Canada

## **Canadian Data Report of Fisheries and Aquatic Sciences**

Data reports provide a medium for filing and archiving data compilations where little or no analysis is included. Such compilations commonly will have been prepared in support of other journal publications or reports. The subject matter of data reports reflects the broad interests and policies of the Department of Fisheries and Oceans, namely, fisheries and aquatic sciences.

Data reports are not intended for general distribution and the contents must not be referred to in other publications without prior written authorization from the issuing establishment. The correct citation appears above the abstract of each report. Data reports are abstracted in *Aquatic Sciences and Fisheries Abstracts* and indexed in the Department's annual index to scientific and technical publications.

Numbers 1-25 in this series were issued as Fisheries and Marine Service Data Records. Numbers 26-160 were issued as Department of Fisheries and the Environment, Fisheries and Marine Service Data Reports. The current series name was introduced with the publication of report number 161.

Data reports are produced regionally but are numbered nationally. Requests for individual reports will be filled by the issuing establishment listed on the front cover and title page. Out-of-stock reports will be supplied for a fee by commercial agents.

## **Rapport statistique canadien des sciences halieutiques et aquatiques**

Les rapports statistiques servent à classer et à archiver les compilations de données pour lesquelles il y a peu ou point d'analyse. Ces compilations auront d'ordinaire été préparées à l'appui d'autres publications ou rapports. Les sujets des rapports statistiques reflètent la vaste gamme des intérêts et des politiques du ministère des Pêches et des Océans, c'est-à-dire les sciences halieutiques et aquatiques.

Les rapports statistiques ne sont pas destinés à une vaste distribution et leur contenu ne doit pas être mentionné dans une publication sans autorisation écrite préalable de l'établissement auteur. Le titre exact paraît au-dessus du résumé de chaque rapport. Les rapports statistiques sont résumés dans la revue *Résumés des sciences aquatiques et halieutiques*, et ils sont classés dans l'index annuel des publications scientifiques et techniques du Ministère.

Les numéros 1 à 25 de cette série ont été publiés à titre de relevés statistiques, Services des pêches et de la mer. Les numéros 26 à 160 ont été publiés à titre de rapports statistiques du Service des pêches et de la mer, ministère des Pêches et de l'Environnement. Le nom actuel de la série a été établi lors de la parution du numéro 161.

Les rapports statistiques sont produits à l'échelon régional, mais numérotés à l'échelon national. Les demandes de rapports seront satisfaites par l'établissement auteur dont le nom figure sur la couverture et la page du titre. Les rapports épuisés seront fournis contre rétribution par des agents commerciaux.

## ABSTRACT

O'Neil, S.F., M. Bernard, P. Gallop, and R. Pickard 1987. 1986 Atlantic salmon sport catch statistics, Maritime Provinces. Can. Data Rep. Fish. Aquat. Sci. No. 663. v + 69 p.

The Maritime Provinces Atlantic salmon sport catch in 1986 was 73,260 fish - 48,540 grilse retained, 1,420 grilse released, and 23,300 large salmon ( $> 63$  cm fork length) released. Field staff estimated that 37 New Brunswick rivers produced 47,530 bright fish (38,620 grilse retained) and 5,603 kelts. Nova Scotia anglers reported fishing on 95 rivers and retained or released a total of 19,913 large salmon and grilse. Only 236 grilse were angled on Prince Edward Island. Anglers spent 111,000 rod-days on New Brunswick rivers and 77,200 on Nova Scotia rivers during the 1986 season. Catch per unit effort (fish per rod-day) for the Maritimes was 0.259.

Keywords: Atlantic salmon, sport catch, rod-days, kelts, grilse, large salmon, New Brunswick, Nova Scotia, Maritimes.

## RÉSUMÉ

O'Neil, S.F., M. Bernard, P. Gallop, and R. Pickard 1987. 1986 Atlantic salmon sport catch statistics, Maritime Provinces. Can. Data Rep. Fish. Aquat. Sci. No. 663. v + 69 p.

Les prises sportives de saumon de l'Atlantique effectuées dans les provinces Maritimes en 1986 s'établissent à 73 260 saumons, soit 48 540 madeleineaux capturés et gardés, 1 420 madeleineaux remis à l'eau et 23 300 gros saumons (plus de 63 cm de longueur à la fourche) remis à l'eau. Les employés des régions concernées ont estimé à 47 530 saumons de montée (38 620 madeleineaux gardés) et 5 603 charognards les prises obtenues dans 37 rivières du Nouveau-Brunswick. En Nouvelle-Écosse, les prises sportives de saumon, soit gardées soit remises à l'eau, obtenues dans 95 rivières s'élèvent à 19 913 gros saumons et madeleineaux. À Île-du-Prince-Édouard, les prises se sont limitées à 236 madeleineaux. En 1986, les pêcheurs ont consacré à la pêche 111 000 journées au Nouveau-Brunswick et 77 200 en Nouvelle-Écosse. La prise par effort unitaire (poissons par journée de pêche) pour les Maritimes a été de 0,259.

## INTRODUCTION

This report provides catch and effort statistics for the Atlantic salmon sport catch in the Maritime Provinces.

The data provided in this report have come from two sources, so have been presented in different formats in two separate sections. Catch and effort information for rivers in New Brunswick and Prince Edward Island was collected by Fisheries and Oceans and New Brunswick Department of Natural Resources and Energy field personnel. The data on Nova Scotia's waterways were compiled from reports supplied by over 6,400 Nova Scotia salmon anglers.

## COMMENT ON THE FISHERY

### MARITIME PROVINCES

The Atlantic salmon management plan initiated in 1984 was continued through 1986. Consequently, anglers were again required to release salmon 63 cm or more in length. The catch and effort data included in the statistical section of this report will reflect those releases for rivers in Nova Scotia only. Canadian recreational catches of Atlantic salmon during the past few years have shown some improvement (Table 1), but comparison of catch data since 1984 with those of earlier years should be done with caution due to the paucity of release information.

The 1986 Maritime-wide recreational catch was 48,540 grilse, which exceeds the

previous 16-year mean (1970-85) of 36,600 large salmon and grilse (Table 2). Anglers throughout the Maritimes reported good to excellent conditions on most rivers. The complete closure of the commercial salmon fishery in 1985 and 1986 and restricted fishery in 1984 has resulted in major increases in escapement of Atlantic salmon to most rivers. The lower-than-average black or kelt salmon catch in 1986 of 1,690 grilse (Tables 2 and 3) is not necessarily indicative of fewer fish, since the angler effort of 7,800 rod-days during the black salmon season is far below the 1970-85 mean of 12,800 rod-days, and the catch estimate excludes released large salmon, which number over 4,000, at least (Table 6).

Anglers actively pursued their quest for Atlantic salmon on 132 Maritime rivers; 35 drain into the Gulf of St. Lawrence (Gulf Region), and 97 are found within the boundaries of the Scotia-Fundy Region (Appendix 1). The retained catch in the Scotia-Fundy Region was 11,150 grilse, down slightly from the 12,600 grilse angled in 1985 (Table 4), but up somewhat from the 1970-85 mean catch of 9,700 fish. The Gulf Region catch of 37,370 grilse on the other hand, showed a substantial increase over the 1970-85 mean of 26,900 large salmon and grilse and the 1985 catch of roughly 20,000 grilse.

The increased abundance of fish was paralleled with greater angler effort; roughly 191,000 rod-days were expended in 1986 in the Maritime Provinces (Table 5, and Fig. 1).

#### NEW BRUNSWICK

New Brunswick anglers experienced some of the best angling in years. The 1986 catch per rod-day (CPD) of 0.363 is the highest catch rate seen since 1980 and is even more exceptional when one considers the unusually high angler effort (Fig. 2 and Table 5).

Atlantic salmon sport fishermen in New Brunswick retained roughly 40,000 grilse in 1986 and released over 12,800 large salmon for a total catch of 53,130 fish (Tables 2 and 6). Estimates of large salmon catches are difficult to obtain so are incomplete. Large salmon catch and release data were only available on 17 of the province's 37 rivers angled for salmon in 1986. In spite of the incomplete state of the data, the 1986 total reported catch represents a 76% increase over the previous 16-year

(1970-85) mean of 30,100 fish.

The reduced commercial exploitation and modified (i.e., no large salmon) recreational harvest has resulted in increased escapement to many New Brunswick rivers. Evidence of the increase is also obtained at fish counting facilities such as the Saint John River system where fish counts at the Mactaquac Dam have shown a recent increase (Table 7).

Historical catch and effort trends show that "anglers follow the fish". In other words, a greater abundance of fish usually results in an escalation in effort and vice versa. The 1986 data is no exception to the general relationship. Anglers expended 111,000 rod-days, more than in any year since 1977, and the second highest effort figure since regular record keeping began in 1951.

TABLE 5. Angling effort (rod-days) and catch per unit effort (CPUE) for the Maritime Provinces, by year of catch, 1970-86.

Data provided by the New Brunswick Department of Natural Resources and Energy on salmon angling license sales in New Brunswick also indicate a recent resurgence in effort (Table 10).

Catch rates were best on the Miramichi and Restigouche river systems. Anglers caught more than one fish per day, on average, on both the Northwest Miramichi (CPE=1.003) and the Sevogle (CPE=1.294) rivers.

An estimated 236 grilse were taken on Prince Edward Island in 1986.

The open season dates for 1986 are given in Table 8; variation orders and special seasons are listed in Table 9.

New Brunswick and Prince Edward Island

rivers are listed alphabetically in the statistical section. The data for each river include the number and weight of kelt and bright grilse, by month, effort in rod-days, and the catch per rod-day.

As mentioned above, all details available on the release of large salmon are provided in Table 6. Large salmon release figures have not been included in the river summaries which follow, as the data are incomplete.

In addition to the individual river data, several river groupings are also provided for summary purposes. They include summaries by major river system, Fisheries and Oceans statistical district, county, salmon fishing area (previously referred to as salmon management zone), and province.

TABLE 6. Estimates of large salmon released by anglers on several New Brunswick rivers in 1986.<sup>1</sup>

River	Number
Bartibog	13 (black only)

TABLE 9. New Brunswick and Prince Edward Island variation orders, fishing prohibitions and special seasons, 1986.

Bartholomew River	Closed to salmon angling in 1986.
Hammond River	Closed to angling in Palmer Brook, from its confluence with the Hammond River upstream 200 m to a point as marked by a fishery officer, from July 31, 1986, for the remainder of the year.
Midgell River	Catch and release "only" season from October 1 to October 31, 1986.
Morell River	Catch and release "only" season from October 1 to October 31, 1986.
Nashwaak River	<ul style="list-style-type: none"> <li>(1) Fishing by means of hook, line and rod in those waters known locally as Big Basin Pool, lying between a point at Grid Reference 49342893 and a point at Grid Reference 49522899, as shown on map Coldstream 21 J/6 of the National Topographic Series, scale 1:50,000, is prohibited from June 26, 1986 for the remainder of the year.</li> <li>(2) Fishing by means of hook, line and rod in that portion of the river in York County known locally as Ross Pool, and extending from a point located 150 m downstream of the mouth of Porters Brook to a point located 30 m upstream of the mouth of Porters Brook, is prohibited from June 1, 1986 for the remainder of the year.</li> </ul>
Nepisiguit	<ul style="list-style-type: none"> <li>(1) Closed to angling in those water from the head of Papineau Falls Pool downstream for a distance of 45 m to a point as marked by a fishery officer from June 25 to December 31, 1986.</li> <li>(2) Closed to angling in those waters from 100 m below the Nepisiguit Trap Counting Fence, from June 25 to December 31, 1986.</li> </ul>
Point Wolfe River	Closed to salmon angling in 1986.
St. Croix River	Daily and yearly catch limits for salmon are varied to be one salmon in any one day and five salmon in any year.
Saint John River	Fishing by means of hook, line and rod is prohibited in those waters in Carleton County lying between the highway bridge at Grafton and the railroad bridge at Upper Woodstock.

### NOVA SCOTIA

Anglers took home an estimated 8,000 grilse from the 95 rivers fished in Nova Scotia in 1986. Nearly 6,300 of the 6,755 licensed anglers provided catch and effort data via license stubs. Although higher catches of retained fish have occurred in the past (Table 2), they included large salmon which have had to be released in Nova Scotia since August 8, 1984. If the number of grilse retained (7,998) and grilse (1,421) and large salmon (10,494) released are summed, the 1986 Nova Scotia catch becomes 19,913 fish, a figure which surpasses any previous total by a substantial margin.

Sport fishermen who fished on the gulf shore of Nova Scotia, an area described in the statistics section as Salmon Fishing Area 18, claimed excellent success on almost all rivers. Catch rates support their claim where the overall catch rate of 0.43 fish per rod-day far surpassed the provincial average of 0.26. Angler effort exhibited a substantial increase for the second year in a row, from 64,900 rod-days in 1985 to 77,200 in 1986 (Table 5 and Fig. 1). License sales in Nova Scotia have mimicked that seen in New Brunswick, where a sharp decline in 1984 has been followed by a rapid increase (Table 10).

The Cheticamp River is managed under the National Parks Act and Regulations which do not require that anglers have a provincial fishing license. Catch

information provided on the Cheticamp by anglers is, therefore, incomplete and should not be referred to in the N.S. data tables. Wardens from the Cape Breton Highlands National Park were kind enough to supply us with their estimates of catch and effort (Table 11).

Several separate tables are provided in the Nova Scotia section of this report which give details on each river reportedly fished in the Province. The format and content of the tables are distinct from those provided for New Brunswick and Prince Edward Island. In general, data in the Nova Scotia section are compiled either by individual river (Tables 14, 18 and 22), by district (Tables 16 and 20) or fishing area (Tables 17 and 21). Data in the tables numbered 14 through 17 provide catch information broken down into retained and released components; Tables 18 through 21 summarize total catch and effort and catch per unit effort. Table 22 is a monthly breakdown of retained catch by river.

Estimates of catch and effort for anglers who failed to return license stubs were made by either a "regression" or "ratio" method, depending on the river. A description of the methodology is provided in Appendix 2.

Open-season dates accompany each river in the Nova Scotia section tables but variation orders and special seasons are listed in Table 12.

TABLE 10. Resident and non-resident Atlantic salmon angling license sales for New Brunswick (1972-86) and Nova Scotia (1983-86).

Month	Salmon (Released)	Grilse (Retained)	Rod days
June	65	3	135
July	55	16	159
August <sup>1</sup>	1	16	67
September <sup>1</sup>	0	2	1
Total	79	37	362

1. No data available for May; August and September data are incomplete.

TABLE 12. Nova Scotia variation orders, fishing prohibitions and special seasons, 1986.

Cheticamp River	Season regulated by Parks Canada: May 17 to September 30, 1986. Refer to Table 11 for catch and effort data.
Clyde River	Season extended to October 15, 1986.
East River, Sheet Harbour	Closed to fishing in those waters upstream from the No. 7 highway bridge to the Fisheries and Oceans Barrier Dam from June 15 to September 30, 1986.
Gold River	<ul style="list-style-type: none"> <li>(1) Closed to fishing in that portion of the river known locally as the "Dipping Pool", located between the "Cable Pool" and the "Kill Devil Pool", as marked by a fishery officer, from June 1 to August 15, 1986.</li> <li>(2) Reopened to salmon angling in those waters from Plymouth Stump downstream to the No. 3 highway bridge abutment from September 15 to September 30, 1986.</li> </ul>
Grand River	<ul style="list-style-type: none"> <li>(1) Closed to fishing in those waters from the highway bridge at Grand River to Morrison's Bridge at Loch Lomond Lake from August 2 to August 19, 1986.</li> <li>(2) Closed to fishing between those points as marked by a fishery officer being approximately 90 m upstream and 90 m downstream from Grand River Falls, Grand River, from June 17 to October 15, 1986.</li> </ul>
Inhabitants River	Salmon season close time extended to October 29, 1986.
Kirby River	Closed to fishing in those waters 50 feet downstream and 50 feet upstream from the No. 430 highway bridge at Sheet Harbour Passage from June 15 to September 30.
LaHave River	<ul style="list-style-type: none"> <li>(1) Closed to fishing in the pool located immediately below Morgan Falls Fishway, as marked by a fishery officer, from May 10 to December 31, 1986.</li> <li>(2) Salmon season close time extended to August 31, 1986 in those waters of the main branch downstream from the pool located immediately below Morgan Falls Fishway, as marked by a fishery officer, and not including tributaries.</li> <li>(3) Salmon season close time extended to August 31, 1986 in those waters of the West LaHave River from Rhyno Lake to its confluence with the main branch.</li> </ul>

TABLE 12. (Cont'd)

Margaree River	(1) Those waters except upstream from the Big Intervale Bridges: Season June 1 to October 15, 1986.  (2) Those waters upstream from the Big Intervale Bridges: Closed all year.  (3) Closed to fishing in those waters of the northeast branch, upstream from the Big Intervale Bridges from May 27 to December 31, 1986.
Medway River	(1) Closed to fishing in that portion, from a location marked by a fishery officer above the Westfield highway bridge, upstream to the foot of McGowan Lake from May 10 to December 31.  (2) Closed to salmon angling in that portion upstream from the foot of McGowan Lake, including all branches and tributaries, from May 10 to December 31, 1986.
Middle River (Victoria Co.)	Closed to fishing in those waters upstream from where the Cabot Trail highway bridge crosses the river near Finlayson from May 21, 1986 for the remainder of the year.
St. Mary's River	(1) Those waters downstream from a point 100 m upstream of Silver's Bridge and downstream from the highway bridge at Glenelg: Season - May 18 to August 29, 1986.  (2) East River, St. Mary's upstream from a point 100 m upstream of Silver's Bridge: Season - May 18 to August 14, 1986.  (3) West River, St. Mary's upstream from the highway bridge at Glenelg: Season - June 1 to August 14, 1986.
Salmon River (Guysborough Co.)	Closed to fishing in those waters from Spanks Bridge upstream to Salmon River Lake, but not including the tributaries, from August 7 to August 19, 1986.
Tusket River	Closed to fishing in those waters from the highway bridge at the southern extremity of Lake Vaughn downstream to the Tusket River hydro station from April 1 to June 30, 1986.
West River (Sheet Harbour)	Closed to fishing in those waters upstream from the Killag Road Bridge to its source, and including all tributaries from June 15 to September 30, 1986.

## ACKNOWLEDGEMENT

The Nova Scotia salmon angling license stub program is a joint program managed by the Nova Scotia Department of Lands and Forest and the federal Department of Fisheries and Oceans. The assistance of the Nova Scotia Department of Lands and Forest staff is gratefully acknowledged. The data made available on Nova Scotia's streams would not have been possible without angler cooperation and support. Data on several river systems in New Brunswick were collected and summarized by New Brunswick Department of Natural Resources and Energy staff, a contribution which is greatly appreciated.

NOVA SCOTIA

TABLE 13. 1986 Nova Scotia Atlantic salmon recreational catch summary data.

Number of licenses issued in 1986 . . . . . 6,755  
 Number of license stubs returned . . . . . 6,444  
 Overall response rate . . . . . 95.4%  
 Number of unspoiled stubs used in analysis . . . . . 6,298

Number of	Observed number	Percent observed	Estimated number
resident anglers	5,554	88	5,897 <sup>1,2</sup>
non-resident anglers	744	12	858 <sup>1</sup>
anglers who fished	5,376	85	5,766
anglers who did not fish	922	15	989
successful anglers	2,846	45	3,052
unsuccessful anglers	2,530	40	2,713
rod-days fished in season	73,370		77,204
rod-days fished by successful anglers	55,354		
rod-days fished by unsuccessful anglers	18,016		
rod-days per angler <sup>3</sup>	13.65		13.39
rivers fished per angler <sup>3</sup>	1.69		
fish retained	7,601		7,998
grilse retained	7,601		7,998
large salmon retained	0		0
fish released	11,387		11,915
grilse released	1,364		1,421
large salmon released	10,023		10,494
fish caught (retained + released)	18,988		19,913
fish per rod-day	0.259		0.258
fish per angler <sup>3</sup>	3.53		3.47
fish per licensee	3.01		2.95

1: Actual number, not estimated.

2. Includes 16 second-issue resident licenses.

3. Angler refers to a licensee who fished; note that 15% of licensees did not fish.

Fishing Areas	Rivers
<u>Gulf Region</u>	
15 Restigouche	Kedgwick, Restigouche, Patapedia, Upsalquitch, Charlo, Eel, Benjamin, Jacquet, Nigadoo, Millstream, Tetagouche, Middle (Gloucester Co.), Little, Nepisiquit, Bass, Caraquet, South Caraquet, Pokemouche, Little Tracadie, Tracadie.
16 Miramichi	Tabusintac, Burnt Church, Bartibog, Southwest Miramichi, Napan (Northumberland Co.), Black (Northumberland Co.), Bay du Vin, Black (Kent Co.), Kouchibouguac, Kouchibouguacis, Shediac, Richibucto, Cockfish, Buctouche, Cocagne, Scoudouc, Aboushagan, Timber, Gaspereau (Westmorland Co.), Baie Verte, Cains, Bartholomew, Dungarvon, Renous, Little Southwest Miramichi, Sevogle, Northwest Miramichi.
17 Prince Edward Island	Morell, West (Queens Co.), Midgell.
18 Gulf Shore Nova Scotia	Shinimikas, Tidnish, River Philip, Wallace, Pugwash, French, Waugh, River John, West (Pictou Co.), Middle (Pictou Co.), Barney's, East (Pictou Co.), West (Antigonish Co.), South (Antigonish Co.), Pomquet, Mabou, Margaree, Cheticamp.
<u>Scotia-Fundy Region</u>	
23 Saint John	Tantramar, Demoiselle Creek, Crooked Creek, Shepody, West (Albert Co.), Alma, Point Wolfe, Coverdale, Turtle Creek, Weldon Creek, Pollett, Petitcodiac, Big Salmon, Irish, Mosher (Saint John Co.), Black (Saint John Co.), Hammond, Little (Saint John Co.), Kennebecasis, Saint John, Nerepis, New, Pocologan, Magaguadavic, Digdeguash, Waweig, St. Croix, Canaan, Oromocto, Salmon (Queens Co.), Nashwaak, Keswick, Tobique, Salmon (Victoria Co.).
19 Cape Breton East	North Aspy, Ingonish, Indian Brook, Barachois, North (Victoria Co.), Baddeck, Aconi Brook, Middle (Victoria Co.), Mira, Lorraine Brook, Catalone, Gerratt Brook, Salmon (Cape Breton Co.), Gaspereau (Cape Breton Co.), Framboise, Marie Joseph, Grand, River Tillard, Inhabitants.
20 Eastern Shore Nova Scotia	Clam Harbour, Guysborough, Salmon (Guysborough Co.), Cole Harbour, Larry's, New Harbour, Isaac's Harbour, Country Harbour, Gegogan Brook, Indian, St. Mary's, Gaspereau Brook, Liscomb, Necum Teuch, Ecum Secum, Moser (Halifax Co.), Quoddy, Salmon (Port Dufferin), West (Sheet Harbour), Taylor Bay Brook, East (Sheet Harbour), Kirby, Tangier, Ship Harbour, Salmon (Halifax Co.), Musquodoboit, Chezzetcook, Three Fathom Harbour Brook, Rocky Run, Lawrencetown Lake (Salmon River), Little Salmon (Lake Major), Sackville.
22 Upper Bay of Fundy	Bear, Lequille, Paradise, Round Hill, Annapolis, Nictaux, Cornwallis, Gaspereau (Kings Co.), St. Croix (Hants Co.), Kennetcook, Shubenacadie, Stewiacke, Salmon (Colchester Co.), North (Colchester Co.), Chiganois, Debert, Folly, Great Village, Portapique, Bass (Colchester Co.), Little Bass, Economy, Harrington, Diligent, Apple, River Hebert, Maclean, Nappan (Cumberland Co.).
21 Southwest Nova Scotia	Nine Mile, Ingram, East (Lunenburg Co.), Middle (Lunenburg Co.), Gold, Martins Brook, Mushamush, LaHave, Petite Riviere, Medway, Mersey, Broad, Sable, Jordan, Roseway, Clyde, Barrington, Tusket, Salmon (Digby Co.), Sissiboo.

## Appendix 2

### Calculation of catch and effort estimates

Nova Scotia salmon anglers are required to complete and return catch and effort cards, which are attached to their licenses. Some cards are returned without prompting, but up to three reminder letters are sent to prompt non-respondents. As a result, cards are identified as belonging to one of four response categories: voluntary, post-prompt 1, post-prompt 2, or post-prompt 3. In spite of the numerous prompts, however, overall response was somewhat less than 100% in 1986. Consequently, catch and effort by non-respondents had to be calculated.

The extrapolation of reported data to account for non-response was accomplished using a three step process: (1) estimating the additional province-wide effort expended by non-respondents, (2) proportioning that effort across all rivers according to the effort observed on those rivers, and (3) estimating the total catch on each river by regressing catch on effort and determining total catch at an effort level which incorporates the estimate of unreported effort. Alternatively, if effort information was insufficient, catches were calculated by using a modified ratio method (see 3(b)).

### Mathematical representation of the three steps.

1.  $\ln \text{Cum effort per response category}$  is regressed on  $\ln \text{Cum returns per response category}$  so that  $\ln \text{Cum } E = a + b \ln \text{Cum } X$ . Cum E and Cum X refer to cumulative effort and returns, respectively. The equation is solved for X equal to the total number of licenses sold in the province.

i.e.,  $\ln \hat{E} = a + b \ln (\text{Total license sales})$  where  $\hat{E}$  is the estimated total effort.

The estimated unreported effort ( $\hat{E}_u$ ) is found by subtracting the overall total reported or observed effort (E), regardless of category, from the estimated total effort ( $\hat{E}$ ):

$$\hat{E}_u = \hat{E} - E$$

2. For river i, estimated total effort ( $\hat{e}_i$ ) is calculated as follows:

$$\hat{e}_i = \frac{\hat{E}_u}{E} \times e_i + e_i,$$

where  $e_i$  is reported effort on river i.

3.(a) For river i, total estimated catch ( $\hat{C}_i$ ) is arrived at by regressing cumulative catch ( $\text{Cum } c_i$ ) on cumulative effort ( $\text{Cum } e_i$ ) for river i for the four categories, so that:

$$\ln \text{Cum } c_i = a' + b' \ln \text{Cum } e_i$$

The equation is solved for  $\text{Cum } e_i$  equal to  $\hat{e}_i$ , the total estimated effort on that river.

$$\text{i.e., } \ln \hat{e}_i = a' + b' \ln \hat{e}_i$$

(b) On some rivers, however, cumulative catch can not be regressed on cumulative effort due to the small number of anglers who reported fishing on those rivers. In such instances where there is no reported effort on a particular river for a response category, the estimate of total catch is calculated by a ratio method, as follows:

An estimate of total provincial catch ( $\hat{C}$ ) is determined by regression as described in 1 to 3(a) above. The ratio of estimated catch ( $\hat{C}$ ) to observed provincial catch (C) is then applied to the observed catch for each river ( $c_i$ ) on which effort data for the four categories is incomplete.

$$\hat{c}_i = \frac{\hat{C}}{C} \times c_i,$$

where  $\hat{c}_i$  is estimated catch for river i.
