MARKET INDICATOR REPORT | JANUARY 2013

Inside China The Pork Trade

▶ **TRADE SUMMARY**

From a global perspective, China is the largest market for fresh meat and the fifth-largest importer of pork and pork products, importing more than C\$2.1 billion in 2011, an increase of 108.9% from 2010. The country mainly imports its pork and pork products from the United States, with 57.9% of total imports, followed by Denmark (14.9%), Canada (9.8%) and Spain (6.1%).

In 2011, China's main pork and pork product imports were frozen offal (C\$1.2 billion), frozen pork cuts (C\$489.7 million), and frozen hams, shoulders and cuts thereof (bone-in) (C\$357.6 million).

In 2011, China exported just over C\$869.2 million in pork and pork products worldwide, an increase of 4.9% from the previous year. Most of China's exports came from processed pork (C\$384.7 million), frozen pork cuts (C\$210.8 million), and sausages (C\$147.8 million). Top destinations included Hong Kong (46.7%), Japan (34.1%) and Singapore (3.5%).

▶ **CANADIAN PERFORMANCE**

With a value of C\$202 million, China was Canada's fifth-largest market for pork and pork products in 2011. In 2011, Canada's greatest pork product sales to China were of frozen pork offal (C\$89.3 million), frozen pork cuts (C\$79.3 million), and fresh, bone-in hams, shoulders and cuts thereof (\$11.5 M). Pork and pork products represented 1.2% of all Canadian agri-food and seafood products exported to China in 2011.

Between 2009 and 2011, Chinese imports of frozen offal (except livers), frozen hams, shoulders and cuts thereof, and pig fat, have increased to place Canada in the top three pork suppliers to China. However, Canada's share has declined in these categories, due to the fact that China imported more of these products overall and there were more countries active in exporting to the market. Therefore, the market share was more fragmented, which has reduced Canada's position. Even so, in the sausage category, China increased its imports and Canada's share has also increased.

Chinese imports of frozen pork livers from Canada recorded the highest volume growth during 2010 to 2011, with 890%.

Source: Global Trade Atlas, 2012

▶ SPENDING AND CONSUMPTION

Chinese consumer expenditure on meat was US\$180.4 billion in 2011. Year-on-year growth, however, has been falling steadily since 2006 (28%), ending with 9.3% in 2011.

Per capita spending on meat was US\$134.5 in 2011, up from US\$123.7 in 2010. Per capita spending has been increasing steadily since 2006 (US\$56.8).

Pork is China's primary meat, and is considered a staple in this market. Offal, the viscera and trimmings of a butchered animal that are removed in dressing meat, is one of China's largest pork product imports, and is used in popular dishes, such as stir-fried pork kidneys, spicy stew, deep-fried pork intestines, and a popular pork tongue dish.

▶ BY THE NUMBERS

China, Top Imports of Pork Products, 2011

Product	Imports from the World (US\$ billions)	Top Supplier
Total	2.134	N/A
Frozen pork offal	0.796	U.S.
Frozen pork cuts	0.183	U.S.
Frozen hams, shoulders and cuts thereof with bone in	0.248	U.S.
Pig fat	0.006	Spain
Frozen pork livers	0.006	Denmark

China, Top Five Imports of Pork Products
Percentage (%) Change, 2010-2011

Source: Global Trade Atlas, 2012

▶ CONSUMER FOODSERVICE IN CHINA*

- ▶ With one-fifth of the world's population, China is the largest global market for fresh meat.
- ▶ Euromonitor reports that one third of the meat consumed in China in 2011 was through foodservice establishments.
- ▶ Euromonitor International reports that the Asia-Pacific region dominates global consumer foodservice, representing 40% of the world's total foodservice market value in 2011. This is up from 39% in 2010. China is one of the Asia-Pacific's largest foodservice markets.
- ▶ In East Asia, full-service restaurants are becoming increasingly central to social life, as smaller living spaces are leading consumers to entertain outside the home. China's full-service restaurants saw value growth of 17% in 2011, with sales of US\$310.3 billion. That same year, value sales from full-service restaurants in China accounted for 75% of the total foodservice sales for the year.

Hotels and lodging

- ▶ Many consumer foodservice outlets in China's hotel and lodging sector are located in hotels, which generally charge higher prices than other locations, such as motels or bed and breakfasts.
- ▶ In 2011, hotels and lodgings represented the third-largest consumer foodservice location in terms of outlet numbers, behind standalone and retail locations. In fact, China's hotel and lodging sector saw dynamic growth in the number of outlets in 2011, rising 14% over 2010 to a total of 269,529 outlets.
- ▶ Consumer foodservice through hotels and lodgings had double digit sales growth (23%) in 2011.
- ▶ Hotels and lodgings also saw the highest average value per transaction in the foodservice sector in 2011. These higher values are attributed to this sector's premium-positioned, full-service restaurants, cafés and bars, with high unit prices for menu items.

Catering

- ▶ Total Chinese consumer expenditure on catering was C\$207.8 billion in 2011, up from C\$179 billion in the previous year.
- ▶ Per capita, Chinese consumer expenditure on catering has also increased significantly since the C\$78 recorded in 2007, reaching C\$155 in 2011.
- ▶ China is seeing the emergence of group buying in consumer foodservice catering. Group buying occurs when a company offers products and services at significantly reduced prices, on the condition that a minimum number of buyers are willing to purchase the same item. This trend began towards the end of 2010. Euromonitor credited the growing popularity of group buying in China to the rapid development of e-commerce. Foodservice catering operators launched a combination of dishes with discounted prices, that can be purchased through group buying, e-commerce platforms. Currently, there are many group buying websites in China, similar to the popular North American services Groupon and Dealfind.

**This report was originally prepared for participants in the FHC China show in November 2012 and so, while the main focus of the report is on trade, a short section describing trends in the Chinese foodservice industry has also been included.*
