Consumer Trends

Sweet Spreads in the United Kingdom

December 2013

MARKET SNAPSHOT

Sweet spreads, including jams, marmalades, honeys, nut butters and chocolate spreads are a household staple in the United Kingdom (U.K.), offering British consumers an easy and relatively low-cost accompaniment for their breakfast or afternoon tea.

British sales of sweet spreads were valued at US\$791.6 million in 2012, representing a 5% increase over 2011 and a 30.8% increase since 2007. However, rising commodity prices continue to impact the spreads market, particularly fruit and nut products, as evidenced by the smaller gains recorded in volume sales, which grew by 2% from 2011 to 2012 (Euromonitor, 2013).

Changing consumer preferences and cautious spending are impacting the types of sweet spreads that Britons are buying. While sales have increased overall, market growth is particularly evident in the non-traditional segments of chocolate spreads and nut/seed-based spreads, largely at the expense of jams and other fruit-based products. This trend is expected to accelerate over the forecast period of 2012 to 2017. However, jam is expected to remain the largest subcategory over this time period, due to an already-high market penetration and the reinvigoration of products by manufacturers.

To grow consumer interest, new sweet spread products are being launched in the British market with an emphasis on premium qualities and eco-awareness attributes, such as “vegetarian” and “environmentally friendly packaging.” Playing into the health and wellness trend with products promoting “minus” claims, such as “low/no/reduced sugar or fat,” is becoming a less prominent tactic, with consumers typically perceiving sweet spreads as a sort of indulgence.

MARKET SNAPSHOT (continued)

According to Euromonitor and Mintel, opportunities for sweet spreads can be found in the form of ingredients within baking and home-cooking, which are both experiencing a resurgence of interest in the U.K. Potential for market expansion may also be found in the “adultification” and premiumization of nut- and chocolate-based spreads, which are typically targeted at children, as more and more consumers integrate these products into their breakfast and snacking routines.

CONSUMER TRENDS

British consumers are seeking affordable, high-quality and health-conscious products, presenting both opportunities and challenges to the sweet spreads market.

Breakfast remains the primary usage occasion for sweet spreads. A 2012 Mintel survey found that 69% of consumers who use sweet spread products do so at breakfast time (February 2013). However, British consumers, particularly younger generations, are increasingly turning to cereal, cereal bars, and breakfast options outside of the home due to the convenience they offer. Furthermore, sales of bread, the core accompaniment for sweet spreads, are expected to continue declining in the U.K. (Euromonitor, January 2013). Due to these trends, sweet spreads manufacturers will have to look beyond the breakfast market to generate sales growth.

Opportunities may be found in the baking segment, due to British consumers’ resurging interest in baking and home-cooking. Mintel found that over 20% of current bakers have increased the frequency at which they do so, and 22% of current sweet spreads users already use them as an ingredient (February 2013). Offering consumers innovative and interesting ways to use sweet spreads in baking projects or for other non-breakfast eating occasions, especially snacks, could grow interest. Chocolate and nut-based spreads are already capitalizing on these changing preferences. Nutella, for example, has been investing in advertisements to emphasize the product’s versatility, with in-store, on-pack and online promotions (Euromonitor, January 2013). The brand’s value share of the British spreads market increased by almost five percentage points from 2007 to 2012 (Euromonitor, 2013).

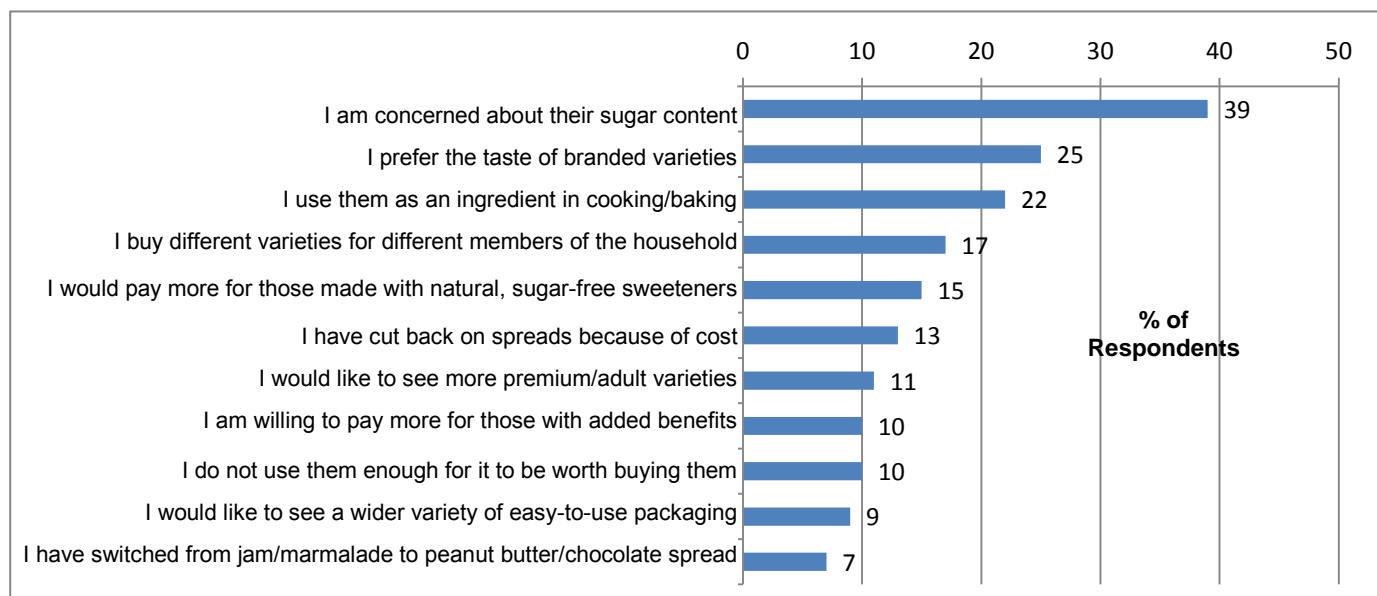

In terms of health and wellness, sweet spreads face a challenge in that they are not inherently healthy products. Mintel found that 39% of consumers were concerned about the high sugar content of sweet spreads, but only 15% would be willing to pay more for products with natural sugar-free sweeteners (see table on page 3). Furthermore, Euromonitor suggests that indulgence is a stronger sales driver than healthfulness in this particular market, finding that many reduced-sugar and reduced-fat jams were discontinued in recent years in favour of premiumized lines. Manufacturers are trying to appeal to consumers’ sense of indulgence and add value to sweet spreads through claims of heightened quality, provenance, and the sourcing of fine ingredients, rather than an emphasis on lowered sugar or fat content. The prominent claims found on recent launches in the sweet spreads market (see page 8 of this report) also attest to this trend. One exception would be honey, which continues to win favour due to health-oriented claims, including anti-bacterial properties, as well as pre and probiotics (Euromonitor, January 2013).

MARKET SIZES

Sales of spreads in the U.K. were valued at US\$792 million in 2012, representing a sales increase of almost 31% since 2007. However, volume sales grew by just 5% over the same period. This discrepancy is at least partially due to the effects of commodity price increases on this market, namely for fruit and nuts.

Despite being the smallest subcategory within the spreads market with sales of US\$83 million, chocolate spreads recorded the fastest growth rate, increasing by 125.7% and 66.9% in value and volume, respectively, from 2007 to 2012. Euromonitor attributes a large portion of this growth to the sales gains made by Nutella within the last few years.

The second-best subcategory in terms of growth was nut- and seed-based spreads. These products are finding success through consumer interest in alternatives to traditional sweet spreads, as well as “plus” positioning, which emphasizes benefits such as high protein, vitamins and mineral content (Euromonitor, January 2013).

Jams and preserves remains the most important spreads category, with sales of US\$307.5 million in 2012. However, this more traditional category is posting only slight gains in value terms with a compound annual growth rate (CAGR) of 1.6% from 2007 to 2012, and actually declined in total volume sales (-2.7%) over the same period. This trend is linked to limited interest in jams and preserves among younger demographics, and a growing preference for chocolate- and nut-based spreads (Euromonitor, January 2013; Mintel, February 2013).

According to Mintel (February 2013), the British spreads market poses a major barrier to growth due to the category’s traditionalist nature and already high penetration. However, the smaller sub-categories in this market present opportunities for continued growth, especially through innovative options that capitalize on premium attributes.

Forecasts

Spreads in the U.K. are expected to reach sales of over US\$1 billion by 2017, growing in value terms by an estimated 27.9% from 2012 to 2017. However, volume sales are expected to maintain a much slower pace over the forecast period.

Sales of nut- and seed-based spreads are expected to accelerate over the forecast period, becoming the fastest-growing subcategory in both value and volume terms. This may illustrate their continued success in emphasizing features such as high protein content. It may also attest to the range development Mintel expects within this particular segment, as manufacturers extend their target market for nut-based spreads beyond children (April 2013).

Over the forecast period, jams and preserves are expected to maintain their prominent position within the spreads category, reaching value sales of US\$374.3 million by 2017. However, volume sales are expected to continue declining, registering a CAGR of -0.7% from 2012 to 2017.

MARKET SHARE BY COMPANY AND BRAND

By company, Premier Foods Plc. maintained its leading position in the spreads market in 2012, holding a 19% value share. Four of the company's brands, Hartley's (jams and preserves), Robertson's (jams and preserves), Sun Pat (nut-based spreads), and Gales (honey), were among the top ten spreads brands by market share.

Unilever Group ranked second in terms of company share, holding 10% of the overall spreads market in 2012, largely attributable to Marmite, the leading spreads brand by value sales. Combined, Unilever's Marmite and Bovril brands represent 92% of the yeast-based spreads segment.

Ferrero Group held the third-largest company share in 2012, solely due to its Nutella brand, which represented 7.9% of the overall spreads market in 2012. Nutella continues to gain ground and currently dominates the chocolate spreads segment, with a 75% value share.

Private labels represented 31.8% of U.K. spreads sales in 2012, and continue to gain share due to lower prices and expanding premium lines.

*Cadbury appears three times in this table under different company names due to its acquisition in 2010 by Kraft, and by Mondelez International in 2012.

DISTRIBUTION CHANNELS

Grocery retailers accounted for 96.7% of spread sales by value in 2012, attributable to spreads' position as grocery staples in the U.K. The country's top grocery retailers, Tesco, Sainsbury, Walmart and Morrisons, are primary channels for sales of spreads, due to their overall dominance in the market. According to a Mintel survey, 80% of shoppers visit one of these four retailers for their weekly grocery shopping (Mintel, February 2013). Discount promotions, extensive selections, and wide private label ranges make these larger retailers the preferred choice for grocery shoppers, particularly in uncertain economic times.

British grocery retailers are investing in their private label spreads offerings, particularly within premium ranges, as consumers seek affordable and high-quality options. For example, Morrisons introduced 15 new jams, marmalades and honeys in 2012 alone. According to Mintel, there are growing opportunities

for this type of expansion within private label sweet spreads. Just 25% of surveyed consumers preferred the taste of branded options over their private-label counterparts (Mintel, February 2013).

NEW PRODUCT LAUNCHES

Between July 2012 and July 2013, the British market saw the introduction of 226 new sweet spread products, according to Mintel's Global New Products Database (2013).

Fruit spreads and related flavours are still the preferred choice in the U.K., dominating the 226 new products. Fruit spreads represented 57.5% of all spread launches during the time period, and four of the top five flavours were fruit-based. Despite representing a small share of the new product launches, nut (particularly peanut) and chocolate spreads continue to gain market share at the expense of more traditional favourites. This trend is expected to continue, particularly as manufacturers promote their use with breakfast fare, and develop more gourmet variations targeting an adult palate (Mintel, April 2013).

Many of the new products boasted claims related to providence or quality rather than healthfulness, illustrating the positioning and general consumer acceptance of sweet spreads as a sort of indulgence.

Packaging innovation has primarily focused on mess-free and otherwise more convenient options. Squeezable bottles are growing in popularity for their simplicity of use (Mintel, April 2013), but jars remain the preferred package choice for new sweet spreads launched in the U.K.

New sweet spreads launched between July 2012 and July 2013, were fairly evenly split between branded options (51.8%) and private label (48.2%). This evidences growing consumer interest in private label spreads, offering high-quality attributes for a lower cost.

New Launches of Sweet Spread Products in the U.K., July 2012 to July 2013, by Features

Feature	Launch count	Percent of total
Subcategory

* Please note that the totals for the count and percentage of products launched by claim will add to more than 226 (100%), as products can use multiple claims.

**An industry word for a type of bottle (often used for ketchup, shampoo, etc.) that can sit on the top, or cap end.

NEW PRODUCT EXAMPLES

Australian Honey

<u>Company:</u>	Morrison's	<u>Price in US\$:</u>	3.64
<u>Brand:</u>	M	<u>Package:</u>	Plastic bottle
<u>Subcategory:</u>	Honey	<u>Size:</u>	340 g
<u>Date:</u>	July 2013	<u>Flavours:</u>	Unflavoured
<u>Claims:</u>	Vegetarian		

This Australian Honey is new to the M brand range and is suitable for vegetarians.

Date Syrup

<u>Company:</u>	Crazy Jack Community Foods	<u>Price in US\$:</u>	3.97
<u>Brand:</u>	Crazy Jack Organic	<u>Package:</u>	Plastic bottle
<u>Subcategory:</u>	Syrups	<u>Size:</u>	340 g
<u>Date:</u>	July 2013	<u>Flavours:</u>	Date
<u>Claims:</u>	Organic, vegetarian		

This product is an organic concentrated date extract that can be used instead of sugar treacle or honey in all cooking, and is also suitable for drizzling over ice cream.

Clementine and Liquorice Jam

<u>Company:</u>	Azienda Agricola Gerace Maria Caterina	<u>Price in US\$:</u>	n/a
<u>Brand:</u>	La Terre di Zoè	<u>Package:</u>	Glass jar
<u>Subcategory:</u>	Confiture and fruit spreads	<u>Size:</u>	240 g
<u>Date:</u>	June 2013	<u>Flavours:</u>	Clementine, liquorice
<u>Claims:</u>	Organic		

This organic-certified product was displayed at the Tutto Food 2013 Trade Show in Milan.

Orange Chocolate Spread

<u>Company:</u>	Tesco	<u>Price in US\$:</u>	2.67
<u>Brand:</u>	Tesco	<u>Package:</u>	Glass jar
<u>Subcategory:</u>	Chocolate spreads	<u>Size:</u>	400 g
<u>Date:</u>	January 2013	<u>Flavours:</u>	Orange
<u>Claims:</u>	Vegetarian, ethical-environmentally friendly package.		

This product is suitable for vegetarians and retails in a recyclable package.

Marma Chilli

<u>Company:</u>	Clippy's	<u>Price in US\$:</u>	3.16
<u>Brand:</u>	Clippy's	<u>Package:</u>	Glass jar
<u>Subcategory:</u>	Confiture and fruit spreads	<u>Size:</u>	340 g
<u>Date:</u>	July 2012	<u>Flavours:</u>	Orange, chilli
<u>Claims:</u>	Vegetarian		

This fine-cut Seville orange marmalade is made with chilli, and is said to be ideal with croissants or cheeses.

Original Crunchy Caramelised Biscuit Spread

<u>Company:</u>	Lotus Bakeries	<u>Price in US\$:</u>	3.96
<u>Brand:</u>	Lotus Bakeries	<u>Package:</u>	Glass jar
<u>Subcategory:</u>	Caramel and cream spreads	<u>Size:</u>	400 g
<u>Date:</u>	June 2013	<u>Flavours:</u>	Caramel, biscuit
<u>Claims:</u>	No additives/preservatives, vegetarian, low/no/reduced transfat, vegan, no animal ingredients.		

This product is suitable for vegetarians, and is free from added flavours, colours and hydrogenated fats.

Black Olive Crema Dolce

<u>Company:</u>	Cellina	<u>Price in US\$:</u>	n/a
<u>Brand:</u>	Olivotto Crème	<u>Package:</u>	Glass jar
<u>Subcategory:</u>	Confiture and fruit spreads	<u>Size:</u>	210 g
<u>Date:</u>	September 2012	<u>Flavours:</u>	Black olive
<u>Claims:</u>	No additives/preservatives, gluten-free, antioxidant, low/no/reduced allergen.		

Source for all:
Mintel GNPD, 2013.

This product is made with black Cellina olives from the Salento region in Italy. It is ideal as a spread on toast or as a filling in croissants.
