Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has established maximum residue limits (MRLs) for iodosulfuron-methyl-sodium in or on field corn and wheat to permit the import and sale of foods containing such residues.

The MRLs were proposed in the consultation document published on 11 June 2012, Proposed Maximum Residue Limit PMRL2012-30, *Iodosulfuron-methyl-sodium*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRLs was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRLs take legal effect in Canada as of the publication date of this document and either replace or are in addition to MRLs currently established for iodosulfuron-methyl-sodium.

Established Maximum Residue Limits for Iodosulfuron-methyl-sodium

Common Name	Residue Definition	MRL (ppm)	Food Commodity
Iodosulfuron-methyl-sodium	4-iodo-2[[[(4-methoxyl-6-methyl-1,3,5-triazin-2-yl)amino]carbonyl]amino]sulfonyl]benzoic acid methylester, monosodium salt	0.03	Field corn ^a
		0.02	Wheat

ppm = parts per million

^a The MRL replaces the previously established 0.025 ppm MRL.

A list of pesticide MRLs established in Canada may be requested via the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
