

HOUSING MARKET OUTLOOK

Quebec Region Highlights

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: Third Quarter 2012

Housing Market Forecast

Overview¹

In Quebec, the impact of slower economic growth will be attenuated by still favourable low mortgage rates and demographic factors, which will again support new home construction in 2012 and 2013. The current climate of uncertainty regarding economic prospects abroad will call for a more cautious attitude domestically and may lead to less vigorous household spending and private investment this year. This environment, combined with a more balanced resale market, is expected to moderate the demand for new homes.

In the coming years, demographic factors will sustain the province's housing markets, but at the same time change their complexion. While sustained net migration to the province will continue to have a positive impact on the rental and resale markets, migration numbers are expected to remain stable over the coming years as no significant change in immigration targets is expected. Population aging, on the other hand, will have a growing impact on the dynamics of the housing market in Quebec, as older households are

¹ The outlook is subject to uncertainty. Although point forecasts are presented in this publication, CMHC also presents forecast ranges and risks where appropriate. The forecasts included in this document reflect information available as of July 25, 2012.

expected to re-enter the market in response to their changing housing needs.

In Detail

Single Starts

In 2011, slower job growth, the recent easing of the resale market and the continuing trend toward the multi-family dwellings have brought down single starts. As a less pronounced decline is expected over the next two years, a total of 15,700 single-detached homes is forecast for 2012. In 2013 single starts should moderate to 15,000 units. The rising popularity of the more affordable multi-family homes and densification trends will further cool this market segment in the future.

Multiple Starts

Following a year of sustained construction in 2011, starts of multi-family dwellings will settle back to more sustainable rates in the next two years. Multiple starts are forecast to be 29,700 this year and 27,100 units in 2013.

Resales

After recording a slight drop last year, sales recorded by the MLS® will bounce back up in this year. This year will see sales of existing condominiums (town houses or apartments) moderate. As a result, 81,300 MLS® unit sales are forecast in 2012 and 82,100 in 2013.

Prices

Relatively stable demand for resale homes, combined with rising supply, has already taken some pressure off prices in recent quarters and should continue to do so in the near term. With a return to more balanced conditions, price growth in the resale market will moderate over the course of 2012 and in 2013. For 2012, the average MLS® price is forecast to be \$271,600 while 2013 will see an increase to \$277,800.

Mortgage Rates

CMHC uses publicly available information and the consensus among major Canadian forecasters regarding interest rates. Although there is significant uncertainty, mortgage rates

are not expected to rise in the short term and will remain low by historical standards.

According to CMHC's base case scenario, for 2012, the one-year posted mortgage rate is expected to be in the 3.2 to 3.4 per cent range, while the five-year posted mortgage rate is forecast to be within 5.2 to 5.3 per cent. For 2013, the one-year posted mortgage rate is expected to rise and be in the 3.5 to 4.2 per cent range, while the five-year posted mortgage rate is forecast to be within 5.1 to 5.4 per cent, reflecting more solid economic growth prospects as 2013 progresses.
