Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has established maximum residue limits (MRLs) for metconazole on stone fruits (Crop Group 12-09), tree nuts (Crop Group 14-11), peanuts and refined peanut oil to permit the import and sale of food containing such residues.

Corresponding MRLs were proposed in the consultation document published on 15 December 2011, Proposed Maximum Residue Limit PMRL2011-51, *Metconazole*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRLs was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRLs for metconazole take legal effect in Canada as of the publication date of this document.

Established Maximum Residue Limits for Metconazole

Common Name	Residue Definition	MRL (ppm)	Food Commodity
Metconazole	5-[(4-chlorophenyl)methyl]-2,2-dimethyl-1-(1 <i>H</i> -1,2,4-triazol-1-ylmethyl)cyclopentanol	0.2	Stone fruits (Crop Group 12-09)
		0.05	Refined peanut oil
		0.04	Tree nuts (Crop Group 14-11), peanuts

ppm = parts per million

MRLs are established for each commodity included in the listed crop groupings in accordance with the Residue Chemistry Crop Groups webpage in the Pesticides and Pest Management section of Health Canada's website.

A complete list of pesticide MRLs established in Canada, as of the date indicated, can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
