Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Highlights

Following two consecutive months of increases, employment in October was unchanged and the unemployment rate remained at 7.4%.

Chart 1 Employment and unemployment rates, Canada, seasonally adjusted

Analysis — October 2012

Following two consecutive months of increases, employment in October was unchanged and the unemployment rate remained at 7.4%.

Compared with 12 months earlier, employment increased 1.3% or 229,000, all in full-time work. The total number of hours worked also rose 1.3% over the same period.

In October, employment grew in Quebec as well as Newfoundland and Labrador, while it fell in British Columbia and Manitoba. There was little change in the other provinces.

The number of public sector employees increased by 37,000, offset by a decline in private sector employment, which includes both private sector employees and the self-employed. Total gains over the previous 12 months were among both private sector employees (+157,000 or +1.4%) and public sector employees (+74,000 or +2.1%).

Employment in agriculture experienced a decline in October, while there was little change in the other industries.

The number of workers among the major demographic groups was virtually unchanged in October.

Provincial Summary

Employment in Quebec increased by 20,000 in October, all in part-time work, pushing the unemployment rate down 0.3 percentage points to 7.7%. Compared with 12 months earlier, employment in the province was 1.7% higher.

In October, employment in Newfoundland and Labrador rose by 3,800, and the unemployment rate was 11.9%. Employment in the province increased 3.6% from 12 months earlier, the highest growth rate among the provinces.

The number of workers in British Columbia declined 11,000 in October. Nevertheless, the unemployment rate fell 0.3 percentage points to 6.7%, as fewer people participated in the labour force. Year-over-year employment growth for the province was 1.3%.

Following two consecutive months of increases, employment in Manitoba fell by 7,300 in October, and the unemployment rate rose 0.6 percentage points to 5.6%. Despite this increase, Manitoba continued to have one of the lowest unemployment rates among the provinces. Compared with 12 months earlier, there was little change in overall employment.

In October, employment in Ontario was little changed, as a decrease in part-time work was mostly offset by an increase in full time. The unemployment rate rose 0.4 percentage points to 8.3%, as more people searched for work. Compared with 12 months earlier, employment growth in the province was 1.0%.

While employment in New Brunswick was little changed in October, the unemployment rate increased 0.6 percentage points to 11.6%, with more people searching for work. Compared with 12 months earlier, the unemployment rate in the province was up 2.2 percentage points.

Employment losses in agriculture

Following an increase in September, employment in agriculture fell by 16,000 in October. Employment in this industry was little changed compared with 12 months earlier.

The number of workers in manufacturing was little changed for the fifth consecutive month. Compared with 12 months earlier, the number of factory workers increased 5.2%, with most of the gains earlier in the year.

Little employment change among the major demographic groups

In October, employment among men aged 55 and over was little changed. However, with more men in this age group searching for work, the unemployment rate increased 1.0 percentage points to 7.3%. Compared with 12 months earlier, employment among this group was up 87,000 (+5.1%), driven in part by population aging.

Employment among women aged 55 and over was little changed in October. Compared with 12 months earlier, their employment increased by 102,000 (+7.4%), also partly due to population aging.

Employment among those aged 25 to 54 was unchanged in October, and the year-over-year gains were 92,000 (+0.8%).

Employment among youths remained little changed for the second consecutive month and was down by 52,000 (-2.1%) compared with 12 months earlier. Their unemployment rate was 14.7% in October.

Note to readers

The Labour Force Survey (LFS) estimates are based on a sample and are therefore subject to sampling variability. Estimates for smaller geographic areas or industries will have more variability. For an explanation of sampling variability of estimates and how to use standard errors to assess this variability, consult the "Data quality" section of the publication Labour Force Information (71-001-X, free).

The employment rate is the number of employed persons as a percentage of the population 15 years of age and over. The rate for a particular group (for example, youth aged 15 to 24) is the number employed in that group as a percentage of the population for that group.

The unemployment rate is the number unemployed as a percentage of the labour force (employed and unemployed).

The participation rate is the number of employed and unemployed as a percentage of the population. For more detailed information, see the Guide to the Labour Force Survey (71-543-G, free).

Unless otherwise stated, this release presents seasonally adjusted data, which facilitates comparisons by removing the effects of seasonal variations. For more information on seasonal adjustment, see Seasonal adjustment and identifying economic trends.

282-0071	Labour force survey estimates (LFS), wages of employees by type of work, North American Industry Classification System (NAICS), sex and age group, unadjusted for seasonality, monthly (current dollars)
282-0072	Labour force survey estimates (LFS), wages of employees by type of work, North American Industry Classification System (NAICS), sex and age group, annual (current dollars)
282-0073	Labour force survey estimates (LFS), wages of employees by job permanence, union coverage, sex and age group, unadjusted for seasonality, monthly (current dollars)
282-0074	Labour force survey estimates (LFS), wages of employees by job permanence, union coverage, sex and age group, annual (current dollars)
282-0075	Labour force survey estimates (LFS), employees by establishment size, North American Industry Classification System (NAICS), sex and age group, unadjusted for seasonality, monthly
282-0076	Labour force survey estimates (LFS), employees by establishment size, North American Industry Classification System (NAICS), sex and age group, annual
282-0077	Labour force survey estimates (LFS), employees by union coverage, North American Industry Classification System (NAICS), sex and age group, unadjusted for seasonality, monthly
282-0078	Labour force survey estimates (LFS), employees by union coverage, North American Industry Classification System (NAICS), sex and age group, annual
282-0079	Labour force survey estimates (LFS), employees by job permanency, North American Industry Classification System (NAICS), sex and age group, unadjusted for seasonality, monthly

282-0080	Labour force survey estimates (LFS), employees by job permanency, North American Industry Classification System (NAICS), sex and age group, annual
282-0081	Labour force survey estimates (LFS), employees working overtime (weekly) by National Occupational Classification for Statistics (NOC-S), sex and age group, unadjusted for seasonality, monthly
282-0082	Labour force survey estimates (LFS), employees working overtime (weekly) by National Occupational Classification for Statistics (NOC-S), sex and age group, annual
282-0083	Labour force survey estimates (LFS), employees working overtime (weekly) by North American Industry Classification System (NAICS), sex and age group, unadjusted for seasonality, monthly
282-0084	Labour force survey estimates (LFS), employees working overtime (weekly) by North American Industry Classification System (NAICS), sex and age group, annual
282-0085	Labour force survey estimates (LFS), supplementary unemployment rates by sex and age group, unadjusted for seasonality, monthly
282-0086	Labour force survey estimates (LFS), supplementary unemployment rates by sex and age group, annual
282-0087	Labour force survey estimates (LFS), by sex and age group, seasonally adjusted and unadjusted, monthly
282-0088	Labour force survey estimates (LFS), employment by North American Industry Classification System (NAICS), seasonally adjusted and unadjusted, monthly
282-0089	Labour force survey estimates (LFS), employment by class of worker and sex, seasonally adjusted and unadjusted, monthly
282-0092	Labour force survey estimates (LFS), actual hours worked at main job by North American Industry Classification System (NAICS), seasonally adjusted, monthly
282-0093	Labour force survey estimates (LFS), employment by National Occupational Classification for Statistics (NOC-S), seasonally adjusted, monthly
282-0094	Labour force survey estimates (LFS), by North American Industry Classification System (NAICS), Canada, seasonally adjusted, monthly
282-0095	Labour force survey estimates (LFS), by full- and part-time students during school months, sex and age group, annual
282-0100	Labour force survey estimates (LFS), by territories, sex and age group, 3-month moving average, seasonally adjusted and unadjusted, monthly
282-0101	Labour force survey estimates (LFS), by immigrant status, age group, Canada, regions, provinces and Montreal, Toronto, Vancouver census metropolitan areas, 3-month moving average, unadjusted for seasonality, monthly
282-0102	Labour force survey estimates (LFS), by immigrant status, age group, Canada, regions, provinces and Montreal, Toronto, Vancouver census metropolitan areas, annual
282-0103	Labour force survey estimates (LFS), by immigrant status, sex and detailed age group, Canada, 3-month moving average, unadjusted for seasonality, monthly

282-0104	Labour force survey estimates (LFS), by immigrant status, sex and detailed age group, Canada, annual
282-0105	Labour force survey estimates (LFS), by immigrant status, educational attainment, sex and age group, Canada, 3-month moving average, unadjusted for seasonality, monthly
282-0106	Labour force survey estimates (LFS), by immigrant status, educational attainment, sex and age group, Canada, annual
282-0107	Labour force survey estimates (LFS), by immigrant status, country of birth, sex and age group, Canada, regions and provinces, 3-month moving average, unadjusted for seasonality, monthly
282-0108	Labour force survey estimates (LFS), by immigrant status, country of birth, sex and age group, Canada, regions and provinces, annual
282-0109	Labour force survey estimates (LFS), by census metropolitan area based on 2006 census boundaries, sex and age group, 3-month moving average, unadjusted for seasonality, monthly
282-0110	Labour force survey estimates (LFS), by census metropolitan area based on 2006 census boundaries, sex and age group, annual
282-0111	Labour force survey estimates (LFS), employment by census metropolitan area based on 2006 census boundaries and North American Industry Classification System (NAICS), 3-month moving average, unadjusted for seasonality, monthly
282-0112	Labour force survey estimates (LFS), employment by census metropolitan area based on 2006 census boundaries and North American Industry Classification System (NAICS), annual
282-0113	Labour force survey estimates (LFS), employment by census metropolitan area based on 2006 census boundaries and National Occupational Classification for Statistics (NOC-S), 3-month moving average, unadjusted for seasonality, monthly
282-0114	Labour force survey estimates (LFS), employment by census metropolitan area based on 2006 census boundaries and National Occupational Classification for Statistics (NOC-S), annual
282-0115	Labour force survey estimates (LFS), by selected census agglomerations based on 2006 census boundaries, annual
282-0116	Labour force survey estimates (LFS), by census metropolitan area based on 2006 census boundaries, 3-month moving average, seasonally adjusted and unadjusted, monthly
282-0117	Labour force survey estimates (LFS), by Montréal, Toronto and Vancouver census metropolitan areas based on 2006 census boundaries, seasonally adjusted and unadjusted, monthly
282-0118	Labour force survey estimates (LFS), by urban and rural areas based on 2006 census boundaries, sex and age group, unadjusted for seasonality, monthly
282-0119	Labour force survey estimates (LFS), by urban and rural areas based on 2006 census boundaries, sex and age group, annual
282-0120	Labour force survey estimates (LFS), employment by urban and rural areas based on 2006 census boundaries, class of worker and North American Industry Classification System (NAICS), unadjusted for seasonality, monthly

282-0121	Labour force survey estimates (LFS), employment by urban and rural areas based on 2006 census boundaries, class of worker and North American Industry Classification System (NAICS), annual
282-0200	Labour force survey estimates (LFS), weekly wage distributions of employees by type of work, North American Industry Classification System (NAICS) and by sex, unadjusted for seasonality, monthly
282-0201	Labour force survey estimates (LFS), weekly wage distributions of employees by type of work, North American Industry Classification System (NAICS) and by sex, annual
282-0202	Labour force survey estimates (LFS), weekly wage distributions of employees by type of work, National Occupational Classification for Statistics (NOC-S) and by sex, unadjusted for seasonality, monthly
282-0203	Labour force survey estimates (LFS), weekly wage distributions of employees by type of work, National Occupational Classification for Statistics (NOC-S) and by sex, annual
282-0204	Labour force survey estimates (LFS), hourly wage distributions of employees by type of work, North American Industry Classification System (NAICS)and by sex, unadjusted for seasonality, monthly
282-0205	Labour force survey estimates (LFS), hourly wage distributions of employees by type of work, North American Industry Classification System (NAICS) and by sex, annual
282-0206	Labour force survey estimates (LFS), hourly wage distribution of employees by type of work, National Occupational Classification for Statistics (NOC-S) and by sex, unadjusted for seasonality, monthly
282-0207	Labour force survey estimates (LFS), hourly wage distribution of employees by type of work, National Occupational Classification for Statistics (NOC-S) and by sex, annual
282-0208	Labour force survey estimates (LFS), by educational degree, sex and age group, unadjusted for seasonality, monthly
282-0209	Labour force survey estimates (LFS), by educational degree, sex and age group, annual
282-0210	Labour force survey estimates (LFS), by family type and family age composition, unadjusted for seasonality, monthly
282-0211	Labour force survey estimates (LFS), by family type and family age composition, annual
282-0212	Labour force survey estimates (LFS), hours lost by employees by reason absent full and part week and sex, unadjusted for seasonality, monthly
282-0213	Labour force survey estimates (LFS), hours lost by employees by reason absent full and part week and sex, annual
282-0214	Labour force survey estimates (LFS), activity prior to unemployment by sex and age group, unadjusted for seasonality, monthly
282-0215	Labour force survey estimates (LFS), activity prior to unemployment by sex and age group, annual

282-0216	Labour force survey estimates (LFS), reason for leaving job during previous year by sex and age group, unadjusted for seasonality, monthly
282-0217	Labour force survey estimates (LFS), reason for leaving job during previous year by sex and age group, annual
282-0218	Labour force survey estimates (LFS), reason for not looking for work, by sex and age group, unadjusted for seasonality, monthly
282-0219	Labour force survey estimates (LFS), reason for not looking for work, by sex and age group, annual

Selected surveys from Statistics Canada

3701 Labour Force Survey

Selected summary tables from Statistics Canada

- Labour force characteristics
- Employment by industry
- Days lost per worker due to illness or disability, by sex, by province
- Economic indicators, by province and territory (monthly and quarterly)
- Labour force and participation rates by sex and age group
- Labour force, employed and unemployed, numbers and rates, by province
- Employment by industry and sex
- Full-time and part-time employment by sex and age group
- Labour force characteristics by age and sex
- Distribution of employed people, by industry, by province
- Labour force characteristics, population 15 years and older, by census metropolitan area
- Labour force characteristics, population 15 years and older, by economic region, by province
- Days lost per worker by cause, by provinces
- Days lost per worker by industry and sex
- People employed, by educational attainment
- Reasons for part-time work by sex and age group

- Self-employment, historical summary
- Employment by age, sex, type of work, class of worker and province (monthly)
- Employment by major industry groups, seasonally adjusted, by province (monthly)
- Actual hours worked per week by industry, seasonally adjusted (monthly)
- Average hourly wages of employees by selected characteristics and profession, unadjusted data, by province (monthly)
- Labour force characteristics, seasonally adjusted, by province (monthly)
- Labour force characteristics, unadjusted, by province (monthly)
- Labour force characteristics, seasonally adjusted, by census metropolitan area (3 month moving average)
- Labour force characteristics, unadjusted, by census metropolitan area (3 month moving average)
- Labour force characteristics, unadjusted, by economic region (3 month moving average)
- Labour force characteristics by immigrant status of population aged 25 to 54, by province
- Labour force characteristics by immigrant status of population aged 25 to 54, by educational attainment
- Labour force characteristics by immigrant status, by detailed age group
- Labour force characteristics by immigrant status of population aged 25 to 54, by country of birth

3. Also referred to as Natural resources.

Note(s): Related CANSIM Tables 282-0088, 282-0089.

Average standard error of change in two consecutive months (see "Sampling Errors" in Data Quality for further explanations).
 Includes both incorporated and unincorporated working owners, self-employed persons who do not have a business and persons working in a family business without pay.

^{1.} For geographic descriptions of economic regions, refer to the Guide to the Labour Force Survey (catalogue number 71-543-GIE).

^{2.} Estimates for Canada are a sum of the provincial totals and exclude estimates from Yukon, Northwest Territories and Nunavut. **Note(s):** Related CANSIM table 282-0054.

Table 6-2 Labour force characteristics by territories, unadjusted for seasonality, 3 month moving average ending in October 2011 and October 2012

	Population	Labour force			Participation	Employment	
		Labour Employment force		Unemployment	rate	rate	rate
		in thous	ands			percent	
Yukon 1 2011 2012	26.7 27.0	20.2 20.7	19.2 19.6	1.0 1.2	75.7 76.7	5.0 5.8	71.9 72.6
Northwest Territories ² 2011 2012	32.1 32.1	24.8 25.0	23.1 23.1	1.7 1.9	77.3 77.9	6.9 7.6	72.0 72.0
Nunavut ³ 2011 2012	21.0 21.2	13.7 13.9	11.7 11.9	2.1 2.0	65.6 65.7	15.0 14.6	55.7 56.1

Since 1992, the Labour force survey (LFS) has been conducted in the Yukon, using an alternative methodology that accommodates some of the operational difficulties inherent to remote locales. These estimates are not included in the national totals. In 1995, the LFS in the Yukon underwent a sample redesign. One result of the redesign was that the covered population increased from 85% to 92%, which is reflected by the sharp increase in the three month moving averages estimates of January, February and March of 1995 for all the level estimates. Users are therefore warned to be cautious when comparing estimates before January 1995 to estimates for January 1995 and forward.

Note(s): Related CANSIM table 282-0100.

Since 2001, the Labour force survey (LFS) has been administered in the Northwest Territories, using an alternative methodology that accommodates some of the operational difficulties inherent to remote locales. These estimates are not included in national totals.

^{3.} Since 2004, the Labour force survey (LFS) has been administered in Nunavut, using an alternative methodology that accommodates some of the operational difficulties inherent to remote locales. These estimates are 3-month moving averages and are not included in national totals. From January 2004 to December 2007, estimates represent about 70% of all Nunavut residents aged 15 and over. Starting in January 2008, coverage was extended to 92%, so that by March 2008, the 3-month moving average is completely based on the extended coverage. Because of the large difference in coverage, users are recommended not to compare estimates prior to January 2008 with data afterwards. The January and February 2008 3-month moving average estimates are based on a mix of both coverages, since the extended coverage was introduced in January 2008. Estimates from January 2004 to December 2007 are based on the 10 largest communities in Nunavut: Iqaluit, Rankin Inlet, Cambridge Bay, Kugluktuk, Baker Lake, Arviat, Pond Inlet, Cape Dorset, Pangnirtung, Igloolik. Estimates from March 2008 to present cover the above communities as well as: Taloyoak, Gjoa Haven, Kugaaruk, Coral Harbour, Repulse Bay, Qikiqtarjuaq, Arctic Bay, Hall Beach, Clyde River.

About the Labour Force Survey

The statistics contained in this report are based on information obtained through a sample survey of 56,000 representative households across the country. The Labour Force Survey, started in November 1945, was taken at quarterly intervals until November 1952. It has been carried out monthly since then. The information generated by the survey has expanded considerably over the years with a major redesign of the survey content in 1976 and again in 1997, and provides a rich and detailed picture of the Canadian labour market.

The sample used in the Labour Force Survey has been designed to represent all persons in the population 15 years of age and over residing in the provinces of Canada, with the exception of the following: persons living on Indian reserves, full-time members of the armed forces and people living in institutions (for example, inmates of penal institutions and patients in hospitals or nursing homes who have resided in the institution for more than six months). Monthly estimates of employment, unemployment and persons not in the labour force refer to the specific week covered by the survey each month, normally the week containing the 15th day.

Definitions and explanations

The **labour force** is composed of those members of the civilian non-institutional population 15 years of age and over who, during the reference week, were employed or unemployed.

Employed persons are those who, during the reference week:

- did any work at all (a)
- had a job but were not at work

A person is considered to be full-time if his/her usual hours at the main job are 30 or more hours per week. When the number of hours worked at the main job is usually less than 30 hours per week then he/she is considered to be part-time.

Unemployed persons are those who, during the reference week:

- (a) were without work, had actively looked for work in the past four weeks (ending with reference week), and were available for work:
- (b) had not actively looked for work in the past four weeks but were on temporary layoff and were available for work:
- (c) had not actively looked for work in the past four weeks but had a new job to start in four weeks or less from the reference week, and were available for work.

Persons in the civilian non-institutional population 15 years of age and over who, during the reference week, were neither employed nor unemployed are classified as not in the labour force.

The unemployment rate represents the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.

The **participation rate** represents the labour force expressed as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex, etc.) is the labour force in that group expressed as a percentage of the population for that group.

The employment rate (formerly the employment/population ratio) represents the number of persons employed expressed as a percentage of the population 15 years of age and over. The employment rate for a particular group (age, sex, etc.) is the number employed in that group expressed as a percentage of the population for that group.

The **part-time rate** represents the number of persons employed part-time expressed as a percentage of the employed. The part-time rate for a particular group (age, sex, etc.) is the number employed part-time in that group expressed as a percentage of the employed for that group.

All geographic regions are based on the 2006 Census boundaries.

Seasonal adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. The seasonally adjusted series contains irregular as well as longer-term cyclical fluctuations.

The seasonally adjusted series are revised each year to take into account current data and to generate new forecast factors for the next twelve months. The data are therefore subject to slight revisions in future issues of this publication.

Sampling variability of estimates

Estimates in this publication are based on the Labour Force Survey, a monthly survey of approximately 56,000 households across Canada. Because the entire population is not surveyed, the estimates are subject to sampling error. While the published estimate is the best available indicator of the real value, changes in the level of any estimates between two months can be the result of a true change or sampling variability. The sampling error can be estimated by calculating the standard error for the published estimate or statistic. These standard errors have been included in the publication tables, in order to assist users in interpreting the data.

Interpretation based on standard error

Two thirds of the time (68%), a change greater than the sampling error indicates a real change. The larger the change compared to the standard error, the better the chance that we are observing a real change, as opposed to a change due to sampling variability. At the 95% level, in order to ensure that change is real, the change in the estimate must be greater than twice the sampling error.

Movements in estimates that are smaller than the sampling error are less likely to reflect a real change and more likely to be due to sampling variability. While the above is true for monthly movements, one can have more confidence in a series of consecutive movements in the same direction, even though some of the monthly movements may be smaller than the sampling error.

Interpretation based on confidence intervals

Confidence intervals provide another way of looking at the variability inherent in estimates of sample surveys. To illustrate how to calculate the confidence interval, let us say that one month the published estimate for total employment rose by 16,000 to reach 16,500,000. The associated standard error for the movement estimate is 27,200. The standard error used to interpret the movement estimate indicates that:

- There are approximately two chances in three (68%) that the real value of the movement between the two months falls within the range -11,200 to +43,200 (16,000 + or – one standard error).
- There are approximately nine chances in ten (90%) that the real value of the movement between the two months falls within the range -27,520 to +59,520 (16,000 + or - 1.6 times the standard error).
- There are approximately nineteen chances in twenty (95%) that the real value of the movement between the two months falls within the range -38,400 to +70,400 (16,000 + or - two standard errors).

For more detailed explanations on sampling variability of estimates, and in particular for information on how to assess the variability of level estimates, consult the Data quality section of the Guide to the Labour Force Survey, (71-543-G) on page 27.

Documentation
