New Home Market

Edmonton housing starts move higher in April

Total housing starts in the Edmonton Census Metropolitan Area (CMA) increased in April to 967 units, up from 758 starts in April 2011. This was the fifth consecutive month where housing starts were higher on a year-over-year basis. For the year-to-date,

housing starts totalled 3,172 units, up from 2,323 during the first four months of 2011.

Across the Edmonton CMA, 493 single-detached units were started in April, up 13 per cent from the 436 single-detached starts in April of 2011. Inside Edmonton City limits, 313 single-detached units broke ground, up nine per cent from a year earlier. To the end of April, 1,576 single-

detached starts were recorded within the Edmonton CMA, representing a 27 per cent increase from the same period of 2011.

Completions of single-detached units fell year-over-year for the tenth consecutive month in April. There were 390 single-detached completions in April, compared with 447 in the same month of last year. Absorptions also declined year-over-year, down eight per cent from 491 in April 2011 to 454 in April of this year. Since absorptions outpaced completions, inventories (including show homes) declined from the previous month and were down five per cent year-overyear to 553 units. Both show home and spec home inventories were down from their April 2011 levels.

The average price of absorbed single-detached units moderated one per cent in April to \$499,525 from \$505,210 a year previous. The decline was caused by lower absorptions of higher-priced homes. Homes priced at or above \$550,000 accounted for 23 per cent of absorbed singledetached units in April, down from 26 per cent a year earlier. In contrast, the median price of absorbed singledetached units increased one per cent to \$455,689. Contractor selling prices reported by Statistics Canada's latest New House Price Index (NHPI) for March 2012 increased in Edmonton by 0.8 per cent on a year-over-year basis.

Multi-family starts, which consist of semi-detached units, rows, and apartments, increased in April by 47 per cent year-over-year to 474 units. Gains were most notable among semidetached units where foundations were poured for 196 units in April, up from 124 a year earlier. Multi-family housing starts within Edmonton City totalled 256 units, up from 217 starts in April 2011. The remaining areas of the CMA saw strong growth with 218 multi-family units breaking ground, more than double the amount of activity a year earlier. With 1,596 units to the end of April, multi-family starts across the Edmonton CMA were almost 50 per cent higher than the first four months of 2011, accounting for half of all housing starts so far this year. Row units have reported the strongest gain thus far, up 161 per cent year-over-year.

There were 179 completions of multi-family units in April, down 24 per cent from 236 completions a year previous. Multiple unit inventories declined from March, as the number of absorptions, at 203, was higher than completions. Year-over-year multifamily inventory fell 18 per cent in April, reaching 859 units. However, at 6,111 units, the number of multiples under construction was 25 per cent higher than in April 2011, increasing the risk of rising inventories moving forward. The supply of multiple units, which includes current inventory plus units under construction was 6,970, 18 per cent higher than the same month of last year.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A "dwelling unit", for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A "start", for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units "under construction" as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A "completion", for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term "absorbed" means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A "Single-Detached" dwelling (also referred to as "Single") is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A "Semi-Detached (Double)" dwelling (also referred to as "Semi") is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A "Row (Townhouse)" dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term "Apartment and other" includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The "intended market" is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A "Rural" area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada's 2006 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
