Overview

In Quebec, relatively slow economic and employment growth will reduce demand of existing and new homes this year. As well, easing resale markets and relatively high inventories of new dwellings will significantly lower housing starts in 2013. Nonetheless, demographic trends will support housing demand into 2014, at which time a strengthening economy and tightening resale markets will energize both the resale and new housing markets.

On the economic front, Quebec's labour markets still feel the impacts of a slow recovery south of the border and of more favourable employment prospects in western Canada. Economic accounts for the first half of the year show slower rate of private investment in machinery and labour. For this reason, employment will progress at a relatively slow pace in 2013 and 2014 (approximately 1 per cent each year). Meanwhile, public and consumer spending have increased moderately, as have done exports. GDP growth of between 1.3 and 2.0 per cent growth is expected during the forecast horizon.

Demographic trends will continue to support the province's housing markets in the next two years. Sustained immigration to the province will still have a positive impact on demand in the rental market, as flows are expected to remain stable during the next two years. Total net migration is expected to reach, respectively, 44,300 and 45,300 persons in 2013 and 2014. While moderating demand from younger households cools first-time buying, population aging will prompt some older households to re-enter the market in response to their evolving housing needs.

Mortgage rates to see modest and gradual increases late in the forecast horizon but will remain low by historical standards

Following the June meeting of the Federal Open Market Committee (FOMC) of the U.S. Federal Reserve Board, interest rates rose modestly and then remained steady in both the U.S. and Canada. According to the Federal Reserve Bank of New York, this reflected a change in the risk assessment of investors and not a change in the expected future path of interest rates.¹

CMHC's interest rate forecast mirrors this view. Hence, mortgage rates have been slightly revised up in the third quarter of 2013 but, thereafter, follow the same interest rate path as before. Nevertheless, this interest rate outlook will continue to be supportive of housing market activity over the forecast horizon, as mortgage rates will remain low by historical standards.

Mortgage rates are expected to increase gradually and steadily over the forecast horizon. By the end of 2014, mortgage rates are forecast to be somewhat higher than in the third quarter of 2013. According to CMHC's base case scenario for 2013, the average for the one-year posted mortgage rate is forecast to be within 3.00 per cent to 3.50 per cent, while the average for the five-year posted mortgage rate is anticipated to be within 5.00 per cent to 5.50 per cent. For 2014, the average for the one-year posted mortgage rate is expected to rise and be in the 3.25 per cent to 3.75 per cent range, while the average for the five-year posted mortgage rate is forecast to be within 5.25 per cent to 6.00 per cent.

Mortgage rates		
1 Year	Q3 2013	3.14
	Change from Q3 2012	0.04
	2013 (F)	3.00 - 3.50
	2014 (F)	3.25 - 3.75
5 Year	Q3 2013	5.27
	Change from Q3 2012	0.03
	2013 (F)	5.00 - 5.50
	2014 (F)	5.25 - 6.00

NOTE: Mortgage rate forecast is based on Q3 2013 data

In Detail

Single Starts:

In 2013, moderate job growth, the continued easing of the resale market, which is expected to attract a greater part of housing demand, and the trend toward multifamily dwelling will contribute to reduce single starts and translate into a total of 13,200 single-detached homes started. In 2014, a tighter resale market will bring some support to the new housing market segment, which is expected to result in a similar number of starts as in 2013.

Multiple Starts:

The trend toward the multi-family market segment is still explained by its relative affordability, the changing needs of an aging population and by densification trends. Fuelled by the popularity of condominium apartments, supply in this market segment has increased significantly. As a result of three years of sustained construction from 2010 to 2012, market conditions in this market have eased notably. Starts of multi-family dwellings will thus decrease by nearly 25 per cent this year. Multiple starts will decrease below the 24,000 level in 2013 and stabilize in 2014 (23,500).

Resales:

While remaining stable in 2012, sales recorded by Centris®12 have been recently declining as a result of the overall economic context discussed previously. Despite a certain rebound in the second half of this year, resales will come in at a lower level this year. For 2013, just over 73,000 such transactions are forecast. As buying conditions improve, total resales will be back in growth mode next year. In total, 75,000 Centris® sales are forecast for 2014.

Prices:

Relatively lower demand for resale homes, combined with rising supply, has taken pressure off price growth in recent quarters and should continue to do so throughout the forecast horizon. In this context, price growth in the resale market will continue to moderate in 2013. The average price recorded by Centris® will reach \$268,000 this year and approach the \$270,000 mark in 2014.

First Nations Mold Remediation Case Study – Ahousaht First Nation
This case study highlights the mold remediation efforts in the Ahousaht First Nation located in British Columbia. This community receives more than two times the amount of rainfall that Vancouver receives in a year. In addition, the majority of the older houses are situated in an area troubled by underground springs and poor drainage. The combination of heavy rainfall and problematic ground water conditions contributed to mold problems in the community's housing.
Ahousaht's approach to solving its mold problem included special emphasis on building a new housing team, developing new construction policies and practices, and training local people to build capacity in the community to remediate and construct new houses. Ahousaht First Nation's housing has seen noticeable improvements and now the focus is on achieving good ventilation, circulation of air in the homes and exhausting the stale moist air outdoors.
