## Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

## User information

## Symbols

The following standard symbols are used in Statistics Canada publications:
. not available for any reference period
.. not available for a specific reference period
... not applicable
0 true zero or a value rounded to zero
0 s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
p preliminary
r revised
x suppressed to meet the confidentiality requirements of the Statistics Act
E use with caution
F too unreliable to be published

## Note

As figures are individually rounded in the tables of this document, totals do not necessarily equal the sum of their component parts.

## Acknowledgements

1.1 Ten-year operating profit overview ..... 14

## Note to readers

These financial and taxation statistics cover all incorporated businesses within the domestic economy, including federal and provincial government enterprises, but exclude enterprises classified to Management of Companies and Enterprises (NAICS 55); Religious Organizations (NAICS 8131); Political Organizations (NAICS 81394); Public Administration (NAICS 91); as well as Funds and other Financial Vehicles (NAICS 526).

Detailed financial data for 67 industry groups based on the North American Classification System (NAICS) 2007 are available and have been released on CANSIM for the period 1999 to 2009. Taxation statistics are available beginning with reference year 2000.

## Section 1

## 2009 Overview

The dampening effect of the global financial crisis that started during the latter part of 2008 contributed to the decline in corporate operating profits in 2009. After increasing for six consecutive years, corporate operating profits declined to $\$ 237.4$ billion in 2009, a decrease of $\$ 74.5$ billion, or $23.9 \%$, from the previous year.

Both the financial and non-financial industries registered significant declines. Operating profits for the non-financial industries for 2009 were $\$ 173.8$ billion,
down 24.1\% from 2008, while those for the financial industries were $\$ 63.6$ billion, down $23.2 \%$ from the previous year.

Net profit dropped to $\$ 169.3$ billion, down $7.2 \%$ from 2008. After adjusting for timing and other differences as well as current and prior year tax losses, taxable income fell $2.1 \%$ to $\$ 180.3$ billion. Corporate taxes likewise decreased to $\$ 51.6$ billion, a decline of $2.2 \%$ over the previous year. The federal portion amounted to $\$ 32.2$ billion, while the provinces claimed $\$ 19.4$ billion.

Chart 1.1
Ten-year operating profit overview

### 1.1 Non-financial industries

### 1.1.1 Operating profits retreat in 2009

After steady growth since 2002, operating profits of the non-financial industries declined in 2009. Operating profits fell to $\$ 173.8$ billion in 2009, a decrease of $\$ 55.3$ billion over profits earned in 2008.

Energy-based industries engaged in oil and gas extraction and support activities as well as petroleum
and coal products manufacturing accounted for 7.3\% of the non-financial industries' total corporate operating profits in 2009, down from a share of $23.0 \%$ in 2008. Their combined 2009 operating profits were $\$ 12.6$ billion, down $76.0 \%$ from the previous year.

The decline in corporate operating profits was widespread, with 38 out of 57 industries showing a downward trend. Other major contributors to the overall decline in operating profits of the non-financial
industries were: primary metal manufacturing, mining, construction, utilities, agriculture, and building, material and supplies wholesaler-distributors.

Petroleum and coal products manufacturing slowed down significantly in 2009, registering operating profits of $\$ 3.1$ billion, down from the $\$ 14.6$ billion earned in 2008. Operating profits for the manufacturing sector were down by $35.5 \%$. This was the second consecutive year of decline for manufacturing, with 2009 operating profits at $\$ 26.3$ billion, down from $\$ 40.8$ billion in 2008. Primary metal manufacturing and fabricated metal product and machinery manufacturing also posted significant declines in operating profits, down $\$ 4.2$ and $\$ 1.0$ billion respectively. Seven of the twenty-two manufacturing industries managed to post increases in operating profit. Notable among these industries were paper manufacturing (up $\$ 0.8$ billion), computer and electronic product manufacturing (up $\$ 0.7$ billion), and motor vehicle and trailer manufacturing (up $\$ 0.7$ billion).

In the service sector, professional, scientific and technical services posted an increase in its operating profit in 2009 (up $\$ 1.3$ billion).

### 1.2 Financial industries

### 1.2.1 Global financial conditions continue to slow down financial industries

Operating profits for the financial industries fell for a second year in a row. At $\$ 63.6$ billion for 2009, operating profits were down 23.2\% from the previous year.

Life, health and medical insurance carriers and enterprises involved in securities and commodity exchanges accounted for three quarters of the $\$ 19.2$ billion overall decline in the financial industries. Bank profits in 2009 were at $\$ 25.7$ billion, a decrease of 1.6\% from 2008.

## Section 2

## Corporate income taxes in 2009

Taxes payable by the non-financial industries were down $\$ 3.9$ billion or $9.2 \%$ to $\$ 38.9$ billion. Taxes payable by enterprises engaged in manufacturing, mining and oil and gas extraction combined, accounted for $\$ 2.8$ billion of the decline.

Corporate taxes payable by the financial industries increased by $\$ 2.8$ billion or $28.3 \%$ to $\$ 12.7$ billion. Taxes payable by the banking and other depository credit intermediation industries were up $\$ 2.9$ billion to $\$ 5.1$ billion.

## concepts

The following information should be used to ensure a clear understanding of the basic concepts that define the data provided in this product, of the underlying methodology of the survey, and of key aspects of the data quality. This information will provide you with a better understanding of the strengths and limitations of the data, and how they can be effectively used and analyzed. The information may be of particular importance to you when making comparisons with data from other surveys or sources of information, and in drawing conclusions regarding change over time.

## Description of the data concepts

## Introduction

Beginning with the 1999 reference year, the Financial and Taxation Statistics for Enterprises program has undergone numerous significant changes which affect both the comparability and the historical continuity of the published statistics. Changes in industrial classification, methodology, data sources as well as content have all been introduced.

Data are now collected and compiled on the basis of the North American Industrial Classification System (NAICS) 2007 for the entire incorporated business population as depicted on Statistics Canada's Business Register. Such a census is made possible by supplementing data collected through Statistics Canada's Quarterly Survey of Financial Statements (QFS) and the survey of provincial or federal level government business enterprises, with administrative data available from the Canada Revenue Agency (CRA). Consequently, the content of the financial and taxation statistics for enterprises has been affected in two ways. First, although the taxation statistics are not available for reference year 1999, they were re-introduced with the 2002 publication and are available begining with reference year 2000. Second, although the financial data are still presented in the basic format of a balance sheet and income statement, certain detail items have changed.

## Description and use of the data

The financial data presented herein comprise financial statements typically prepared by incorporated businesses to record their financial position and performance. The data include: asset, liability and equity items encompassed in a balance sheet, revenue and expense items as reported on an income statement, along with several common financial performance ratios. The taxation data are derived from the T2 Corporate Income Tax Return and include a reconciliation of book profit to taxable income and taxes payable.

These statistics are used in two broad ways. First, they provide a measure of financial position and performance of incorporated businesses by industry aggregations. They are used by a wide variety of economists and industry analysts in both the private and government sectors. Second they are used as the benchmark for the quarterly estimates of corporate profits in the Canadian System of National Accounts.

## Coverage

The domestic economy consists of personal, business and government sectors. This publication covers incorporated enterprises of the financial and non-financial business sectors and business enterprises controlled by federal or provincial governments. In addition, non-profit enterprises considered to be part of the incorporated business sector are also included.

## The statistical unit

For statistical purposes, Statistics Canada defines a hierarchical structure of units for each firm. The four standard statistical units that are used are listed from largest to smallest below:

- Enterprise
- Company
- Establishment
- Location

The statistical unit for this publication is the enterprise. An enterprise can be a single corporation or a family of corporations under common ownership and/or control, for which a set of consolidated financial statements are produced.

## Accounting concepts, definitions and practices

The concepts and definitions for most industries are based on the guidelines of the Canadian Institute of Chartered Accountants (CICA). Regulated industries may follow practices and definitions determined by the regulators. However, these practices are usually similar to the Generally Accepted Accounting Principles (GAAP) of the Canadian Institute of Chartered Accountants.

## Financial classification and presentation

Because there is no widely accepted standard classification for financial items, it was necessary to devise one in order to present information in a homogeneous way for all enterprises. The financial item presentation for this publication has been condensed somewhat to allow for a generic presentation across industries.

## Industrial classification

Commencing with 1999, Financial and Taxation Statistics for Enterprises are based on the North American Industry Classification System (NAICS) ${ }^{1}$. From 1988 to 1998, the Standard Industrial Classification for Companies and Enterprises (SIC-C 1980) was used.

NAICS is an activity-oriented industry classification that was developed by the statistical agencies of Canada, Mexico and the United States to provide a consistent framework for the collection, analysis and dissemination of industrial statistics used by government policy analysts, academics and researchers, the business community and the public. NAICS was primarily designed to classify economic production performed at the establishment level; the activity that contributes the most value-added determines the NAICS code for the establishment.

To determine which NAICS code should be assigned to a statistical enterprise, the NAICS code is determined for each establishment belonging to the statistical enterprise. The NAICS code representing the largest value-added is then assigned to the statistical enterprise. The NAICS (unlike the 1980 SIC-C) does not provide classifications for integrated activities. For example, a petroleum enterprise may be involved in exploration, mining, refining, shipping and retailing of petroleum products. Whereas the 1980 SIC-C provided a classification code for integrated petroleum activities, under NAICS such an enterprise is classified to the individual NAICS code that relates to the activity that provides the most value-added. NAICS is a detailed, hierarchical classification with 928 individual 6 -digit industries. These are aggregated into 20 sectors of activity, such as mining, manufacturing, wholesale trade, retail trade and construction.

The annual Financial and Taxation Statistics for Enterprises are published in this document at the NAICS level of 67 industry groups. Other levels of aggregation are available upon request on a cost recovery basis..

Text table 1 provides the composition of the industry groups included in this publication.

[^0]Text table 1
Industry group composition

| NAICS 67 industry groupings | Table | Industry no. | NAICS Canada 2007 codes included |
| :---: | :---: | :---: | :---: |
| Agriculture, fishing, hunting, trapping and support activities | 5-1 | 1 | 111, 112, 114, 1151, 1152 |

1. Excludes 8131 and 81394.

## Statistical methodology

## Survey design

Three sources of data were combined to form a census of all units in the population of interest. These consisted of:

- Annualized data from the Quarterly Survey of Financial Statements (QFS) obtained from the Industrial Organization and Finance Division at Statistics Canada.
- A survey of provincial or federal level government business enterprises (GBE) that operated in the business sector, with data obtained from the Public Sector Statistics Division at Statistics Canada.
- Administrative corporate taxation data in the form of the T2 Corporation Income Tax Return and the General Index of Financial Information (GIFI) obtained from the Tax Data Division at Statistics Canada.

The frame contains $1,318,397$ units included in our population of interest. The Quarterly Survey of Financial Statements (QFS) provided consolidated data for 3,280 of the larger enterprises. The survey of government business enterprises provided data for 115 enterprises. The remaining data was obtained through administrative corporate taxation data. Although the vast majority of data comes from the administrative source it is less significant in terms of their contribution to assets and operating revenues (see Text table1).

Text table 1
Contribution of assets and operating revenue by data source, 2009

|  | Enterprises | Portion of total assets | Portion of total operating revenues |
| :---: | :---: | :---: | :---: |
|  | number | percent |  |
| Data source |  |  |  |
| Quarterly survey of financial statements | 3,280 | 71.3 | 50.1 |
| Government business enterprises data | 115 | 7.6 | 3.8 |
| Administrative taxation data | 1,315,002 | 21.1 | 46.1 |
| Total | 1,318,397 | 100.0 | 100.0 |

## Collection and processing

For reference years 1999 and 2000, data collected from the Quarterly Survey of Financial Statements were annualized and then combined with data from a supplementary annual questionnaire that was mailed to survey respondents. The supplementary annual questionnaire was designed to obtain additional detailed information on operating expenses not available from the QFS. Beginning for reference year 2001, the supplementary questions were added to the Quarterly Survey of Financial Statements and the supplementary annual questionnaire was eliminated.

Information from all three data sources was provided in different formats with different sets of variables. In order to merge the data it was necessary to transform all three data sources into a common set of variables that contained a complete set of financial statement information. Certain details were omitted in the process due to the unavailability of data from all sources.

While QFS and GBE data were collected at the enterprise level, GIFI data, on the other hand, were collected at the non-consolidated single legal entity level. Data for single legal entities belonging to a corporate family (multi-legals) are then rolled up to the enterprise level.

## Edit and imputation

Several checks are performed on the data to verify internal consistency and identify extreme values. Imputation for complete non-response is performed by 2 general methods. The preferred and most common method makes use of historical information about the non-responding unit and current trends in principal characteristics of similar units. When historical information is not available, such as in the case of births, a donor of similar size and industry is substituted for the missing unit.

Text table 3 indicates the effect of imputation on operating revenues broken down by industry grouping.
Although government business enterprises account for only $7.6 \%$ of total assets and $3.8 \%$ of total operating revenues, they have a significant presence in certain industries. For example, GBE's hold $66.7 \%$ of the assets in the utilities industry and generated $52.8 \%$ of the operating revenues in the arts, entertainment and recreation industry (see Text table 2).
Text table 2
Contribution of assets and operating revenues by government business enterprises, by industry, 2009

| Fabricated metal product and machinery manufacturing | 25-1 | 16,330 | 60,944 | B |
| Computer and electronic product manufacturing | 26-1 | 2,688 | 41,708 | B |
| Electrical equipment, appliance and component manufacturing | 27-1 | 1,414 | 14,355 | B |
| Motor vehicle and trailer manufacturing | 28-1 | 601 | 65,338 | A |
| Motor vehicle parts manufacturing | 29-1 | 913 | 17,004 | B |
| Air, rail and ship products and other transportation equipment manufacturing | 30-1 | 1,171 | 23,743 | A |
| Furniture and related product manufacturing | 31-1 | 4,686 | 11,582 | B |
| Miscellaneous manufacturing | 32-1 | 7,189 | 11,059 | B |
| Food, beverage, tobacco and farm product wholesaler-distributors | 33-1 | 9,854 | 88,058 | B |
| Petroleum product wholesaler-distributors | 34-1 | 1,176 | 44,530 | C |
| Motor vehicle and parts wholesaler-distributors | 35-1 | 4,730 | 40,621 | B |
| Building material and supplies wholesaler-distributors | 36-1 | 9,536 | 59,151 | A |
| Farm, construction, forestry, mining and other industrial machinery and equipment and supplies wholesaler-distributors | 37-1 | 7,865 | 42,573 | B |
| Computer, communications and other machinery and equipment wholesaler-distributors | 38-1 | 10,152 | 55,139 | B |
| Miscellaneous wholesaler-distributors | 39-1 | 33,699 | 138,315 | B |
| Motor vehicle and parts dealers | 40-1 | 15,250 | 92,788 | A |
| Furniture, home furnishings, electronics and appliance stores | 41-1 | 14,502 | 26,174 | B |
| Building material and garden equipment and supplies dealers | 42-1 | 7,919 | 28,490 | A |
| Food and beverage stores | 43-1 | 19,679 | 121,772 | A |
| Gasoline stations | 44-1 | 9,146 | 22,841 | B |
| Clothing, department and other general merchandise stores | 45-1 | 23,486 | 87,154 | A |
| Miscellaneous retailers | 46-1 | 28,137 | 49,971 | A |
| Air transportation | 47-1 | 1,386 | 20,390 | B |
| Rail, truck, water and other transportation | 48-1 | 55,966 | 68,684 | B |
| Pipelines, warehousing and transportation support activities | 49-1 | 11,404 | 44,333 | A |
| Publishing industries (except internet) | 50-1 | 5,102 | 18,934 | B |
| Broadcasting, motion pictures, sound recording and information services | 51-1 | 15,475 | 16,371 | B |
| Telecommunications | 52-1 | 2,332 | 53,146 | A |
| Banking and other depository credit intermediation | 53-1 | 116 | 102,848 | A |
| Local credit unions | 54-1 | 12 | 12,980 | A |
| Non-depository credit intermediation | 55-1 | 6,743 | 30,315 | B |
| Central credit unions | 56-1 | 15 | 1,323 | B |
| Financial transactions processing, loan brokers and other activities related to credit intermediation | 57-1 | 2,392 | 3,725 | B |
| Securities and commodity contracts intermediation and brokerage | 58-1 | 3,221 | 10,593 | B |

Text table 3 - continued
Imputation Impact, 2009

| NAICS 67 industry | Table | Number of <br> enterprises | Operating <br> revenue |
| :--- | ---: | ---: | ---: |
|  |  | Imputation <br> impact on <br> revenue |  |

## Note(s): Imputation impact on revenue:

A: 0-10\% = Excellent;
B: $10-33 \%=$ Very good;
C: $33-50 \%=$ Good;
D: $50-60 \%=$ Acceptable;
E: 60\%+++ = Unreliable.

## Estimation

Since data is obtained from one of the three data sources for each enterprise in the population of interest, estimates are derived from the simple tabulation of data.

The combined survey results were analyzed before publication. Generally, this entails a detailed review of the individual responses (especially for the largest enterprises), a review of general economic conditions and trends, and comparisons with other relevant sub-annual surveys.

Due to certain financial reporting constraints, data for enterprises in the insurance industry could not be obtained through the administrative data source. Data for the industry are therefore derived using QFS weighted estimates rather than a census.

## Data accuracy

While considerable effort was made to ensure high standards throughout all collection and processing operations, the resulting estimates are inevitably subject to a certain degree of error. There are two categories of errors in statistical information - sampling errors and non-sampling errors. Non-sampling errors is the only type that applies to this program, given that there was no sampling process used to produce these estimates ${ }^{1}$.

Non-sampling errors can arise from a variety of sources and are difficult to measure and their importance can differ according to the purpose to which the data are being put. Among non-sampling errors are gaps in the information provided by corporations in their tax returns and errors in processing, such as data capture.

[^1]
## Reference period

The objective of this annual series is to cover business activity within a calendar reference period. Data derived from the Quarterly Survey of Financial Statistics approximate the calendar period. The Government business enterprise data reflect fiscal periods which often are governed by the April to March fiscal year of governments. However, beginning with the 2002 reference year, the government business enterprise data has been adjusted to reflect the calendar period. The administrative data used from Canada Revenue Agency (CRA) is based on financial statements filed along with annual income tax returns by corporations. Historically, data from fiscal periods ending at any time fromJanuary to December were included in the reference year. However, beginning with 2004 and 2003 revised, data from income tax returns for fiscal periods ending from April to March have been included in order to better represent business activity in the calendar period.

## Confidentiality

The confidentiality of the reported statistics is protected under the provisions of the Statistics Act. For this reason, statistics are released in aggregate form only, with no potential identification of individually reported information. The confidentiality provisions of the Statistics Act override the provisions of the Access to Information Act to guarantee with the confidentiality of reported data of individual respondents.

## Limitations of the data

To be valid for either time-series or cross-sectional analysis, the definitions of data must be consistent within time periods or across time periods. Put differently, the differences and similarities in data must reflect only real differences and not differences in the concepts or definitions used in preparing the data.

The ability to use the data for analysis depends on the conceptual framework in which the data is being used.
These data are consistent with the Generally Accepted Accounting Principles (GAAP) of the Canadian Institute of Chartered Accountants. As such they do not agree with the concepts of the CSNA for example. If the GAAP concepts are appropriate for the application of the data then there may still be some problems of consistency (between units or over time) for items where GAAP does not prescribe a particular treatment or allow some latitude.

One of the general problems with GAAP for some uses is that it prescribes a historical cost treatment of assets (i.e. their cost at the time of acquisition). This means that comparisons over time and across industries may not be valid for balance sheet data or for ratios derived from the Balance Sheet.

## Definitions of key financial variables

## Balance sheet

The Balance sheet is comprised of total assets, liabilities, and equity.

- Total assets are the sum total of economic resources in which the entity exercises a certain control. Included are cash and deposits; accounts receivable and accrued revenue; inventories; investments and accounts with parents, subsidiaries and affiliates; portfolio investments; loans given to other enterprises; and capital assets.
- Liabilities are the sum total of the entities obligations. Included are accounts payable and accrued liabilities; income taxes payable; borrowings; and deferred income taxes.
- Equity is the accumulated undistributed earnings derived from all sources, including capital or extraordinary gains and losses.

## Income statement

The Income statement includes revenues; expenses; gains and losses; income taxes; and various profit measures.

- Operating revenue includes revenues from the sales of goods and services; rental and operating lease revenue; and revenue from commissions, franchise fees, and royalties.
- Operating expense includes the cost of goods and services used as inputs into production; wages and salaries; employer portion of employee benefits; indirect taxes; and depreciation, amortization and depletion of buildings, machinery and natural resources.
- Operating profit is the difference between Operating revenues and Operating expenses.
- Net profit is obtained from Operating profit by subtracting expenses for interest payments and income tax; and adding revenues from interest and dividends received gains (losses) on the sales of assets, equity in affiliates' earnings, and extraordinary gains.

## Reconciliation of profit to taxable income and taxes payable

The Reconciliation of profit to taxable income and taxes payable illustrates the adjustments required to compute taxable income and taxes payable.

- Taxable Income (tax base) is the amount of income subject to tax in the current year after application of prior year losses.
- Taxes include federal and provincial taxes levied under the Income Tax Act.

## Operating profit margin

Operating profit is the net result of the principal business activities of a firm. For non-financial industries, operating profits exclude interest and dividend revenue and capital gains/losses. For financial industries, interest and dividend revenue, capital gains/losses and interest paid on deposits are included in the calculation of operating profits. This ratio indicates management's ability to generate earnings from the principal business activities of a firm. The ratio is expressed as a percentage of operating revenue.

## Formula

Operating profit margin:
Operating profit
Total operating revenue

## Return on capital employed

This ratio measures profitability and how well management has employed the assets, by calculating the percentage return on total capital provided by the owners and lenders (creditors). The earnings figure is calculated before taking into account after-tax interest expense (payments to lenders) and dividends (payments to owners). The ratio indicates how many cents are returned to every dollar of capital invested.

## Formula

Return on capital employed:

## Profit before extraordinary gains + interest on borrowings net of tax

Borrowings + loans and accounts with affiliates + total equity

## Return on equity

This ratio measures the level of return to the owners (investors) and it represents their measure of profitability. The earnings figure is the after-tax profits, including a deduction for interest expense (payments to lenders). It is the net profit available to the owners (investors) before extraordinary gains. The ratio indicates how many cents are returned to every dollar invested by the owners.

## Formula

Return on equity:
Profit before extraordinary gains
Total equity

## Debt to equity

This ratio examines the relationship of debt (loans, bonds, debentures) to shareholders' equity. It compares the relative size of debt to resources invested by the owners. It indicates the extent to which a firm relies on borrowed funds to finance its operations. Firms that rely heavily on borrowed funds are said to be highly leveraged.

## Formula

Debt to equity:

## Borrowings + loans and accounts with affiliates

Total equity

## Working capital

This ratio examines the relationship of current assets to current liabilities. It measures the ability to pay short-term debts easily when they become due.

## Formula

Working capital:
Current assets
Current liabilities

## Receivable turnover

This ratio provides a measure of the quality and relative size of accounts receivable. It indicates the effectiveness of a firm's credit policy by calculating how often accounts receivable are converted into cash during the year. The ratio divides the outstanding receivables figure at year-end into the year's sales.

## Formula

Receivable turnover:
Sales of goods and services
Accounts receivable

## Inventory turnover

This ratio is a measure of the adequacy of inventory for the volume of business and how efficiently management turns over the inventory in relation to other firms in the industry. The ratio divides the year-end inventory into the cost of sales for the year.

## Formula

Inventory turnover:

$$
\frac{\text { Cost of sales }}{\text { Inventory }}
$$

## Quick ratio

This ratio, a refinement of the working capital ratio, examines ability to pay short term debts when they become due. It relates current assets minus inventories to current liabilities.

## Formula

Quick ratio:

Current assets - Inventories
Current liabilities

## Income Taxes to Taxable Income

This ratio, another measure of the tax rate, equals the rate of federal and provincial income taxes to the tax base.

## Formula

Income taxes to taxable income:
Federal part 1 tax payable + provincial income tax
Tax base

[^0]:    1. Estimates on NAICS basis are provided for non-financial industries for 1998
[^1]:    1. with the exception of the insurance industry
