Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has established a maximum residue limit (MRL) for the safener isoxadifen-ethyl in or on rice to permit the import and sale of foods containing such residues.

A corresponding MRL was proposed in the consultation document published on 28 September 2011, Proposed Maximum Residue Limit PMRL2011-37, *Isoxadifen-ethyl*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRL was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRL takes legal effect in Canada as of the publication date of this document and is in addition to the MRL already established for isoxadifen-ethyl.

Established Maximum Residue Limit for Isoxadifen-ethyl

Common Name	Residue Definition	MRL (ppm)	Food Commodity
Isoxadifen-ethyl	ethyl 4,5-dihydro-5,5-diphenyl-3-isoxazolecarboxylate, including the metabolite benzenepropanenitrile, β -hydroxy- β -phenyl-	0.1	Rice

ppm = parts per million

A complete list of all pesticide MRLs established in Canada can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
