# CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) is Canada's national housing agency. We contribute to improving the living conditions and the well-being of Canadians.

Our housing finance activities centre around giving Canadians access to affordable financing solutions. The main tool to achieve this goal is our mortgage loan insurance program.

We help lower-income households — seniors, people with disabilities, Aboriginals, women and children fleeing family violence, youth at risk, and individuals who are homeless or at risk of homelessness — to gain access to safe, affordable housing.

Through our research, we encourage innovation in housing design and technology, community planning, housing choice and finance. We offer a wide variety of information products to consumers and the housing industry to help them make informed purchasing and business decisions.

We also work with our government partners and industry to promote Canadian products and expertise in foreign markets, thereby creating jobs for Canadians here at home.

In everything that we do, we are committed to helping Canadians access a wide choice of quality, affordable homes, and making vibrant and sustainable communities a reality across the country. CMHC is home to Canadians.
