Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has granted full registration to technical grade prothioconazole and the end-use products JAU 6476 100FS Seed Treatment Fungicide and L1397 Seed Treatment Fungicide for use in Canada on dried shelled peas and beans, except soybeans (Crop Subgroup 6C). The specific uses approved in Canada are detailed on the labels of JAU 6476 100FS and L1397 Seed Treatment Fungicides, *Pest Control Products Act* Registration Numbers 30101 and 30102, respectively.

Corresponding maximum residue limits (MRLs) were identified in Proposed Maximum Residue Limit PMRL2011-46, *Prothioconazole*, published on 17 November 2011. The PMRL referenced the consultation document, Proposed Registration Decision PRD2011-07, *Prothioconazole*, published on 29 July 2011. The PMRA received no comments in response to the consultation under PRD2011-07.

To comply with Canada's international trade obligations, consultation on the proposed MRLs was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRLs take legal effect in Canada as of the publication date of this document and are in addition to the MRLs already established for prothioconazole.

Common Name	Residue Definition	MRL	Food Commodity
		(ppm)	
Prothioconazole	2-[2-(1-chlorocyclopropyl)-3-(2-	0.9	Dried shelled pea and
	chlorophenyl)-2-hydroxypropyl]-2,4-dihydro-		bean, except soybean
	3 <i>H</i> -1,2,4-triazole-3-thione, including the		(Crop Subgroup 6C;
	metabolite		except dry chickpeas
	α-(1-chlorocyclopropyl)-α-[(2-chlorophenyl)		and dry lentils) <sup>a</sup>
	methyl]-1 <i>H</i> -1,2,4-triazole-1-ethanol		

## Established Maximum Residue Limits for Prothioconazole

<sup>a</sup> Dry chickpeas and dry lentils are excluded from this MRL action as 0.9 ppm MRLs are already established for these legume commodities.

MRLs are established for commodities included in the listed crop subgroup in accordance with the Residue Chemistry Crop Groups webpage in the Pesticides and Pest Management section of Health Canada's website.

A complete list of all pesticide MRLs established in Canada, as of the date indicated, can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
