Preface

The *Fiscal Reference Tables* provide annual data on the financial position of the federal, provincial-territorial and local governments. The data are presented on both a Public Accounts basis—corresponding to the accounting conventions used to report financial information to the respective legislatures—as well as on a National Accounts basis—as prepared by Statistics Canada and the Organisation for Economic Co-operation and Development.

The Fiscal Reference Tables for the Federal Government —Public Accounts have been revised to reflect the reclassification of certain figures to conform to the current year's presentation.

For information or clarification, please contact Brian Pagan at 613-995-6391, Fiscal Policy Division, Department of Finance, Ottawa, Ontario, K1A 0G5.

⁽¹⁾ In 1996–97, the Canada Health and Social Transfer (CHST) was introduced to replace the Canada Assistance Plan, education support, and insurance and medical care. Since April 2004, the CHST has been divided into the Canada Health Transfer and the Canada Social Transfer.

⁽²⁾ Certain comparative figures have been reclassified to conform to the current year's presentation.

Due to a break in the series following the introduction of full accrual accounting, data from 1983–84 onward are not directly comparable with earlier years.

Estimates are based on an update of the methodology developed in the Department of Finance working paper "Fiscal Policy and the Business Cycle: A New Approach to Identifying the Interaction" (2003), Stephen Murchison and Janine Robbins. In particular, this update incorporates the cyclical impact of commodity prices in the calculation of the cyclical component and a treatment of the Employment Insurance Account that is reflective of the current regime.

⁽¹⁾ For some specific years, temporary counter-cyclical fiscal measures (e.g. most temporary measures included in the stimulus phase of the Economic Action Plan) as well as punctual factors such as one-time gains or expenses (e.g. related to sales tax harmonization), are included in the cyclical component of the balance and therefore excluded from the cyclically-adjusted budgetary balance.

Due to a break in the series following the introduction of full accrual accounting, data from 1983-84 onward are not directly comparable with earlier years.

⁽¹⁾ Includes the impacts of the joint trusteeship of pension plans, restructuring exit expenses, negotiating framework incentive payments and climate action dividend.

Due to a break in the series following the move to fully comply with generally accepted accounting principles (GAAP), data from 1998–99 onward are not directly comparable with earlier years.

Sources: Statistics Canada, Sector Accounts (Table 380-0007); Government of Canada Budgetary Revenues and Expenditures (Table 183-0014); Department of Finance.

Estimates are based on an update of the methodology developed in the Department of Finance working paper "Fiscal Policy and the Business Cycle: A New Approach to Identifying the Interaction" (2003), Stephen Murchison and Janine Robbins. In particular, this update incorporates the cyclical impact of commodity prices in the calculation of the cyclical component and a treatment of the Employment Insurance Account that is reflective of the current regime.

⁽¹⁾ For some specific years, temporary counter-cyclical fiscal measures (e.g. most temporary measures included in the stimulus phase of the Economic Action Plan) as well as punctual factors such as one-time gains or expenses (e.g. related to sales tax harmonization) are included in the cyclical component of the balance and therefore excluded from the cyclically-adjusted budgetary balance.
