Housing Market Forecast

Figure 1

Figure 2

Source: CMHC

Overview

In Quebec, moderate economic growth and still favourable borrowing conditions and demographic trends will continue to support housing demand in 2013 and 2014, but not at the same pace as in 2011 and 2012.

An easing resale market and strong supply will translate into lower demand for new homes.

As was the case during the last decade, demographic factors will continue to support the province's housing markets in the years to come and, at the same time, change their complexion.

Sustained net migration to the province will still have a positive impact on demand in the rental and resale markets, as migration flows are expected to remain stable over the forecast horizon.

Meanwhile, while moderating demand from younger households impacts first-time buying, population aging will have a growing impact on the look of the housing market in Quebec.

As older households re-enter the market in response to their evolving housing needs, changes in tenure type are expected.

Mortgage rates to see modest and gradual increases, but will remain low

According to CMHC's base case scenario for 2013, the one-year mortgage rate is forecast to be within 3.00 per cent to 4.00 per cent, while the five-year posted mortgage rate is anticipated to be within 5.00 per cent to 5.75 per cent.

For 2014, the one-year posted mortgage rate is expected to rise and be in the 4.00 per cent to 5.00 per cent range, while the five-year posted mortgage rate is forecast to be within 5.50 per cent to 6.25 per cent, consistent with higher economic growth prospects in 2014.

Mortgage rates are not expected to increase until late 2013 or early 2014, leading to a slight rise in mortgage rates on an annual basis, when compared to 2012.

Further increases are expected through 2014, but rates will remain low, by historical standards, over the forecast horizon.

Mortgage rates		
1 Year	Q4 2012	3.10
	Change from Q4 2011	-0.40
	2013 (F)	3.45
	2014 (F)	4.47
5 Year	Q4 2012	5.24
	Change from Q4 2011	-0.05
	2013 (F)	5.32
	2014 (F)	5.78

NOTE: Mortgage rate forecast is based on Q4 2012 data

In Detail

Single Starts

In 2013, moderate job growth, the continued easing of the resale market and the trend toward the multi-family dwelling will again reduce single starts and translate into a total of 15,000 single-detached homes started in 2013 and 14,600 in 2014.

This market segment is still affected by the rising popularity of the more affordable multi-family homes and densification trends.

Multiple Starts

Fuelled by the popularity of condominium apartments, supply in this market segment is currently strong. Following three years of sustained construction from 2010 to 2012, market conditions in this market are now easing.

Starts of multi-family dwellings will settle back in the coming years. Multiple starts will move to 27,300 in 2013 and 27,600 in 2014.

Resales

After holding steady in 2012, sales recorded by Centris® 10 will come in at a slightly lower level this year. For 2013, 75,800 such transactions are forecast. Notwithstanding the overall economic impacts discussed previously, the growing housing stock will sustain sales volumes. As a result, total resales will be back in growth mode next year.

In total, over 79,000 Centris® sales are forecast for 2014.

Prices

Relatively lower demand for resale homes, combined with rising supply, has taken pressure off price growth in recent quarters and should continue to do so throughout this coming year.

With a return to more balanced conditions, price growth in the resale market will continue to moderate in 2013. The average price recorded by Centris® will reach \$270,100 this year and \$275,100 in 2014.
