Housing Market Forecast

Figure 1

Figure 2

Source: CMHC

Overview

In Quebec, recently slower economic growth will reduce demand of existing and new homes this year. Moreover, easing resale markets and relatively high inventories of new dwellings will significantly lower housing starts in 2013. This being said, still favourable borrowing conditions and demographic trends will support housing demand into 2014, at which time a strengthening economy and tightening resale markets will energize both the resale and new housing markets.

On the economic front, Quebec's labour markets still feel the impacts of a slow recovery south of the border and of more favourable employment prospects in western Canada. While business investment increases solidly, firms are focusing on fixed capital rather than on hiring. Meanwhile, public and consumer spending are moderate, while export levels remain stable. GDP growth of between 1 and 1.4 per cent growth is expected during the forecast horizon.

Demographic trends will continue to support the province's housing markets in the next two years. Sustained immigration to the province will still have a positive impact on demand in the rental market, as flows are expected to remain stable over the forecast horizon. While moderating demand from younger households cools first-time buying, population aging will prompt some older households re-enter the market in response to their evolving housing needs.

Mortgage rates to see modest and gradual increases, but will remain low

In line with the consensus among private-sector forecasters, increases in the Target Overnight Rate by the Bank of Canada are not anticipated before mid-2014, later than anticipated at the time of the 2013 First Quarter Housing Market Outlook. This reflects the downward revisions in GDP forecasts since the publication of the First Quarter Housing Market Outlook, particularly the expectations of a slower economy in 2013. The expected delay in interest rate increases will continue to be supportive of housing market activity over the forecast horizon.

Mortgage rates		
1 Year	Q1 2013	3.00
	Change from Q1 2012	-0.30
	2013 (F)	3.00 - 3.25
	2014 (F)	3.25 - 3.75
5 Year	Q1 2013	5.21
	Change from Q1 2012	-0.05
	2013 (F)	5.00 - 5.50
	2014 (F)	5.25 - 5.75

Source: Bank of Canada, CMHC Forecast

NOTE: Mortgage rate forecast is based on Q1 2013 data

According to CMHC's base case scenario for 2013, the one-year mortgage rate is forecast to be within 3.00 per cent to 3.25 per cent with an average of 3.13 per cent, while the five-year posted mortgage rate is anticipated to be within 5.00 per cent to 5.50 per cent with an average of 5.28 per cent. For 2014, the one-year posted mortgage rate is expected to rise and be in the 3.25 per cent to 3.75 per cent range with an average of 3.42, while the five-year posted mortgage rate is forecast to be within 5.25 per cent to 5.75 per cent with an average of 5.53 per cent, consistent with higher economic growth prospects in 2014.

Mortgage rates are not expected to increase until mid 2014. The anticipated small and steady increases in mortgage rates will lead to somewhat higher mortgage rates by the end of 2014. However, these rates will remain low, by historical standards, over the forecast horizon.

In Detail

Single Starts:

In 2013, moderate job growth, the continued easing of the resale market and the trend toward multi-family dwelling will again reduce single starts and translate into a total of 14,200 single-detached homes started. In 2014, a tighter resale market will bring some support and result in 14,500 single starts. The trend toward the multi-family market segment is explained by its relative affordability, the changing needs of an aging population and by densification trends.

Multiple Starts:

Fuelled by the popularity of condominium apartments, supply in this market segment has increased significantly. As a result of three years of sustained construction from 2010 to 2012, market conditions in this market have eased significantly. Starts of multi-family dwellings will thus decrease considerably this year. Multiple starts will descend below the 25,000 level in 2013 and rise above the 26,200 mark in 2014.

Resales:

While holding steady in 2012, sales recorded by Centris® have been recently declining as a result of the overall economic context discussed previously. Despite a certain rebound in the second half of this year, resales will come in at a lower level this year. For 2013, 72,500 such transactions are forecast. As buying conditions improve, total resales will be back in growth mode next year. In total, 76,500 Centris® sales are forecast for 2014.

Prices:

Relatively lower demand for resale homes, combined with rising supply, has taken pressure off price growth in recent quarters and should continue to do so throughout this coming year. With a return to more balanced conditions, price growth in the resale market will continue to moderate in 2013. The average price recorded by Centris® will reach \$271,200 in 2013 and \$274,200 next year.
