HOUSING MARKET INFORMATION

SENIORS' HOUSING REPORT

Canada Highlights

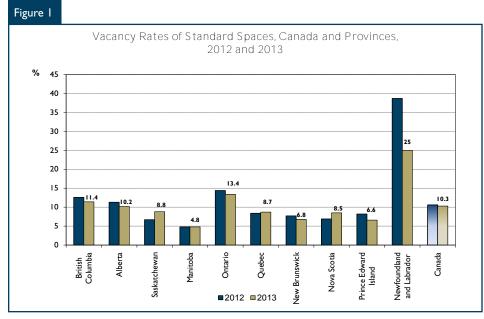

Date Released: 2013

Highlights

- Across the country, there were 208,301 spaces in seniors' housing residences in 2013, with the vast majority (85.1 per cent) being standard spaces.
- The vacancy rate of standard spaces in seniors' housing residences in Canada decreased slightly over the past year, reaching 10.3 per cent in 2013, compared to 10.6 per cent in 2012.
- The average rent for bachelor units and private rooms, where at least one meal is included in the rent, rose by 1.3 per cent to \$1,995 per month in 2013, compared to \$1,969 in 2012. Ontario posted the highest average rent at \$2,789, while Quebec had the lowest at \$1,453.

Source: CMHC Seniors' Housing Survey

¹ A standard space is one that is occupied by a resident paying market rent and who does not receive heavy care (defined as 1.5 or more hours of care per day). A non-standard space is one in which the residents are receiving heavy care, spaces being used for respite and non-market spaces.

Universe

According to the National Seniors' Housing Survey conducted in 2013 by Canada Mortgage and Housing Corporation (CMHC), 205,112 seniors lived in the 2,579 residences surveyed, an increase of 1.5 per cent over 2012. A change in the resident profile was observed in 2013. Specifically, the survey counted fewer couples and more singles among the residents this year than it did in 2012.

The number of spaces in residences increased (+1.9 per cent), rising from 204,496 spaces in 2012 to 208,301 in 2013, with 85.1 per cent being standard spaces.

The capture rate, which is the percentage of the seniors' population aged 75 years and over who occupied a standard or non-standard space, remained relatively unchanged at 8.5 per cent. The capture rate was the highest in Quebec (17.6 per cent), while it was the lowest in Nova Scotia (1.9 per cent).

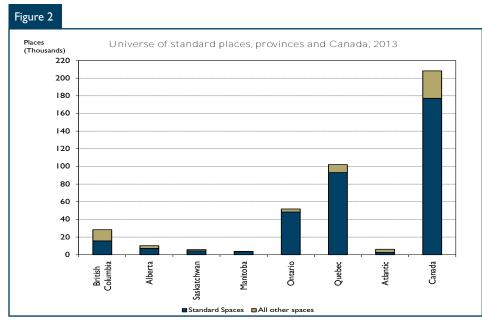

Vacancy rates

Vacancy rate for standard spaces falls slightly

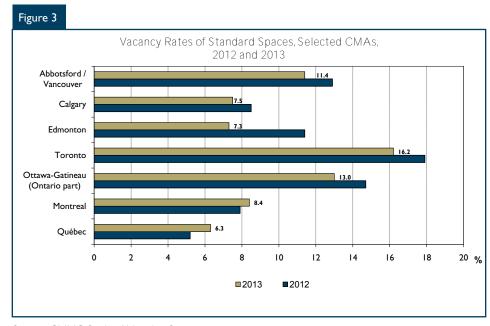

The national vacancy rate for standard spaces in seniors' housing residences decreased slightly over the past year, reaching 10.3 per cent in 2013, compared to 10.6 per cent in 2012.

Among the provinces, the vacancy rates were highest in Newfoundland and Labrador (25.0 per cent) and in Ontario (13.4 per cent). On the other hand, the lowest vacancy rates were posted in Manitoba (4.8 per cent) and Prince Edward Island (6.6 per cent).

At the census metropolitan area (CMA) level, the largest proportions of vacant spaces were recorded in

Source: CMHC Seniors' Housing Survey

Source: CMHC Seniors' Housing Survey

Windsor (17.8 per cent) and London (17.1 per cent). On the other hand, the lowest vacancy rates were posted in Greater Sudbury (2.9 per cent) and Brantford (4.7 per cent).

The vacancy rates in the seven largest CMAs are presented in figure 3. Among this group, Québec had the lowest vacancy rate (6.3 per cent), while Toronto (16.2 per cent) posted

the highest vacancy rate.

Vacancy rates for seniors' residences are typically higher than the vacancy rates posted in the traditional rental market, as a result of higher rents and more frequent turnover.

Average vacancy rate for nonstandard spaces rises slightly

In 2013, across the country, the

average vacancy rate for non-standard spaces reached 3.3 per cent in 2013, up from 3.1 per cent in 2012. In addition, the vacancy rate for non-standard spaces remained lower than the rate for standard spaces.

The lower vacancy rate for non-standard spaces can be attributed to the nature of those spaces. Among these, non-market spaces are typically fully occupied, while heavy care spaces are sometimes temporarily used. This type of unit would then be changed to a standard space when vacated².

Average vacancy rate for all standard and non-standard spaces

Overall, the vacancy rate for all standard and non-standard spaces decreased slightly, falling to 9.2 per cent in 2013 from 9.5 per cent in 2012. This decline was due to the previously mentionned change in the resident profile in 2013, when compared to last year. This year, there were fewer couples and more singles among the residents. The increase in the share of singles among the residents caused demand for units in seniors' residences to outpace supply of such units.

Average rents

Average monthly rent for standard spaces rises slightly

The average rent for bachelor units and private rooms, where at least one meal is included in the rent, rose by 1.3 per cent, to \$1,995 per month in 2013, compared to \$1,969 in 2012.

Among the provinces, the lowest average rents were posted in Quebec

(\$1,453) and Manitoba (\$1,779), while the highest average rents were recorded in Ontario (\$2,789) and Nova Scotia (\$2,559).

At the CMA level, the average monthly rents for bachelor units and private rooms were lowest in Saguenay (\$1,172), Sherbrooke (\$1,283) and Trois-Rivières (\$1,305) and highest in Toronto (\$3,266), Ottawa (\$2,991) and Oshawa (\$2,958).

Given the additional amenities and services provided in most residences, rents are typically higher in seniors' residences than in the conventional rental market. Rents are directly influenced by the type of service offered. For example, for units offering heavy care services, the average rent was \$3,477 in 2013, up from \$3,378 in 2012. The national average increase reflected higher rents in most provinces. The average monthly rent for heavy care spaces was the lowest in Quebec (\$2,577), and the highest in British Columbia (\$5,720).

Rent distribution

In Canada, nearly a third (32.0 per cent) of standard spaces were rented for less than \$1,500 a month, while just as many (31.8 per cent) were rented for \$2,500 or more a month.

The lower overall rents in Quebec have a direct impact on the rent distribution. A majority (55.0 per cent) of the units on the market posted an average rent of less than \$1,500 per month, while 4.4 per cent of the spaces in seniors' residences in that province posted an average rent of \$2,500 or more per month. In contrast, Ontario had 1.8 per cent of the spaces rented for less than

\$1,500 per month, while 73.3 per cent of units had an average of \$2,500 or more per month.

Wide range of services and amenities available

In order to meet the evolving demand, residences offer a wide variety of services and amenities.

The most popular amenities offered to seniors in some residences are a 24-hour call bell service (93.9 per cent), transportation (46.8 per cent), exercise facilities (44.1 per cent) and an on-site nurse service (42.1 per cent). Movie theatre (29.9 per cent), swimming pools (11.3 per cent) and on-site pharmacies (10.6 per cent) were the rarer amenities.

Proportion (%) of Structures with Access to Selected Amenities					
24-hour Call Bell	93.9				
Transportation	46.8				
Exercise Facilities	44.1				
Nurse on site	42.1				
Movie Theatre	29.9				
Swimming Pool	11.3				
Pharmacy	10.6				

Source: CMHC Seniors' Housing Survey

² A non-market space is one where the rent received for the unit is less than market rent or where the resident occupying the unit is subsidized. A heavy care space is one where the residence provides 1.5 hours or more of health care per day to the resident. Examples include Alzheimer, dementia and mobility support residents. Heavy care space estimates for occupied spaces only include those where the resident is required to pay for a high level of care

Methodology

Canada Mortgage and Housing Corporation conducts the Seniors' Housing Survey in February and March. This annual survey became national in scope in 2009, covering all centres in each of the ten provinces. Both private and non-profit residences are included in the survey universe. Non-profit residences must have at least one unit that is not subsidized.

To be eligible for inclusion in the 2013 survey results, a residence must:

- ✓ Have been in operation for at least one year, i.e., before January 2012
- ✓ Have at least 10 rental units (Quebec, Ontario, Prairies) or 5 rental units (Atlantic provinces and B.C.)
- ✓ Offer an on-site meal plan
- ✓ Not provide high levels of healthcare (defined as 1.5 hours or more of care per day) to all of their residents. Nursing homes and long-term care homes are examples of residences that were not included in the survey.
- ✓ Offer rental units. Life lease units and owner-occupied units are excluded from this survey.
- ✓ Have at least 50% of residents who are 65 years of age or older.

The Seniors' Housing Survey is a census and not a sample survey, therefore, all seniors' residences in Canada meeting these criteria are included to be part of this survey.

Survey data were obtained through a combination of telephone interviews and fax and email responses. Information was obtained from the owner, manager, or residence administrator. Survey results reflect market conditions at the time of the survey. Survey results have been weighted to adjust for non-responses, to ensure that they are reflective of the universe. The level of statistical reliability is noted in the data tables. For more information on the reliability of the data please click <a href="https://example.com/here-emails-new-market-emails-

All statistics published, excluding information on new market supply, include only those residences that have been in operation for at least one year.

Definitions

Space: A space is a residential area that is rented out. Examples of spaces include: one half of a semi-private unit, a private or bachelor unit, a one-bedroom unit and a two-bedroom unit. In most cases a space is the same as a unit. The exception is the case where a unit has been divided to rent to multiple residents. Semi-private and ward units are an example of this. Unless otherwise indicated, data for spaces are for all unit types.

Standard Space: A space where the resident does not receive high-level care (i.e., the resident receives less than 1.5 hours of care per day.) or is not required to pay an extra amount to receive high-level care. Regional terms for this type of space may vary across the country.

Heavy Care Space: A space where the resident is paying an extra amount to receive high-level care (1.5 hours or more of care per day). Examples include Alzheimer, Dementia and mobility support residents.

Respite Space: A space used to provide temporary accommodation for a senior who normally lives in another place and not at the residence.

Non-market or Subsidy Space: A space where the rent received for the unit is less than market rent or where the resident occupying the unit is subsidized.

Rent: Refers to the actual amount a resident pays per month for their accommodation space and all mandatory services. For vacant spaces, the rent is the amount the owner is asking for the space.

Vacancy: A space is considered vacant if, at the time of the survey, it is physically unoccupied and available for immediate rental.

Capture Rate: The main age group living in seniors' residences are persons aged 75 years and older. Capture rate in a centre is the ratio of the total number of residents living in the survey universe divided by its estimated 75+ population, expressed as a percentage.

Acknowledgement

The Seniors' Housing Survey could not have been conducted without the cooperation of the residence owners and their staff. CMHC acknowledges their time and assistance in providing accurate information. As a result of their contribution, CMHC is able to provide data and analysis that benefits the entire industry.

Confidentiality

All information provide through this survey is kept strictly confidential and only used by CMHC to generate statistics and data sets that do not allow for the identification of individuals, households, businesses or buildings.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world.
