Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has approved the addition of new uses on dry edible beans to the product label of Venture L Herbicide, containing technical grade fluazifop-p-butyl. The specific uses approved in Canada are detailed on the label of Venture L Herbicide, *Pest Control Products Act* Registration Number 21209.

Corresponding maximum residue limits (MRLs) were proposed in the consultation document published on 28 February 2012, Proposed Maximum Residue Limit PMRL2012-04, *Fluazifop-butyl*. Residues of fluazifop-p-butyl, the resolved (*R*)-isomer, are covered by MRLs established for fluazifop-butyl, the unresolved isomeric mixture. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRLs was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRLs take legal effect as of the publication date of this document and are in addition to the MRLs already established for fluazifop-butyl.
