## Montréal CMA

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: March 2011

### Montréal Metropolitan Area Housing Starts in February 2011

The results of the latest starts survey conducted in February 2011 by Canada Mortgage and Housing Corporation (CMHC) show that 962 dwellings were started in the Montréal census metropolitan area (CMA) during this month, compared to 1,182

in February 2010.

The 19-per-cent drop in starts marked the fourth straight monthly decrease in residential construction in the Montréal area. The recent trend in residential construction reflects a decline in demand for new housing, which is in line with our scenario that starts will fall in 2011. For the year, we forecast a decrease of 7 per cent.

Most market segments showed decreases in activity. In fact, only rental

housing construction rose this past month (+45 per cent). However, the decline was particularly significant in the case of condominiums (-22 per cent). After having set a record in 2010 and supported residential construction in recent months, the condominium segment registered the lowest volume of starts for a month of February since the early 2000s. While this market segment should experience a decline in 2011, condominiums will once again account for a considerable share of residential construction. As for freehold homes, single-detached housing starts recorded another drop (-4 per cent), while semi-detached and row home building posted a gain (+28 per cent).

A review of the geographic sectors reveals that the decrease in activity was pronounced on the Island of Montréal (-56 per cent). Foundations were laid for very few condominiums (26 units) and rental dwellings (0) on

the Island in February. Housing starts also fell in the South Crown (-14 per cent), a decrease due to declines in freehold home building (-26 per cent). Only the North Crown posted a gain in starts (+15 per cent), notably on account of the strong increase in condominium activity (+80 per cent), which was attributable to the start of construction on a few mid-sized projects in Laval and on the North Shore. This past month, more than half of all new condominiums were started in the North Crown. Lastly, activity was stable in Vaudreuil-Soulanges (0 per cent).

During the first two months of the year, housing starts fell by 28 per cent from the same period in 2010. The greatest decrease in activity was recorded in the rental housing segment (-38 per cent). Declines in starts were also registered for freehold homes (-25 per cent) and condominiums (-12 per cent).

## Job market

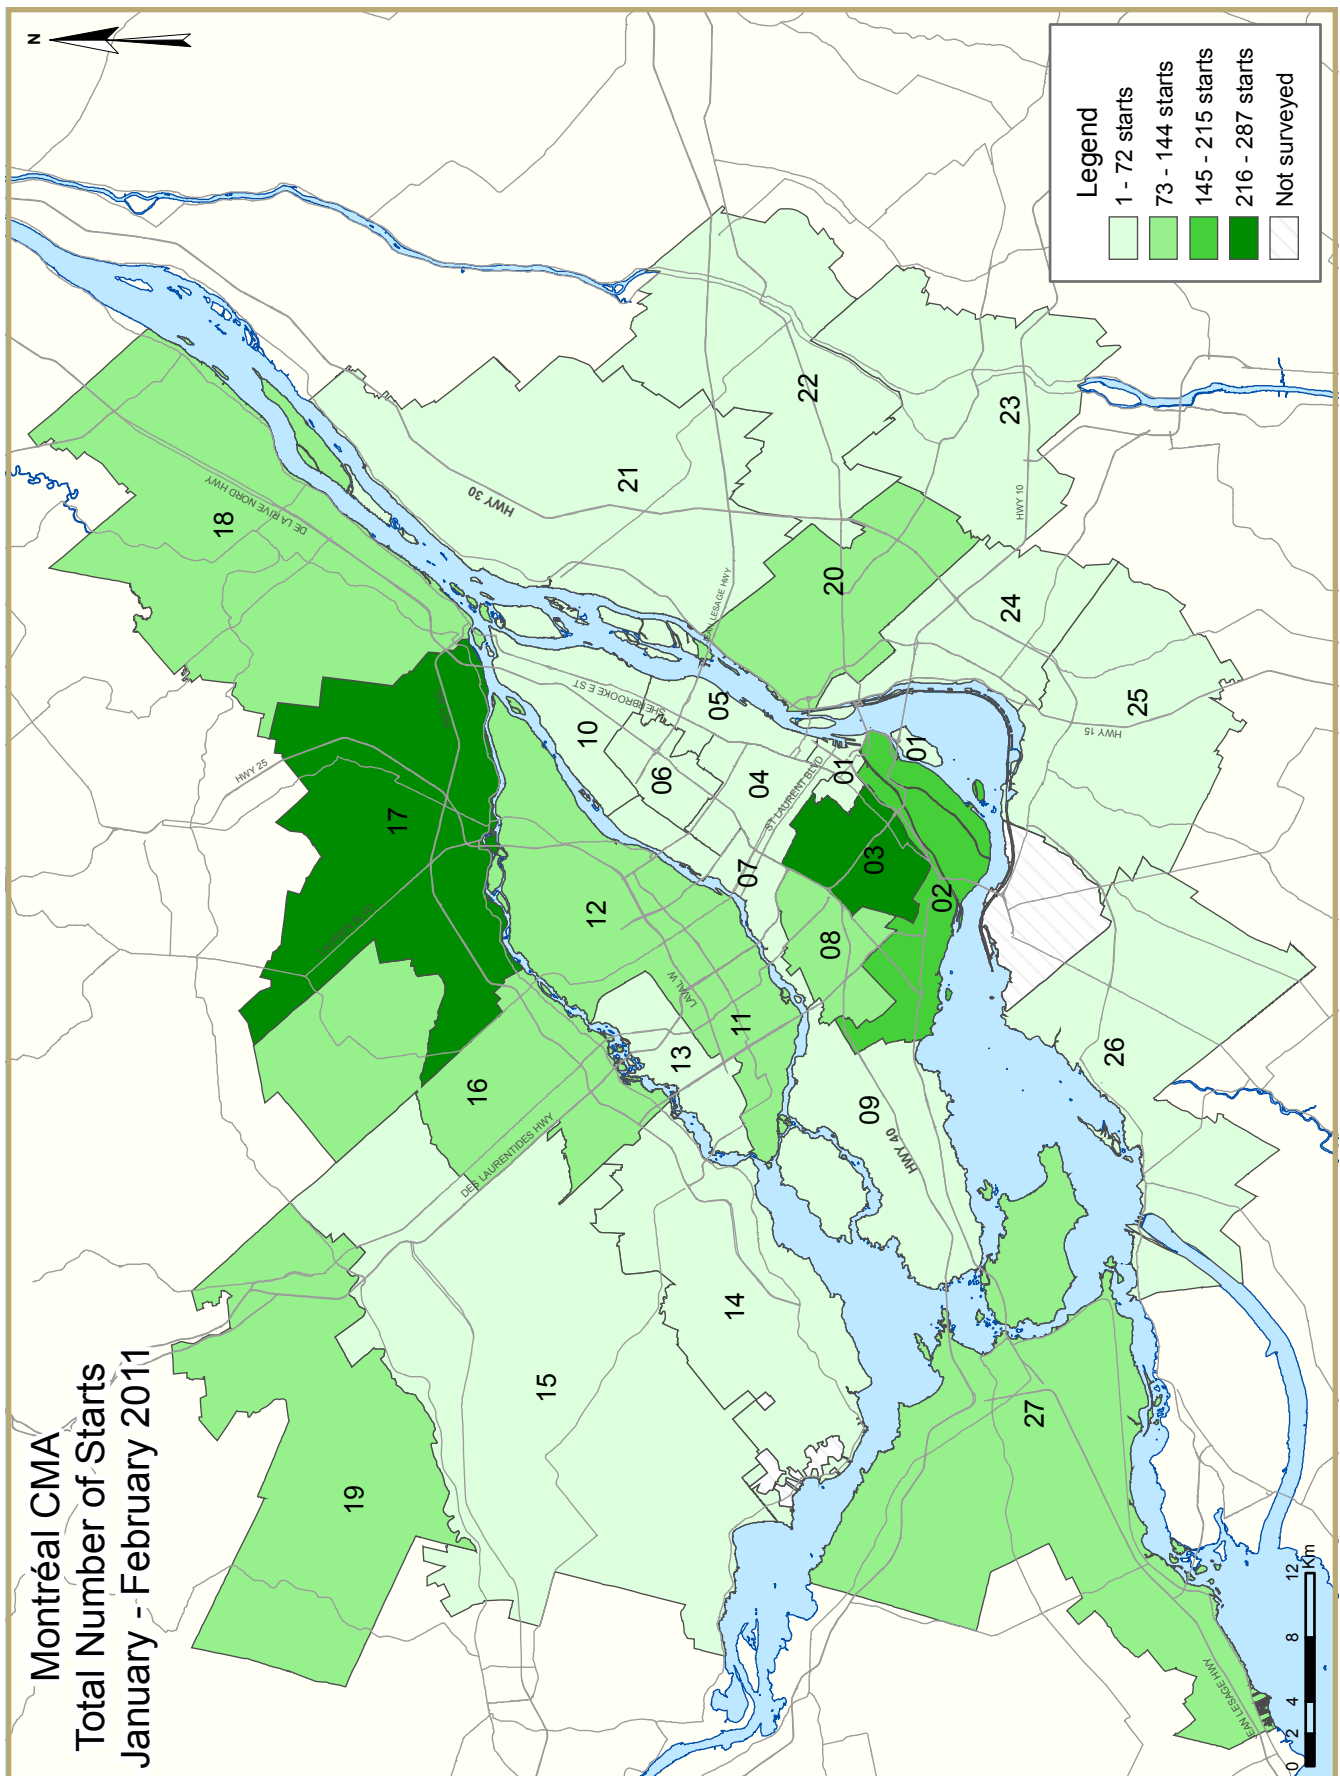

This past February, the Montréal job market posted growth for the first time since June 2010, as the number of jobs<sup>2</sup> rose by 0.9 per cent over the previous month. The unemployment rate, for its part, fell for a third straight month, reaching 8.1 per cent. This was in fact the lowest level observed in the Montréal CMA since January 2009.

In the last 12 months, the Montréal labour market registered a net gain of some 41,000 jobs<sup>3</sup>.

<sup>1</sup> In this report, the data presented on the rental segment exclude co-operative housing starts. It should be noted that co-operative housing starts fell from 294 units in February 2010 to 91 in February 2011.

<sup>2</sup> Seasonally adjusted rate

## METHODOLOGY

### Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

### Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

## STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

## DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

## INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

**Freehold:** A residence where the owner owns the dwelling and lot outright.

**Condominium (including Strata-Titled):** An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

**Rental:** Dwelling constructed for rental purposes regardless of who finances the structure.

## GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

## CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.

For more information, visit our website at [www.cmhc.ca](http://www.cmhc.ca)

You can also reach us by phone at 1-800-668-2642 or by fax at 1-800-245-9274.  
Outside Canada call 613-748-2003 or fax to 613-748-2016.

Canada Mortgage and Housing Corporation supports the Government of Canada policy on access to information for people with disabilities. If you wish to obtain this publication in alternative formats, call 1-800-668-2642.

The Market Analysis Centre's (MAC) electronic suite of national standardized products is available for free on CMHC's website. You can view, print, download or subscribe to future editions and get market information e-mailed automatically to you the same day it is released. It's quick and convenient!
