Date Released: Fourth Quarter 2011

Housing Market Forecast

Figure 1

Figure 2

¹ The outlook is subject to uncertainty. Although point forecasts are presented in this publication, CMHC also presents forecast ranges and risks where appropriate. The forecasts and historical data included in this document reflect information available as of October 5, 2011.

Overview¹

Recent economic growth, favourable borrowing conditions and sustained positive net migration will again support new home construction in 2011. As the global and national economic recovery slows, less vigorous household spending and private investment are expected in the province. GDP will grow by 2.3 per cent in 2011 and 2 per cent in 2012.

Demographic factors will continue to sustain the province's housing markets in the coming years. Strong net immigration to the province will continue to have a positive impact on the rental and resale markets. In addition, population ageing will likely prompt older households to re-enter the market in response to their housing needs.

This environment, combined with an easing resale market, will lessen the demand for new homes. Accordingly, 48,000 housing starts are expected this year, followed by 44,500 in 2012.

Mortgage Rates

Recent announcements by the Bank of Canada have indicated that the Bank will be leaving the target overnight interest rate unchanged at 1.0 per cent for some time to come. The Bank has been noting that in light of slowing global economic momentum and heightened financial uncertainty, the need to withdraw monetary policy stimulus has diminished.

Mortgage rates		
1 Year	Q3 2011	3.50
	Change from Q3 2010	0.13
	2011 (F)	3.60
	2012 (F)	3.56
5 Year	Q3 2011	5.39
	Change from Q3 2010	-0.13
	2011 (F)	5.42
	2012 (F)	5.43

Source: Bank of Canada, CMHC Forecast

NOTE: Mortgage rate forecast is based on Q3 2011 data

The last increase in the overnight interest rate occurred on September 8, 2010 when the Bank of Canada raised it by 25 basis points. Mortgage rates, particularly short term mortgage rates and variable mortgage rates, are expected to remain at historically low levels.

According to CMHC's base case scenario, posted mortgage rates will remain relatively flat until late 2012. For 2012, the one-year posted mortgage rate is expected to be in the 3.4 to 3.8 per cent range, while the five-year posted mortgage rate is forecast to be within 5.2 to 5.7 per cent.

In Detail

Single Starts:

For most of 2010, new construction of single detached homes benefited from the improved economic and financial environment, as well as from the reduced supply of such homes on the resale market. However, the rising popularity of multi-family housing and densification trends will cool this market segment. As a result, close to 17,000 single detached homes will be started in 2011, with a 3 per cent increase expected in 2012 to 17,400 units.

Multiple Starts:

Following a strong rebound in 2010, starts of multi-family dwellings will settle back to more sustainable levels

over the course of the next two years. Nonetheless, multiple starts will reach 31,100 units in 2011. Given the current supply of condominium apartments on the market, starts of multi-family homes will slow to the 27,100 unit level in 2012.

Resales:

Given the weaker start during the first half of this year, MLS® resales will record a lower level of activity than in the previous year. However, resale activity will pick up during the last part of 2011 as the housing stock continues to grow. As a result, close to 77,000 MLS® sales are forecast for 2011 and over 79,000 in 2012.

Prices:

Relatively stable demand for resale homes, combined with rising supply, will take some pressure off prices over the course of the next year. With a return to more balanced conditions, price growth in the resale market will moderate over the course of 2011 and in 2012. The average MLS® price is expected to be \$251,200 in 2011 and \$257,400 in 2012.
