## Acknowledgements

The Centre for Education Statistics Division at Statistics Canada sincerely appreciates the continued support and collaboration from the Departments/ Ministries of Education from each province and territory and their employees who work diligently to collect and compile data for the Elementary-Secondary Education Survey (ESES) in a timely and thorough fashion.

Statistics Canada maintains a close relationship with the Canadian Education Statistics Council, particularly the Strategic Management Committee (SMC) and seeks their on-going advice and guidance on the survey.

The Centre for Education Statistics Division also appreciates the efforts of Jonathan Ellison, Chief of the Institutional Surveys Section, for his guidance and oversight, Elaine Tremblay for her technical assistance with the data tables and charts, Danielle Baum and Rosemarie Andrews for the production of PDF and HTML dissemination tables and Isabelle Menard, Acting Manager, Dissemination Unit.

## Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Appendix 2 Definitions ..... 50
Cumulative index ..... 54

## Note to readers

1. The number of graduates is at the end of the school year, while population estimates are as of July 1 of the corresponding school year. Late graduates are included in the calculations. The graduation rate should not be used to infer a dropout rate. The four programs that comprise the graduate pool are: regular programs for youth, adult upgrading programs (GED), vocational programs for youth and vocational programs for adults. Due to the small population in the three territories, changes in the number of graduates may yield high percentage changes from year to year.
2. The graduation rate used by the Elementary Secondary Education Survey (ESES) is aligned with the Organization for Economic Cooperation and Development (OECD) requirements in order to ensure that Canadian graduation rate data can be compared with other nations. It is calculated by dividing the number of graduates by the average of the 17 and 18 year old population:
Graduation rate $=$ Graduates (High school graduates (youth and adults) and Vocational program graduates (youth and adults))/ Average number of the 17 and 18 year-old population

Due to differences in reporting, comparing graduation rate data between jurisdictions should be done with caution.
3. The term "educator" refers to teachers, school administrators and pedagogical support.
4. Note that the student-educator ratio is not the same as the studentteacher ratio. The student-educator ratio includes personnel listed in Note 3.
5. Data Table 29 (Total expenditures in public elementary and secondary schools as a percentage of total expenditures by provincial and local governments) and Data Table 35 (Total expenditures by provincial and local governments) have been discontinued until 2014 when this data is expected to be produced again.
6. All data, including financial data, are subject to revision.

. not available for any reference period

1. All jurisdictions, 2005/2006 to 2009/2010. (Public School) Data are available for English second language programs for Québec. Data are available for French second language programs for the other provinces.
2. As of $2008 / 2009$, several changes were implemented to the French as a Second Language (FSL) program. One of the entry points for French Immersion in the public system was changed from Grade 1 to Grade 3. A new methodology was introduced to replace Core French, and this new program began at Grade 4 instead of Grade 1 with a significant concentration of FSL instruction at Grade 5.
3. 2005/2006 data are for students in grades 3 to 11 . Data for 2006/2007 to 2009/2010 includes students from grades 1 to 11.

1. Historical revisions have been made to this table to exclude students who graduated from Adult Learning Centres registered under the Adult Learning Centres Act, effective July 2001. This has the effect of understating the number of graduates and the associated graduation rate for Manitoba as compared to other provinces and jurisdictions and should not be considered directly comparable.
2. The number of graduates in the final year is understated by $2-3 \%$ because some schools have not submitted course information before the data collection cutoff for this report.

## Appendix 2

## Definitions

## Enrolments

Number of students enrolled in public schools operated by school boards or the province in September (or as close as possible thereafter) of the school year. It includes all students in publicly funded schools (graded and ungraded), provincial reformatory or custodial schools, and other students recognized and funded by a province or territory. It excludes correspondence or distance education enrolments, private school students, independent school students or students in schools financed by federal departments (e.g. the Department of National Defense and Aboriginal Affairs and Northern Development Canada (AANDC)).

Includes other non-standard enrolment including students receiving educational services (if recognized by the province) and for schools and/or school districts that receive funding in a unique manner. They may be non-graduates who are taking only a few courses required to complete graduation. For example, a student who is enrolled in only $25 \%$ of a 'regular' course load and for whom the school or school district receives only $25 \%$ of the usual funding. This category may not apply to some provinces or territories.

## Headcount enrolment

Defined as the number of students enrolled in September (or as close as possible thereafter) of the school year.

## Full Time Equivalent (FTE) enrolment

Defined as the number of full-time students enrolled in September (or as close as possible thereafter) of the school year, plus the sum of part-time students according to the time fraction spent in the classroom and for which students are funded. For example, junior kindergarten and kindergarten students taking a half-time program and where a half-time program is being funded, the FTE enrolment would be the headcount enrolment divided by two, which is 0.5 . If a student is only taking a quarter of the usual course load and is funded on that basis, the FTE enrolment would be the headcount enrolment divided by four, which is 0.25 .

## Minority and Second Language Programs

## Regular Second Language Programs

Enrolments in programs where French is taught to Anglophone students or English is taught to Francophone students as a "subject" in the regular course offerings. One or more additional subjects can also be taught in the student's second official language but second language instruction must total less than $25 \%$ of all instruction time.

## Second Language Immersion Programs

Enrolments in programs where French is the language of instruction for Anglophone students or English is the language of instruction for Francophone students. Instruction time in the student's second official language is more than $25 \%$ of all instruction time.

## Minority Language Programs

Enrolments in programs for students from the official language linguistic minority in the relevant province or territory (French outside Québec, English in Québec). These programs allow children in the linguistic minority to pursue their education in their first official language.

## Graduates

Graduates of general training programs offered to similarly aged young students. Includes first time graduates only.

Includes graduates in General Education Development (GED), Adult Basic Education (ABE) and other equivalency programs. Excludes any graduates of upgrading programs offered at the postsecondary level.

Includes graduates in all professional and technical training programs. Excludes any graduates of vocational programs offered at the postsecondary level.

## Graduation rate

The number of graduates is as of the end of a school year while the population estimates are as of July 1 of the corresponding school year. The graduation rate should not be used to infer a dropout rate.

The graduation rate is calculated by dividing the number of graduates with the average of the 17 and 18 year-old population:

Graduation Rate $=$ Total number of secondary graduates / [(17 year old population +18 year-old population)/2]

## Educators

Includes all employees in the public school system (either school-based or school district-based) who belong to one of the three following categories: teachers, school administrators and pedagogical support.

It includes all educators in regular public schools, provincial reformatory or custodial schools, and other students recognized and funded by a province or territory. It excludes correspondence or distance programs, private schools,or independent schools financed by federal departments (e.g. the Department of National Defense and Aboriginal Affairs and Northern Development Canada (AANDC)).

Please note that all teachers in regular programs for youth, adult upgrading programs and vocational programs for youth and adults are also included. Any programs offered at the postsecondary level are excluded.

## Teachers

This category includes personnel involved in direct student instruction in a group or one-on-one basis. Chairpersons of departments who spend the majority of their time teaching are also reported in this category. Personnel temporarily not at work (e.g. for reasons of illness or injury, maternity or parental leave, holiday or vacation) are also included.

## Includes:

- Classroom teachers
- Special education teachers
- Specialists (music, physical education)
- Other teachers who work with students as a whole class in a classroom, in small groups in a resource room, or one-on-one inside or outside a regular classroom

## Excludes:

- Teacher aides, student teachers
- Other personnel who do not get paid for their employment.

## School Administrators

This category covers professional teaching personnel who provide services to students to support their instruction program. It includes educational assistants, paid teacher's aides, guidance counsellors and librarians.

## Excludes:

- Higher level management
- Receptionists, secretaries, clerks and other staff who support the administrative activities of the school

## Pedagogical support

This category covers professional teaching personnel who provide services to students to support their instruction program. It includes educational assistants, paid teacher's aides, guidance counsellors and librarians.

## Excludes:

- Health and social support which should be reported under 'other than educators"

## Headcount educator

Defined as the number of educators on September the 30th (or as close as possible thereafter) of the school year who are responsible for providing services to the headcount enrolment students.

## Full Time Equivalent (FTE) educator

Defined as the number of full-time educators on September the 30th (or as close as possible thereafter) of the school year, plus the sum of part-time educators according to their percentage of a full-time employment allocation (determined by the province or territory). For example, if a normal full-time work allocation is ten months per year, an educator who works for six months of the year would be counted as 0.6 of a Full Time Equivalent (FTE) or an employee who works part time for ten months at $60 \%$ of full time would be 0.6 of an FTE.

# Culture, Tourism and the Centre for Education Statistics Research Papers Cumulative index 

Statistics Canada's Division of Culture, Tourism and the Centre for Education Statistics develops surveys, provides statistics and conducts research and analysis relevant to current issues in its three areas of responsibility.

The Culture Statistics Program creates and disseminates timely and comprehensive information on the culture sector in Canada. The program manages a dozen regular census surveys and databanks to produce data that support policy decision and program management requirements. Issues include the economic impact of culture, the consumption of culture goods and services, government, personal and corporate spending on culture, the culture labour market, and international trade of culture goods and services. Analysis is also published in Focus on Culture (87-004-XIE, free, http://www.statcan.ca/bsolc/english/ bsolc?catno=87-004-X).

The Tourism Statistics Program provides information on domestic and international tourism. The program covers the Canadian Travel Survey and the International Travel Survey. Together, these surveys shed light on the volume and characteristics of trips and travellers to, from and within Canada.

The Centre for Education Statistics develops and delivers a comprehensive program of pan-Canadian education statistics and analysis in order to support policy decisions and program management, and to ensure that accurate and relevant information concerning education is available to the Canadian public and to other educational stakeholders. The Centre conducts fifteen institutional and over ten household education surveys. Analysis is also published in Education Matters (81-004-XIE, free, http://www.statcan.ca/bsolc/english/bsolc?catno=81-004-X), and in the Analytical Studies Branch research paper series (11F0019MIE, free, http://www.statcan.ca/bsolc/english/bsolc?catno=11F0019M).
