Quebec Region Highlights

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: Fourth Quarter 2012

Housing Market Forecast

Figure 1

Figure 2

Source: CMHC

¹ The outlook is subject to uncertainty. Although point forecasts are presented in this publication, CMHC also presents forecast ranges and risks where appropriate. The forecasts included in this document reflect information available as of October 17, 2012.

Overview¹

In Quebec, slower economic growth will be partly offset by still-favourable borrowing conditions and demographic trends.

Demographic factors will help sustain the province's housing markets. Sustained net migration to the province will continue to have a positive impact on demand in the rental and resale markets, as migration flows are expected to remain stable over the coming years.

Population aging, on the other hand, will have a growing impact on the dynamics of the housing market in Quebec, as older households are expected to re-enter the market in response to their changing housing needs.

However, the lingering climate of uncertainty regarding the economic outlook abroad will maintain a cautious attitude domestically and translate into relatively mild household spending and employment growth in the province over the forecast horizon. This environment will lead to continued moderation in housing starts in the last quarter of 2012 and in 2013.

In Detail

Single Starts

In 2012, slower job growth, the recent easing of the resale market and the continuing trend toward a greater share of multiple dwelling starts continued to bring down single starts. As a result, single starts are expected to decline 4 per cent to 15,900 units. A similar decline of 5.7 per cent is expected in 2013, to 15,000 units.

The rising popularity of the more affordable multi-family homes and the trend toward higher-density land use will continue to cool this market segment in the years to come.

Multiple Starts

Despite the popularity of condominium apartments, supply in this market segment has remained strong relative to demand in recent years. Following sustained construction in the first half of 2012, starts of multi-family dwellings are expected to settle back down to a rate more in line with demand over the forecast period. As a result, multiple starts are expected to decline 3.2 per cent to 30,800 units in 2012, followed by a decline of 11.4 per cent to 27,300 units in 2013.

Quebec Region Housing Forecast - Rental Market				
	Vacancy Rate		Average Rent 2-Bedroom Units

Resales

MLS® sales are expected to record a gain of 2 per cent to 78,700 sales in 2012 and a similar gain of 1.4 per cent to 79,800 sales in 2013. Besides the overall economic impacts discussed previously, the ever-growing housing stock will sustain, as it typically does, sales volumes.

Prices

Relatively stable sales of existing homes, combined with rising new listings, has taken some pressure off price growth in recent quarters and should continue to do so over the forecast horizon. With a return to more balanced conditions, price growth in the resale market will continue to moderate in 2012 and 2013. Following a gain of 8.4 per cent in 2011, the average MLS® price is forecast to rise 3.9 per cent in 2012 to \$271,800 and rise 0.8 per cent in 2013 to \$274,100.

Mortgage rates

Although there is significant uncertainty, mortgage rates are not expected to change in 2012. Slight increases are expected in 2013, but rates will remain low by historical standards.

According to CMHC's base case scenario, for 2012, the one-year mortgage rate is forecasted to be within 2.75 per cent to 3.50 per cent. For 2013, the one-year posted mortgage rate is expected to rise and be in the 3.00 per cent to 4.00 per cent range, while the five-year posted mortgage rate is forecasted to be within 5.00 per cent to 5.75 per cent, consistent with higher employment and economic growth prospects in 2013.
