His Excellency the Right Honourable David Johnston, C.C., C.M.M., C.O.M., C.D.
Governor General of Canada

Excellency:

I have the honour to submit to Your Excellency the annual *Report on the Administration of the “Members of Parliament Retiring Allowances Act” for the Fiscal Year Ended March 31, 2011.*

Respectfully submitted,

Original signed by

The Honourable Tony Clement
President of the Treasury Board and Minister for FedNor

Introduction

The *Members of Parliament Retiring Allowances Act* (MPRAA, or the Act) governs pension arrangements for members of Parliament—members of the Senate and of the House of Commons. Under the Act, the pension plan also provides a survivor allowance for eligible spouses and children. This report begins with a summary of the plan’s main provisions and then presents information, for the fiscal year 2010–11, on the transactions recorded in the pension plan accounts, on membership, and on benefits paid. Historical data are also included.

In this report, “members” refers to active and retired participants in the plan. Where necessary, members of the Senate and of the House of Commons are referred to separately.

Funding

Accounts

Two accounts are maintained in the Public Accounts of Canada to record transactions under the plan: the Members of Parliament Retiring Allowances (MPRA) Account and the Members of Parliament Retirement Compensation Arrangements (MPRCA) Account.

The MPRA Account records the transactions related to the benefits payable under the plan when these benefits accord with income tax rules for registered pension plans. The MPRCA Account records the transactions related to the benefits payable under the plan when the benefits exceed the limits imposed by tax rules.

The MPRCA Account is registered with the Canada Revenue Agency (CRA), and a transfer is made annually between the MPRCA Account and CRA either to remit a 50-per-cent refundable tax in respect of the net contributions and interest credits or to credit a reimbursement based on the net benefit payments. For the fiscal year ended March 31, 2011, the MPRCA Account has paid to CRA an amount of \$16.8 million.

Tables 1 to 4 in this report present current and historical data on the MPRA and MPRCA accounts.

Actuarial funding valuation

As required by the *Public Pensions Reporting Act*, the President of the Treasury Board causes the Chief Actuary to conduct an actuarial funding valuation of the pension arrangements established under the MPRAA. The actuarial valuation is performed by the Office of the Chief Actuary at least every three years and is tabled in Parliament by the President. The actuarial valuation presents an estimate of the balance sheet on an actuarial basis, notably, the value of assets and liabilities and any resulting excess or shortfall. In addition, the actuarial valuation also

determines the projected current service cost for each of the next three years following the valuation date. The most recent actuarial funding valuation of the pension arrangements for members of Parliament was prepared as of March 31, 2010, and tabled in Parliament on September 27, 2011.

Members' contributions

Effective January 1, 2001, the contribution rate for members of the Senate remained unchanged at 7 per cent while the contribution rate for members of the House of Commons was reduced from 9 per cent to 7 per cent of their sessional indemnities.

Some members, such as the prime minister, speakers, ministers, leaders of the opposition, parliamentary secretaries, and so forth, receive additional allowances and salaries for their service. These members must contribute to the plan, based on these additional allowances and salaries, unless they elect not to make such contributions or to contribute at a lower rate.

The prime minister must contribute 7 per cent of the salary paid to him or her as prime minister in addition to the contributions required from that individual for his or her role as a member of the House of Commons. If eligible, a member can decide to contribute for prior service in Parliament, in which case the member must pay interest on past service contributions.

Government contributions

On a monthly basis, the government is required to contribute an amount to each account, after taking into account members' contributions, to fund the costs of all future benefits that members have earned during that month. The government contribution rate for each account varies from year to year and can be expressed as a multiple of members' contributions. The ratios of government contributions to members' contributions for the calendar years 2011 and 2010 are as follows:

Government Contributions as a Multiple of Members' Contributions

	2011	2010
Senate		
MPRA Account	3.75	3.55
MPRCA Account	4.80	4.66
House of Commons		
MPRA Account	4.98	4.10
MPRCA Account	8.22	7.60

Interest

Every quarter, the government credits interest on the balance of each account at a rate set by the regulations. For the fiscal year ended March 31, 2011, interest amounts were credited quarterly at a rate of 2.5 per cent on the balance of the MPRA Account and the MPRCA Account.

Future unfunded liabilities

When the government identifies an unfunded actuarial liability in either the MPRA Account or the MPRCA Account following the tabling of an actuarial valuation report in Parliament, the government must, over a prescribed period, credit to the Account such amounts that, after the prescribed period, would cover the unfunded actuarial liability identified.

Allowances and Other Benefits

Annual allowance

Members

Upon ceasing to be a member of Parliament, plan members are entitled to an annual allowance after they have contributed to the plan for at least six years. For service up to and including July 12, 1995, former members are entitled to an immediate annual allowance. For service after that date, former members are not entitled to an annual allowance until they are 55.

The benefit accrual rate for senators is 3 per cent per year of service to a maximum of 75 per cent of the average sessional indemnity. For members of the House of Commons, the accrual rate is 5 per cent per year of service up to and including July 12, 1995; 4 per cent per year of service after that date until December 31, 2000; and 3 per cent per year of service effective January 1, 2001, to a maximum of 75 per cent of the average sessional indemnity. Effective January 1, 2001, the annual allowance is based on members' average sessional indemnity for the best five years. Prior to that date, the annual allowance was based on the average sessional indemnity for the best six years.

The annual allowance of a retired member is suspended if that person becomes a member again, either of the Senate or the House of Commons. The annual allowance of a retired member of the Senate or the House of Commons is suspended if that person starts working for the federal government and remuneration exceeds \$5,000 per year.

Prime minister

During an individual's tenure as prime minister, the incumbent must contribute for at least four years if this service is to be eligible for an allowance. The allowance will be paid once the prime minister is no longer a member of Parliament or is 65 years old, whichever comes later.

The allowance is equal to two thirds of the annual salary payable to a prime minister at the time the payment of the allowance begins.

Withdrawal allowance

Some members may get a withdrawal allowance. This is a return of a member's contributions, along with interest on those contributions, at a rate set by the regulations. Members receive withdrawal allowances if they do not complete six years of contributory service, if they leave the Senate by reason of disqualification, or if they are expelled from the House of Commons.

Survivor allowance

Members

Eligible survivors and children of members may receive an allowance.

For eligible survivors, this allowance is equal to three fifths of the basic annual allowance that the member would have been entitled to receive, or that the retired member was receiving, immediately before his or her death.

Children of members who are under the age of 18 or full-time students between 18 and 25 years of age are also entitled to an allowance. This allowance is equal to one tenth of the member's basic annual allowance or two tenths if no allowance is being paid to an eligible survivor as defined in the legislation.

Prime minister

An eligible survivor receives an allowance equal to one half of the allowance payable to a former prime minister for service as prime minister. While the prime minister must contribute 7 per cent of the salary paid to him or her as prime minister in addition to the contributions as a member of the House of Commons, a survivor allowance is paid to a spouse and not to the children of a former prime minister.

Indexing

Allowances to retired members and survivors are adjusted at the beginning of each calendar year. This adjustment corresponds to the percentage increase in the average of the Consumer Price Index (CPI) for the 12-month period ended September 30 over the CPI average for the same 12-month period of the previous year.

Indexing payments do not begin until the former member is 60 years old; however, once indexing begins, payments reflect the cumulative increase in the CPI since the member left Parliament.

Survivor allowances are indexed immediately based on the date a member left Parliament.

Minimum benefit

When a member or retired member dies and there are no survivors entitled to an allowance, the member's estate receives the amount by which the member's contributions exceed any allowances already paid.

Contributors

At March 31, 2011, there were 410 members contributing under the plan, and there were 3 vacant seats in the House of Commons. Tables 5 and 6 in this report present information on the number and distribution of allowances.

Statistical Tables

Notes

1. Includes contributions for current and prior service and interest paid by members.
2. Includes a transfer of \$9,941,788 from the Supplementary Retirement Benefits Account and an actuarial adjustment credit of \$158,000,000.
3. Includes pension division payments and interest on withdrawal allowances.
4. PSS stands for Public Service Superannuation.
