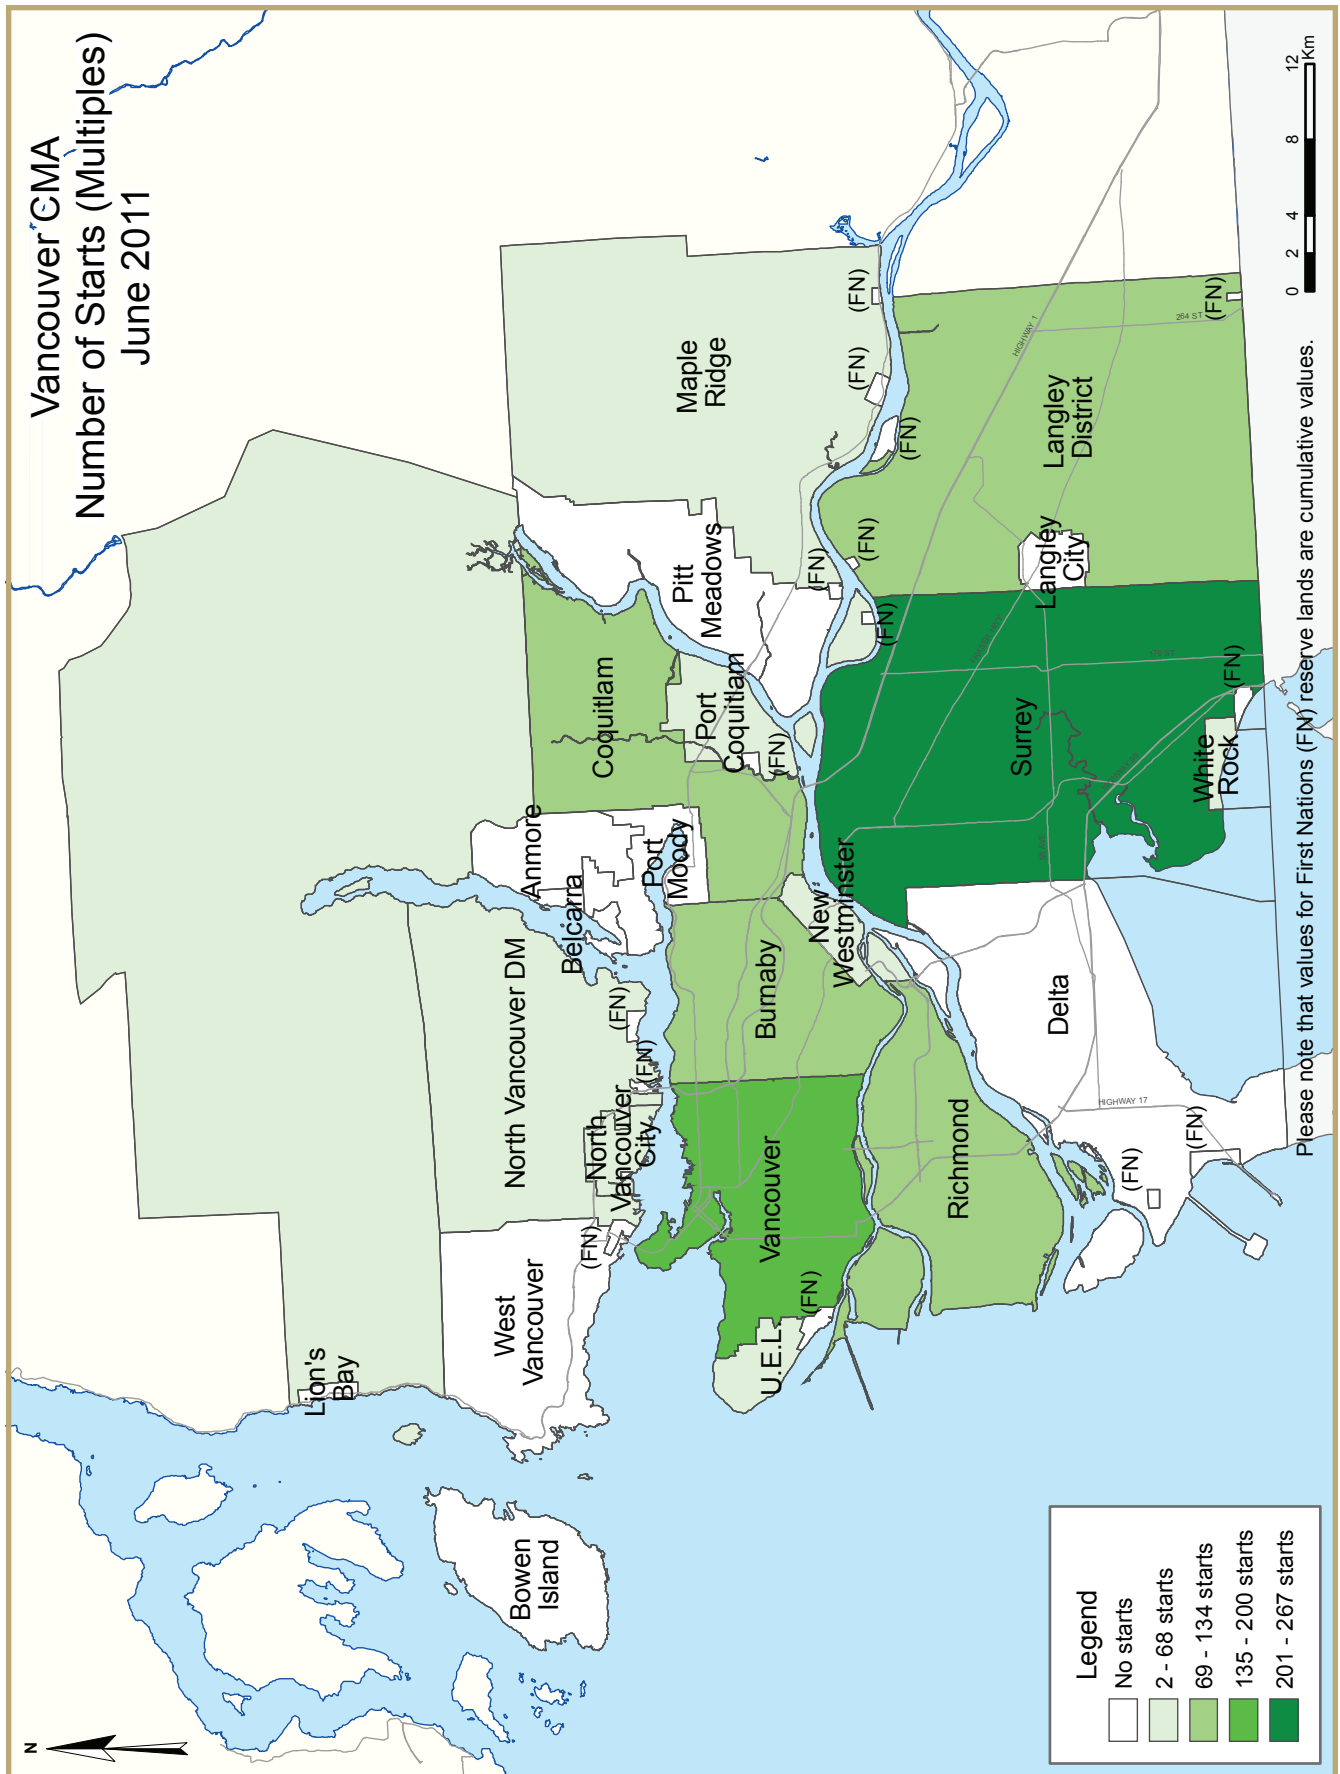

Average MLS® prices in Greater Vancouver rose twenty per cent, year over year, in the first half of 2011. The demand for single detached homes, especially higher end properties in various neighbourhoods in the region, has been the major reason for the double-digit increases in MLS® prices. While detached home prices were up 21 per cent, the average MLS® price for multiple family homes increased by six per cent in year-to-date terms.

Figure 2

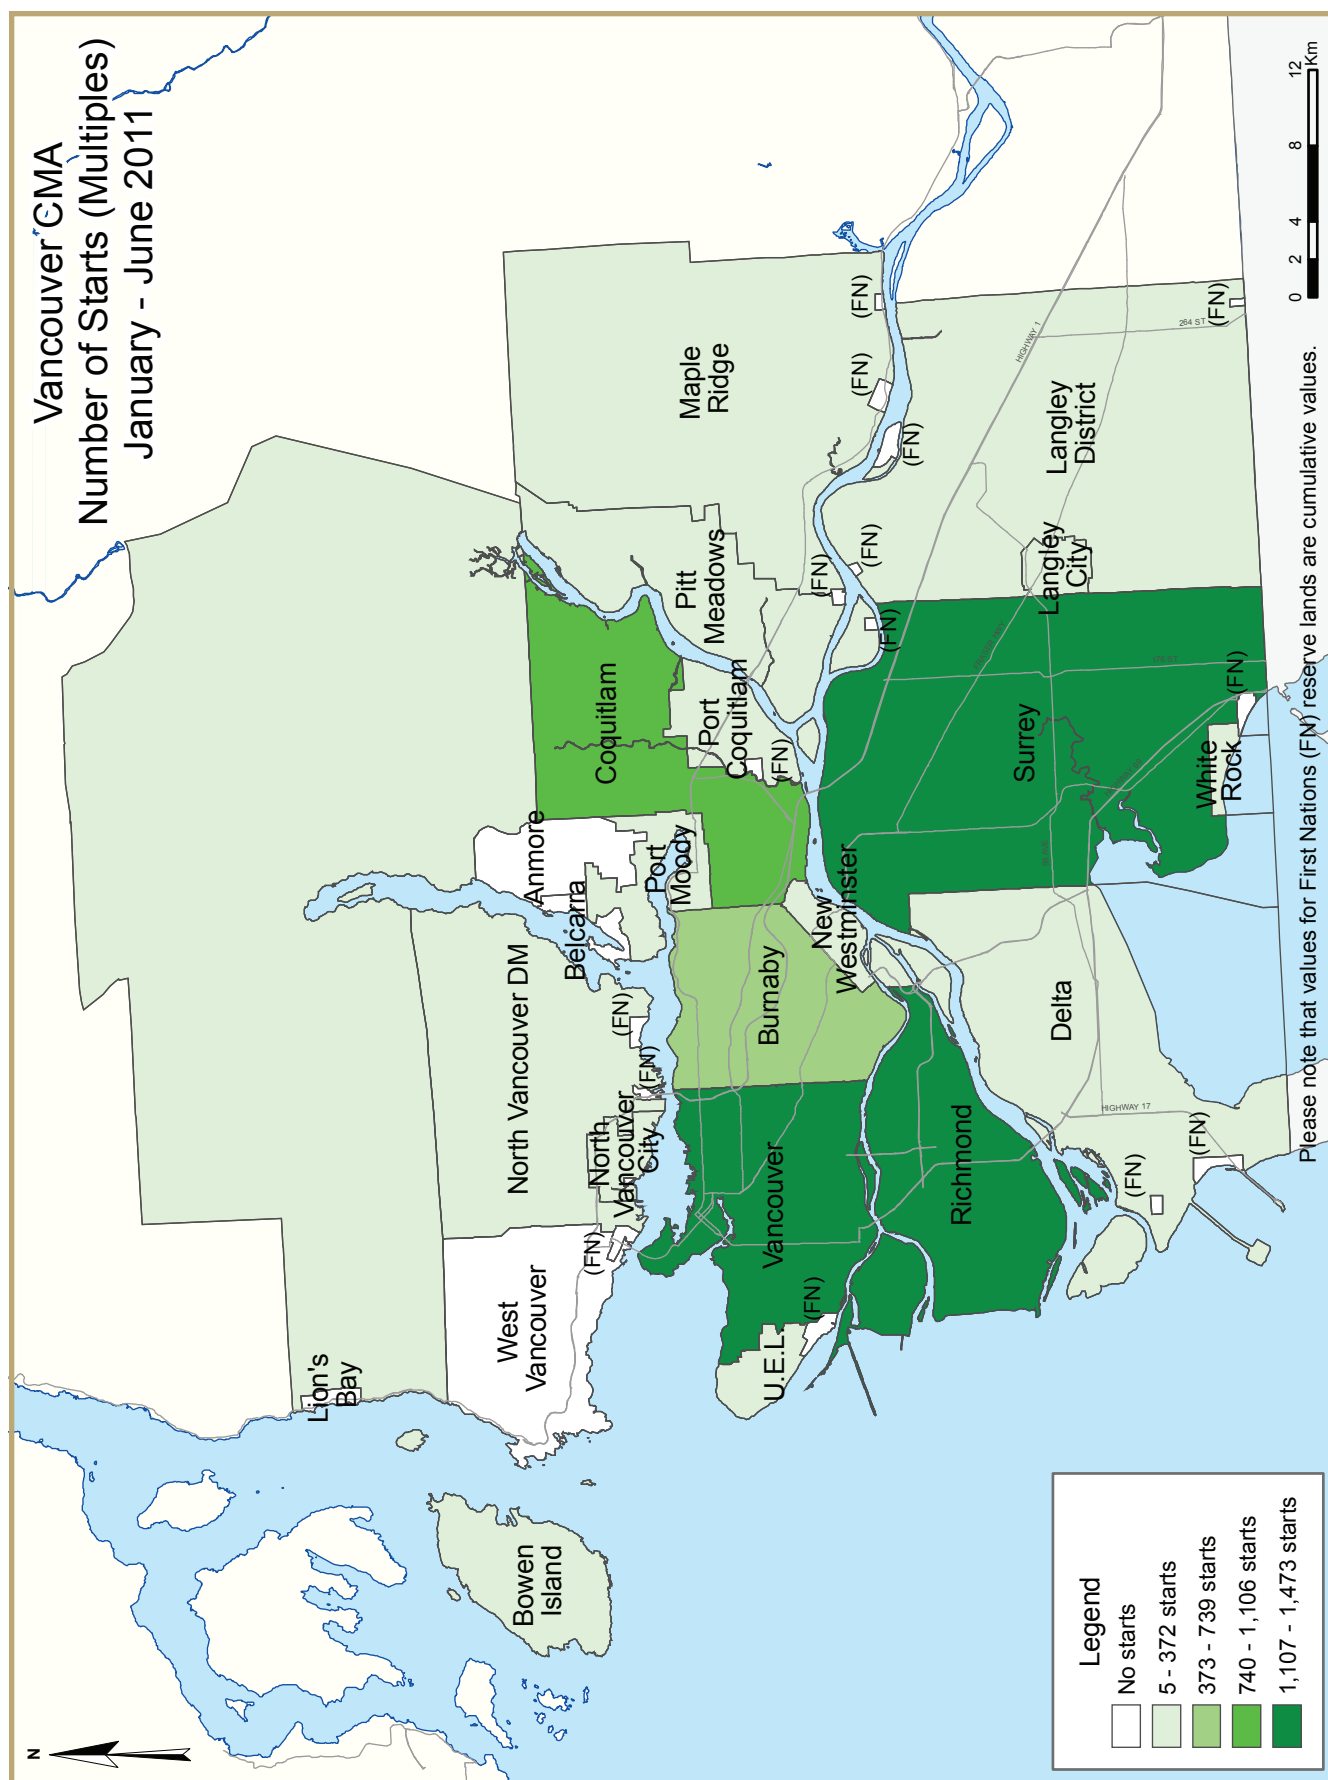

¹ This section deals with the resale market in the Resale Estate Board of Greater Vancouver area. This does not include Surrey, Langley, White Rock or North Delta.

² MLS® is a registered trademark of the Canadian Real Estate Association (CREA)

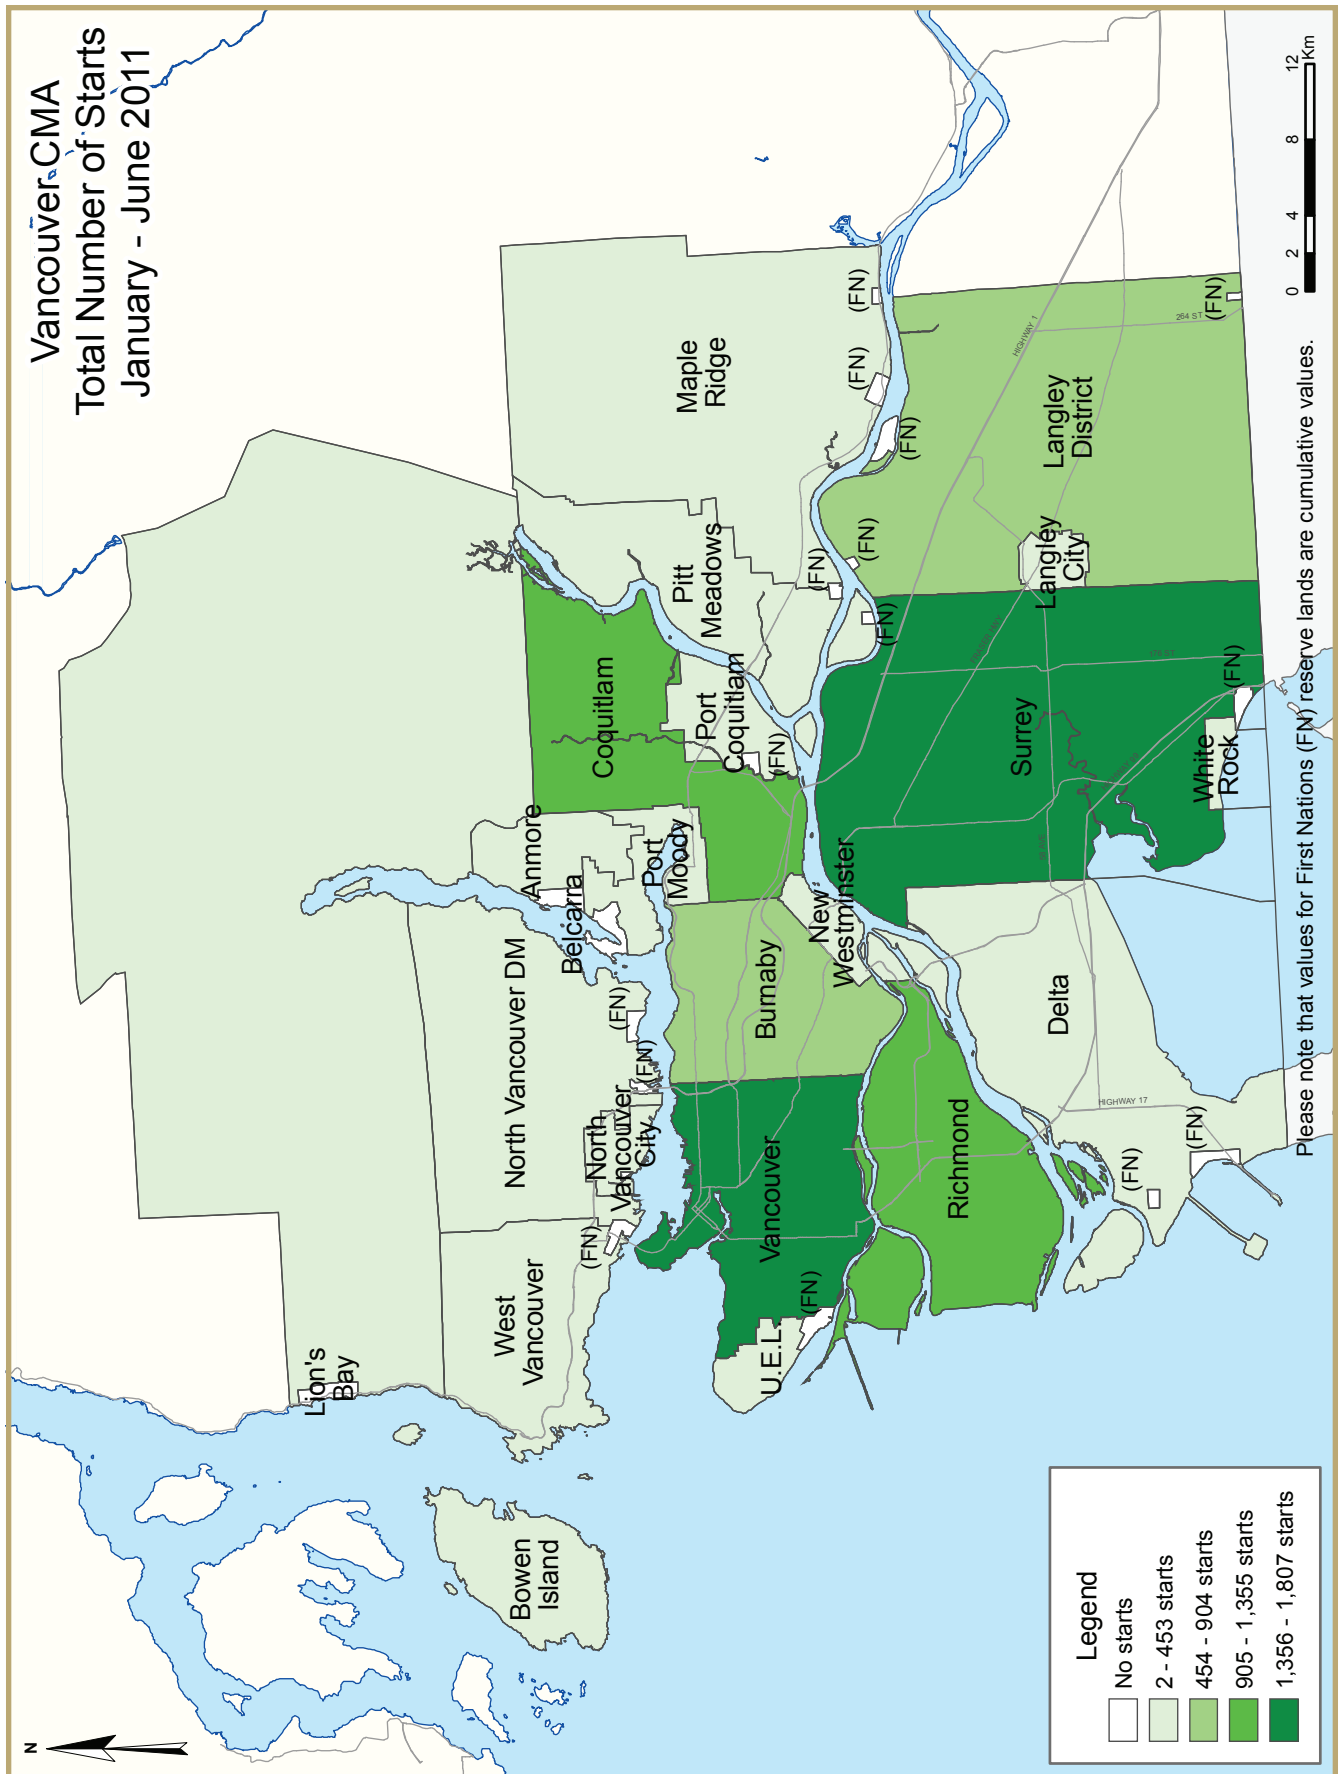

HOUSING NOW REPORT TABLES

Available in ALL reports:

- 1 Housing Activity Summary of CMA
- 2 Starts by Submarket and by Dwelling Type – Current Month or Quarter
- 2.1 Starts by Submarket and by Dwelling Type – Year-to-Date

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
