New Home Market

Winnipeg housing starts increase in May

Home builders in the Winnipeg Census Metropolitan Area (CMA) began construction on 685 units in May, up from 379 in May 2011. Increases were posted in both the single-detached and multi-family sectors. After five months, total housing starts for 2012 numbered

1,692 units, up 50 per cent from 1,130 starts during the same period of 2011.

Single-detached builders started work on 255 units in May, 50 per cent more than the 170 started in May 2011. Spurred by an inventory of new homes that remains relatively low, builders continue to produce new single-detached homes in response to demand. After five months, single-detached starts totalled 816 units, 20 per cent more than during the same period one year earlier. Builders also

completed 379 homes in May, 36 per cent more than during May 2011. As a result, the number of single-detached units under construction at the end of May increased only 10 per cent year-over-year, reaching 1,205.

There were 332 single-detached homes absorbed in May, 38 per cent more than the 240 absorbed one year prior. This brings the number of units absorbed during the first five months of 2012 to 635, 30 per cent more than during the same period of 2011. With absorptions slightly outpacing completions, the inventory of

completed and unoccupied single-detached homes declined from April to May. On a year-over-year basis, single-detached inventory increased by only five per cent, numbering 160 units in May 2012 compared to 152 units in May 2011. This remains below the five-year average inventory of 198 units. Total supply, which includes the number of units under construction, stood at 1,365 units at the end of May, 10 per cent more than one year earlier. At the current six-month average rate of absorption, this represents 11 months of supply.

The average price of a new single-detached home absorbed in the Winnipeg CMA in May 2012 was \$381,167, up four per cent from the average price posted in May 2011. The year-to-date average price was \$390,383, an increase of two per cent from the prior year. The median price saw a nine per cent increase in May 2012 to \$358,851, as the share of absorptions priced under \$300,000 fell from 24 per cent in May 2011 to 16 per cent in May 2012.

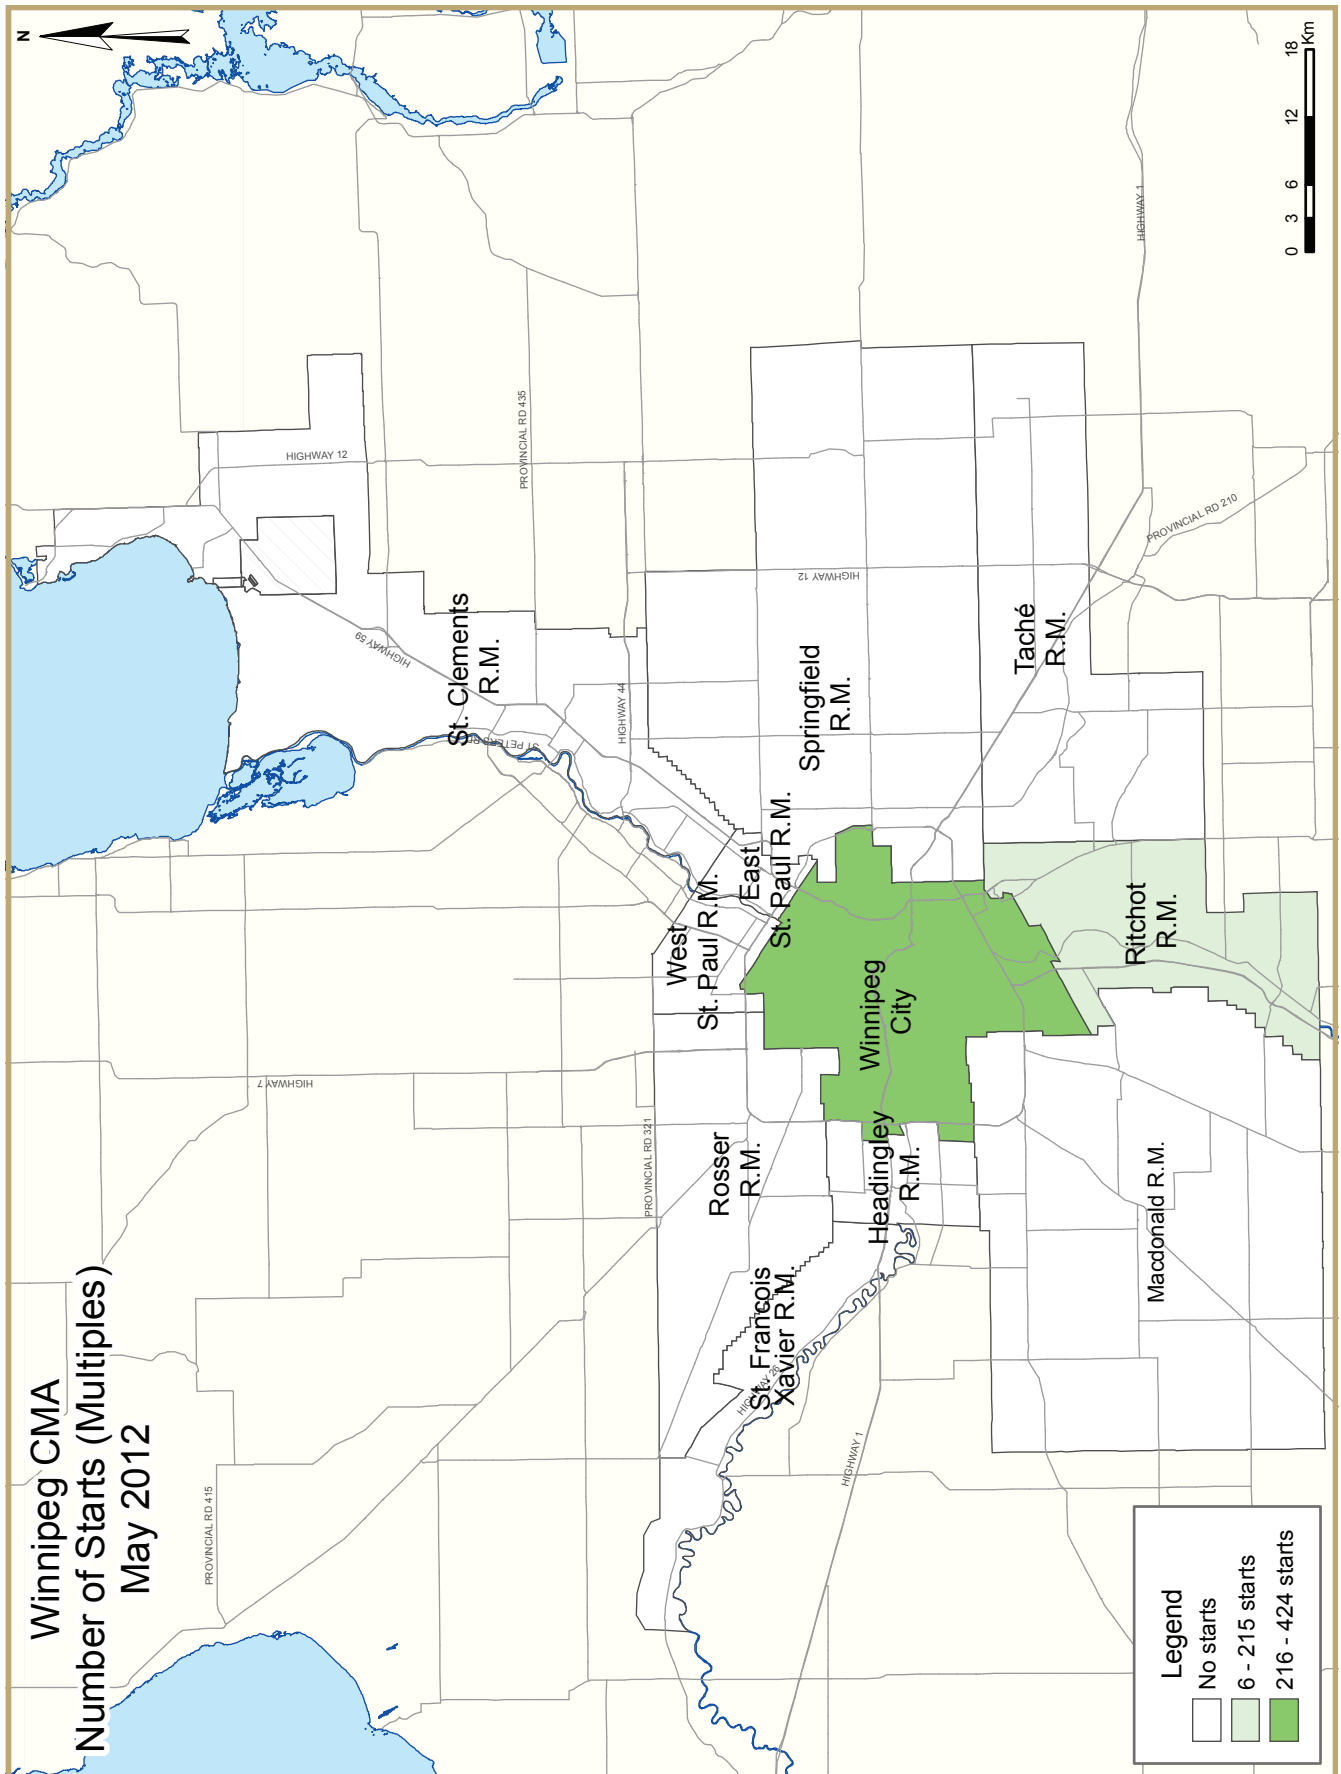

The multi-family sector, which includes semi-detached units, rows, and apartments, saw 430 units begin construction in May 2012, more than double the 209 units started one year earlier. Year-to-date multi-family starts totalled 876 units, 94 per cent more than the 451 units started in the first five months of 2011. While starts for rental tenure, at 381 units, have increased 53 per cent over the previous year, the number of multi-family starts for condominium or ownership tenure numbered 467 units, an increase of more than two-fold. As a result, the number of multi-family units under construction at the end of May 2012 was 1,870, 44 per cent more than the 1,297 units under construction at the end of May 2011.

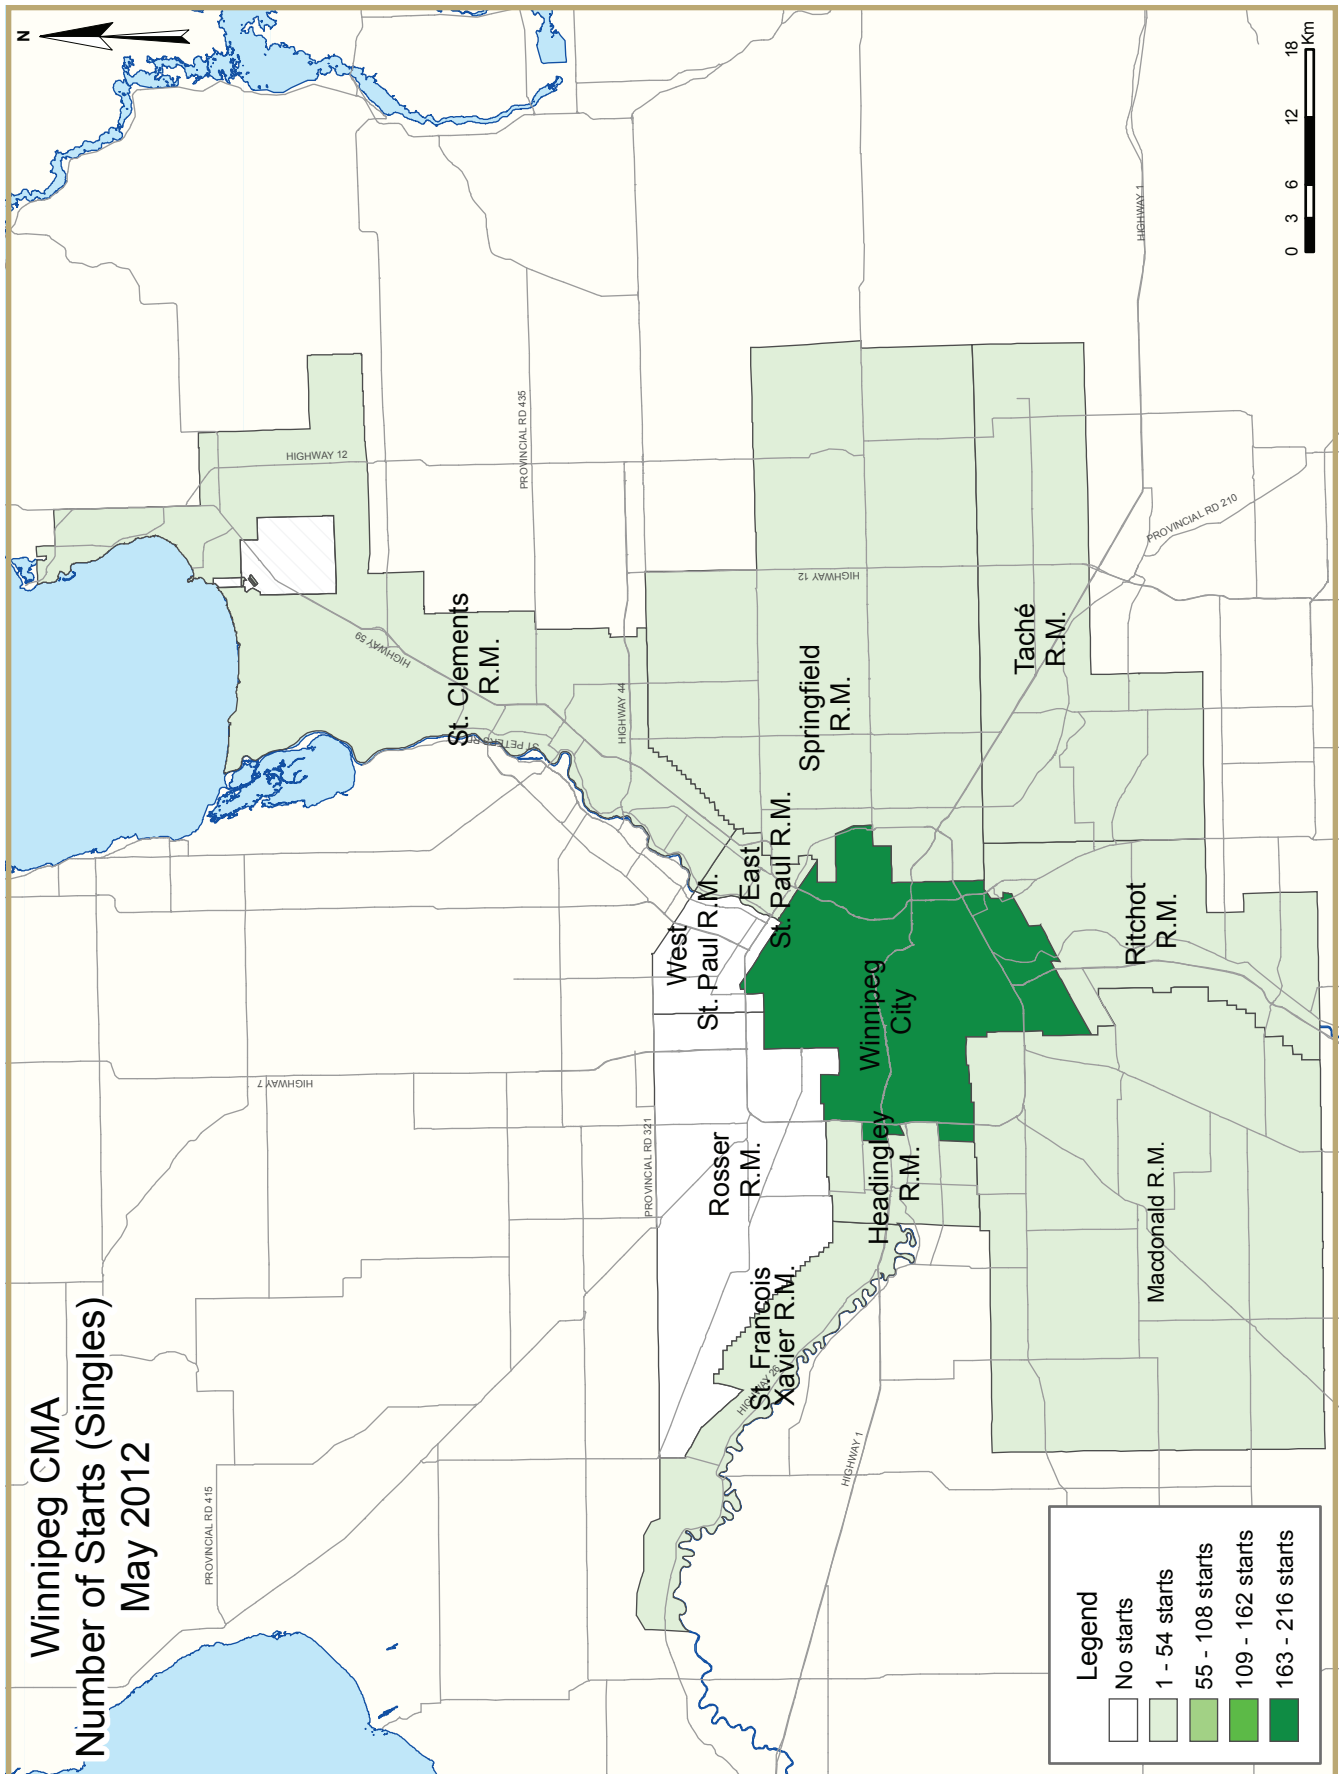

There were only 62 multi-family units absorbed in May 2012, less than half the 127 units absorbed one year earlier. Year-to-date, however, absorptions totalled 305 units, an increase of three per cent over the number of units absorbed in the same period of 2011. The inventory of multi-family units completed and not absorbed at the end of May 2012 was 134 units, 45 per cent fewer than the 244 units in inventory in May 2011.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
