Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has added new uses on sunflowers and condiment type mustard seeds to the product label of Headline EC Fungicide, containing technical grade pyraclostrobin. The specific uses approved in Canada are detailed on the label of Headline EC Fungicide, *Pest Control Products Act* Registration Number 27322.

Corresponding maximum residue limits (MRLs) were proposed in the consultation document published on 25 May 2011, Proposed Maximum Residue Limit PMRL2011-14, *Pyraclostrobin*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRLs was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRLs take legal effect in Canada as of the publication date of this document and either replace or are in addition to the MRLs already established for pyraclostrobin.

#### **Established Maximum Residue Limits for Pyraclostrobin**

| Common<br>Name | Residue Definition   | MRL (ppm) | Food Commodity   |
|----------------|--|-----------|--|
| Pyraclostrobin | methyl <i>N</i> -[2-[[[1-(4-chlorophenyl)-1 <i>H</i> -pyrazol-3-yl]oxy]methyl] phenyl]- <i>N</i> -methoxycarbamate, including the metabolite carbamic acid, <i>N</i> - [2-[[[1-(4-chlorophenyl)-1 <i>H</i> -pyrazol-3-yl]oxy]methyl]phenyl]-, methyl ester | 0.45      | Sunflower (Crop Subgroup 20B*), mustard seeds (condiment type) |

ppm = parts per million

MRLs are established for each food commodity included in the listed crop grouping in accordance with Appendix 1.

A complete list of all pesticide MRLs established in Canada can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.

<sup>\*</sup> The 0.3 ppm MRL previously established for sunflower seeds is revised to reflect the 0.45 ppm crop subgroup MRI

# Appendix I

## **Crop Groups: Numbers and Definitions**

| Crop Group |          | Crop Subgroup |           | Food Commodities Included in the Crop Subgroup  |  |
|------------|----------|---------------|-----------|---|--|
| No.        | Name     | No.           | Name      | in the Crop Subgroup  |  |
| 20         | Oilseeds | 20B           | Sunflower | Calendula seeds Evening primrose seeds Jojoba seeds Niger seed seeds Safflower seeds Sunflower seeds Tallowwood seeds Tea oil plant seeds |  |
