

# HOUSING NOW

## Halifax CMA

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: December 2012

### Housing Starts Increased in November While MLS® Sales Declined

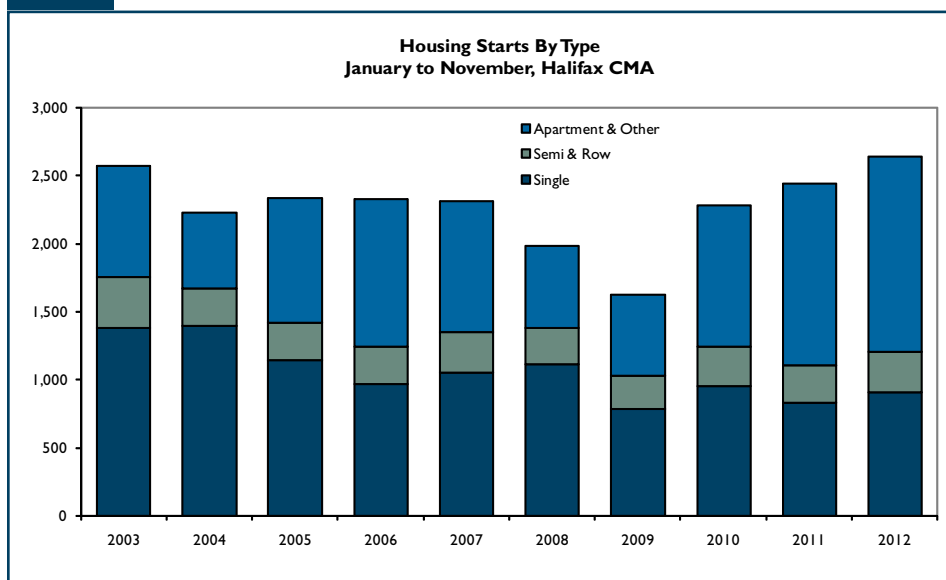

The housing market in Halifax Regional Municipality was mixed in November as total construction starts increased while existing home sales declined.

There were 138 residential construction starts in the HRM in November compared to 126 last year

which represents an increase of 9.5 per cent. The increase in total starts was attributed to growth in the semi-detached and row segment as builders broke ground on 62 units last month compared to 42 last year. In the single-detached market, starts declined over eight per cent to 76 units in November. There were no new apartment starts recorded last month.

After eleven months of the year, total housing starts in the HRM climbed eight per cent to 2,642 units. Year-to-date, over 48 per cent of all starts

were rental apartment units. Along with encompassing nearly half of all starts, rental apartment construction increased eight per cent year-to-date to 1,276 units. In the single-detached segment of the market, starts increased nine per cent in 2012 to 906 units. In the semi-detached and row market 297 units were started, which represents an increase of nearly 11 per cent compared to last year. In the apartment condominium market, housing starts recorded little change year-to-date at 161 units compared to 157 last year.

The total number of units under construction in the HRM stood at 3,872 in November compared to 2,703 last year. The sharp increase is largely attributed to the number of apartment-style rental units under construction in the HRM and specifically in the Halifax City and Dartmouth City submarkets at 1,633 and 762 units, respectively. In the single-detached market, 713 singles were under construction last month compared to 573 last year. Of the 713 singles under construction, 186 were in Dartmouth City, 153 were in Halifax County East and 120

were in Bedford-Hammonds Plains. In the Halifax City submarket, 50 single-detached units were under construction in November 2012.

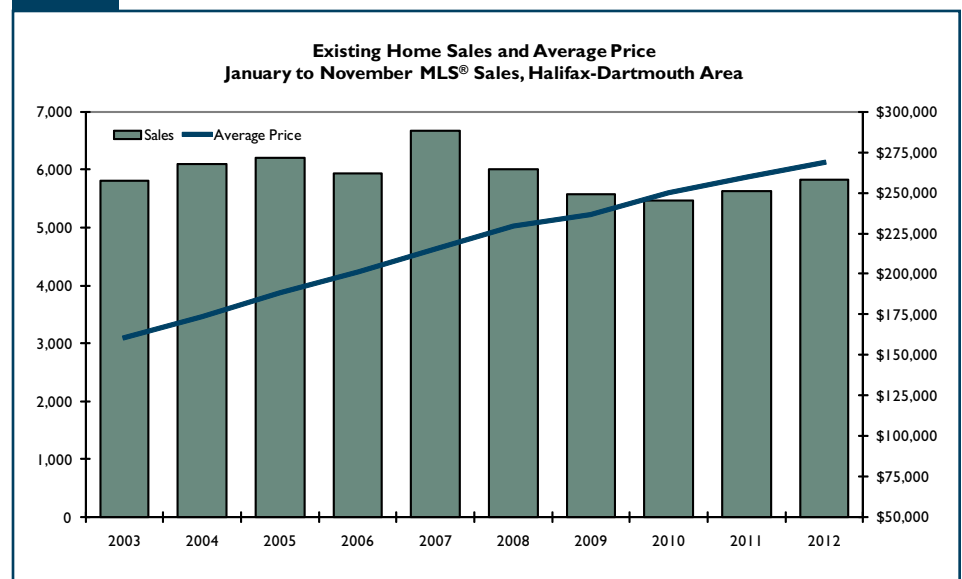

The level of available singles inventory in the HRM (completed and not absorbed units) stood at 64 units in November compared to 32 last year. Over one-third of the available inventory was in the Bedford-

Hammonds Plains submarket at 23 units. In Sackville, 11 units were completed and not absorbed while the Halifax City, Fall River – Beaverbank and Halifax County Southwest submarkets each reported ten singles that were completed and not absorbed as of November.

In the new homes market (absorbed single-detached units), there were 91 singles sold in the HRM in November compared to 111 last year. The average price of a new single was \$426,257 last month compared to \$369,390 in November 2011 which represents price growth of over 15 per cent. The strong price growth was largely attributed to continued demand for high quality homes in above average priced submarkets; specifically in Bedford-Hammonds Plains where prices climbed nearly 13 per cent to \$549,770 and Halifax County Southwest where prices increased over 20 per cent to \$445,068.

Year-to-date, 734 new singles were sold in the HRM compared to 833 units last year. Of the 734 singles, 188 were recorded in Bedford-Hammonds

Figure 3

MLS® is a registered trademark of the Canadian Real Estate Association

Plains, 107 were in Fall River-Beaverbank and 102 were in Halifax City. In the Sackville submarket, there were sales of 101 new singles in 2012.

The average price of a new single was \$427,834 year-to-date in 2012 compared to \$394,683 last year. Price growth was strongest in the Halifax County Southwest submarket at nearly 18 per cent to \$460,604. Prices also posted strong growth in Bedford-Hammonds Plains at 12 per cent to \$500,289. In the HRM's most expensive submarket for new singles, Halifax City, the average price increased 3.8 per cent year-to-date to \$533,289.

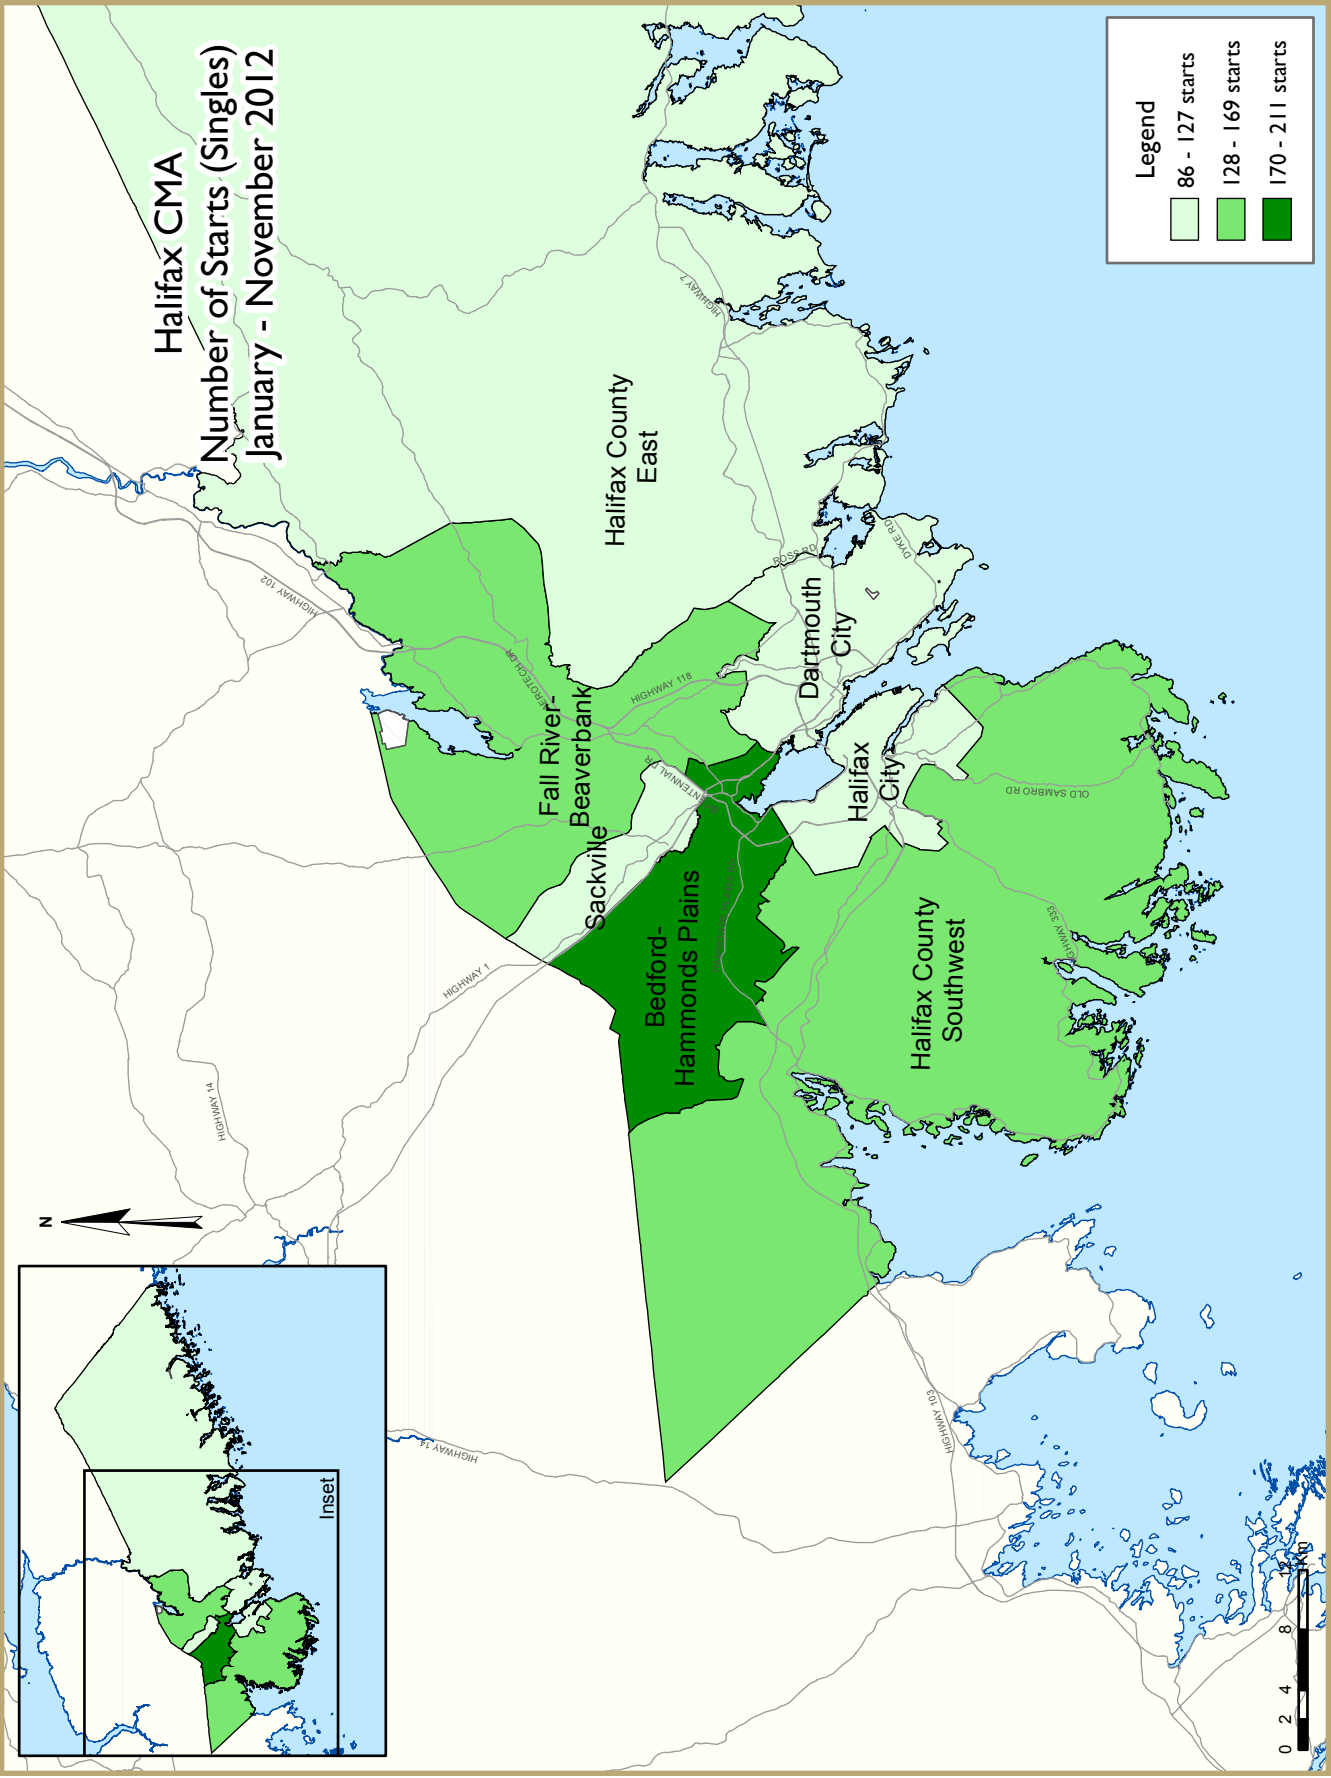

In the existing homes market, sales declined nearly 35 per cent in November to 354 units as every submarket reported fewer sales compared to last year. The sharp decrease was in comparison to a record level of activity for the month of November recorded in 2011 when 542 existing homes were sold. Compared to the ten-year average for November of 411 units, sales in 2012 were 14 per cent below the average.

Despite the decline last month, year-to-date existing home sales in the HRM were up 3.5 per cent compared to last year to 5,820 units. At the submarket level, sales were mixed in the first eleven months of the year. In two of the largest and most expensive submarkets, Halifax City and Bedford-Hammonds Plains, sales declined by 4.5 and 4.4 per cent, respectively. In the Sackville submarket, sales climbed nearly 22 per cent compared to 2011 reaching 512 sales. Existing home sales in Fall River-Beaverbank and Halifax County Southwest also recorded strong increases year-to-date at 12 per cent. In the HRM's largest submarket for existing home sales, Dartmouth City, sales increased three per cent to 1,501 units.

The average price of an existing home increased 3.5 per cent year-to-date to \$268,733 as each submarket reported an increase. Prices in Sackville reported the highest level of growth at 6.6 per cent to \$219,162. In Halifax City and Dartmouth City, prices climbed six per cent to \$323,293 and \$243,258 respectively. Prices increased at a slower pace in Bedford-Hammonds Plains and Halifax County Southwest at two and 1.6 per cent, respectively.

The average time it takes to sell a home in the city declined in 2012 to 86 from 94 days last year. The average number of days on market was shortest in Dartmouth City at 70 days and longest in Bedford-Hammonds Plains at 112 days.

The number of active listings in the HRM stood at 2,955 units in November compared to 2,755 last year. The increase in active listings was largely attributed to sharp increases in the Bedford-Hammonds Plains and Sackville submarkets of 25 and 21 per cent, respectively.

## HOUSING NOW REPORT TABLES

### Available in **ALL** reports:

- 1 Housing Activity Summary of CMA
- 2 Starts by Submarket and by Dwelling Type – Current Month or Quarter
- 2.1 Starts by Submarket and by Dwelling Type – Year-to-Date
- 3 Completions by Submarket and by Dwelling Type – Current Month or Quarter
- 3.1 Completions by Submarket and by Dwelling Type – Year-to-Date
- 4 Absorbed Single-Detached Units by Price Range
- 5 MLS® Residential Activity
- 6 Economic Indicators

### Available in **SELECTED** Reports:

- 1.1 Housing Activity Summary by Submarket
- 1.2 History of Housing Activity (once a year)
- 2.2 Starts by Submarket, by Dwelling Type and by Intended Market – Current Month or Quarter
- 2.3 Starts by Submarket, by Dwelling Type and by Intended Market – Year-to-Date
- 2.4 Starts by Submarket and by Intended Market – Current Month or Quarter
- 2.5 Starts by Submarket and by Intended Market – Year-to-Date
- 3.2 Completions by Submarket, by Dwelling Type and by Intended Market – Current Month or Quarter
- 3.3 Completions by Submarket, by Dwelling Type and by Intended Market – Year-to-Date
- 3.4 Completions by Submarket and by Intended Market – Current Month or Quarter
- 3.5 Completions by Submarket and by Intended Market – Year-to-Date
- 4.1 Average Price (\$) of Absorbed Single-Detached Units

## METHODOLOGY

### Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

### Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

## STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

## DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

## INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

**Freehold:** A residence where the owner owns the dwelling and lot outright.

**Condominium (including Strata-Titled):** An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

**Rental:** Dwelling constructed for rental purposes regardless of who finances the structure.

## GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

## CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
