Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has approved the addition of canola (including canola-quality *Brassica juncea*) and rapeseed to the product label of Rancona 3.8 FS Fungicide, containing technical grade ipconazole. The specific uses approved in Canada are detailed on the label of Rancona 3.8 FS Fungicide, *Pest Control Products Act* Registration Number 29175.

Corresponding MRLs were proposed in the consultation document published on 28 March 2012, Proposed Maximum Residue Limit PMRL2012-07, *Ipconazole*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRLs was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRLs take legal effect in Canada as of the publication date of this document and are in addition to the MRLs established for ipconazole.

Established Maximum Residue Limits for Ipconazole

| Common Name | Residue Definition | MRL (ppm) | Food Commodity |
|----------------|--|--------------|---|
| Ipconazole | 2-[(4-chlorophenyl)methyl]-5-(1- methylethyl)-1-(1 <i>H</i> -1,2,4-triazol-1- ylmethyl)cyclopentanol | 0.01 | Mustard seeds (oilseed type), rapeseeds (canola) |

ppm = parts per million

A list of pesticide MRLs established in Canada, as of the date indicated, can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
