Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has approved the addition of new uses on sweet corn to the product label of Dupont Coragen Insecticide, containing technical grade chlorantraniliprole. The specific uses approved in Canada are detailed on the label of Dupont Coragen Insecticide, *Pest Control Products Act* Registration Number 28982.

A corresponding maximum residue limit (MRL) was proposed in the consultation document published on 24 May 2012, Proposed Maximum Residue Limit PMRL2012-26, *Chlorantraniliprole*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRL was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRL takes legal effect as of the publication date of this document and is in addition to the MRLs currently established for chlorantraniliprole.

Established Maximum Residue Limit for Chlorantraniliprole

Common Name	Residue Definition	MRL (ppm)	Food Commodity
Chlorantraniliprole	3-bromo- <i>N</i> -[4-chloro-2-methyl-6- [(methylamino)carbonyl]phenyl]-1- (3-chloro-2-pyridinyl)-1 <i>H</i> -pyrazole- 5-carboxamide	0.02	Sweet corn kernels plus cob with husks removed

ppm = parts per million

A list of pesticide MRLs established in Canada, as of the date indicated, can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
