### HOUSING MARKET INFORMATION

# HOUSING NOW Montréal CMA

Date Released: May 2012

## Montréal metropolitan area housing starts in April 2012

The results of the latest starts survey conducted by Canada Mortgage and Housing Corporation (CMHC) in April 2012 show that 2,773 dwellings were started in the Montréal census

metropolitan area (CMA), compared to 1,961 in April 2011.

This increase in new home construction was mostly attributable to the 1,533 condominium units started this past month. This surge in condominium starts underlines the higher variance of this type of construction. However, with more supply of resale condominiums, we expect lower annual starts by the end of this year.

Construction of freehold housing continued its downward trend in April 2012. The decrease was most felt in the semi-detached and row housing segment, which registered a decline of 24 per cent compared to the same month in 2011. Detached home starts moved down by about 2 per cent.

On a geographical basis, strong condominium construction in April 2012 boosted total starts in the South Crown by more than twofold, and on the Island of Montréal, by 53 per cent. Condominium starts were also positive in the North Crown, but the gain was not enough to offset the declines in freehold and rental housing activity in this sector. Total starts in the North Crown fell by 16

per cent. As for Vaudreuil-Soulanges, total starts there dropped by 33 per cent as a result of decreases for all housing types.

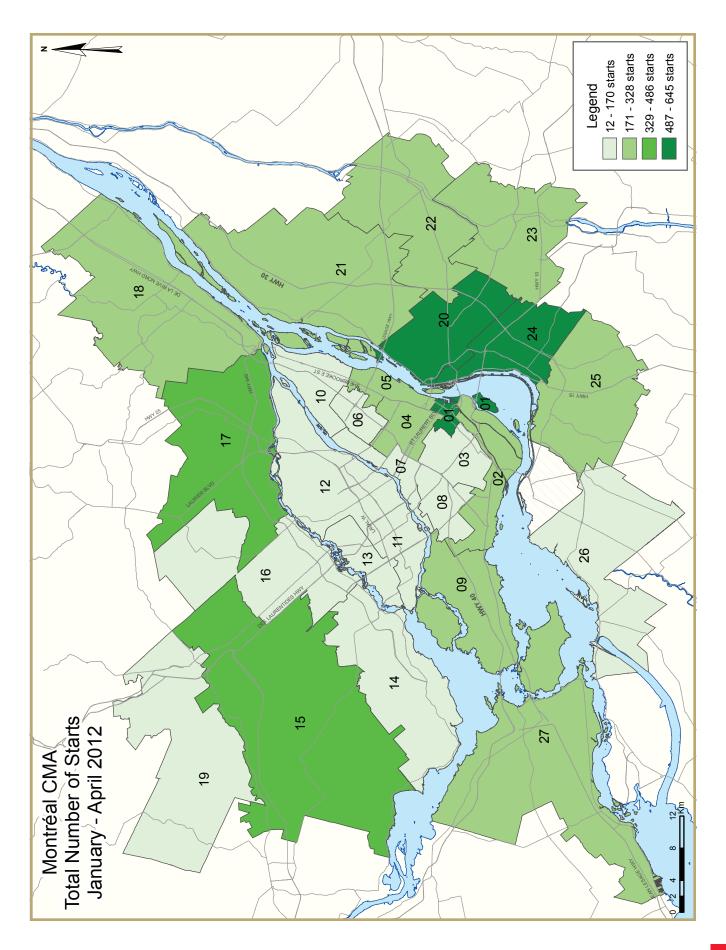

On a year-to-date basis, total starts in the Montréal CMA decreased by 2.6 per cent, mostly on account of declines in rental and freehold housing starts offsetting the gains in condominium units. While condominium construction rose by 27 per cent in the first four months of 2012 over the same period a year earlier, detached home starts and semi-detached and row housing starts decreased by 13 per cent and 14 per cent, respectively. Construction of rental units fell by 48 per cent.

### Job Market<sup>2</sup>

Total employment in the Montréal CMA continued its upward trend in April 2012. This was the third month of consecutive increase since February 2012. The seasonally adjusted employment increased by 1.15 per cent, mainly as a result of part-time job creation. The unemployment rate remained stable, at 9.2 per cent, compared to March 2012.

<sup>&</sup>lt;sup>1</sup> In this report, the data presented on the rental segment exclude co-operative housing starts.

<sup>&</sup>lt;sup>2</sup> All numbers quoted are seasonally adjusted unless stated otherwise.

	ZONE DESCRIPTIONS - MONTRÉAL CMA
Zone I	Downtown Montréal (bordered on the east by Amherst Street, on the west by Guy Street and on the north by Chemin Remembrance and Des Pins Avenue), Île-des-Soeurs.
Zone 2	Dorval, L'Île-Dorval, Montréal (Lachine, LaSalle, Le Sud-Ouest, Verdun).
Zone 3	Côte-Saint-Luc, Hampstead, Montréal (Côte-des-Neiges, Notre-Dame-de-Grâce, Outremont), Montréal-Ouest, Mont-Royal, Westmount.
Zone 4	Montréal (Parc-Extension, Plateau Mont-Royal, Rosemont (including La Petite-Patrie), Saint-Michel, Villeray).
Zone 5	Montréal (Mercier, Hochelaga-Maisonneuve, Centre-Sud).
Zone 6	Montréal (Anjou, Saint-Léonard).

### **METHODOLOGY**

### **Starts & Completions Survey Methodology**

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

### **Market Absorption Survey Methodology**

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

# STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A "dwelling unit", for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A "start", for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units "under construction" as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A "completion", for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term "absorbed" means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

### **DWELLING TYPES:**

A "Single-Detached" dwelling (also referred to as "Single") is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A "Semi-Detached (Double)" dwelling (also referred to as "Semi") is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A "Row (Townhouse)" dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term "Apartment and other" includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

### INTENDED MARKET:

The "intended market" is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

**Condominium (including Strata-Titled):** An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

### **GEOGRAPHICAL TERMS:**

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A "Rural" area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada's 2006 Census area definitions.

### CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
