Department of Fisheries and Oceans. 2011. Quebec Marine
Fisheries - Annual Statistics Review 2008-2009, 222 p.

Foreword

The hard times that the Quebec fishing industry has been experiencing in recent years underscore the importance of producing reliable statistics that are as up to date as possible. The requests for information that we receive have not only become more numerous and more pressing, but above all more complex. This is the background to this annual statistical report.

The twenty-fourth edition of the Annual Statistics Review of Quebec marine fisheries, produced by the Department of Fisheries and Oceans (DFO), paints a detailed portrait of the industry in 2008 and 2009. In a nutshell, in this last year, the volume of landings totalled 56,363 metric tons and had an associated value of close to 135 million dollars and in 2009 the volume of landings totalled 59,154 metric tons and had an associated value of close to 120 million dollars.

In the present edition, you will find a section entitled: “**Statistical Profile of Seal Fishery**”. In this section, we are presenting an overview of the activities related to seal fishery in the Quebec Region. You will find information concerning the number of licences issued per type and maritime areas as well as information concerning the landings of harp seal by fleet, and finally, data relating to the seal fishery observation activities.

A supplement entitled “Quebec Marine Fisheries: 2008 and 2009 Highlights”. This handy, comprehensive reference tool was prepared jointly by the Statistics and Licensing Division and the Policy and Economics Branch to provide a snapshot of the state of Quebec’s fishing industry in 2008 and 2009.

The Statistics and Licensing Division, which is responsible for this publication, is mandated to compile, process, analyse and publish data on Quebec marine fisheries. The statistics produced are of vital importance, first, to assess and highlight the economic value of the industry, and second, to provide managers and scientists with a basis for the various analyses required for effective fishery resource management.

It is important to note that a federal-provincial agreement between the Department of Fisheries and Oceans (DFO) and the Quebec Department of Agriculture, Fisheries and Food (MAPAQ – Ministère de l’Agriculture, des Pêcheries et de l’Alimentation du Québec) has laid the groundwork for greater coordination in collecting data. It aims to eliminate duplication of effort by public servants seeking information from fishing industry players and to promote intergovernmental data sharing.

The three types of data in this report have been obtained in different ways. Catch data are based on the sales transactions between fishers and fish buyers when each vessel lands its catch. For data on fishing effort, used by scientists in their research work, we rely upon the excellent cooperation of skippers, who provided information on fishing grounds, type of gear, target species and species caught, among other things. Finally, statistics on fishermen, fishing fleets and licences come from the licensing process.

The quality of the data in this review depends on (a) the quantity of data that our system gathers from fishermen, buyers and processing plants, and (b) the accuracy of the data. With limited resources, the Statistics and Licensing Division does everything within its power to check the data it gathers, but cannot guarantee that everyone involved submitted all their data. We turn to resource management programs such as enterprise allocations (quota licences), for which strict monitoring methods exist, to ensure that data entered into the system are consistent with observations of landings by dockside monitors.

This does not however apply to every fishery. In addition to that, consultations with Inspectors, Protection Officers, Policy and Economics Branch representatives as well as with industry representatives further enable Statistics and Licensing Division staff to produce reliable, representative data.

The descriptive narratives accompanying the tables and figures are not intended as an in-depth analysis of the state of the marine fisheries in Quebec in 2008 and 2009.

The publication of this annual review of Quebec marine fisheries has been made possible by the hard work and rigour of the Statistics and Licensing Division staff and groups in Sept Îles, Gaspé and Cap-aux-Meules. We would also like to thank the Policy and Economics Branch for its important contribution.

We wish to take this opportunity to thank the fishermen, buyers and producers for their ongoing cooperation; knowing that supplying statistics is an extra burden for them.

All of us in Statistics and Licensing Division hope that you enjoy reading this annual review and welcome any comments or ideas that might help us improve it.

List of tables

WORK FORCE IN QUEBEC

- 1 Number of active registered licence holders for 2008 and 2009 by sector (according to port of landing) by age group
- 1B Number of active licence holders in 2008 and 2009 by sector and by fishermen status
- 2 Number of registered vessels in 2008 and 2009 by sector and length group (according to port of landing)
- 2A Number of vessels in all Quebec sectors by tonnage and length group in 2009
- 2B Number of active vessels in Quebec in 2008 and 2009 by sector and length group (according to port of landing)
- 2C Number of active Quebec vessels in Quebec in 2008 and 2009 by sector and length group (according to port of landing)
- 3 Buyers operating in Quebec in 2008 and 2009 by sector

RESOURCE ACCESSIBILITY

- 4 Number of commercial fishing licences issued by sector in 2008 and 2009 for selected species (excluding seal fishery licences)
- 4A Number of seal fishery licences issued in 2008 and 2009, by sector
- 5 Number of commercial fishing licences issued in Quebec in 2009 for the main species (excluding seal fishery licences)
- 6 Number of commercial fishing licences issued on the Gaspé Peninsula in 2009 for the main species (excluding seal fishery licences)
- 7 Number of commercial fishing licences issued on the North Shore in 2009 for the main species (excluding seal fishery licences)
- 8 Number of commercial fishing licences issued in the Magdalen Islands in 2009 for the main species (excluding seal fishery licences)
- 9 Fishing quotas applicable to Quebec, 2009
(excluding supplementary purchase slips)

List of tables

- 10A Weekly crab landings by zone
(excluding supplementary purchase slips), 2009
- 10B Weekly shrimp landings by shoal, 2009
- 10C Weekly cod landings by division for the main mobile gears groups
(excluding supplementary purchase slips), 2009
- 10D Weekly cod landings, by division, for all fixed gears
(excluding supplementary purchase slips), 2009
- 10E Weekly lobster landings by zone, 2009

LANDINGS IN QUEBEC

- 11 Landings in Quebec in 2008 and 2009
- 11A Landings in Quebec by vessels under 35' in 2008 and 2009
- 11B Landings in Quebec by vessels 35' to 44'11" in 2008 and 2009
- 11C Landings in Quebec by vessels 45' to 64'11" in 2008 and 2009
- 11D Landings in Quebec by vessels 65' and over in 2008 and 2009
- 11E Supplementary purchase slips in Quebec in 2008 and 2009
- 12 Monthly landings in Quebec by species, 2008 and 2009,
all administrative sectors (Quantity)
- 12A Monthly landings in Quebec by species, 2008 and 2009,
all administrative sectors (Value)
- 13 Landings in Quebec by type of fishing gear used
in 2008 and 2009 (Quantity and value)
- 14 Landing average price by species in Quebec
(excluding supplementary purchase slips), 2008 and 2009
- 15 Quebec - Ten most important municipalities of landing
in 2008 and 2009 (Quantity and Value)
- 16 Landings in Quebec by non Quebec boats
in 2008 and 2009 (Quantity)
- 16A Value of landings in Quebec by non Quebec boats
in 2008 and 2009

List of tables

- 17 Landings outside of Quebec by Quebec boats
in 2008 and 2009 (Quantity)
- 17A Value of landings outside of Quebec by Quebec boats
in 2008 and 2009 (Value)

DISTRIBUTION OF LANDINGS BY SECTOR

- 18 Landings in the Gaspé Peninsula in 2008 and 2009
- 18A Landings in the Gaspé Peninsula by vessels under 35'
in 2008 and 2009
- 18B Landings in the Gaspé Peninsula by vessels 35' to 44'11"
in 2008 and 2009
- 18C Landings in the Gaspé Peninsula by vessels 45' to 64'11"
in 2008 and 2009
- 18D Landings in the Gaspé Peninsula by vessels 65' and over
in 2008 and 2009
- 18E Supplementary purchase slips in the Gaspé Peninsula in 2008 and 2009
- 18.1 Monthly landings in the Gaspé Peninsula by species,
2008 and 2009 (Quantity)
- 18.1A Monthly landings in the Gaspé Peninsula by species,
2008 and 2009 (Value)
- 19 Landings, Gaspé North, 2008 and 2009, Bic to Rivière-La-Madeleine
- 20 Landings, Gaspé East, 2008 and 2009, Grande-Vallée to Cap Gaspé
- 21 Landings, Gaspé South, 2008 and 2009, Cap-aux-Os
to Port Daniel
- 22 Landings, Baie-des-Chaleurs, 2008 and 2009, Shigawake
to Matapédia
- 23 Landings average price by species in the Gaspé Peninsula
(excluding supplementary purchase slips), 2008 and 2009
- 24 Landings on the North Shore in 2008 and 2009

List of tables

- 24A Landings on the North Shore by vessels under 35' in 2008 and 2009
- 24B Landings on the North Shore by vessels 35' to 44'11" in 2008 and 2009
- 24C Landings on the North Shore by vessels 45' to 64'11" in 2008 and 2009
- 24D Landings on the North Shore by vessels 65' and over in 2008 and 2009
- 24E Supplementary purchase slips on the North Shore in 2008 and 2009
- 24.1 Monthly landings on the North Shore by species, 2008 and 2009 (Quantity)
- 24.1A Monthly landings on the North Shore by species, 2008 and 2009 (Value)
- 25 Landings, Upper North Shore, 2008 and 2009, Tadoussac to Gallix
- 26 Landings, Middle North Shore, 2008 and 2009, Sept-Iles to Pointe Parent, including Anticosti Island
- 27 Landings, Lower North Shore, 2008 and 2009, Kégaska to Blanc-Sablon
- 28 Landings average price by species on the North Shore (excluding supplementary purchase slips), 2008 and 2009
- 29 Landings in the Magdalen Islands in 2008 and 2009
- 29A Landings in the Magdalen Islands by vessels under 35' in 2008 and 2009
- 29B Landings in the Magdalen Islands by vessels 35' to 44'11" in 2008 and 2009
- 29C Landings in the Magdalen Islands by vessels 45' to 64'11" in 2008 and 2009
- 29D Landings in the Magdalen Islands by vessels 65' and over in 2008 and 2009
- 29E Supplementary purchase slips in the Magdalen Islands in 2008 and 2009

List of tables

- 29.1 Monthly landings in the Magdalen Islands by species
2008 and 2009 (Quantity)
- 29.1A Monthly landings in the Magdalen Islands by species
2008 and 2009 (Value)
- 30 Landings average price by species in the Magdalen Islands
(excluding supplementary purchase slips), 2008 and 2009

ATLANTIC COAST LANDINGS

- 31 Landings in New Brunswick, 2008 and 2009
- 32 Landings in Nova Scotia, 2008 and 2009
- 33 Landings in Newfoundland, 2008 and 2009
- 34 Landings in Prince Edward Island, 2008 and 2009
- 35 Landings on the Atlantic Coast, 2008 and 2009
- 36 Number of commercial fishermen on the Atlantic Coast in 2008 and 2009,
by province and fishermen category
- 37 Number of commercial fishermen on the Atlantic Coast in 2008 and 2009,
by administrative region and fishermen category
- 38 Number of vessels on the Atlantic Coast in 2008 and 2009,
by province and length group
- 39 Number of vessels on the Atlantic Coast in 2008 and 2009,
by administrative region and length group
- 40 Number of commercial fishing licences issued in 2008 and 2009, on the
Atlantic Coast, by province and for selected species
- 41 Number of commercial fishing licences issued in 2008 and 2009, on the
Atlantic Coast, by administrative region and for selected species

Methodology

The data in this publication are taken from the statistical system of Fisheries and Oceans Canada, Quebec Region. The system consists of three components, all of which were used to produce this report: catch-effort-quotas, people-vessels-licences, and processing plant production and workforce.

Data on people, vessels and licences come from licensing paperwork. The number of licence holders corresponds to the number of people registered with the Department of Fisheries and Oceans, who operated authorized fishing gears under the terms of a commercial fishing licence in 2008 and 2009. The number of vessels is the number of fishing boats licensed in 2008 and 2009. The number of licences is the total number of fishing licences issued, but not necessarily active, in 2008 and 2009.

Data on fish and shellfish landings are provided by commercial buyers, who are required to provide us with a copy of the DFO form to record their purchases from fishermen. Each transaction of this type generally corresponds to one fishing trip. The Enterprise Allocation Monitoring Program, initiated in 1989, now covers some mobile and fixed gear vessels less than 64' 11" and some 65'-100' long, for groundfish in areas 4RST and 3PN. The program also affects all crabbers and shrimpers, as well as many scallopers and surf clam fishers. For these fleets, an additional check has to be carried on the data supplied to the Statistics Service.

Furthermore, to estimate the volume of fish eaten by commercial fishermen and their families, the volume of fish sold directly to the public or used as bait and processed by fishermen themselves, we use an estimation methodology which takes into consideration socio-economic elements, data provided by fisheries officers and resource managers as well as information obtained from fishermen's associations. **This type of data, called “supplementary purchase slips” is being included only in tables where we added a note to that effect.**

Data are gathered, coded and entered locally in each of the maritime sectors: Gaspé, Sept Îles and Cap aux Meules. The concepts and definitions used meet the standards set by the Statistical Coordinating Committee for the Atlantic Coast (STACAC) and are thus compatible with the systems of the other Atlantic regions (the Gulf, Nova Scotia and Newfoundland).

Papers published by the STACAC provide more information on the concepts and definitions used here (see reference list). Some of them are available from Statistics Service at the Quebec City Regional Office.

Figures in the tables on landings have been rounded, so they may not add up to the totals shown.

It should also be noted that some data on salmon, eel, smelt, tomcod, capelin and sturgeon landings were supplied by the Quebec Department of Agriculture, Fisheries and Food (MAPAQ - Ministère de l'Agriculture, des Pêcheries et de l'Alimentation du Québec).

Another important point is that until 1992, seal fishery licences were issued in the maritime sectors and did not figure in the publication of the various statistical tables on fishing licences. In 1993, the policy on licensing for the seal fishery was amended to make it much more like the ones for other types of licences, so seal fishery licences are now counted the same way as other existing licences. To avoid skewing the trend analysis, we decided to publish the seal fishery data separately. Statistical table 4A gives the number of seal fishery licences according to quite specific parameters.

It should be noted that the process of gathering data at the source is the result of the Federal-Provincial Harmonization Agreement on the Quebec Marine Fisheries, the main objective of which was to eliminate duplication of effort in this area.

Maritime territory

Quebec maritime territory begins at the eastern tip of Île d'Orléans and is divided into four sectors.

The St. Lawrence Sector extends from Anse à Gilles to Cap à l'Original (on the south shore) and from Cap Tourmente to Baie Sainte Catherine (on the north shore). The North Shore Sector lies between Tadoussac and Blanc Sablon (including Anticosti Island). The Gaspé Sector begins at Le Bic and stops at Matapedia. The fourth sector comprises the Magdalen Islands. For more details, refer to the map titled "Maritime Sectors in Quebec" on next page.

On another basis, the Quebec Region maritime territory is subdivided into twenty-eight statistical districts. These districts are defined by limits represented by geographic points and are used in most statistical systems. This standardization makes it possible to compare the data that DFO has been collecting in Quebec since 1984 with those published by the Bureau de la statistique du Québec for previous years.

The twenty-eight statistical districts, with their geographic limits, are listed in an Appendix.

MARITIME SECTORS IN QUEBEC

Conventional Symbols

o	Less than half of the smallest unit used
-	Nil or zero
%	Proportion of a quantity to another expressed as a percentage
Var. %	Percentage variation indicating the size of increases or decreases from one year to the next and calculated as follows:
Var. % =	$\frac{\text{figure from target year} - \text{figure from preceding year}}{\text{figure from preceding year}} \times 100$
N.B.:	All variations presented in this review refer to the years 2008 and 2009 only.
N/A	Information not applicable
N/AV	Information not available
MT	Metric ton
...	Not applicable because of different units
◇	Not publishable, because there were fewer than three buyers or fewer than three fishermen for this fishery (protected information)

Definitions of terms used in this publication

Active fisherman	Fisherman or fisherman's helper who has made at least one landing in the season.
Active fishing enterprise	Fishing enterprise that has made at least one landing in the season.
Active registered licence holders	Any person registered with BAPAP (Bureau d'accréditation des pêcheurs et des aides-pêcheurs) who uses fishing gear authorized by a commercial fishing licence. This definition does not cover fishermen helpers.
Active vessel	A vessel for which at least one landing in the reference year has been counted.
Actual deviation	Difference between data for the year under consideration and the preceding year.
Administrative regions	Regions defined by DFO. In this publication, we refer to the Atlantic administrative regions: Quebec Region: Encompasses the province of Quebec Gulf Region: Encompasses coastal areas of the Gulf in New Brunswick and Nova Scotia, as well as the province of Prince Edward Island Nova Scotia: Encompasses the waters of the Bay of Fundy, the Scotian Shelf and Georges Bank which is the ocean side of Nova Scotia Newfoundland Region: Encompasses the geographic sector of the same name.
Atlantic Coast	Covers the Quebec, Gulf, Nova Scotia and Newfoundland regions.
Average Price	Total value of all landings sold divided by the total weight landed.

Buyer	Person or firm that commercially purchases fish directly from fishermen.
Certified plant	Any place that fish is processed for export or stored before exporting.
“Commercial fisherman” (southern Gulf)	In the Gulf, a commercial fisherman is a registered fisherman who does not take part in the fisheries fished by vessels with an LOA of 15.2 m (50') or longer and does not meet the requirements of a bona fide full-time or part-time fisherman.
Commercial fishing licence	Designate an instrument by which the Minister of Fisheries and Oceans authorizes, pursuant to his discretionary authority under the Fisheries Act, grants permission to a person including an Aboriginal organization to harvest certain species of fish or marine plants subject to the conditions attached to the licence. This is in no sense a permanent permission; it terminates upon expiry of the licence. The licensee is essentially given a limited fishing privilege rather than any kind of absolute or permanent “right or property”.
Conversion factor	Ratio used to convert the weight of a product or form of a product on landing into equivalent live weight.
Core	<p>In order to qualify as a member of the core group, a person must meet the following criteria:</p> <ul style="list-style-type: none"> - be the head of an active fishing enterprise, i.e., have fished full time for the previous two years (1994 and 1995) and have a vessel in the fishery; and - hold either two key licences, OR one key licence and in two of the years 1993, 1994 and 1995, have fished for 10 weeks with minimum reported landings of \$5,000 from their own licences for vessels less than 35' and of \$10,000 from their own licences for vessels longer than 35', OR one key licence and, in two of the years 1993, 1994 and 1995, have earned at least 75% of their income from fishing

License holders who meet the eligibility criteria for the Atlantic Groundfish Strategy (TAGS) or the Northern Cod Adjustment and Recovery Program (NCARP) may use the TAGS or NCARP qualifying years instead.

Key licences are defined as shrimp, crab, lobster, groundfish other than handline, scallop, herring and, on the Lower North Shore, capelin.

Division	NAFO (Northwest Atlantic Fisheries Organization) divisions.
Fishing day	Day in which fishing gear was used with the goal of catching fish to sell.
Gear	Any equipment used to catch fish.
Gulf of St. Lawrence	Coastal areas of the Gulf in New Brunswick, Nova Scotia, western Newfoundland and southern Labrador, as well as Prince Edward Island and Quebec.
ITQ	Individual transferable quota
Landed value	Monetary value of the recorded landed quantity, that is, the landed quantity multiplied by the unit price, or the value supplied by the buyer.
Landing	Quantities of fish and shellfish (molluscs and crustaceans) landed, excluding discards, measured as live weight.
Live weight	Weight (round weight) of a live fish, which can be estimated, if necessary, on the basis of the form at landing using a standard conversion factor.
Non-core	Any fisherman not qualified for membership in the core group.
Non registered active licence holders	Non registered holders of active licence refer only to companies, shellfish harvesters, aboriginal fishermen, successions and to licences bought back by DFO.
Other items	Includes sea urchins, lumpfish caviar, scallop roe, other seafood,

	and seal products.
Outside the Gulf of St. Lawrence	Waters of the Bay of Fundy, the Scotian Shelf and Georges Bank that is, the ocean side of Nova Scotia as well as the province of Newfoundland, not including the west coast and southern Labrador.
Quota	For a given species and fishing area, the catch limit set for a segment of the commercial fleet.
Specialized enterprise	Fishing enterprise that has recorded at least 25% of the average value of landings of its reference fleet.
Supplementary purchase slips	These data are used to compile all landings not recorded on general purchase receipts. This information comes from estimates from four different sources: <ul style="list-style-type: none"> - Fish processed by fishermen - Direct sales to the public - Fish used as bait by fishermen - Other landings (including personal consumption by fishermen and their families and sport fishing)
Value	Statistics on value are expressed in current Canadian dollars.

*CATCH PORTRAIT OF
QUEBEC SECTOR*

Catch portrait of Quebec sector for 2009

Quebec landings reached 61,090 tons for a value of \$125,1 M in 2009, a 5 % rise in volume and a 12 % drop in value compared to 2008 (figure 1). This decrease in the value of landings is mainly due to a 22 % drop in the value of lobster landings in 2009. The total value of lobster landings dropped by \$9,4 M, due to a 21 % decrease in the average landed price.

The total value of landings for several other species also decreased, particularly for snow crab (-10 %), shrimp (-7 %) and cod (-70%). An increase of 9 % in volume and 13 % in value for Greenland halibut landings was recorded, which helped minimize the drop in value of total landings in Quebec.

Figure 1: Landing trends for the Quebec fishing industry, 1988-2009

Source: DFO, Quebec region

Note: Supplementary purchase slips are included in the landings

With regard to groundfish, a 19 % drop in the volume of landings was recorded, while the total value also decreased of 10 %. More specifically, cod landings recorded a 66 % drop in volume and a 70 % drop in value.

The breakdown of the value of landings by species (figure 2) shows that snow crab is the top species in Quebec with \$46,1 M, or 37 % of total landings. Lobster comes in second with a value of \$33,9 M, or 27 % of the total. Shrimp is in third place with landings of \$23,4 M, or 19 % of the total. These three crustaceans alone represent 83 % of the total value of landings in 2009. Lagging far behind, the value of groundfish and pelagic landings were, respectively, \$10,3 M and \$3.6 M in 2009.

Figure 2: Breakdown of the value of Quebec landings by species, 2009

Source: DFO, Quebec region

As for the breakdown of landings by maritime sector (figure 3), the year 2009 saw significant variations.

On the North Shore, the total value of landings dropped by 9 %. This is due to the decrease in the value of shrimp and cod. In 2009, the decrease in the price of shrimp thus had an impact on the value of landings on the North Shore.

In the Gaspe, the total value of landings dropped by 6 %. This is due to the decrease of the landings prices of shrimp, lobster and snow crab.

In the Magdalen Islands, the total value of landings dropped 20 %. This is due to the 29 % drop in value for snow crab and 20 % for lobster in the Islands, themselves the result of a drop in landing prices.

	2009	99		59 154		100

(1) The buyers are filed according to their physical location.

RESOURCE
ACCESSIBILITY

Resource accessibility

In order to achieve its objective of conserving and preserving various fish stocks, DFO imposes control measures each year. Licensing and quotas are responding to this necessity.

Quotas are used to determine the quantities allocated to each fishery, while licensing is an efficient means of controlling access to the various resources.

Licences for anadromous and catadromous species are issued by the Government of Quebec, while the Federal Government looks after licensing for all other species.

TABLE 9**FISHING QUOTAS APPLICABLE TO QUEBEC****- YEAR 2009 -**

SPECIES	(1) DIVISION	Type of fishing gear and category of vessel	(5) PERIOD	QUOTA with adjustments	(9) Catches landed in Quebec (MT) (final figures)	(4) Total catches under this quota (preliminary figures)	% of catches under this quota landed in Quebec
Snow Crab	4S	Area 13 - Inshore crab fishers	(8)	150 ⁽²⁾	122	122	100.00
		Area 14 - Inshore crab fishers	(8)	509 ⁽²⁾	509	509	100.00
		Area 15 - Inshore crab fishers	(8)	538 ⁽²⁾	537	537	100.00
		Area 15 - Temporary allocations	(8)	55 ⁽²⁾	56	56	100.00
		Area 16 - Inshore crab fishers - Group A	(8)	4 270 ⁽²⁾	4 244	4 244	100.00
		Area 16 - Inshore crab fishers - Group B	(8)	336 ⁽²⁾	332	332	100.00
		Area 16A - Temporary allocations	(8)	426	414	414	100.00
TOTAL: Snow Crab				29 933	15 018	29 519	50.88

- (1) Refers to NAFO (Northwest Atlantic Fisheries Organization) divisions except for Shrimp where we use the management areas as established by the Department of Fisheries and Oceans.
- (2) This global quota is subdivided into individual quotas and is set for Quebec fishers only.
- (3) This global quota is subdivided into individual quotas.
- (4) For this total, figures originating from Newfoundland, Gulf and Scotia Fundy Regions are not final.
- (5) Dates indicating the duration of the fishery except for Herring where we identify the various Spring and Fall fisheries.
- (6) Unit 1 is grouping 4RST from January to December and 3Pn and 4Vn from January to May, and unit 2 is grouping 3Ps and 4Vn from January to December, and 3Pn and 4Vs and 4Wfgj from June to December.
- (7) For this species only, quantities are indicated in meat weight.
- (8) Considering that these are individual quotas, duration periods are not specified.
- (9) In accordance with Access to Information Act, we are reporting landings against quotas only where there were at least three participants, unless we have the authorization from the concerned participants.
- (10) No global quota for sub-areas 16E, 16F and 18A as per the three-year scallop management plan for 2007 to 2009.

Average landed price

The average landed price by species as indicated here reflects the prices paid to fishermen and is determined by dividing the total value of all landings by the total landed weight.

The average price takes into account the condition of the catch at landing. The advantage of this method is that the significance of the price given can be specified. An identical approach is used for each of the maritime sectors.

It should also be pointed out that the average prices in the following tables exclude supplementary purchase slips, which explains why no figure is given for some species.

TABLE 14

LANDING AVERAGE PRICE BY SPECIES IN QUEBEC

(Excluding supplementary purchase slips, value in dollars per kilogram)

SPECIES	LANDED FORM DESCRIPTION	2008	2009	VARIATION IN %

***STATISTICAL PROFILE
OF SEAL FISHERY***

2009 Statistics on Seal Fishing Activities

This section aims to present an overview of the activities related to the seal fishery in the Quebec Region. It contains information concerning the number of licences issued per type and per maritime area as well as information concerning the captures of harp seal by fleet, and finally, data relating to the seal fishing observation activities.

Context

2009 is the fourth year of implementation of geographical shares that remain however temporary. The Magdalen Islands share has been established at 20% of the available allocation of the Gulf of St. Lawrence while the Quebec North Shore obtained 8%. This new sharing approach allowed the two concerned Quebec maritime areas to manage their own activities for the seal fishery, as opposed to years prior to 2006 where the fishery was conducted in a competitive mode for the whole Gulf of St. Lawrence. This also allowed each maritime area to have opening and closing dates adapted to their reality.

In 2009, the harp seal TAC, Atlantic wide, has been set at 280 000 animals, in conformity with the precautionary approach implemented in 2006. This management approach allows to adjust the allocations to the conditions of the market, as long as the population of seals remains over the threshold beforehand determined, being 70% of the reference level of 5.8 millions of seals (according to the 2008 census). If the population comes close to the determined threshold, measures must be taken to bring the population back to this threshold.

Summary of the Magdalen Islands seal fishery for the 2009 season

The first opening took place from March 10 to 22, 2009 with the authorization to catch a maximum of 6 seals per commercial licence holder, in order to allow licence holders to supply themselves with meat. Approximately 1,500 seals were caught during this period. Afterward, the competitive fishery started on March 23 and closed two (2) and a half days later (on March 25) because the quota had been reached. During this second period, 19,525 seals were caught; 106 inshore harvesters and 26 vessels took part in the fishery. The substantial presence of ice around the Magdalen Islands concentrated the fishing activities near the coasts, a situation that had not been observed since the mid-nineties.

100% of the quota given to the Magdalen Islands was caught, and 40% of that was caught by inshore harvesters, in the contrary of the previous years when more than 50% of the Islands' quota was caught by vessels over 45 feet. The catches were essentially composed of seals at the "beater" stage.

Summary of the North Shore seal fishery for the 2009 season

The commercial and personal use fishery opened by order on December 1, 2008 but only for the territory and harvesters of the Upper North Shore because of the early arrival of the seals in this area. The fishery ended on April 30, 2009 on the request of the harvesters' Association from Les Escoumins. During that period, 171 seals were caught on the Upper North Shore. The aboriginal fishery took place from March 28 to April 3, 2009. The Natashquan Band Council caught 93% of its quota, which equals to 1,541 seals out of a quota of 1,650 seals.

From April 8 to May 14, 2009, the commercial fishery opened for the remainder of the region, the Middle and Lower North Shore. On this part of the region, the personal use fishery also started on April 8 and closed on May 14, 2009 for the Middle North Shore and on June 7, 2009, for the Lower North Shore.

A total of 317 seals were caught on the North Shore, 146 of which were caught on the Lower North Shore, 171 on the Upper North Shore and no catch reported on the Middle North Shore. Only 4% of the 7864 seals allocated to the North Shore were caught in 2009. Forty-six percent (46%) of the landings were from the Lower North Shore harvesters and 54% from the Upper North Shore harvesters. A total of 20 vessels and 66 harvesters took part in the commercial fishery, while one vessel and about seven harvesters took part of the fishery on the aboriginal quota. The majority of the vessels used measured less than 35 feet in length and they caught 91% of the total catches on the North Shore. Two vessels measuring between 35 and 45 feet caught 5% of the landings.

Statistics and graphics 2008-2009

The quota available for the Gulf is of 84,424 seals. The Quebec portion represents 27,275 seals for the commercial fishery (including the carry forward of 10% of the previous year unused quota and an additional allocation of 5,000 seals). In addition, a quota of 4,950 seals was issued to the First Nations from all the Atlantic Provinces. The Quebec North Shore obtained 1,650 seals.

Here is the breakdown for the share of the commercial quota attributed to Quebec Region for 2009:

Area	Allocation
Magdalen Islands	15 911
North Shore	6 364
Gaspe Peninsula	0
Aboriginal Communities – North Shore area	1 650
Supplementary Allocation – 5 000 seals for Quebec Region	5 000 ¹
Total Quebec	28 925

¹1500 for the North Shore and 3500 for the Magdalen Islands.

The Quebec Region catches reached 22 884 seals and were distributed as follows:

2009

Fleet	Magdalen Islands		North Shore (including Aboriginal)		Gaspe Peninsula (1)		Total Quebec	
	Number of seals captured	Number of active vessels	Number of seals captured	Number of active vessels	Number of seals captured	Number of active vessels	Number of seals captured	Number of active vessels

Note: There were no catches registered at DFO for the Gaspe Peninsula for the years mentioned above.

Statistics on licences

According to the recommendations made by the Industry, DFO has imposed a freeze on the issuance of sealing licences in June 2004 (commercial licence and personal use), in order to slow down the increase of the fishing effort and to identify the conditions which should encompass the issuance of new sealing licences. This freeze however does not apply to Grey Seal fishing licences, neither to Aboriginal Communities.

Number of sealing licences issued by type and by maritime area

Number of licences issued	Magdalen Islands		North Shore		Gaspe Peninsula		Total Québec	
	2008	2009	2008	2009	2008	2009	2008	2009
Commercial Professional	896	879	854	827	61	57	1 811	1 763
Commercial Assistant	4	3	0	0	0	0	4	3
Personal use	5	5	376	367	50	46	431	418
Total	905	887	1 230	1 194	111	103	2 246	2 184

Note : All licences are not necessarily active, the approximate number of participants is available in the paragraphs presenting the summary of the 2009 fishing season.

Statistics on licences to observe the seal fishery

Each year, observers come to observe the commercial seal fishing activities. In order to be authorized near the fishing sites, observers must obtain a seal fishery observation licence. An observation licence is valid for one day and may be renewed upon request. In 2009, all observers have been able to go on the ice and some licences have been renew up to 25 times. Individuals, mainly journalists and photographers coming from Canada, United States and Europe came to observe the commercial fishery.

Data on Seal fishery observation licences

	2008		2009
	Southern Gulf	Northern Gulf and Front	Area: Hay Island, Henry Island, South and Northern Gulf
Number of requests received	65		43
Number of licences issued⁽¹⁾	54	9	27
Number of days of observation	139	36	235

⁽¹⁾ Some people did not make any follow up on their request.

Statistics concerning product processing

In 2009, all the seal catches by the Quebec Region harvesters were sold and processed in Quebec. The major part of the processed product value comes from the seal skins. Once defatted and tanned, the skins travel to Asia and Eastern Europe. Some quantities of meat are also processed for the local and Quebec markets (specialized market) and for personal consumption. The seal oil market is also developing. However, the value associated to that production remains confidential since there is currently only one buyer on this market.

***ECONOMIC PROFILE
OF QUEBEC MAIN
FISHING FLEETS***

Economic Profile of Quebec Main Fishing Fleets

The Annual Statistics Review 2008-2009 proposes a section intended to the Quebec main fishing fleets. You will find in the following pages, information related to the size of the fleets, the manpower, the fishing effort as well as the average landings for these various Quebec fleets.

In order to characterize each fleet, we have classified them by main species landed, and in some cases, by fishing area, gear type and vessel length. For example, for a fisherman who is fishing groundfish, pelagic fish and crustaceans, we will classify him in the fleet where he gets the higher value for his landings, being groundfish, pelagic fish or crustaceans. In other respects, landings and average prices are always calculated according to a fleet considered as “specialized” or according to a group of specialized enterprises. The expression “specialized” refers to fishing enterprises where their landings represent at least 25% of the average value of their fleet.

In addition, we want to inform you that the data concerning the fleets presented in the next section exclude the statistics for aboriginal fleets to ensure that the average value of the landings could be calculated from comparable data.

Please note that Scallops fleets of the North Shore (fisheries on individual quotas and competitive fisheries), of the Gaspe Area and Magdalen Islands have very few participants. Consequently, data concerning these fleets cannot be disclosed in this review for confidentiality considerations.

Finally, data on the groundfish fleets will be published at a later date as changes are being made to a more precise breakdown. This data will be eventually available on the DFO's Policy and Economics Branch, Quebec Region Web site.

Evolution of average landing, 2000 to 2009																																					
<p>The chart illustrates the significant growth in both quantity and value of average landing for shrimpers from 2000 to 2009. While quantity increased from 206 mt in 2000 to 428 mt in 2009, value grew even more sharply from 179 thousand dollars to 428 thousand dollars over the same period.</p> <table border="1"> <thead> <tr> <th>Year</th> <th>Quantity (mt)</th> <th>Value (thousands of \$)</th> </tr> </thead> <tbody> <tr><td>2000</td><td>206</td><td>179</td></tr> <tr><td>2001</td><td>295</td><td>211</td></tr> <tr><td>2002</td><td>245</td><td>218</td></tr> <tr><td>2003</td><td>281</td><td>305</td></tr> <tr><td>2004</td><td>249</td><td>348</td></tr> <tr><td>2005</td><td>250</td><td>280</td></tr> <tr><td>2006</td><td>248</td><td>167</td></tr> <tr><td>2007</td><td>210</td><td>259</td></tr> <tr><td>2008</td><td>381</td><td>381</td></tr> <tr><td>2009</td><td>259</td><td>428</td></tr> </tbody> </table>					Year	Quantity (mt)	Value (thousands of \$)	2000	206	179	2001	295	211	2002	245	218	2003	281	305	2004	249	348	2005	250	280	2006	248	167	2007	210	259	2008	381	381	2009	259	428

Evolution of average landing, 2000 to 2009																																								
<p>The chart illustrates the annual average landing for crabbers in Area 15 from 2000 to 2009. It features two sets of bars for each year: light grey bars representing 'Quantity (mt)' and dark grey bars representing 'Value (thousands of \$)'. The 'Value' series shows a general downward trend, starting at 275 thousand dollars in 2000 and ending at 199 thousand dollars in 2009. The 'Quantity' series shows a similar downward trend, starting at 53 mt in 2000 and ending at 44 mt in 2009.</p> <table border="1"> <thead> <tr> <th>Year</th> <th>Quantity (mt)</th> <th>Value (thousands of \$)</th> </tr> </thead> <tbody> <tr><td>2000</td><td>53</td><td>275</td></tr> <tr><td>2001</td><td>55</td><td>203</td></tr> <tr><td>2002</td><td>48</td><td>232</td></tr> <tr><td>2003</td><td>40</td><td>216</td></tr> <tr><td>2004</td><td>44</td><td>191</td></tr> <tr><td>2005</td><td>77</td><td>165</td></tr> <tr><td>2006</td><td>69</td><td>114</td></tr> <tr><td>2007</td><td>65</td><td>72</td></tr> <tr><td>2008</td><td>71</td><td>233</td></tr> <tr><td>2009</td><td>72</td><td>227</td></tr> <tr><td>2009</td><td>44</td><td>199</td></tr> </tbody> </table>					Year	Quantity (mt)	Value (thousands of \$)	2000	53	275	2001	55	203	2002	48	232	2003	40	216	2004	44	191	2005	77	165	2006	69	114	2007	65	72	2008	71	233	2009	72	227	2009	44	199

Lobster	Round.....	11.466	8.920	-22.2
Rock Crab	Round.....	.879	.880	0.1
Snow Crab	Round.....	3.999	3.257	-18.6

2008 - 2009 Landings St. Lawrence Sector

The St. Lawrence Sector is distinguished by a low level of marine fishing activity. Landings made in 2008 and in 2009 for the sector between Anse à Gilles and Cap à l'Original on the south shore, and between Cap Tourmente and Baie Sainte Catherine on the north shore, represented respectively 230.3 and 233.9 metric tons for an assorted value .481 and .426 million dollars. Thus, 2009 landings are higher in quantity and their value has decreased of 11.4% compared to 2008.

In 2009, we had 22 active registered licence holders, 3 less than in 2008. Concerning the number of buyers, we have 4 buyers in 2009 compared to 3 buyers in 2008.

To abide by confidentiality regulations, it is not possible for the Department to reveal any information concerning St. Lawrence Sector landings. The small number of participants in marine fishery activities as well as the small amount of catches justify the application of such a confidentiality measure.

2008 - 2009 Landings
Northern Quebec

The Department of Fisheries and Oceans has no registered data for 2008 and 2009 for the Northern Quebec Sector.

***PRODUCTION AND
MANPOWER IN PLANT***

Plant production data

This section concerns fish and seafood processed in Quebec in 2008 and 2009. In this review, production refers to any processing by a plant or any sale of a product to a merchant who buys directly from fishermen. Most of the enterprises listed here are located in the Gaspé Peninsula, the Magdalen Islands or on the North Shore. Our data-collection network is concentrated in these three regions, although we did obtain information from a few firms in the Quebec City and Montreal areas.

The volume of the various products listed is based on information provided by each of the processing plants and merchants. Value is calculated on the basis of selling prices for each type of seafood. It is important to note that the tables shown in this section are not covering seal fishing data.

Some figures were adjusted if there were discrepancies with the rest of the available data. When making these adjustments, we used the following information as reference points: purchase value of raw material, value of same types of products when processed and, wherever possible, from the same geographic sector, the selling price of the preceding year taking into account variations in prices and inflation.

The data are given for the total of Quebec and by maritime sector. Note that for reasons of confidentiality, in some cases we have grouped a number of products together.

Plant workforce data

The number of employees in the 2008-2009 statistical review represents the maximum number of people who worked in the same plant over the course of the year (the month with the highest number of employees was used as the yardstick). This method of accounting is based on the following definition of an employee: “An employee is any person working for a definite period for an employer operating an establishment that processes or deals in any seafood product.”

The annual employment survey of processing plants is the source of our information on employment. A few plants, however, provided us with employment information over the telephone. In a few rare cases, we made estimates, based on information gathered by DFO staff.

TABLE 48

MANPOWER IN PLANT

IN 2008 AND 2009

SECTOR	YEAR	Maximum number of employees	Net change	Quantity produced in metric tons	Quantity produced in % of total
ST. LAWRENCE AND NON-MARITIME TERRITORY	2008	183	-6	5 930.7	14.53
	2009	177		4 394.6	11.04

APPENDICES

APPENDIX 1

Boundaries of Quebec maritime statistical districts

<u>District</u>	<u>Geographic point</u>	<u>Landing point</u>
1	Anse à Gilles to Pointe Rouge	Anse à Gilles to St-Roch-des-Aulnaies
2	Pointe Rouge to Notre-Dame du Portage	Ste-Anne de la Pocatière to St-André
3	Notre-Dame du Portage to Ste-Luce	Notre-Dame du Portage to Cap-à-l'Original
4	Ste-Flavie to eastern boundary of Matane County	Ste-Flavie to Petits Méchins
5	Cap-Chat to Duchesnay	Fonderie to Ruisseau Castor
6	Duchesnay to St-Hélier	Ruisseau à Rebours to Anse à Thibault
7	St-Hélier to Petite Rivière-au-Renard	Ruisseau à l'Ail to Petit Cap
8	Petite Rivière-au-Renard to Cap des Rosiers	Petite Rivière-au-Renard to Cap des Rosiers
9	Cap Gaspé to Pointe St-Pierre	Cap Gaspé to Pointe Navarre
10	Pointe St-Pierre to Brèche à Manon	Malbay to Weygand
11	Brèche à Manon to Pointe Maquereau	Brèche à Manon to Newport
12	Pointe Maquereau to New Carlisle	Pointe Maquereau to Cullens Brooks
13	New Carlisle to Rivière Grande-Cascapédia	New Carlisle to St-Siméon ouest
14	Rivière Grande-Cascapédia to Pointe Miguasha	Maria to Pointe Bourg
15	Pointe Miguasha to Rivière Restigouche	Miguasha to Matapedia
16	Cap Tourmente to Rivière Saguenay	Petite Rivière St-François to Cap-Brûlé
17	Rivière Saguenay to Bersimis	Tadoussac to Anse à Bouleau
18	Bersimis to Rivière Ste-Marguerite	Bersimis to Îles de May
19	Rivière Ste-Marguerite to Rivière Pigou	Sept-Îles to Maloténam
20	Rivière Pigou to Havre St-Pierre	Rivière aux Graines to Rivière Pigou
21	Havre St-Pierre to Rivière Kégaska	Havre St-Pierre to Pointe Parent
22	Rivière Kégaska to Baie des Moutons	Rivière Kégaska to Chevery
23	Baie des Moutons to Bonne Espérance	Baie des Moutons to Rivière St-Paul
24	Bonne Espérance to Blanc Sablon	Bonne Espérance to Îles Demoiselles
25	Île d'Anticosti	Anticosti
26	Îles-de-la-Madeleine, northern division	Havre-aux-Maisons to Lapointe
27	Île du Havre Aubert to l'Île d'Entrée	Havre Aubert to l'Île d'Entrée
28	Île de Cap-aux-Meules	Cap-aux-Meules to Cap Vert

N.B. The geographic points that mark the boundaries of the statistical districts are shown here with the corresponding points of landing. There are thus two types of boundaries for each district.
