1		Annual Edition 2014	

Table of Contents

PART 1	Foreword	1
1.1	Advance Notices	1
1.2	Consolidation of Marine Communications and Traffic Services (MTS) Centres	1
1.3	ECAREG Canada and Pre-Arrival Information Correspondence	1
1.4	The Radio Aids to marine Navigation Annual Publications	2
1.5	Consolidation of the Inuvik and Iqaluit Marine Communications and Traffic Services Centres	2
1.6	Ship Radio Inspections	2
1.7	The Canadian Forces Fleet MetOc Broadcast Service	2
1.8	The Commercial Public Correspondence Service	2
1.9	Avoid Collision with Right Whales	3
1.10	Canadian Maritime Mobile Safety and Public Correspondence Communication Frequencies	3
1.11	General Information on MCTS Listings	7
1.12	Telephone / Facsimile/ Telex Directory	8
1.13	Joint Rescue Coordination Centre (JRCC) / Maritime Rescue Sub-Centre (MRSC)	9
1.14	Icebreaking services	9
1.15	Regional Office Addresses (covering the East Coast, Eastern Arctic and Central Canada)	10
1.16	Regional Notices to Shipping (NOTSHIP) Issuing Authorities	10
PART 2	Facilities Information	1
2.1	Marine Communications and Traffic Services Centre	1
2.1.1	Halifax, Nova Scotia	1
2.1.2	Iqaluit, Nunavut	4
2.1.3	Labrador (Goose Bay), Newfoundland and Labrador	10
2.1.4	Les Escoumins, Québec	13
2.1.5	Placentia, Newfoundland And Labrador	15
2.1.6	Port Aux Basques, Newfoundland and Labrador	18
2.1.7	Prescott, Ontario	21
2.1.8	Québec, Québec	24
2.1.9	Rivière-au-Renard, Québec	27
2.1.10	Saint John, New Brunswick	31
2.1.11	Sarnia, Ontario	35
2.1.12	St. Anthony, Newfoundland and Labrador	37
2.1.13	St. John's, Newfoundland and Labrador	40
2.1.14	Sydney, Nova Scotia	43
2.1.15	Thunder Bay, Ontario	47
2.2	Canal And Lock Operations	50
2.3	Canal, Port And Lock Operations	51
2.4	Radio Beacon Stations Continuously in Operations	60
2.5	Radar Beacon (Racons)	60
2.5.1	Atlantic Coast, Gulf and St. Lawrence River to Montréal, Eastern Arctic	60
2.5.2	Lake Winnipeg	65
2.5.3	Great Lakes (includes St. Lawrence River to Montréal)	65

PART 3	Vessel Traffic services	1
3.1	Responsibilities	1
3.2	Traffic Clearance	1
3.3	Communications.....	2
3.3.1	Communication Difficulties	2
3.3.2	Ship Board Radio Equipment Malfunction.....	2
3.4	Zone Description	3
3.4.1	Eastern Canada	3
3.4.2	Northern Canada	3
3.4.3	Local Zones	3
3.5	Zone Application.....	3
3.5.1	Eastern Canada Vessel Traffic Services Zone (ECAREG).....	3
3.5.2	Northern Canada Vessel Traffic Services Zone (NORDREG).....	4
3.5.3	Local Vessel Traffic Services Zones	4
3.6	Reports	4
3.6.1	Change in Information.....	4
3.6.2	Non-Routine Reports	4
3.6.3	ECAREG - Information Requirements	5
3.6.4	ECAREG Zone Reports	6
3.6.5	NORDREG Zone Reports	7
3.7	Vessel Traffic Services Zone Schedules	15
3.7.1	Bay of Fundy.....	15
3.7.2	Halifax Harbour and Approaches	20
3.7.3	Northumberland Strait.....	23
3.7.4	Placentia Bay.....	25
3.7.5	Port aux Basques	28
3.7.6	St. John's.....	31
3.7.7	St. Lawrence Waterway	33
3.7.8	Sarnia Zone and Areas	38
3.7.9	Strait of Belle Isle – Voluntary Zone	45
3.7.10	Strait of Canso and Eastern Approaches	48
PART 4	General	1
4.1	Procedures	1
4.1.1	Radiotelephone Procedures.....	1
4.1.2	Distress Communications in Radiotelephony	5
4.1.3	Urgency Communications	9
4.1.4	Safety Communications	10
4.1.5	Aids to Navigation	11
4.2	Systems	12
4.2.1	Global Maritime Distress and Safety System in Canada (GMDSS)	12
4.2.2	Long-Range Identification and Tracking of Vessels Regulations (LRIT)	14
4.2.3	Canadian NAVTEX Service	19
4.2.4	Guidance for Masters in Distress Situations and Alerting of SAR Authorities	30

4.2.5	Procedure for Responding to DSC Distress Alerts by Ships	35
4.2.6	AMVER - Automated Mutual-Assistance Vessel Rescue System	40
4.2.7	Differential Global Positioning System (DGPS)	47
4.2.8	Pre-Arrival Information Report (PAIR)	53
4.3	Services	55
4.3.1	Notices to Shipping	55
4.3.2	World-Wide Navigational Warning Service (WWNWS)	57
4.3.3	Cellular Phone (*16) Service - Marine Emergencies	59
4.3.4	Direction Finding (VHF/DF) Service	60
4.3.5	Sail Plan Service	61
4.3.6	Search and Rescue in Canadian Areas of Responsibility	61
4.3.7	Marine Communications and Traffic Services Message Service	62
4.3.8	Icebreaking and Ice Routing Services	65
4.3.9	Canadian Hydrographic Service	66
4.3.10	Inspection of Radio Apparatus	67
4.3.11	Radio Station Licensing and MMSI Numbers	70
4.3.12	Application for a Radio Inspection of a Compulsorily Fitted Vessel	71
4.3.13	Marine Telephone Service	72
PART 5	Environment Canada's Marine and Ice Warning and Forecast Programs	1
5.1	Background	1
5.2	Marine Warning Program	1
5.3	Marine and Ice Forecast Program	2
5.3.1	Monitoring the Forecast	3
5.3.2	Marine and Ice Forecast Areas	3
5.3.3	Current Conditions	3
5.3.4	Emergency Response	3
5.3.5	Delivery of Marine Warning and Forecast Services	4
5.4	Voluntary Observing Ship (VOS) Program	4
5.5	Buoys Program	4
5.6	MAREP (MARine REPorting Program)	5
5.7	Port Meteorological Officers (PMOs)	5
5.7.1	Port Meteorological Officers (PMOs)	5
5.8	NAVTEX	7
5.8.1	Abbreviations Used by MSC within NAVTEX and METAREAs Bulletins	9
5.8.2	Ice Elements	12
5.9	Mafor Decode Table	13
5.10	Northern Canada	15
5.10.1	Marine Weather Forecast Program	15
5.10.2	Weather and Ice Messages	16
5.10.3	Weatheradio Canada	17
5.10.4	Marine Forecast Areas	19
5.10.5	Marine Forecast Service to METAREAs XVII and XVIII	22
5.10.6	Serviced Forecast Zones	23
5.10.7	METAREAs Forecast Transmission:	25

5.11	Newfoundland and Labrador	26
5.11.1	Marine Weather Forecast Program	26
5.11.2	The Regular Program	26
5.11.3	Marine Weather Observations and Forecast Bulletins.....	26
5.11.4	Weatheradio Canada	27
5.11.5	Marine Forecast Areas.....	29
5.12	Maritimes Region	30
5.12.1	Marine Weather Forecast Program	30
5.12.2	The Regular Program	30
5.12.3	The Recreational Program	30
5.12.4	Marine Weather Observations and Forecast Bulletins.....	31
5.12.5	Canadian Hurricane Centre	31
5.12.6	Weatheradio Canada	32
5.12.7	Marine Forecast Areas.....	34
5.13	Québec Region	35
5.13.1	Marine Weather Forecast Program	35
5.13.2	The Regular Program	35
5.13.3	The recreational program.....	35
5.13.4	Marine Weather Observations and Forecast Bulletins.....	36
5.13.5	Buoy Position St. Lawrence River	36
5.13.6	Weatheradio Canada	36
5.13.7	Marine Forecast Areas.....	38
5.14	Great Lakes Including St. Lawrence River to Cornwall	38
5.14.1	Marine Weather Forecast Program	38
5.14.2	The Regular Program	38
5.14.3	The Recreational Program	39
5.14.4	Buoys	40
5.14.5	Weatheradio Canada	41
5.14.6	Marine Forecast Areas.....	41
5.15	Canadian Ice Service (Cis).....	42
5.15.1	Ice Forecasts	42
5.15.2	Ice Program	43
5.15.3	Ice Reports or Observations	43
5.15.4	Ice Charts	43
5.15.5	Ice Beacons.....	43
5.15.6	Weatheradio Canada	44
5.15.7	Ice areas.....	44
5.15.8	Ice charts	46
5.15.9	Facsimile Broadcast.....	47

PART 1 FOREWORD

1.1 ADVANCE NOTICES

In order that mariners may have advance knowledge of proposed changes to existing facilities to be provided, additions, deletions and changes to such facilities under the jurisdiction of the Canadian Coast Guard are listed hereunder. Effective dates of changes and dates for the commissioning of new facilities are, however, extremely hard to forecast owing to difficulties in obtaining materials and subject to the provision of necessary funds. Every effort will be made to amend dates as far in advance as possible. In every case of changes to facilities and commissioning new facilities, an appropriate Notice to Mariners will be issued.

1.2 CONSOLIDATION OF MARINE COMMUNICATIONS AND TRAFFIC SERVICES (MCTS) CENTRES

The Canadian Coast Guard is consolidating and modernizing its Marine Communications and Traffic Services. These changes will result in a configuration of 12 MCTS Centres strategically located across the country. Information pertaining to consolidation will be advertised to clients by all available means.

a) Atlantic Region

St. John's MCTS will close; services will be provided remotely by Placentia MCTS
Saint John (Fundy) MCTS will close; services will be provided remotely by Halifax MCTS
St. Anthony MCTS will close; services will be provided remotely by Labrador (Goose Bay) MCTS

b) Central & Arctic Region

Montreal MCTS will close; services will be provided remotely by Quebec MCTS
Thunder Bay MCTS will close; services will be provided remotely by Sarnia MCTS
Rivière-au-Renard MCTS will close; services will be provided remotely by Les Escoumins MCTS

There will be no reduction in the MCTS level of service provided to clients. Mariners should be aware that, as a result of consolidation, contact information, weather and other pertinent marine broadcast schedules may change. These changes will be advertised in RAMN, as they become available.

Mariners should check NOTMAR PART 3 on a monthly basis for updates.

1.3 ECAREG CANADA AND PRE-ARRIVAL INFORMATION CORRESPONDENCE

Effective 00:01UTC, 1 January 2014, ECAREG and Pre-Arrival Information Reports previously submitted to the ECAREG Canada office in St. John's, NL will now be processed by Halifax MCTS. As of this date, all ECAREG and Pre-Arrival Information correspondence shall be forwarded to:

Halifax MCTS Centre
Telephone: 902-426-4956
Facsimile: 902-426-4483
Email: HLXECAREG1@INNAV.GC.CA

1.4 THE RADIO AIDS TO MARINE NAVIGATION ANNUAL PUBLICATIONS

Effective April 1, 2013, the Canadian Coast Guard will cease the printing of its "Radio Aids to Marine Navigation" annual publications which include the "Atlantic, St. Lawrence, Great Lakes, Lake Winnipeg and Eastern Arctic" edition as well as the "Pacific and Western Arctic" edition. The publications will continue to be available online, free of charge, at:

http://www.ccg-gcc.gc.ca/eng/CCG/Information_for_Mariners.

The "Radio Aids to Marine Navigation" annual publications are updated each April. Amendments will continue to be advertised by radio broadcast (Notices to Shipping) and/or issued on a monthly basis, when required, in "Notices to Mariners", Section 3. The "Notices to Mariners" publication is available online, free of charge, at: <http://www.notmar.gc.ca>.

Every ship station fitted on a Canadian ship or on a non-Canadian ship engaged in the coasting trade of Canada, pursuant to the *Ship Station (Radio) Regulations 1999*, and all ships in waters under Canadian jurisdiction, pursuant to the *Charts and Nautical Publications Regulations, 1995*, are required to carry the most recent applicable edition of "Radio Aids to Marine Navigation".

1.5 CONSOLIDATION OF THE INUVIK AND IQALUIT MARINE COMMUNICATIONS AND TRAFFIC SERVICES CENTRES

As of the end of the 2012 Arctic navigation season, the Canadian Coast Guard has permanently closed the Inuvik Marine Communications and Traffic Services Centre. Commencing with the 2013 Arctic navigation season, all services are provided remotely by Iqaluit Marine Communications and Traffic Services Centre.

1.6 SHIP RADIO INSPECTIONS

Owners and masters of Canadian vessels are advised that Transport Canada has delegated the authority to issue radio inspection certificates to Recognized Organizations under the Delegation Statutory Inspection Program. Vessels enrolled in the Delegation Statutory Inspection Program, as well as classed ships, are encouraged to contact a Recognized Organization for their radio inspection required by regulations under the *Canada Shipping Act, 2001*. Currently, the Recognized Organizations are: the American Bureau of Shipping; Bureau Veritas; Det Norske Veritas; Germanischer Lloyd; and, Lloyd's Register. This is in addition to the Canadian Coast Guard, who continues to also have delegated authority for this function.

1.7 THE CANADIAN FORCES FLEET METOC BROADCAST SERVICE

The Canadian Forces Fleet MetOc Broadcast service (radioteletype and radiofacsimile) was placed in abeyance effective September 2, 2010. The Canadian Forces Fleet MetOc Broadcast may be reinstated and ceased without warning as necessitated by military operational requirements. When notified, Marine Communications and Traffic Services will issue a Notice to Shipping concerning reinstatement or cessation of this service.

1.8 THE COMMERCIAL PUBLIC CORRESPONDENCE SERVICE

Effective January 1, 2014, the following changes to the Canadian Coast Guard commercial public correspondence service, provided through select Marine Communications and Traffic Services centres, will be in effect:

All long distance ship-shore calls will be administered through the regular telephone service provider as a collect call.

Individuals intending to place shore-ship calls will be required to direct-dial the appropriate MCTS centre.

MCTS centres providing a commercial public correspondence service are identified in RAMN, Part 2

1.9 AVOID COLLISION WITH RIGHT WHALES

North Atlantic Right Whales are the most endangered large whale in the world; about 350 remain. They are slow swimmers, seldom moving faster than 3-5 knots. They may stay submerged for 10 to 20 minutes and are seen alo or in small groups. If you spot one Right Whale, there may be more in the area. Please report all sightings of Right Whales in Canada to the Canadian Coast Guard via VHF Ch 16 and in the Bay of Fundy contact Fundy Traffic VHF Ch 14. They are difficult to see and might be oblivious to vessels – please avoid approaching them closely. For more details, visit: http://www.sararegistry.gc.ca/default_e.cfm.

Note: Roseway Basin Seasonal Area is to be avoided. In order to significantly reduce the risk of ship strikes of the highly endangered North Atlantic Right Whale, it is recommended that ships of 300 tons gross tonnage and upwards solely in transit during the period of June 1st through December 31st should avoid this area.

1.10 CANADIAN MARITIME MOBILE SAFETY AND PUBLIC CORRESPONDENCE COMMUNICATION FREQUENCIES

The frequencies listed on the following pages are those in general use by ships in Canadian waters for inter-ship communications and for ship/shore communications with Marine Communications and Traffic Services centres operated by the Canadian Coast Guard.

Part 2 of this publication contains individual listings for Marine Communications and Traffic Services centres operated by the Canadian Coast Guard, giving details of the communication and special services provided to ships.

On the following pages are frequency lists, including the geographical areas of use:

- Newfoundland and Labrador;
- Atlantic Coast, Gulf and St. Lawrence River up to and including Montréal;
- Great Lakes (including St. Lawrence above Montréal);
- Eastern Arctic; and
- Western Arctic.

Table 1-1 - Maritime Mobile Safety and Communication Frequencies MF/HF

Frequencies		Channel	Class of Emission	Areas Used	Remarks
kHz (ship)	kHz (coast)				
	490		F1B	1, 2, 3, 4	NAVTEX service (French).
	518		F1B	1, 2, 3, 4	International NAVTEX Service (English).
2003			J3E	2	Inter-ship (Lower St. Lawrence River to West Point, Anticosti Island).
2118	2514		J3E	1, 2, 4, 5	Public correspondence; MSI broadcasts.

Frequencies		Channel	Class of Emission	Areas Used	Remarks
kHz (ship)	kHz (coast)				
2134			J3E	1, 2	Inter-ship (fishing vessels only).
2142	2538		J3E	1	Public correspondence.
2158	2550		J3E		Public correspondence (U.S. vessels only).
2182	2182		J3E	1, 2, 4	International distress and safety communications.
2187.5	2187.5		G2B		International distress and safety calls (DSC).
2206	2582		J3E	1, 2, 4	Public correspondence; MSI broadcasts.
2237			J3E	1, 2	Inter-ship (other than fishing vessels).
	2598		J3E	1, 2	MSI broadcasts.
2638			J3E	1, 2	Inter-ship (shared with U.S. vessels).
2738			J3E	1, 2	Inter-ship (shared with U.S. vessels).
2815	2530		J3E	2	Public correspondence.
	2749		J3E	2	MSI broadcasts.
	3253		J3C	4	Radiofacsimile
3023	3023		J3E	1, 2, 3, 4, 5	International SAR coordination communications, including SAR aircraft.
4071	4363	403	J3E	4	Public correspondence; MSI broadcasts.
4083	4375	407	J3E	1, 2, 4	Public correspondence.
4084.7	4379.1	408	J3E	1, 2	Public correspondence.
4100.2	4394.6	413	J3E	1, 2	Public correspondence.
4116	4408	418	J3E	1, 2	Public correspondence.
4125	4125		J3E	1, 2, 3, 4, 5	International distress and safety communications including SAR aircraft.
4177.5	4177.5		F1B	4, 5	International distress and safety communications (NBDP).
4207.5	4207.5		F1B	4, 5	International distress and safety calls (DSC).
	4416		J3C	2	Radiofacsimile
5680	5680		J3E	1, 2, 3, 4, 5	International SAR coordination communications, including SAR aircraft.
6206	6507	603	J3E	1, 2, 4	Public correspondence; MSI broadcasts
6212	6513	605	J3E	1, 2, 4	Public correspondence.
6215	6215		J3E	4	International distress and safety communications.
6268	6268		F1B	4, 5	International distress and safety communications (NBDP).
6312	6312		F1B	4, 5	International distress and safety calls (DSC).
	7710		J3C	4	Radiofacsimile
8228	8752	812	J3E	1, 2, 4	Public correspondence.
8261	8785	823	J3E	1, 2	Public correspondence.
8267	8791	825	J3E	1, 2, 4	Public correspondence.

Frequencies		Channel	Class of Emission	Areas Used	Remarks
kHz (ship)	kHz (coast)				
8291	8291		J3E	4	International distress and calling.
8376.5	8376.5		F1B	4, 5	International distress and safety communications (NBDP).

157.350	161.950	27	F3E	2, 3	Public correspondence.
157.375	157.375	87	F3E	1, 2, 3	Port operations/Ship movement.
157.425	157.425	88	F3E	1, 2, 3	Port operations/Ship movement.
	161.775	83B	F3E	3	Weather and NOTSHIP broadcasts.
	161.850	25B	F3E	3	Weather and NOTSHIP broadcasts.
161.975	161.975	87B	G2B	1, 2, 3	AIS-1
	162.000	28B	F3E	3	Weather and NOTSHIP broadcasts.
162.025	162.025	88B	G2B	1, 2, 3	AIS-2

Notes: Reference VHF:

“A” following a channel number means Simplex Operation on the ship station transmitting frequency.

“B” following a channel number means ship stations receive only on the higher coast station transmission frequency.

1.11 GENERAL INFORMATION ON MCTS LISTINGS

- a) Transmit and receive frequencies are listed in kHz.
- b) The numbered areas mentioned in the remarks column of centres providing communications and special services are shown on the marine weather forecasts maps, and are listed in detail under the heading “Weather Forecast Areas” in Part 5.
- c) Frequencies for which the J3E single sideband modes of emission are shown in the Marine Communications and Traffic Services centre listings are designated by the carrier frequencies. The assigned frequencies are 1.4 kHz higher than the carrier frequencies listed. (This note also applies to the medium and high radiotelephone frequencies listed in the “Canadian Maritime Mobile Safety and Public Correspondence Communication Frequencies”, Section 1.10).

Table 1-3 - Legend for MCTS Centre Listings

Abbreviation/Acronym	Explanation
AIS	Automatic Identification System
CMB	Continuous Marine Broadcast
DF	Direction Finding
DSC	Digital Selective Calling
F1B	Radioteletype
F3E	Radiotelephony, Frequency Modulation
G2B	Phase modulation, digital information, automatic reception.
H+	This symbol followed by a number indicates minutes past the hour.
HF NBDP	High Frequency Narrow-Band Direct-Printing Telegraphy
J3C	Facsimile – Single-sideband, Suppressed Carrier
J3E	Radiotelephony – Single-sideband, Suppressed Carrier
MCTS	Marine Communications and Traffic Services
MMSI	Maritime Mobile Service Identity
NAVTEX	Narrow Band Direct Printing telegraphy
SC	Ship Control (Canal and Locks operations)
UTC	Coordinated Universal Time

PART 3 VESSEL TRAFFIC SERVICES

The purpose of this section is to describe to shipboard personnel the ship reporting procedures to be followed by vessels when within or intending to enter a Vessel Traffic Services (VTS) zone.

3.1 RESPONSIBILITIES

There is no intention on the part of the Canadian Coast Guard to attempt to navigate or manoeuvre ships from a shore station and nothing in this publication overrides the authority of the master of his responsibility for the safe navigation of his ship. Information passed to the master is intended to assist him in the safe conduct of his ship.

A MCTS officer may, with respect to any vessel of a prescribed class that is about to enter or is within a VTS zone:

- a) grant a clearance to the vessel to enter, leave or proceed within the VTS zone;
- b) direct the master, pilot or person in charge of the deck watch of the vessel to provide any pertinent information in respect of that vessel that may be specified in the direction;
- c) direct the vessel to use any radio frequencies in communications with coast stations or other vessel that may be specified in the direction; and
- d) direct the vessel at the time, between the times or before or after any event that may be specified in the direction;
 - to leave a VTS zone,
 - to leave or refrain from entering any area within a VTS zone that may be specified in the direction, or
 - to proceed to or remain at any location within a VTS zone that may be specified in the direction.

A vessel, as well as the master, pilot or person in charge of the deck watch of a vessel, shall comply with a direction given to it or them by a Marine Communications and Traffic Services officer. Notwithstanding, the master, pilot or person in charge of the deck watch may take any action that may be required to ensure the safety of life, the ship or any other ship.

The master of a ship shall ensure that before the ship enters a VTS zone the ship's radio equipment is capable of receiving and transmitting radio communications on the appropriate VTS sector frequency.

3.2 TRAFFIC CLEARANCE

A "traffic clearance" is an authorization for a ship to proceed subject to such conditions as may be included in the authorization. The traffic clearance is predicated upon ship report information and known waterway/traffic conditions. A traffic clearance does not eliminate the need for other authorizations required by legislation or by laws.

Should any factor upon which the traffic clearance is predicated alter to the detriment of safe navigation, the traffic clearance may be delayed or other conditions may be attached to the traffic clearance.

A traffic clearance is required prior to:

- a) entering a VTS zone;

- b) commencing a departure manoeuvre;
- c) commencing a manoeuvre that may be detrimental to safe navigation; and
- d) proceeding after being stranded, stopped due to breakdown of main propulsion machinery or steering gear, or involved in a collision.

3.3 COMMUNICATIONS

Radiotelephone procedures used in communicating with a Marine Communications and Traffic Services centre are those specified by the International Telecommunications Union in the *"Manual for Use by the Maritime Mobile and Maritime Mobile Satellite Services"*.

A continuous listening watch shall be maintained on the appropriate VTS sector frequency on radio equipment located:

- at any place on board the ship, where the ship is at anchor or moored to a buoy; and
- in the vicinity of the ship's conning position, where the ship is underway.

A continuous listening watch may be suspended if a Marine Communications and Traffic Services officer directs the ship to communicate with coast stations and/or other ship stations on a different VHF radio frequency.

All times given in local VTS zone reports should be in local time and in accordance with the 24-hour clock system.

Navigation safety calls on designated VTS sector frequencies should be kept to the minimum consistent with the safety requirement of the situation.

3.3.1 Communication Difficulties

Where a ship, for any reason other than ship board radio equipment failure is unable to obtain the required traffic clearance or after receiving a traffic clearance, is unable to maintain direct communication with the appropriate Marine Communications and Traffic Services centre, the master may nevertheless proceed on his route, but shall take all reasonable measures to communicate with the appropriate Marine Communications and Traffic Services centre as soon as possible and obtain the specified clearance.

3.3.2 Ship Board Radio Equipment Malfunction

In the event of a ship board radio equipment failure where the ship is unable to obtain the required traffic clearance or after receiving a traffic clearance, is unable to maintain direct communication with the appropriate Marine Communications and Traffic Services centre, the vessel shall:

- a) if it is in a port or anchorage where repairs can be made, remain in the port until the vessel is able to establish communications in accordance with the *Canada Shipping Act, 2001*, Part 5, Section 6(a); or
- b) if it is not in a port or anchorage where repairs can be made, proceed to the nearest reasonably safe port or anchorage on its route and remain there until the vessel is able to establish communications in accordance with the *Canada Shipping Act, 2001*, Part 5, Section 6(b).

3.4 ZONE DESCRIPTION

3.4.1 Eastern Canada

The Eastern Canada VTS zone consists of the Canadian waters on the east coast of Canada south of the 60th parallel of north latitude and in the St. Lawrence River east of 66° 00' west longitude except the waters within Ungava Bay and the waters within the VTS zones referred to in the *Vessel Traffic Services Zone Regulations*.

3.4.2 Northern Canada

The Northern Canada Vessel Traffic Services (NORDREG) zone consists of:

- a) the shipping safety control zones prescribed by the *Shipping Safety Control Zones Order*;¹
- b) the waters of Ungava Bay, Hudson Bay and Kugmallit Bay that are not in a shipping safety control zone;
- c) the waters of James Bay;
- d) the waters of Koksoak River from Ungava Bay to Kuujuaq;
- e) the waters of Feuilles Bay from Ungava Bay to Tasiujaq;
- f) the waters of Chesterfield Inlet that are not within a shipping safety control zone and the waters of Baker Lake; and
- g) the waters of Moose River from James Bay to Moosonee.

3.4.3 Local Zones

Local VTS zones are as specified in the schedule of the *Vessel Traffic Services Zone Regulations*.

3.5 ZONE APPLICATION

3.5.1 Eastern Canada Vessel Traffic Services Zone (ECAREG)

With respect to the Eastern Canada VTS zone, the *Eastern Canada Vessel Traffic Services Zone Regulations* apply in respect of:

- a) every ship of 500 tons gross tonnage or more;
- b) every ship that is engaged in towing or pushing a vessel, where the combined tonnage of the ship and the vessel being towed or pushed is 500 tons gross tonnage or more; or
- c) every ship carrying a pollutant or dangerous goods, or engaged in towing or pushing a vessel carrying a pollutant or dangerous goods as prescribed in the;
 - i) *International Maritime Dangerous Goods (IMDG) Code*, and
 - ii) *Vessel Pollution and Dangerous Chemicals Regulations*.

Participation is mandatory.

¹ The Shipping Safety Control zones cover Canada's coastal northern waters within the area enclosed by the 60th parallel of north latitude, the 141st meridian of west longitude and the outer limit of the exclusive economic zone; however, where the international boundary between Canada and Greenland is less than 200 nautical miles from the baselines of the territorial sea of Canada, the international boundary shall be substituted for that outer limit.

3.5.2 Northern Canada Vessel Traffic Services Zone (NORDREG)

With respect to the Northern Canada VTS zone (NORDREG), the *Northern Canada Vessel Traffic Services Zone Regulations* apply to the following classes of vessels:

- a) vessels of 300 tons gross tonnage or more;
- b) vessels that are engaged in towing or pushing another vessel, if the combined gross tonnage of the vessel and the vessel being towed or pushed is 500 tons gross tonnage or more; and
- c) vessels that are carrying as cargo, a pollutant or dangerous goods, or that are engaged in towing or pushing a vessel that is carrying as cargo a pollutant or dangerous goods.

Participation is mandatory.

3.5.3 Local Vessel Traffic Services Zones

With respect to the VTS zones specified in the *Vessel Traffic Services Zone Regulations*, these regulations apply in respect of:

- a) every ship 20 metres or more in length;
- b) every ship engaged in towing or pushing any vessel or object, other than fishing gear, where;
 - i) the combined length of the ship and any vessel or object towed or pushed by the ship is 45 metres or more in length, or
 - ii) the length of the vessel or object being towed or pushed by the ship is 20 metres or more in length.

Participation is mandatory.

With respect to the VTS zones specified in the *Vessel Traffic Services Zone Regulations*, these regulations do not apply in respect of:

- a) a ship engaged in towing or pushing any vessel or object within a log booming ground;
- b) a pleasure yacht that is less than 30 metres in length; and
- c) a fishing vessel that is less than 24 metres in length and not more than 150 tons gross tonnage.

3.6 REPORTS

3.6.1 Change in Information

A report shall be made whenever a significant change occurs in the information previously provided in any report made pursuant to the *Eastern Canada Vessel Traffic Services Zone Regulations*, *Northern Canada Vessel Traffic Services Zone Regulations* or the *Vessel Traffic Services Zone Regulations* except where the report was made when departing from a VTS zone.

3.6.2 Non-Routine Reports

Pursuant to the *Eastern Canada Vessel Traffic Services Zone Regulations* and the *Vessel Traffic Services Zone Regulations* a report indicating the vessel's name, position and a description of the incident shall be made prior to the vessel proceeding as soon as the master becomes aware of any of the following conditions:

- a) the occurrence on board the ship of any fire;

- b) the involvement of the ship in a collision, grounding or striking;
- c) any defect in the ship's hull, main propulsion systems or steering systems, radars, compasses, radio equipment, anchors or cables;
- d) any discharge or probable discharge of a pollutant from the ship into the water;
- e) another ship in apparent difficulty;
- f) any obstruction to navigation;
- g) any aid to navigation that is functioning improperly, damaged, off-position or missing;
- h) the presence of any pollutant in the water;
- i) the presence of a ship that may impede the movement of other ships; and
- j) any ice and weather conditions that are detrimental to safe navigation.

Notes:

Items f), g) and h) are not required if the information has been previously promulgated by a Notice to Shipping.

Mariners are encouraged to provide, on a voluntary basis, any information pertaining to charts and publications which may not be on board so that arrangements can be made to embark the necessary items.

3.6.3 ECAREG - Information Requirements

ECAREG zone reports shall be communicated directly to ECAREG or to the nearest Canadian Coast Guard Marine Communications and Traffic Services centre. All times given in ECAREG zone reports shall be Coordinated Universal Time (UTC).

Dependent upon the reporting requirement, various elements of the following may be required to be reported.

- a) the name of the ship;
- b) the radio call sign of the ship;
- c) the name of the master of the ship;
- d) the position of the ship;
- e) the time the ship arrived at the position;
- f) the course of the ship, if any;
- g) the speed of the ship, if any;
- h) the prevailing weather conditions (including ice if applicable);
- i) the estimated time that the ship will enter the Eastern Canada VTS Zone;
- j) the estimated time that the ship will depart the berth;
- k) the destination of the ship;
- l) the estimated time of arrival of the ship at the destination;
- m) the route the ship intends to take through the Eastern Canada VTS zone to arrive at the destination;
- n) the name of the last port of call of the ship;
- o) the draft of the ship;
- p) any dangerous goods, listed by class, or pollutant, that is carried on board the ship or a vessel being towed or pushed by the ship;
- q) revoked;

- r) any defect in the ship's hull, main propulsion systems or steering systems, radars, compasses, radio equipment, anchors or cables;
- s) any discharge, or threat of discharge, of a pollutant from the ship into the water, and any damage to the ship that may result in the discharge of a pollutant from the ship into the water;
- t) the name of the Canadian or United States agent of the ship; or
- u) the date of expiration of a certificate referred to in Article VII of the *International Convention on Civil Liability for Oil Pollution Damage, 1969/1992*, the International Oil Pollution Prevention Certificate, the International Pollution Prevention Certificate for the Carriage of Noxious Liquid Substances in Bulk, the Certificate of Fitness and the Certificate of Compliance, if any issued to the ship. (The following is also requested: the date and expiration of the ISM Safety Management Certificate, the ISM document of compliance, and the International Convention on Civil Liability for Bunker Oil Pollution Damage, 2001 Certificate (known as Bunkers Convention Certificate), if any, issued to the ship.)

3.6.4 ECAREG Zone Reports

3.6.4.1 Prior to Entering the Zone

A report containing all the required information listed, except item j), shall be made 24 hours prior to entering the zone, or as soon as practical where the estimated time of arrival of the ship at the zone is less than 24 hours after the time the ship departed for the last port of call.

This report is not required where:

- a) the ship is on a voyage between two ports within the zone; and
- b) the ship is entering the zone directly from the Arctic Canada Traffic zone, and is in possession of a valid NORDREG Clearance.

3.6.4.2 Entering at Zone Boundary

A report containing the required information listed in a), b), d), h) and i), shall be made immediately before the ship crosses the zone boundary when entering the zone.

This report is not required when entering directly from a local VTS zone.

3.6.4.3 Arrival at Berth

A report containing the required information listed in a) and b), as well as the following information:

- a) port of arrival; and
- b) time of arrival;

Shall be made on arrival of the ship at a berth.

3.6.4.4 Departing Berth

A report containing the required information, except item a), shall be made two hours before a ship departs a berth.

A traffic clearance to depart a berth is valid for one hour from the estimated time of departure. Where a traffic clearance to depart berth has expired because of a revised time of departure, a new traffic clearance is required. In this case, the report need only contain the ship's name, call-sign, position and revised time of departure.

This report is not required where the ship is proceeding to another berth in the same port.

3.6.4.5 Exiting the Zone

A report containing the required information listed in a), b), d) and h), shall be made immediately before the ship crosses the seaward boundary.

In a case where exiting a zone coincides with entering a local VTS zone, this report is not required. Procedures as local VTS zone reporting requirements shall be followed.

ECAREG Coordinates

ECAREG reports shall be sent to:

Halifax MCTS Centre
Telephone: 902-426-4956
Facsimile: 902-426-4483
Email: HLXECAREG1@INNAV.GC.CA

Rivière-au-Renard MCTS Centre
Telephone: 418-269-3843
Facsimile: 418-269-5514
Email: RARECAREG@INNAV.GC.CA

3.6.5 NORDREG Zone Reports

3.6.5.1 Format

NORDREG reports shall be addressed to NORDREG CANADA and communicated either directly to NORDREG CANADA or to the nearest Canadian Coast Guard Marine Communications and Traffic Services centre. All times indicated in NORDREG reports shall be in Coordinated Universal Time (UTC). The master of a ship shall ensure that these reports are made in accordance with the stated requirements.

The information requested from the ships is derived from the standard reporting format shown in International Maritime Organization resolution A.851(20) – *General Principles for Ship Reporting Systems and Ship Reporting Requirements, Including Guidelines for Reporting Incidents Involving Dangerous Goods, Harmful Substances and/or Marine Pollutants*.

Every report shall begin with the term “NORDREG” (system identifier) and be followed by whichever of the following two letters corresponds to the report:

- a) “SP”, in the case of a sailing plan report;
- b) “PR”, in the case of a position report;
- c) “FR”, in the case of a final report;
- d) “DR”, in the case of a deviation report.

The report must include the applicable designators followed by the information required in accordance with the Table 3-1 - NORDREG Zone Report: Designators and Information Required.

3.6.5.2 Content and Time and Geographical Position for Submitting Reports

Vessels shall send a report as follows, and provide the information required in accordance with the Table 3-1 that corresponds to the designators specified.

3.6.5.3 When the Vessel is About to Enter the NORDREG Zone

A sailing plan report (SP) shall be provided when the vessel is about to enter the NORDREG zone and must include the following designators: A, B, C or D, E, F, G, H, I, L, O, P, Q, S, T, W, and X.

Note: Designators O, Q, T are not required when entering directly from the ECAREG zone.

Vessels about to enter the NORDREG zone should provide the sailing plan report 24 hours in advance of entering the zone, or as soon as possible after leaving a port that is less than 24 hours from the NORDREG zone. This ensures vessels are not delayed in obtaining a clearance from Marine Communications and Traffic Services and enables Marine Communications and Traffic Services to assess current conditions and prepare relevant safety information for the vessel.²

3.6.5.4 Departing a Berth/Anchorage

A sailing plan report (SP) shall be provided more than one hour but not more than two hours before a vessel departs from a berth within the NORDREG zone, unless the vessel is moving to another berth in the same port. The sailing plan report must include the following designators: A, B, C or D, H, I, L, O, P, Q, S, T, W, and X.

Note: Designators O, P, Q, S, T, W, X are not required if the corresponding information has not changed since the previous sailing plan report.

3.6.5.5 Getting Underway After an Incident

A sailing plan report (SP) shall be provided immediately before a vessel gets underway within the NORDREG zone if the vessel; has been stranded, has stopped as a result of a breakdown in the main propulsion systems or steering systems, or has been involved in a collision. The sailing plan report must include the following designators: A, B, either C or D, I, L, O, P, Q, S, T, W and X.

Note: Designators O, P, Q, S, T, W, X are not required if the corresponding information has not changed since the previous sailing plan report.

3.6.5.6 Entering at Zone Boundary

A position report (PR) shall be provided immediately after a vessel enters the NORDREG zone and must include the following designators: A, B, C or D, E, F, and S.

3.6.5.7 Daily

A position report (PR) shall be provided daily at 16:00 UTC, unless the vessel is transmitting LRIT information. The position report shall include the following designators: A, B, C or D, E, F, and S.

3.6.5.8 Other Situations

A position report (PR) shall be provided with designators A, B, C or D, E, F, S and X as soon as feasible after a vessel's master becomes aware of any of the following:

- a) another vessel in apparent difficulty;
- b) any obstruction to navigation;
- c) any aid to navigation that is not functioning properly or is damaged, out of position or missing;
- d) any ice or weather conditions that are hazardous to safe navigation; and
- e) a pollutant in the water.

² Vessels must obtain a clearance from MCTS before entering the NORDREG zone.

3.6.5.9 Arrival at Berth/Anchorage

A final report (FR) shall be provided on the arrival of a vessel at a berth within the NORDREG zone and include the following designators: A and K.

3.6.5.10 Exiting the Zone

A final report (FR) shall be provided immediately before a vessel exits the NORDREG zone and include the following designators: A and K

3.6.5.11 Deviation Report

A deviation report (DR) shall be provided when a vessel's position varies significantly from the position that was expected based on the sailing plan report, or when a vessel's intended voyage changes from the sailing plan report. The deviation report must include the following designators: A, B, either C or D and the other designators included in the sailing plan report if the corresponding information has changed since that report.

Table 3-1 - NORDREG Zone Report: Designators and Information Required

Designator	Subject	Information
A	Vessel	The vessel's name, the name of the state whose flag the vessel is entitled to fly and, if applicable, the vessel's call sign, International Maritime Organization ship identification number and Maritime Mobile Service Identity (MMSI) number.
B	Date and time	Date and time corresponding to the vessel's position under designator C or D given in Coordinated Universal Time (UTC). A 6-digit group followed by a Z, the first 2 digits giving the day of the month, the next two digits giving the hour and the last two digits giving the minutes.
C	Vessel's position by latitude and longitude	A 4-digit group giving latitude in degrees and minutes suffixed with N and a 5-digit group giving longitude in degrees and minutes suffixed with W.
or D	Vessel's position by geographical name of place.	If the vessel is at a known place, the name of the place. If the vessel is not at a known place, the name of a known place followed by the vessel's true bearing (3-digits) and distance in nautical miles from the place.
E	Vessel's course	True course. A 3-digit group.
F	Vessel's speed	Speed in knots. A 2-digit group.
G	The vessel's last port of call	The name of the port of call.
H	Vessel's entry into the NORDREG zone or departure from a berth within the NORDREG zone.	Estimated date and time the vessel will enter the NORDREG zone or depart the berth within the NORDREG zone, as appropriate. Date and time expressed as under designator B and entry or departure position expressed as under designator C or D.
I	Vessel's destination and expected time of arrival	The name of the destination followed by expected time of arrival, expressed as under designator B.
K	Vessel's exit from the NORDREG zone or arrival at the vessel's destination	Date and time vessel exits the NORDREG zone or arrives at its berth within the NORDREG zone. Exit date and time expressed as under designator B and exit or arrival position expressed as under designator C or D.

Designator	Subject	Information
L	Vessel's intended route.	A brief description of the intended route through the NORDREG zone.
O	Vessel's maximum present static draught	A 4-digit group giving metres and centimetres.
P	Cargo.	A brief description of the vessel's cargo and the cargo of any vessel being towed or pushed. The description must include: a) in the case of a dangerous good, the class and quantity; and b) in the case of a pollutant, the technical name and quantity.
Q	Defects, damage and deficiencies, as well as circumstances adversely affecting the vessel's normal navigation.	Brief details of any defects, damage or deficiencies of the vessel or its machinery, equipment or charts and nautical publications, or circumstances that adversely affect normal navigation.
S	Weather and ice.	A brief description of the prevailing weather and ice conditions.
T	Vessel's authorized representative, agent or owner.	The name and contact information of; a) in the case of a Canadian vessel, its authorized representative; b) in the case of a foreign vessel, its Canadian or American agent or owner; c) in the case of a pleasure craft that is not a Canadian vessel, the pleasure craft's owner.
W	Persons on board the vessel.	The number of persons.
X	Additional information for sailing plan report. Information to be reported in a position report in certain situations	a) In the case of a sailing plan report the following information: i) the total amount of oil on board that is for use as fuel or carried as cargo, expressed in cubic metres; ii) if the vessel's owner or master holds an arctic pollution prevention certificate in respect of the vessel; the certificate's expiry date and the name of its issuing authority; iii) the vessel's ice class, if applicable, and the name of the classification society that assigned the ice class; iv) if the vessel is getting underway after having been stranded, stopped as a result of a breakdown in the main propulsion or steering system or involved in a collision; a brief description of the applicable incident. b) In the case of a position report required after becoming aware of: another vessel in difficulty; any obstruction to navigation; an aid to navigation that is not functioning properly or is damaged, out of position or missing; any ice or weather conditions that are hazardous to safe navigation and a pollutant in the water - then a brief description of the applicable matter.

NORDREG Coordinates

NORDREG reports shall be sent to:

Iqaluit MCTS Centre
 Telephone: 867-979-5724
 Facsimile: 867-979-4264
 Telex (Telefax): 063-15529
 Telegraphic Identifier: NORDREG CDA
 Email: IQANORDREG@INNAV.GC.CA

Operational from approximately mid-May to late December

Prescott MCTS Centre

Telephone: 613-925-4471

Facsimile: 613-925-4519

Email: IQANORDREG@INNAV.GC.CA

Operational from approximately late December to mid-May

3.6.5.12 Local Vessel Traffic Services Zone Reports

With respect to local VTS zones as specified in the *Vessel Traffic Services Zone Regulations* the master of a ship shall report to a Marine Communications and Traffic Services officer in accordance with the following requirements.

3.6.5.13 Information Required

Dependent upon the reporting requirement the following information may be required to be reported:

- a) the name of the ship;
- b) the radio call sign of the ship;
- c) the position of the ship;
- d) the estimated time that the ship will enter the VTS zone;
- e) the destination of the ship;
- f) the estimated time that the ship will arrive at its destination;
- g) whether any pollutant or dangerous goods cargo is carried on board the ship or any vessel or object being towed or pushed by the ship;
- h) the estimated time that the ship will depart the berth; and
- i) the estimated time at which the ship will next arrive at a location requiring a report.

3.6.5.14 Entering a Zone

At least 15 minutes before a ship intends to enter a VTS zone, a report shall be made specifying the information listed in a), b), c), d), e), f) and g).

Exception: Ships already in possession of a valid Traffic Clearance issued by ECAREG, NORDREG or another Vessel Traffic Services zone are not required to provide this report.

3.6.5.15 Arrival at a Calling-In-Point (CIP)

When a ship arrives at a CIP a report shall be made specifying the information listed in a), c) and i).

3.6.5.16 Arrival at Berth

As soon as practicable after a ship arrives at a berth, a report shall be made specifying the information listed in a) and c).

3.6.5.17 Departure Manoeuvre

Departure manoeuvre is defined as an operation during which a vessel leaves a berth and gets safely underway:

- a) immediately before commencing a departure manoeuvre, a report shall be made specifying the information listed in a), b), c), e), f), g) and h);
- b) immediately after completing the departure manoeuvre, a report shall be made specifying the information listed in a), c) and i).

3.6.5.18 Manoeuvres

A traffic clearance is required 15 minutes prior to commencing any manoeuvre such as:

- a) a compass adjustment;
- b) the calibration and servicing of navigational aids;
- c) a sea trial;
- d) a dredging operation; and
- e) the laying, picking up and servicing of submarine cables; or any other manoeuvre that may be detrimental to safe navigation.

Prior to commencing a manoeuvre a report shall be made specifying the information listed in a) and c), plus a description of the intended manoeuvre.

As soon as practical after the manoeuvre is completed, a report describing the manoeuvre just completed shall be made.

3.6.5.19 Variations

Ferries and other vessels on regularly scheduled voyages may be exempted from making routine reports. Formal variations to reporting procedures will be granted only where alternate arrangements to provide essential information are made and where the equivalent procedure or practice is deemed to be as safe as that required in the regulations.

Formal variations may be obtained by submitting a written request to the appropriate Regional Marine Communications and Traffic Services Superintendent, Canadian Coast Guard (see Section 1.15). In circumstances other than those described above, informal variations may be granted from time to time on a one time only basis by a Marine Communications and Traffic Services officer where the procedure or practice requested is deemed to be as safe as that required in the regulations.

3.6.5.20 Pre-Arrival Information Report (PAIR)

The Canadian *Marine Transportation Security Regulations* (MTSR) require a Pre-Arrival Information Report (PAIR) to be filed prior to entry into Canadian waters. Message format and contact information are found in PART 4.

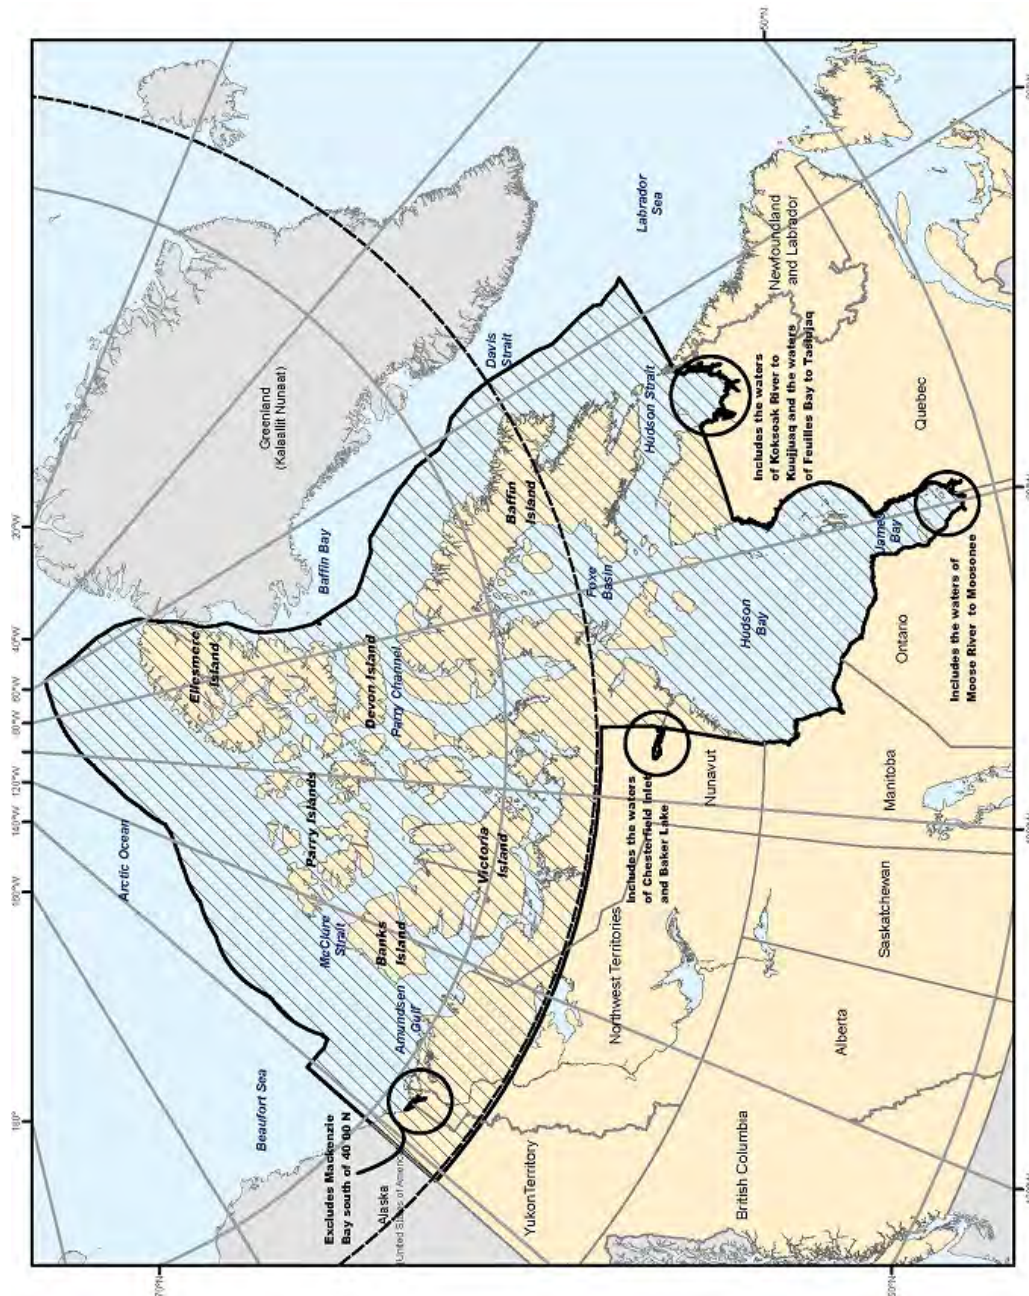

Figure 3-2 - Vessel Traffic Services - Northern Canada (NORDREG) Zone

3.7 VESSEL TRAFFIC SERVICES ZONE SCHEDULES

3.7.1 Bay of Fundy

NOTE: Latitude and longitude positions given for the Bay of Fundy Vessel Traffic Services Zone are in NAD 83.

The Bay of Fundy Vessel Traffic Services zone comprises all Canadian waters contained within the area bounded by a line drawn in a 270° True direction from Chebogue Point in position 43°43'54.3"N, 66°07'08.0"W; thence through the following positions:

43°43'54.3"N 66°26'28"W, 43°58'45.3"N 66°27'43"W, 44°09'30.3"N 66°47'01"W, 44°11'50.3"N 66°49'31"W, 44°14'57.3"N 66°52'40"W, 44°17'21.2"N 66°55'08"W, 44°22'30.2"N 67°18'58.1"W, 44°29'50.2"N 67°15'08.1"W, 44°35'30.2"N 67°08'13"W, 44°42'00.2"N 66°58'22"W, 44°46'35.6"N 66°54'09.2"W thence along the Canada/USA boundary line to the shore at 45°11'30.5"N 67°17'00.6"W; thence following the Canadian shores of New Brunswick and Nova Scotia back to the beginning at Chebogue Point, including Fishing Zone 2.

Table 3-2 - Sectors and Boundaries for the Bay of Fundy

Sector	Boundaries
1	The outer limit of the zone, and a line joining the following positions: 45°03'29.2"N 66°27'32.8"W, 44°53'14.6"N 66°36'00.1"W, 44°43'08.8"N 66°44'16.6"W, 44°36'38"N 65°56'28.7"W.
2	From the inner boundary of sector 1 eastward to a line joining 45°19'22.5"N 65°32'05.4"W; and 44°56'54.3"N 65°15'49.4"W, and including the waters of Saint John Harbour northward to a line joining Pleasant Point, 45°16'28.7"N 66°05'47.1"W; and Pokiok, 45°16'38.3"N 66°05'34.5"W.
3	All of the waters encompassed by the shores of New Brunswick and Nova Scotia east of a line joining 45°19'22.5"N 65°32'05.4"W; and 44°56'54.3"N 65°15'49.4"W; which is described as the eastern limit of sector 2.

Table 3-3 - Identification and Frequencies for the Bay of Fundy

Sector	Identifier	Channel	Frequencies (MHz)
1	« Fundy Traffic»	14	156.7
2	« Fundy Traffic»	12	156.6
3	« Fundy Traffic»	71	156.575

Note: Fundy Traffic monitors navigation in the traffic zone using radar and Automatic Identification System (AIS).

Table 3-4 - Calling-In-Points for the Bay of Fundy

Number	Sector	Name	General Description and Conditions	Geographic Description
1A	1		Southeast entrance to traffic separation scheme Inward.	A point at 44°10'40.3"N 66°48'16"W.
1B	1		Southwest exit from traffic separation scheme Outward.	A point at 44°16'09.3"N 66°53'54"W.
2A	1		Inward traffic only.	A point at 44°19'11.4"N 66°34'12.4"W.
2B	1		Outward traffic only.	A point at 44°23'16.9"N 66°39'28"W.
3A	1		Inward traffic only.	A point at 44°30'09.3"N 66°15'56.5"W.
3B	1		Outward traffic only.	A point at 44°32'25.8"N 66°20'46"W.

Number	Sector	Name	General Description and Conditions	Geographic Description
4A	1 & 2		Sector boundary – Inward traffic only.	A point at 44°38'53.3"N 66°12'43.9"W.
4B	2		Outward traffic only.	A point at 44°50'17.8"N 66°14'19.5"W.
4C	2		Inward traffic only.	A point at 44°44'49.1"N 66°10'32.7"W.
4D	1 & 2		Sector boundary – Outward traffic only.	A point at 44°39'38.1"N 66°18'11.2"W.
4E	2		Entrance to/exit from traffic separation scheme.	A point at 44°49'38.3"N 66°23'40.2"W.
5A	2		North exit from traffic separation scheme – Inward traffic only.	A point at 45°01'45.3"N 66°04'08.4"W.
5B	2		North entrance to traffic separation scheme – Outward traffic only.	A point at 45°02'45.3"N 66°09'35.4"W.
6	2	Saint John Harbour light and whistle Buoy J		A line joining: 45°13'30.4"N 66°05'45.1"W; 45°12'55.3"N 66°02'36.9"W; 45°12'59.3"N 66°00'28.2"W.
7	2	Partridge Island		A line joining: 45°14'10.3"N 66°03'12.1"W and 45°14'20.3"N 66°00'07.9"W.
8	2			A point at 45°15'30.3"N 66°03'31.3"W.
9	2			A point at 45°16'10.9"N 66°04'24.9"W.
10	2			A point at 45°16'00.5"N 66°05'39.1"W.
11	2			A point at 45°15'51.5"N 66°02'37.6"W.
1C	1		Outer boundary – Sector 1	A line joining 44°17'21.2"N 66°55'08"W and 44°22'30.2"N 67°18'58.1"W.
1E	1		Outer boundary – Sector 1 Grand Manan Channel	A line joining: 44°22'30.2"N 67°18'58.1"W; 44°29'50.2"N 67°15'08.1"W; 44°35'30.2"N 67°08'13"W; 44°42'00.2"N 66°58'22"W; 44°46'35.6"N 66°54'09.2"W; 44°47'39.1"N 66°53'07.5"W.
1P	1		Grand Manan Channel	A line joining 44°45'35.7"N 66°50'01.9"W & 44°45'37"N 66°50'03"W, and thence along the boundary between Fishing zones 2 & 4 to 44°47'39.1"N 66°53'07.5"W; thence, along the Canada/US boundary to 44°49'31.8"N 66°55'57.3"W, and along the extension of this boundary to 44°50'16.8"N 66°57'05.2"W.
2P	1		Campobello Island to The Wolves	A line joining 44°55'57.4"N 66°53'55.3"W and 44°56'09.8"N 66°44'04.3"W.
2R	1		Southwest Wolf Island to sector boundary.	A line joining: 44°56'10.6"N 66°43'57.7"W and 44°53'14.6"N 66°36'00.1"W.

Number	Sector	Name	General Description and Conditions	Geographic Description
3Q	1 & 2		Sector Boundary.	A line joining: 44°43'08.8"N 66°44'16.6"W, 44°53'14.6"N 66°36'00.1"W, 45°03'29.2"N 66°27'32.8"W.
5R	2			A line joining: 45°03'00.3"N 66°10'58"W; 45°03'36.3"N 66°12'22"W; 45°07'06.7"N 66°20'50.8"W.
3P	1			A line joining: 45°02'19.6"N 66°48'31.1"W; 44°55'57.4"N 66°53'55.3"W.
4P	1		Head Harbour Passage	A line joining: 44°56'48.5"N 66°58'14"W; 44°55'40.6"N 66°56'37.4"W.
5P	1		Passamaquoddy Bay	A line joining: 45°04'17"N 66°55'12.6"W and a position on the Canada/US boundary line at 45°01'36.7"N 67°03'56.6"W.
1M	1		Outer boundary – Sector 1 southwest of Brier Island	A line joining: 43°58'45.3"N 66°27'43"W; 44°09'30.3"N 66°47'01"W.
2M	1		Entrance to St. Mary's Bay	A line joining 44°05'12"N 66°12'42.8"W; 44°12'08.3"N 66°23'09"W.
3M	1		South end of Petit Passage	An arc centered on 44°22'21"N 66°12'12"W; Radius 1½ NM, and extending from shore to shore in the waters of St. Mary's Bay, connecting the following points: 44°23'31.3"N 66°10'53.6"W; 44°21'15.2"N 66°10'46.4"W; & 44°21'19.9"N 66°13'44.1"W.
4M	1		North end of Petit Passage	An arc centered on 44°24'14.5"N 66°12'55"W; Radius 1½ NM, and extending from shore to shore in the waters of the Bay of Fundy, connecting the following points: 44°23'02.8"N 66°14'10.8"W; 44°25'19.6"N 66°14'21.7"W; & 44°25'21.9"N 66°11'31.8"W.
6M	2			A line joining: 44°39'56.6"N 65°49'57.2"W and 45°01'30.3"N 66°02'46"W.
5U	2			A line joining 45°08'02.3"N 65°50'56.9"W and 45°15'24.3"N 65°48'39.9"W.
1D	2		Entrance/Exit to Digby Gut	An arc centered on 44°42'38.8"N 65°46'23.9"W; Radius 2 NM and extending from shore to shore in the waters of the Bay of Fundy, connecting the following points: 44°41'03.7"N 65°48'06.6"W; 44°44'00.3"N 65°48'27.5"W & 44°43'09.9"N 65°43'41.4"W.

Number	Sector	Name	General Description and Conditions	Geographic Description
5S	2			A line joining 45°01'30.3"N 66°02'46"W and 45°08'02.3"N 65°50'56.9"W.
8U	2 & 3		Boundary – Sectors 2 / 3	A line joining 45°19'22.5"N 65°32'05.4"W and 44°56'54.3"N 65°15'49.4"W.
1L	1		Outer boundary – Sector 1 west of Yarmouth, NS.	A line joining: 43°43'54.3"N 66°26'28"W and 43°58'45.3"N 66°27'43"W.
1Y	1		Outer boundary – Bay of Fundy VTS zone near Yarmouth, NS	A line joining: 43°43'54.3"N 66°07'08"W and 43°43'54.3"N 66°26'28"W.
2Y	1		Yarmouth Sound	An arc centered on 43°46'57.3"N 66°09'29.5"W; Radius 1½ NM, and extending from shore to shore in the waters off Yarmouth Sound, connecting the following points: 43°46'08.4"N 66°07'45.2"W; 43°46'29.7"N 66°11'27.7"W and 43°48'24.5"N 66°10'00.3"W.

All times shall be given in Atlantic Standard Time or Atlantic Daylight Saving Time, whichever is in effect.

3.7.2 Halifax Harbour and Approaches

NOTE: Latitude and longitude positions given for Halifax Harbour and Approaches Vessel Traffic Services zone are in NAD 83.

The Halifax Vessel Traffic Services zone comprises all Canadian waters contained within an area bounded by a line connecting points from Point Pennant, 44°25'53.8"N 63°38'56.5"W; to position 44°17'41.3"N 63°35'09.6"W; to the Canadian territorial boundary at 44°14'02"N 63°30'50.3"W; thence, along Canada's territorial boundary to a point at 44°22'43.5"N 63°13'48.5"W, and thence, along a line to Petpeswick (Collies) Head, 44°40'43.3"N 63°09'44.2"W.

Note: Halifax Traffic monitors navigation in the traffic zone using radar and Automatic Identification System (AIS).

Table 3-5 - Sectors and Boundaries for Halifax Harbour and Approaches

Sector	Boundaries
1	The seaward boundary of the zone, and a line connecting points from Hartlen Point, 44°35'20.5"N 63°27'05.8"W; to position 44°30'13.8"N 63°28'46.7"W; thence, to Duncan Reef light buoy, H1, 44°29'36"N 63°30'34"W, and thence, to the shore west of Duncan Reef, 44°29'36"N 63°31'28.1"W.
2	The inner boundary of sector 1 and the shoreline northward and westward of the inner boundary of sector 1.

Note: Les Escoumins, Québec and Montréal Traffic monitor navigation in the traffic zone using radar and Automatic Identification System (AIS).

Figure 3-9 - Vessel Traffic Services - St. Lawrence River

These charts (figures above) do not yet reflect the CIP changes.

3.7.8 Sarnia Zone and Areas

3.7.8.1 Sarnia Vessel Traffic Services Zone

Sarnia Vessel Traffic Services zone is comprised of the waters from Lake Huron Cut light buoy "11" to buoys 1 in the East and West Outer Channels in Lake Erie.

All vessels reporting in the area north of the Harbour Beach/Point Clark line will be answered by Thunder Bay Marine Communications and Traffic Services Centre on behalf of Sarnia Marine Communications and Traffic Services. The identifier "SARNIA TRAFFIC" may still be used.

NUMERICAL C-I-P's identify mandatory calling-in-points under the *St. Clair and Detroit River Navigation Safety Regulations*.

3.7.8.2 Sarnia Vessel Traffic Services Areas

Sarnia Vessel Traffic Services Areas are comprised of Canadian waters in Lake Huron from Detour Reef light to Lake Huron Cut light buoy "11", and Canadian waters in Lake Erie from East and West Outer Channel buoys "1" to Long Point light. Ships in these areas are required to guard the International Distress, Safety and Calling Frequency 156.8 MHz (Channel 16).

ALPHABETICAL C-I-P's identify voluntary calling-in-points in the Sarnia Vessel Traffic Services Areas.

3.7.8.3 Application

Within the St. Clair and Detroit Rivers, mariners should be guided by the traffic reporting provisions of the *St. Clair and Detroit River Navigational Safety Regulations*, which apply to all ships required by the *Ship Station Radio Regulations* to be fitted with a bridge-to-bridge radiotelephone.

Table 3-23 - Sectors and Boundaries for Sarnia Zone and Areas

Sector	Boundaries
1	The waters of Lake Huron, the St. Clair River and Lake St. Clair from a line running 090° - 270° True through Detour Reef light, 45°56'54"N 83°54'12"W to a line joining Lake St. Clair light 42°27'54"N 82°45'18"W and Lake St. Clair light buoy "24", 42°27'53"N 82°45'03"W.
2	The waters of Lake St. Clair, the Detroit River and Lake Erie from a line joining Lake St. Clair light, 42°27'54"N 82°45'18"W and Lake St. Clair light buoy "24", 42°27'53"N 82°45'03"W to a line running 152° True from Long Point light 42°32'55"N 80°02'57.4"W in Lake Erie.

Table 3-24 - Identification and Frequencies for Sarnia Zone and Areas

Sector	Identifier	Channel	Frequency (MHz)
1	"Sarnia Traffic"	11	156.55
2	"Sarnia Traffic"	12	156.6

Note: Sarnia Traffic monitors navigation in the traffic zone using Automatic Identification System (AIS).

Table 3-25 - Calling-In-Points for Sarnia Zone and Areas

Number	Sector	Name	General Description and Conditions	Geographic Description
A	1	Detour	At Detour Reef light for vessels transiting St. Mary's River.	For vessels transiting St. Mary's River, a line running 090°- 270° True through 45°56'54"N 83°54'12"W.
		Cordwood Point	At Cordwood Point light buoy "1" for vessels transiting to or from Lake Michigan.	For vessels transiting to or from Lake Michigan, a line joining 45°56'54"N 83°54'12"W and 45°40'53"N 84°18'05"W.
			These vessels should specify Cordwood Point.	
B	1	Great Duck Island	A line joining Great Duck Island light and Presque Isle light.	A line running from 45°38'30"N 82°57'48"W to 45°21'24"N 83°29'30"W.
C	1	Cove Island	At Cove Island light for vessels enroute to or from Georgian Bay.	A line running 000° True from 45°19'37"N 81°44'07"W Call Thunder Bay Marine Communications and Traffic Services on Ch 26.
D	1	Harbour Beach Point Clark	Mariners should specify Point Clark when following Georgian Bay courses and Harbor Beach at all other times.	A line joining 43°50'42"N 82°37'54"W and 44°04'22.1"N 81°45'25.6"W.
1	1	30 minutes north of Lake Huron Cut light buoy « 11 »	30 minutes north of Lake Huron Cut lighted buoys « 11 » and « 12 » (downbound only).	
E	1	Lake Huron Cut Light buoy «11 »	Lake Huron Cut Light buoy « 11 »	A line running 090°-270° True through 43°05'25"N 82°24'38"W.
2	1	Lake Huron Cut light « 7 »	Lake Huron Cut light « 7 » (downbound only).	A line running 090°-270° True through 43°03'36"N 82°25'06"W.
3	1	Lake Huron Cut light buoy « 1 »	At Lake Huron Cut light buoy « 1 » (upbound only).	A line running 090°-270° True through 43°00'37"N 82°24'53"W.
4	1	Black River	At. St.Clair / Black River Junction light.	On north shore of river entrance 42°58'24"N 82°25'12"W.
5	1	Stag Island Upper Light	At Stag Island Upper light (upbound only).	A line running 090° True from 42°54'25"N 82°27'57.5"W.
6	1	Salt Dock	Marine City Salt Dock Light.	A line running 110° True from 42°41'16.8"N 82°30'20.5"W.
7	1	Light 23	Grande Point light "23" (downbound only).	A line joining 42°35'07"N 82°33'23.5"W and 42°35'04"N 82°33'10"W.
8	1	Light 2	A line joining St. Clair Flats Canal light « 2 » and St. Clair Cutoff Pier light « X32/1" (upbound only).	A line running from 42°31'06"N 82°41'12"W and 42°30'54"N 82°41'08"W.

Number	Sector	Name	General Description and Conditions	Geographic Description
9	1	Lake St.Clair light	Lake St. Clair light	A line running from 42°27'54"N 82°45'18"W and 42°27'53"N 82°45'03"W.
10	2	Station Belle Isle	Belle Isle light (downbound only)	A line running 150° True from 42°20'24"N 82°57'36"W.
10A	2	Rouge River	20 minutes from entering or leaving the Rouge River Shortcut Canal.	
10B	2	Rouge River	Immediately before entering or leaving the Rouge River or Shortcut Canal.	A line running from 42°16'26"N 83°06'36"W and 42°16'31"N 83°06'33.5"W.
11	2	Grassy Island light	Grassy Island light	A line running 090°-270° True through 42°13'30"N 83°08'00"W.
12	2	Detroit River light	Detroit River light	A line running 090°-270° True through 42°00'01"N 83°08'30"W.
F	2	Southeast Shoal	At Southeast Shoal light	A line from 41°54'33"N 82°30'36"W to 41°49'35"N 82°27'47"W thence to 41°32'12"N 82°42'42"W.
G	2	Long Point	A line joining Long Point light to the south shore of Lake Erie.	A line running 152° True from 42°32'55"N 80°02'58"W to 42°14'35"N 79°49'44"W.

All times shall be given in Eastern Standard Time or Eastern Daylight Saving Time, whichever is in effect.

The map illustrates the Sarnia VTS Zone and its surrounding areas. Key features include:

- LAKE HURON** at the top.
- LAKE ST. CLAIR** in the center.
- LAKE ERIE** on the right.
- SARNIA** is located between Lake Huron and Lake St. Clair.
- SECTOR 1 VHF CH11** is located in Lake Huron, near Sarnia.
- SECTOR 2 VHF CH 12** is located in Lake Erie, near Sarnia.
- SECTOR BOUNDARY (Lake St. Clair Light)** is marked by a dashed line across Lake St. Clair.
- LAKE HURON Cut Light Buoy 11** is marked with a star on the shore of Lake Huron.
- Detroit River Light** is marked with a star on the shore of Lake Erie.
- SARNIA VOLUNTARY VTS AREA** is indicated by vertical double-headed arrows on the left side of the map.
- SARNIA MANDATORY VTS ZONE** is indicated by a vertical double-headed arrow in the center of the map.

SARNIA VTS ZONE & AREAS

3.7.8.4 Frequency Guard Great Lakes Basin

Amendments to the VHF Practices and Procedures regulations which make Channel 13 (156.650 MHz) the dedicated Bridge-to-Bridge frequency in the Great Lakes Basin became effective February 1, 1989. At that time the VHF listening watch requirements for vessels upbound/downbound in these waters were established as follows:

Table 3-26 - VHF Listening Watch Requirements

	Location	Monitor	Remarks
A	CIP #2 to CIP #6-7 (Seaway Beauharnois)	Seaway Ch 14 and Ch 16	Ch 13 Bridge-to-Bridge exemption through this area.
B	CIP # 6-7 to CIP #10-11 (Seaway Eisenhower)	Seaway Ch 12 and Ch 16	Ch 13 Bridge-to-Bridge exemption through this area.
C	CIP # 10-11 to Crossover Island (Seaway Iroquois)	Seaway Ch 11 and Ch 16	Ch 13 Bridge-to-Bridge exemption through this area.
D	Crossover Island to Cape Vincent (Seaway Clayton)	Bridge Ch 13 and Ch 16	Ch 13 serves as Bridge in this area. Seaway Clayton on Ch 12 through this area.
E	Cape Vincent to mid Lake Ontario (Seaway Sodus)	Bridge Ch 13 and Ch 16	Seaway Sodus also on Ch 12 through this area.
F	Mid Lake Ontario to CIP #15 (Seaway Newcastle)	Bridge Ch 13 and Ch 16	Seaway Newcastle operates on Ch 11 through this area.
G	CIP #15 to CIP #16 (Welland Canal)	Seaway Ch 14 and Ch 16	CH 13 Bridge-to-Bridge exemptions through this area.
H	CIP #16 to Long Point Lake Erie (Seaway Long Point)	Bridge Ch 13 and Ch 16	Seaway Long Point on Ch 11.
I	Long Point to Detroit River Light (Lake Erie)	Bridge Ch 13 and Ch 16	Sarnia Marine Communications and Traffic Services Centre operate on Ch 12.
J	Detroit River Light to Lake St. Clair Light	Bridge Ch 13 and Marine Communications and Traffic Services Centre Ch 12	Sarnia Marine Communications and Traffic Services Centre will monitor Ch 16 on behalf of vessels.
K	Lake St. Clair Light to Lake Huron Cut Light Buoy "11"	Bridge Ch 13 and Marine Communications and Traffic Services Centre Ch 11	Sarnia Marine Communications and Traffic Services Centre will monitor Ch 16 on behalf of vessels.
L	Lake Huron Cut Light Buoy "11" to Detour Reef Light including Cove Island (Lake Huron and Georgian Bay)	Bridge Ch 13 and Ch 16	Thunder Bay and Sarnia Marine Communications and Traffic Services Centres operate on Ch 11 Lake Huron.
M	Detour Reef Light to Île Parisienne Light (St. Mary's River)	Bridge Ch 13 and Ch 12	USCG Sault Ste Marie (SOO Traffic) will monitor Ch 16 on behalf of vessels.
N	Île Parisienne Light through Lakes Superior/Michigan	Bridge Ch 13 and Ch 16	

Notes:

- 1) Portable VHF equipment may be accepted to meet the Ch 13 requirement when a ship is required by the Ship Station Radio Regulations to fit only one radiotelephone installation.*
- 2) In summary, vessels shall monitor Ch 13 Bridge-to-Bridge continuously except in the exempted areas of St. Lambert to Crossover Island and in the Welland Canal where the appropriate Seaway channel must be guarded.*
- 3) Channel 16 shall also be guarded throughout the Great Lakes Basin except from Detroit River Light to Lake Huron Cut Lighted Buoy "11" (Sarnia Vessel Traffic Services zone) and from Detour Reef Light to Île Parisienne Light (St. Mary's River). Since vessels will be guarding Ch 13 and the Vessel Traffic Services frequency through the zones, watch on Ch 16 will be maintained by Sarnia Marine Communications and Traffic Services for the Sarnia Vessel Traffic Services zone and by USCG Sault Control for the Detour Reef Light to Île Parisienne zone on behalf of vessels in transit.*
- 4) While the Ch 13 Bridge-to-Bridge guard is to be maintained continuously (except in exempted waters) the watch on Ch 16 may be relinquished when reporting at a CIP or exchanging traffic with any station of the maritime mobile service on an appropriate working frequency.*
- 5) When wishing to contact a Harbour, Bridge or Pilotage authority initial contact should be made on the appropriate working channel as directed.*
- 6) Information contained in the chart and narrative is based on the latest information at time of printing.*

PART 3 - Page 44

3.7.9 Strait of Belle Isle – Voluntary Zone

Note: Latitude and longitude positions given for the Strait of Belle Isle Voluntary Vessel Traffic Services zone are in NAD 83.

The Canadian Coast Guard has established a voluntary VTS zone in the Strait of Belle Isle, Newfoundland.

The Belle Isle VTS zone includes all waters within the Strait of Belle Isle bounded by a line extending from Double Island, Labrador, 52°15'30"N 55°32'55"W, to Northeast Ledge, Belle Isle, 52°02'11.8"N 55°16'05.6"W, to White Islands, Newfoundland, 51°34'51"N 55°21'05"W; thence, westerly to Partridge Point Light, Newfoundland, 51°34'52.7"N 55°25'16.1"W; thence, westerly along the south shore of the Strait of Belle Isle to Seal Islands, Newfoundland, 51°17'16.2"N 56°45'51.8"W; thence, along a line to Forteau Light, Labrador, 51°28'10.2"N 56°57'12.1"W; and thence, easterly along the north shore of the Strait of Belle Isle to Double Island, Labrador, 52°15'30"N 55°32'55"W.

Vessels required to comply with the *Vessel Traffic Services zones Regulations* are requested to participate in the system. Fishing vessels are encouraged to maintain a listening watch or contact "Belle Isle Traffic" on Channel 14 VHF to obtain up-to-date information on vessels reported transiting the Belle Isle VTS zone.

Table 3-27 - Sector and Boundaries for Strait of Belle Isle

Sector	Boundaries
1	<p>Eastern Boundary: A line extending from Double Island, Labrador, 52°15'30"N 55°32'55"W, to Northeast Ledge, Belle Isle, 52°02'11.8"N 55°16'05.6"W, to White Islands, Newfoundland, 51°34'51"N 55°21'05"W; thence, westerly to Partridge Point Light, Newfoundland, 51°34'52.7"N 55°25'16.1"W.</p> <p>Western Boundary: A line joining Seal Island, Newfoundland, 51°17'16.2"N 56°45'51.8"W, to Forteau Light, Labrador, 51°28'10.2"N 56°57'12.1"W.</p>

7	1	C14 buoy		A line from 45°34'42.3"N 61°15'52.6"W to 45°31'13.8"N 61°15'40.4"W.
8	1	Critchett Point		A line from 45°33'34.3"N 61°19'03.4"W to 45°32'52.3"N 61°19'44.4"W.
9	1	C26 buoy		A line from 45°36'23.2"N 61°22'14.3"W to 45°36'15.2"N 61°23'13.2"W.
10	1	Canal North Lock Gate		Canso Canal North Lock Gate, 45°38'58.2"N 61°24'57.3"W.

All times shall be given in Atlantic Standard Time or Atlantic Daylight Saving Time, whichever is in effect

Figure 3-13 - Vessel Traffic Services - Strait of Canso

PART 4 GENERAL

4.1 PROCEDURES

4.1.1 *Radiotelephone Procedures*

4.1.1.1 **General**

In the interest of safe navigation, and especially during bad weather conditions, masters should ensure that a continuous listening watch is maintained on 2182 kHz. Where practicable, and having due regard for Vessel Traffic Services and Seaway Control requirements, a listening watch should be maintained on VHF Ch 16 (156.8 MHz).

2182 kHz and Ch 16 (156.8 MHz) shall only be used for distress, urgency and safety communications and for calling purposes. The class of emission to be used for radiotelephony on the frequency 2182 kHz shall be J3E.

Initial calls must be made directly on the safety and calling frequency 2182 kHz. This procedure is required because the MCTS Centres do not monitor MF working frequencies.

Make initial calls on any of the VHF working frequencies shown in the "Receiving" column of the MCTS Centre listing. The MCTS Centre will then respond on the corresponding frequency shown in the "Transmitting" column. It is necessary to indicate the channel number on the initial call because MCTS officers guard multiple frequencies simultaneously. Before making a call directly on a working frequency, listen for a period long enough to ensure that the channel is not in use. Follow this procedure for radio checks.

If difficulty is experienced in establishing contact with the MCTS Centre, or if contact is desired with another vessel, the initial call may be made on the calling frequency Ch 16 in which case the station called will reply on the same frequency. As soon as communication has been established a change must be made to an agreed working frequency and all further communications made on that frequency.

Masters of compulsorily-fitted ships are reminded that a radio log of all distress and urgency communications and safety communications pertaining to their own ship should be kept and maintained onboard their vessels.

4.1.1.2 **The following examples will illustrate the procedure to be used**

Table 4-1 - Initial call, when a vessel is attempting to establish communication on a working frequency with a specific station

Item	Spoken
Name of station called (spoken three times).	PRESCOTT COAST GUARD RADIO
The words "THIS IS".	THIS IS
Type, name, radio call sign of vessel calling (spoken three times).	STEAMER FAIRMOUNT CYLD
and channel	CHANNEL 26
Invitation to reply	OVER

Table 4-2 - Initial call when a vessel wishes to establish communications with any station within range (or within a certain area):

Item	Spoken
General call (spoken three times).	ALL STATIONS (or ALL SHIPS IN JOHNSTONE STRAITS)
The words "THIS IS"	THIS IS
Type, name and radio call sign of vessel calling (spoken three times).	TANKER IMPERIAL CORNWALL/VCVC
Invitation to reply.	OVER

When a station wishes to broadcast information rather than to establish communication, it proceeds with the message instead of giving the invitation to reply.

A radio message from a ship consists of several parts which shall be transmitted on the working frequency in the following order:

- type, name and radio call sign of the originating ship;
- the date and time the message originated. (Preferably in UTC. Daylight Saving Time shall not be used). [date and time may be sent as one group, the first two figures indicate the date, the last four the time];
- the address;
- the text or body of the message;
- the signature.

Note: Items a) and b) taken together, are known as the "preamble".

Table 4-3 - Example of a ship to shore radio message:

Item	Spoken
Message	FROM M/V WEST WIND, CALL SIGN V2AG
Filed	071225UTC
Address	ECAREG CANADA
Text	SECURED SYDNEY GOVERNMENT WHARF
Signature	MASTER

An acknowledgment of receipt of a message shall not be given until the receiving operator is certain that the transmitted information has been received correctly.

While it is not practical to lay down precise words and phrases for all radiotelephone procedures, the following should be used where applicable.

Table 4-4 - Practical terms

Terms	Meaning
ACKNOWLEDGE	Let me know that you have received and understood this message.
CORRECTION	An error has been made in this transmission. The correct version is.....
GO AHEAD	Proceed with your message.
OVER	My transmission is ended and I expect a response from you.
OUT	This conversation is ended and no response is expected.
READ BACK	After I have given OVER, repeat all the message back to me exactly as received.
ROGER	I have received all of your last transmission.
RECEIVED NUMBER	Receipt of your message number..... is acknowledged
STAND BY	Wait until you hear further from me.
VERIFY	Check with the originator and send the correct version.
WORDS TWICE	As a request - Please send each word twice. As information - I will send each word twice.

4.1.1.3 Phonetic Alphabet

When it is necessary to spell out call signs, service abbreviations and words whose spelling might be misinterpreted, the following letter spelling table should be used:

A - ALFA	F - FOXTROT	K - KILO	P - PAPA	U - UNIFORM	Z - ZULU
B - BRAVO	G - GOLF	L - LIMA	Q - QUEBEC	V - VICTOR	
C - CHARLIE	H - HOTEL	M - MIKE	R - ROMEO	W - WHISKEY	
D - DELTA	I - INDIA	N - NOVEMBER	S - SIERRA	X - X-RAY	
E - ECHO	J - JULIET	O - OSCAR	T - TANGO	Y - YANKEE	

4.1.1.4 Times

Times are expressed in four figures, the first two denoting the hour and the last two the minutes, the day starting at midnight with 0000 and ending at 2400. The standard of time (e.g. UTC) is stated at the head of the appropriate column, or against the figures involved.

4.1.1.5 Time Zone Comparison

NST	Newfoundland STANDARD TIME
AST	Atlantic STANDARD TIME
EST	Eastern STANDARD TIME
CST	Central STANDARD TIME

To convert from Coordinated Universal Time to Local Standard Time look opposite UTC under the appropriate column. For corresponding Daylight Saving Time, add one hour.

4.1.1.6 Time Signals

Canada's official time is the responsibility of the National Research Council's Institute for National Measurement Standards, Ottawa, ON. Its short wave radio station CHU, with transmitters located at 45°17'47"N 75°45'22"W is equipped with vertical antennas to give the best possible coverage to the maximum number of Canadian users. The signal is transmitted continuously on 3330 kHz, 7850 kHz and 14670 kHz, upper single-sideband H3E (AM compatible). A cesium atomic clock generates the carrier frequencies (accurate to a part in 10^{11}) and the UTC seconds pulses (accurate to 50 microseconds). The start of each UTC second is marked by the start of 300 cycles of a 1000 Hz tone, with certain omissions and identifications. Every half-minute is marked by omitting the preceding tone (for second 29). In the 9 seconds preceding each minute, the second pulses are shortened to "ticks" to provide a window for the voice announcement, followed by a longer tone. The start of this tone marks the exact minute given by the announcement. This tone is one-half second long, except for the exact hour - when it is one full second long and in this case only is followed by 9 seconds of silence.

The bilingual voice announcement which is heard each minute takes the form:

“CHU Canada - Coordinated Universal Time -- hours -- minutes -- heures -- minutes” for even minutes,

and

“CHU Canada - Temps Universel Coordonné -- heures -- minutes -- hours -- minutes” for odd minutes.

A small number of the longer time announcements use the abbreviation “UTC” rather than the full form.

Following international practice, Canada’s official time is based on Coordinated Universal Time (UTC) which is kept within one second of UT1, the time on the Greenwich meridian as used for celestial navigation. Users interested in the ultimate accuracy of celestial navigation can determine UT1 with an accuracy of 0.1 seconds by decoding the difference $DUT1 = UT1 - UTC$, as transmitted by CHU in the internationally accepted code. The number of tenths of a second of DUT1 can be decoded by counting the number of emphasized second pulses that follow each minute. If the emphasized pulses occur for any of the seconds 1 to 8, DUT1 is positive; if the emphasized pulses occur for any of the seconds 9 to 16, DUT1 is negative. CHU emphasizes second pulses by splitting them (0.1 s of tone, 0.1 s of silence, 0.1 s of tone) so that a double tone is heard.

4.1.2 Distress Communications in Radiotelephony

4.1.2.1 Early Notification of Search and Rescue Authorities of Developing Situations

In the interest of ensuring the highest level of safety, mariners should immediately notify the Canadian Coast Guard, through any MCTS Centre of any situation which is or may be developing into a more serious situation requiring assistance from the Search and Rescue (SAR) System. The need for the earliest possible alerting of SAR Authorities to potential maritime emergencies cannot be over-emphasized.

This advice is given in accordance with IMO Circular MSC/Circ.892 and similar advice found in the ICAO/IMO International Aeronautical and Maritime SAR (IAMSAR) Manual Volume III. Further, there have been similar recommendations arising from serious SAR cases in the Canadian SAR Region where masters have failed to provide this notice until after the situation deteriorated.

This notification allows SAR authorities to carry out preliminary and contingency planning that could make a critical difference if the situation worsens. Time lost in the initial stages of a SAR mission may be crucial to its eventual outcome.

It is always best to consider the worst-case scenario and to alert SAR authorities accordingly. This notification places no obligations upon the master except to advise the Canadian Coast Guard when the situation has been corrected.

Canadian MCTS Centres provide coverage of all marine distress frequencies, however, each centre does not necessarily guard each frequency (refer to centre listings Part 2). MCTS provides communications between the JRCC/MRSC and the vessel or vessels concerned with the distress.

The radiotelephone distress frequencies are:

- a) 2182 kHz on medium frequency (MF) band;
- b) 156.8 MHz (Ch 16) on very high frequency band (VHF); and
- c) any other available frequency on which attention might be attracted if transmissions on 2182 kHz and 156.8 MHz are not possible or successful.

The digital selective calling (DSC) frequencies are:

- a) Ch 70 in the VHF band;
- b) 4207.5 kHz;
- c) 6312.0 kHz;
- d) 8414.5 kHz;
- e) 12577 kHz; and
- f) 16804.5 kHz in the High Frequency (HF) bands.

When another craft or person is in distress;

- a) all transmissions capable of interfering with the distress traffic must be stopped;
- b) attention must be concentrated on the distress communications and all information possible intercepted; and
- c) a station in the vicinity of the distressed craft must acknowledge receipt of the distress message if received, giving its own position in relation to that of the craft in distress and stating the action being taken.

Distress communications consist of the:

- a) distress Alert (when using VHF or HF DSC);
- b) distress Signal;
- c) distress Call;
- d) distress Message; and
- e) distress Traffic.

Transmission of a DSC Distress Alert, a Distress Signal and/or a Distress Call announces that the ship, aircraft, other vehicle, or person that is making the transmission is:

- a) threatened by serious and imminent danger and requires immediate assistance; or
- b) aware of another ship, aircraft, other vehicle, or person threatened by serious and imminent danger and requires immediate assistance.

Distress communications should be repeated by the craft in distress until an answer is heard.

The DSC Distress Alert will automatically switch radios to the associated distress frequency for the subsequent transmission of the distress signal, the distress call and the distress message.

4.1.2.2 The Alarm Signal

The radiotelephone Alarm Signal consists of the continuous alternate transmission of two audio tones of different pitch for a period of at least thirty seconds but not to exceed one minute. The sound of this tone is similar to that used by some ambulances.

The Alarm Signal is used by Canadian MCTS Centres to alert ships:

- a) that a mayday relay broadcast is about to follow; or

- b) that a Tsunami warning, preceded by the Urgency Signal (PAN PAN) is about to follow; or
- c) that the transmission of an urgent cyclone warning, preceded by the Safety Signal (SÉCURITÉ), is about to follow.

The Alarm Signal transmitted by the coast radio station will normally be sent for a period not exceeding thirty (30) seconds and will be followed by a ten (10) second continuous tone.

4.1.2.3 The Distress Signal

The Distress Signal consists of the word "MAYDAY"

The Distress Call consists of:

- a) the word "MAYDAY" (spoken three times);
- b) the words "THIS IS" followed by;
- c) the name of the ship in distress (spoken three times);
- d) the call sign or other identification; and
- e) the ship's MMSI (if a DSC distress alert has been sent).

The Distress Call:

- a) should not be addressed to a particular coast radio station or ship; and
- b) has absolute priority over all other transmissions and all coast radio stations and ships that hear this call must cease any transmissions that will interfere with it and must listen on the frequency used for this call.

The Distress Message consists of:

- a) the word "MAYDAY";
- b) the name of the ship in distress;
- c) the call sign or other identification;
- d) the ship's MMSI (if a DSC distress alert has been sent);
- e) the position of the ship in distress;
- f) the nature of the distress;
- g) the kind of assistance needed;
- h) any other useful information which might assist the rescue; and
- i) the word "OVER", which is an invitation to acknowledge and reply.

The DSC Distress Alert Acknowledgement to an "All Stations" DSC Distress Alert shall normally be made by a MCTS Centre.

Ship stations may acknowledge receipt of a DSC Distress Alert by radiotelephony on the associated distress and calling frequency after a MCTS Centre has had time to initiate contact with the vessel in distress.

4.1.2.4 Distress Traffic

Distress Traffic consists of all messages about the immediate assistance required by the ship in distress. Prior to the transmission of any Distress Traffic, the Distress Signal "MAYDAY" must be sent once before the call. The control of Distress Traffic is the responsibility of the ship in distress or of the ship or coast radio station sending a Distress Message.

A mobile station that learns that another mobile station is in distress may transmit the distress message if:

- a) the station in distress cannot transmit it;
- b) the master or person responsible for the craft carrying the station which intervenes believes that further help is necessary; and
- c) although not in a position to render assistance, it has heard a distress message which has not been acknowledged.

In the above situation the distress message relay takes the following form:

- a) the radiotelephone Alarm Signal, if possible;
- b) the words "MAYDAY RELAY" (spoken three times);
- c) the words "ALL STATIONS" or a specific MCTS Centre, as appropriate (spoken three times);
- d) the words "THIS IS";
- e) the name of the mobile station repeating the distress message (spoken three times);
- f) the call-sign or other identification of the mobile station repeating the distress message;
- g) the MMSI of the mobile station repeating the distress message (if the initial distress alert was sent by DSC);
- h) the repetition of the distress message; and
- i) the word, "OVER".

When Distress Traffic has ceased or when silence is no longer necessary the station that has controlled the Distress Traffic must transmit a message on the distress frequency advising that the distress traffic has ceased.

- a) the word "MAYDAY";
- b) the words "ALL STATIONS" (spoken three times);
- c) the words "THIS IS";
- d) the name of the station which has controlled the distress traffic (spoken three times);
- e) the call-sign or other identification of the station which has controlled the distress traffic;
- f) the current Coordinated Universal Time (UTC);
- g) the MMSI (if the initial distress alert was sent by DSC) and the name and call sign of the ship that was in distress and a brief description of the resolution of the distress;
- h) the words "SEELONCE FEENEE"; and
- i) the word "OUT".

4.1.2.5 Distress Procedure Example

Initiate a VHF or HF DSC Distress Alert.

Then, on the associated distress and calling frequency, the following distress call and distress message should be spoken slowly and distinctly:

Table 4-6 - Example of a distress call/message

Item	Spoken
Distress Signal	"MAYDAY" (three times)
the words	"THIS IS"
name of ship	"Nonsuch" (three times)
MMSI number	"316010115" (if initial distress alert was sent by DSC)
Distress Signal	"MAYDAY"
name of ship	"Nonsuch"
MMSI number	"316010115" (if initial distress alert was sent by DSC)
position	"Off Iles-St-Marie"
nature of distress	"Struck rock and taking on water"
assistance needed	"Require help to abandon ship"
other useful information	"5 persons on board"
invitation to acknowledge and reply	"OVER"

4.1.3 Urgency Communications

The DSC Urgency Announcement will automatically switch marine radios to the associated distress frequency for the subsequent transmission of the urgency signal, the urgency call and the urgency message.

The **Urgency Signal** consists of the words "PAN PAN".

The **Urgency Call** consists of:

- the words "PAN PAN" (spoken three times);
- the words "ALL STATIONS" or station specific call (spoken three times);
- the words "THIS IS" followed by;
- the name of the station making the call (spoken three times);
- the call-sign or other identification; and
- the ship's MMSI (if the initial Urgency announcement was sent by DSC).

The urgency signal may be transmitted only on the authority of the master or the person responsible for the ship, aircraft or other vehicle carrying the mobile station.

The urgency signal indicates that the calling station has a very urgent message to transmit concerning the safety of a ship, aircraft or other vehicle, or the safety of a person.

The urgency signal, the urgency call, and the urgency message shall be sent on the distress frequencies 2182 kHz and Ch 16 (156.8 MHz). If transmission on these frequencies is impossible, any other available frequency on which attention might be attracted should be used.

The urgency signal has priority over all other communications, except distress, and all stations which hear it must take care not to interfere with the transmission of the message which follows the urgency signal.

Stations which hear the urgency signal must continue to listen for at least three minutes. At the end of this period, if no urgency message has been heard, normal service may be resumed. However, stations which are in communication on frequencies other than those used for

transmission of the urgency signal may continue their normal work without interruption provided the urgency message is not addressed "to all stations".

The DSC Urgency Acknowledgement to an "All Stations" DSC Urgency Announcement shall normally be made by a MCTS Centre. Ship stations may acknowledge, by radiotelephony, the receipt of a DSC Urgency Announcement on the associated distress and calling frequency after a MCTS Centre has had time to initiate contact with the vessel in distress.

4.1.4 Safety Communications

The Safety Signal consists of the word "SÉCURITÉ".

The Safety Call consists of:

- a) the word "SÉCURITÉ" (spoken three times);
- b) the words "ALL STATIONS" (spoken three times);
- c) the words "THIS IS", followed by;
- d) the name of the station making the call (spoken three times);
- e) the call-sign or other identification;
- f) the station's MMSI (if the initial Safety announcement was sent by DSC);
- g) a brief description of the context of the "Safety Message";
- h) the channel or frequency for the Safety broadcast; and
- i) the word "OUT".

The safety signal indicates that the station is about to transmit an important navigational or meteorological warning. The safety message should be sent on a working frequency, which is announced at the end of the call.

The safety call is transmitted on the distress frequencies 2182 kHz and Ch 16 (156.8 MHz). If transmission on these frequencies is impossible, any other available frequency on which attention might be attracted shall be used.

A ship station which receives an "All Stations" DSC Safety Announcement shall not acknowledge receipt.

All stations hearing the safety signal shall shift to the working frequency indicated in the call and listen to the safety message until satisfied it does not concern them.

The **Safety Message** format consists of:

- a) the word "SÉCURITÉ";
- b) the words "ALL STATIONS" (spoken three times);
- c) the words "THIS IS", followed by;
- d) the name of the station making the call (spoken three times);
- e) the call sign or other identification of the transmitting station;
- f) the MMSI of the transmitting station (if the initial announcement was sent by DSC);
- g) the details of the safety message;
- h) the word "OUT".

4.1.5 Aids to Navigation

4.1.5.1 Positions

All positions expressed in latitude and longitude of the radio aids to navigation listed in this publication are approximate and are taken from the largest scale Canadian Hydrographic Service charts, where available, or British Admiralty charts of the vicinity. Mariners should bear in mind when plotting the position of any given aid that it is preferable to use a chart with the aid already located on it than to plot it from a position given in latitude and longitude.

4.1.5.2 Reporting Abnormal Operation of Radio Aids

A marine radio aid observed to be operating abnormally should be reported, as soon as possible to a MCTS Centre.

Reports shall be as complete as possible, giving full details including time, date, the position from which the observation was made, and details and description of conditions, such as weather and reception, prevailing at the time of the observation.

It is also requested that ships report abnormal MCTS Centre operation, such as poor quality of marine telephone calls, unreadability of broadcasts, failure to answer calls, etc.

To ensure prompt corrective action, such reports must include the date, time and position of ship when the observation was made, together with details of prevailing weather and reception conditions.

4.1.5.3 Radio Beacons

Marine radio beacons generally operate in the 285-325 kHz. Radio beacon service enables ships fitted with direction finding equipment to take a bearing or to take several consecutive bearings which will provide a fix. See PART 2 for details on individual listings.

4.1.5.4 Radar Beacons (RACONS)

Radar beacons (Racons) may be established at lighthouses, on buoys or at other specific charted locations ashore or afloat to enhance identification and detection range of these features by radar.

Some Racons operate only in the X band 9320-9500 MHz, whilst others are dual band X/S, X band plus S band of 2920-3100 MHz. It should also be noted that the slow sweep (SS) type of Racon will give a response every 72-120 seconds, whilst the frequency agile Racon (FAR) will respond more frequently.

The Racon signal appears on the radar display as a line commencing at the approximate range of the Racon and extending outwards along its line of bearing from the ship toward the limit of the display. The signal displayed may be a solid line or it may be broken into a code consisting of a series of dots and dashes as shown in relevant publications.

4.2 SYSTEMS

4.2.1 Global Maritime Distress and Safety System in Canada (GMDSS)

4.2.1.1 What is GMDSS?

The Global Maritime Distress and Safety System (GMDSS) is an international system using improved terrestrial and satellite technology and ship-board radio systems. It ensures rapid alerting of shore-based rescue and communications authorities in the event of an emergency. In addition, the system alerts vessels in the immediate vicinity and provides improved means of locating survivors.

GMDSS was developed through the International Maritime Organization (IMO) and represents a significant change in the way maritime safety communications are conducted. While it is mandatory for all ships subject to the *International Convention for the Safety Of Life At Sea* (SOLAS) (cargo ships 300 gross tons or greater and all passenger vessels, on international voyages), GMDSS will impact on all radio-equipped vessels, regardless of size. All SOLAS ships are required to fully comply with GMDSS.

4.2.1.2 Why GMDSS?

GMDSS was developed to **SAVE LIVES** by modernizing and enhancing the current radiocommunications system. By utilizing satellite and digital selective calling technology, GMDSS provides a more effective distress alerting system. It improves the current system by:

- a) increasing the probability that an alert will be sent when a vessel is in distress;
- b) increasing the likelihood that the alert will be received;
- c) increasing the ability to locate survivors;
- d) improving rescue communications and coordination; and
- e) providing mariners with vital maritime safety information.

4.2.1.3 Maritime Safety Information (MSI)

Maritime Safety Information broadcasts, which comprise navigational and meteorological warnings, meteorological forecasts and other safety-related messages can be received in four different ways in GMDSS:

- a) NAVTEX receivers are fully automatic and receive broadcasts in coastal regions up to 300 nautical miles offshore;
- b) Inmarsat C terminals receive Enhanced Group Call (EGC) - SafetyNET broadcasts for areas outside NAVTEX coverage;
- c) High Frequency narrow-band-direct-printing (HF NBDP) receivers may be used to promulgate MSI in areas outside Inmarsat coverage; and
- d) VHF marine radio (Sea Area A1) as a medium for obtaining nav/met MSI.

4.2.1.4 GMDSS Sea Areas - International

Although ship-to-ship alerting is still an important function in GMDSS, the emphasis is on two way communications between ships and shore facilities. All GMDSS ships must be capable of communicating with the shore and transmitting a distress alert by two different means. The equipment carried by a GMDSS ship is therefore determined by its area of operation and the availability of shore-based communications services.

Table 4-7 - Four “Sea Areas” defined in the GMDSS

Sea Area	Description
Sea Area A1	Within range of shore-based VHF/DSC coast station (40 nautical miles).
Sea Area A2	Within range of shore-based MF/DSC coast station (excluding sea areas A1) (150 nautical miles).
Sea Area A3	Within the coverage of an Inmarsat geostationary satellite (approximately 70°N to 70°S) (excluding sea areas A1 & A2).
Sea Area A4	The remaining areas outside sea areas A1, A2 & A3 (polar regions).

4.2.1.5 GMDSS Sea Areas - Canada

In Canada, as a result of consultations with the Canadian marine industry, it has been decided to implement sea areas A1 on the east and west coasts. Outside of A1 will be an A3 sea area with an A4 sea area in the Arctic.

Consideration was given to the implementation of an A2 sea area, but due to budgetary constraints and the marine industry's preference for sea areas A1 and A3, sea area A2 is not being planned at this time. A1 sea area for the Great Lakes and St. Lawrence River is also provided.

4.2.1.6 Communications between GMDSS Vessels & Non-GMDSS Vessels

Since February 1st, 1999, GMDSS larger ships have been maintaining an automated listening watch on VHF/DSC Ch 70 and MF/DSC 2187.5 kHz. This at times creates the situation, where vessels fitted with traditional, non-GMDSS radio equipment, may have had difficulties alerting or contacting a GMDSS ship. The Canadian Coast Guard is addressing this by monitoring both GMDSS and traditional distress frequencies. Furthermore, the Canadian Coast Guard and Transport Canada encourage all vessels to fit VHF/DSC in the interest of increased safety.

4.2.1.7 Important Safety Notice concerning VHF/DSC

After having received a distress, urgency or safety broadcast announcement on VHF/DSC Ch 70 the VHF/DSC equipment will automatically switch the DSC radio to VHF Ch 16 for the subsequent voice announcements. Mariners who are required by the *VHF Practices and Procedures Regulations* to monitor a specific VTS sector frequency should return the radio to the appropriate working frequency after determining, on Ch 16, the impact of the VHF/DSC alert broadcast announcement on their vessel's operations.

It has been determined that vessels maintaining a listening watch on a VTS sector frequency, per the requirements of the *VTS Zone Regulations* may, if navigating in congested waters, temporarily discontinue DSC watchkeeping on VHF/DSC Channel 70 until the required manoeuvre has been completed.

Vessels inadvertently or accidentally transmitting a distress/urgency/safety broadcast on VHF/DSC must cancel the distress/urgency/safety broadcast on VHF Ch 16. Intentionally sending a false distress alert carries penalties under both the *Canada Shipping Act, 2001* and the *Radiocommunications Act*.

VHF/DSC equipment must be programmed with the correct Maritime Mobile Service Identity (MMSI) numbers (reference “Radio Station Licensing and MMSI numbers” in Section 4.3.11, also reference Section 1.12 for the MCTS Centres' MMSI numbers).

4.2.1.8 Canadian Coast Guard Marine Communications and Traffic Services Centres

To help ease the transition to GMDSS and bridge the communication gap between the two systems, Canadian Coast Guard MCTS Centres will continue to monitor the current distress and safety channels VHF Ch 16 and MF 2182 kHz for the foreseeable future. Once Canada's sea areas have all been implemented, lower cost DSC equipment is available, and it is determined that these services are no longer required, these listening watches may be discontinued. This decision will be evaluated at that time.

The Canadian Coast Guard national VHF-DSC (digital selective calling) network controlled by MCTS Centres can process VHF-DSC "Test Calls" from vessels provided that the marine radio meets the International Telecommunications Union (ITU) standard Recommendation M.493-11 (or higher) "Digital selective-calling system for use in the maritime mobile service".

The Canadian Coast Guard VHF-DSC equipment is configured to automatically acknowledge VHF-DSC test calls within seconds of receipt provided that the MCTS Centre VHF-DSC equipment is not processing higher priority DSC calls.

To supplement the broadcasting of Maritime Safety Information (MSI) on NAVTEX, Inmarsat, SafetyNET and HF NBDP, MCTS Centres will continue MSI broadcasts using the existing VHF continuous marine broadcast system and MF radiotelephony broadcast at advertised times.

4.2.2 Long-Range Identification and Tracking of Vessels Regulations (LRIT)³

INTERPRETATION

Definitions

1. (1) The following definitions apply in these Regulations.

"cargo vessel"

"cargo vessel" means a vessel that is not a passenger vessel and is of 300 tons gross tonnage or more.

"international voyage"

"international voyage" means a voyage between a port in one country and a port in another country, but does not include a voyage solely on the Great Lakes, the St. Lawrence River and their connecting and tributary waters as far east as the lower exit of the St. Lambert Lock at Montréal.

"LRIT equipment"

"LRIT equipment" means information-transmitting equipment for the long-range identification and tracking of a vessel.

"LRIT information"

"LRIT information" means the information referred to in section 5.

"Minister"

"Minister" means the Minister of Transport.

³ Reference: [SOR/2010-227](#)

“passenger vessel”

“passenger vessel” means a vessel that carries more than 12 passengers.

“sea area A1”, “sea area A2”, “sea area A3” and “sea area A4”

“sea area A1”, “sea area A2”, “sea area A3” and “sea area A4” have the meanings assigned by regulation 2.1 of Chapter IV of SOLAS.

“SOLAS”

“SOLAS” means the International Convention for the Safety of Life at Sea, 1974, and the Protocol of 1988 relating to the Convention, as amended from time to time.

When vessel is constructed

(2) For the purpose of these Regulations, a vessel is constructed on the earliest of

- (a) the day on which its keel is laid;
- (b) the day on which construction identifiable with a specific vessel begins; and
- (c) the day on which assembly of the vessel reaches the lesser of 50 tonnes and 1% of the estimated mass of all structural material.

APPLICATION

Cargo vessels and passenger vessels

2. (1) These Regulations apply in respect of Canadian vessels everywhere if they

- (a) are engaged on international voyages; and
- (b) are cargo vessels or passenger vessels.

Exceptions

(2) These Regulations do not apply in respect of

- (a) pleasure craft; or
- (b) government vessels.

COMPLIANCE

Authorized representative

3. The authorized representative of a vessel shall ensure that the requirements of sections 4 to 10 are met.

LRIT EQUIPMENT

Vessels to be fitted

4. (1) Every vessel shall be fitted with LRIT equipment.

Exception — sea area A1

(2) Subsection (1) does not apply in respect of a vessel that operates exclusively in sea area A1 if it is fitted with an automatic identification system that meets the requirements of and is operated in accordance with section 65 of the *Navigation Safety Regulations*.

Exception — vessels constructed before December 31, 2008

(3) A vessel constructed before December 31, 2008 is not required to be fitted with LRIT equipment before

(a) if the vessel is certified under subsection 51(4) of the *Ship Station (Radio) Technical Regulations, 1999* for operation in sea area A1 and sea area A2 or in sea area A1, sea area A2 and sea area A3, the later of the day on which these Regulations come into force and the day on which its radio installation is first inspected after December 31, 2008; or

(b) if the vessel is certified under subsection 51(4) of the *Ship Station (Radio) Technical Regulations, 1999* for operation in sea area A1, sea area A2, sea area A3 and sea area A4,

(i) while the vessel is operating in sea area A1, sea area A2 or sea area A3, the later of the day on which these Regulations come into force and the day on which its radio installation is first inspected after December 31, 2008, or

(ii) while the vessel is not operating in sea area A1, sea area A2 or sea area A3, the later of the day on which these Regulations come into force and the day on which its radio installation is first inspected after July 1, 2009.

Interpretation

(4) For the purpose of subsection (3), inspection of a vessel's radio installation occurs when it is inspected as required by section 51 of the *Ship Station (Radio) Technical Regulations, 1999*.

Automatic transmission

5. The LRIT equipment fitted on a vessel to meet the requirements of section 4 shall automatically transmit the following information:

- (a) the vessel's identity;
- (b) the vessel's position, particularly its latitude and longitude; and
- (c) the date and time of the transmission.

Type approval or certification

6. (1) The LRIT equipment fitted on a vessel to meet the requirements of section 4 shall be type-approved or certified by the Minister as meeting the performance standards and functional requirements set out in section 4 of the *Revised performance standards and functional requirements for the long-range identification and tracking of ships*, the annex to International Maritime Organization Resolution MSC.263(84), as amended from time to time.

Interpretation

- (2) For the purpose of interpreting section 4 of the annex referred to in subsection (1),
 - (a) "should" shall be read to mean "shall"; and
 - (b) "Administration" shall be read to mean "Minister".

Switching off equipment

7. (1) The LRIT equipment fitted on a vessel to meet the requirements of section 4 shall be capable of being switched off on board.

Master

- (2) The vessel's master may switch off the LRIT equipment:
 - (a) when international agreements, rules or standards provide for the protection of navigational information; and
 - (b) in exceptional circumstances and for the shortest duration possible when the equipment's operation is considered by the vessel's master to compromise the safety or security of the vessel.

Informing authorities

- (3) If the master switches off the LRIT equipment in the case provided for by paragraph (2) (b), the master shall
 - a) without undue delay inform a Marine Communications and Traffic Services centre of the Canadian Coast Guard and, if the vessel is in the waters of a contracting government, the relevant maritime authority of that government; and
 - b) make an entry, in the record of navigational activities and incidents maintained in accordance with section 85 of the *Navigation Safety Regulations*, setting out the reasons for the decision and indicating the period during which the equipment was switched off.

Reducing frequency of or temporarily stopping transmission

8. (1) The LRIT equipment fitted on a vessel to meet the requirements of section 4 shall be capable of

- (a) being configured to transmit the LRIT information at a reduced frequency of once every 24 hours; and

(b) temporarily stopping the transmission of LRIT information.

Master

(2) While a vessel is undergoing repairs, modifications or conversions in dry dock or in port or is laid up, the vessel's master may, on his or her own

initiative, and shall, if directed to do so by the Minister,

(a) reduce the frequency of the transmission of LRIT information to once every 24 hours; or

(b) temporarily stop the transmission of LRIT information.

Informing authorities

(3) If the master reduces the frequency of or temporarily stops the transmission of LRIT information under subsection (2), the master shall

(a) without undue delay inform a Marine Communications and Traffic Services centre of the Canadian Coast Guard and, if the vessel is in the waters of a contracting government, the relevant maritime authority of that government; and

(b) make an entry, in the record of navigational activities and incidents maintained in accordance with section 85 of the *Navigation Safety Regulations*, indicating the period during which the transmission of LRIT information was reduced in frequency or temporarily stopped, and whether or not the Minister directed the action.

Failure of system

9. If the Minister or the Canadian Coast Guard informs the master of a vessel that any part of the system used to receive LRIT information from the vessel or to disseminate the information has failed, the master shall make an entry, in the record of navigational activities and incidents maintained in accordance with section 85 of the *Navigation Safety Regulations*, setting out the date and time the master was informed.

Electromagnetic interference

10. LRIT equipment shall be installed so that electromagnetic interference does not affect the proper functioning of navigational equipment.

Issuance of proof of type approval or of certificate

11. (1) On application, the Minister shall issue a proof of type approval or a certificate for LRIT equipment if the Minister determines that the equipment meets the performance standards and functional requirements referred to in subsection 6(1).

Carry proof or certificate on board

(2) A vessel's master shall ensure that a proof of type approval or a certificate issued under subsection (1) for the LRIT equipment fitted on the vessel to meet the requirements of section 4 is

(a) in the case of a proof of type-approval, carried on board in the form of

(i) a label that is securely affixed to the equipment in a readily visible location, or

(ii) a document that is kept in a readily accessible location; and

(b) in the case of a certificate, carried on board in a readily accessible location.

COMING INTO FORCE

Registration date

12. These regulations come into force on the day on which they are registered.

4.2.3 Canadian NAVTEX Service

Table 4-8 – Transmitting sites where NAVTEX Service is available:

Controlled by	Site	Position	Range (NM)	ID 518 kHz (English)	ID 490 kHz (French)
St. John's MCTS	St. John's	47°36'N 52°40'W	300	O	
Labrador MCTS	Cartwright	53°42'N 57°01'W	300	X	
Sydney MCTS	Port Caledonia	46°11'N 59°54'W	300	Q	J
Saint John MCTS	Yarmouth	43°45'N 66°07'W	300	U	V
Rivière-au-Renard MCTS	Moisie	50°15'N 66°10'W	300	C	D
Thunder Bay MCTS	Pass Lake	48°34'N 88°39'W	300	P	
Prescott MCTS	Ferndale	44°56'N 81°14'W	300	H	
Iqaluit MCTS	Iqaluit	63°43'N 68°33'W	300	T	S

The above noted NAVTEX services are provided on a time-shared basis for the broadcast of the following subject indicator content:

- (A) Navigational Warnings
- (B) Meteorological Warnings
- (C) Ice Reports
- (D) Search and Rescue Information/Tsunami
- (E) Meteorological Forecasts
- (G) AIS Service Messages
- (J) GPS Messages

Broadcast time and content is shown in individual MCTS Centre listings. For Wiarton site consult Prescott MCTS listing. For Sept-Iles site consult Rivière-au-Renard MCTS listing.

4.2.3.1 Emergency Position Indicating Radio Beacons (406 MHz)

It is recommended that a float-free EPIRB be carried on board ships and pleasure crafts operating offshore. To be effective, 406 MHz EPIRBs must be registered with the Canadian Beacon Registry by telephone 1-800-406-7671; facsimile 1-877-406-3298;

or, on the Website at: <http://www.canadianbeaconregistry.forces.gc.ca/> . You may also reach the Canadian Beacon Registry by email at cbr@sarnet.dnd.ca.

INMARSAT discontinued their monitoring service of Inmarsat E EPIRB distress alerts as of December 1, 2006.

Mariners should check with INMARSAT for exchange of any currently held INMARSAT E EPIRBs. Further, mariners should only purchase and fit COSPAS-SARSAT 406 MHz EPIRBs.

- a) Float-free EPIRBs should not be fitted under ledges or structures that would impede their ability to float free. Do not install the EPIRB with lanyard attached to the superstructure of your vessel.
- b) Both manually activated EPIRBs and float-free EPIRBs should be readily accessible so that in the event of an emergency, it is available for immediate use.
- c) EPIRBs should be tested using the "TEST" button, by the operator every 6 months. This test should be recorded in the radio log.
- d) EPIRB battery packs and hydrostatic release units should be replaced per the manufacturer's recommendations.

A list of 406 MHz EPIRBs approved for use in Canada is available on the Website at: <http://www.tc.gc.ca/eng/marinesafety/oep-navigation-safety-apci-2298.htm>

4.2.3.2 Ship Station (Radio) Regulations, 1999

- ☐ Ships $\geq 20\text{m}$ and certified to carry >12 passengers, or ships $\geq 300\text{gt}$
☐ All other ships

- 1) Requirements for Safety Convention ships are not shown as they must comply with the Safety Convention.
- 2) Requirements for ships on inland voyages and minor waters voyages are not shown since there are no new requirements.
- 3) Regulations do not apply to a pleasure yacht not carrying a master or crew for hire, or a tow-boat in a booming ground.

Table 4-9 - Sea Area A1 or VHF

Equipment	Sea Area A1 or VHF
VHF Radio with DSC (SSRR)	Yes -unless ship operates within a VTS Zone, then will have until January 31, 2003, or until the sea area A1 is completed, whichever is latest.
	Yes - by February 1, 2003, or after sea area A1 completed, whichever is latest • ships $\geq 8\text{m}$ in length and of closed construction, • ships carrying >6 passengers, and • tow boats -exempted are ships on a home-trade voyage, class IV in a VTS Zone -current VHF radiotelephone provisions remain in effect until then
Inmarsat Ship Earth Station with EGC, and MF Radio with DSC, or	No
MF/HF Radio with DSC and NBDP (SSRR)	No
NAVTEX Receiver (no change to current requirement – SSRR)	No
	No
EPIRB (float-free) (SSRR)	Yes
	Yes • if $\geq 20\text{ m}$ (and beyond home trade IV voyage) • if tug $>5\text{gt}$ and $<20\text{ m}$ if voyage >50 miles long and >2 miles from shore • if $\geq 15\text{gt}$ and go beyond home-trade III voyage limits i.e., 20 miles from shore by April 1, 2001 • if $\geq 8\text{m}$ and go beyond home-trade III voyage limits on April 1, 2002 (Note: EPIRB does not have to be float-free if less than 15gt) -exempted are ships on home-trade voyages, class IV or minor waters voyages.

Equipment	Sea Area A1 or VHF
Radar Transponder(s) (SARTs) (SSRR, Life Saving Equipment Regulations, Large Fishing Vessel Inspection Regulations, and Small Fishing Vessel Inspection Regulations)	No
	Yes 1 if 20m in length or over on > HTII voyages; but, can continue to carry 2 Class II EPIRBs instead until one of the batteries expire.
Survival Craft VHF Portable Radio (Life Saving Equipment Regulations, Large Fishing Vessel Inspection Regulations)	Yes 3 are required, unless ship is certified to carry ≤12 passengers and is <500gt, then carry 2 (new requirement for ships on home-trade voyages, class III).
	No
Reserve Source of Energy	Yes
	Yes if ship is ≥20m, is carrying more than 6 passengers, or is a tow-boat.

Table 4-10 - Sea Area A3

Equipment	Sea Area A3
VHF Radio with DSC (SSRR)	Yes -unless ship operates within a VTS Zone, then will have until January 31, 2003, or until the sea area A1 is completed, whichever is latest.
	Yes - by February 1, 2003, or after sea area A1 completed, whichever is latest • ships ≥8m in length and of closed construction, • ships carrying >6 passengers, and • tow boats -exempted are ships on a home-trade voyage, class IV in a VTS Zone -current VHF radiotelephone provisions remain in effect until then
Inmarsat Ship Earth Station with EGC, and MF Radio with DSC, or	Yes (EGC required only if outside NAVTEX range)
MF/HF Radio with DSC and NBDP (SSRR)	No
NAVTEX Receiver (no change to current requirement – SSRR)	Yes
	Yes • if ≥ 150gt tow boat • if ≥ 300gt cargo ship • if ≥24m fishing, or • if passenger ship

Equipment	Sea Area A3
EPIRB (float-free) (SSRR)	Yes
	Yes <ul style="list-style-type: none"> • if ≥ 20 m (and beyond home trade IV voyage) • if tug > 5gt and < 20 m if voyage > 50 miles long and > 2 miles from shore • if ≥ 15gt and go beyond home-trade III voyage limits i.e., 20 miles from shore by April 1, 2001 • if ≥ 8m and go beyond home-trade III voyage limits on April 1, 2002 (Note: EPIRB does not have to be float-free if less than 15gt) -exempted are ships on home-trade voyages, class IV or minor waters voyages.
	Yes 2 are required, unless ship is certified to carry ≤ 12 passengers and is < 500 gt, then carry 1.
Radar Transponder(s) (SARTs) (SSRR, Life Saving Equipment Regulations, Large Fishing Vessel Inspection Regulations, and Small Fishing Vessel Inspection Regulations)	Yes 1 if 20m in length or over on $>$ HTII voyages; but, can continue to carry 2 Class II EPIRBs instead until one of the batteries expire.
	Yes 3 are required, unless ship is certified to carry ≤ 12 passengers and is < 500 gt, then carry 2 (new requirement for ships on home-trade voyages, class III).
Survival Craft VHF Portable Radio (Life Saving Equipment Regulations, Large Fishing Vessel Inspection Regulations)	Yes 3 are required if ship is certified to carry > 12 passengers and is > 5 gt.
	Yes 3 are required, unless ship is certified to carry ≤ 12 passengers and is < 500 gt, then carry 2 (new requirement for ships on home-trade voyages, class III).
Reserve Source of Energy	Yes
	Yes if ship is ≥ 20 m, is carrying more than 6 passengers, or is a tow-boat.

Table 4-11 - Sea Area A4

Equipment	Sea Area A4
VHF Radio with DSC (SSRR)	Yes -unless ship operates within a VTS Zone, then will have until January 31, 2003, or until the sea area A1 is completed, whichever is latest.
	Yes - by February 1, 2003, or after sea area A1 completed, whichever is latest <ul style="list-style-type: none"> • ships ≥ 8m in length and of closed construction, • ships carrying > 6 passengers, and • tow boats -exempted are ships on a home-trade voyage, class IV in a VTS Zone -current VHF radiotelephone provisions remain in effect until then

Equipment	Sea Area A4
Inmarsat Ship Earth Station with EGC, and MF Radio with DSC, or MF/HF Radio with DSC and NBDP (SSRR)	Yes MF/HF option only
	No
NAVTEX Receiver (no change to current requirement – SSRR)	No
	No
EPIRB (float-free) (SSRR)	Yes
	<p>Yes</p> <ul style="list-style-type: none"> if ≥ 20 m (and beyond home trade IV voyage) if tug > 5gt and < 20 m if voyage > 50 miles long and > 2 miles from shore if ≥ 15gt and go beyond home-trade III voyage limits i.e., 20 miles from shore by April 1, 2001 if ≥ 8 m and go beyond home-trade III voyage limits on April 1, 2002 (Note: EPIRB does not have to be float-free if less than 15gt) <p>-exempted are ships on home-trade voyages, class IV or minor waters voyages.</p>
Radar Transponder(s) (SARTs) (SSRR, Life Saving Equipment Regulations, Large Fishing Vessel Inspection Regulations, and Small Fishing Vessel Inspection Regulations)	Yes 2 are required, unless ship is certified to carry ≤ 12 passengers and is < 500 gt, then carry 1.
	Yes 1 if 20m in length or over on $>$ HTII voyages; but, can continue to carry 2 Class II EPIRBs instead until one of the batteries expire.
Survival Craft VHF Portable Radio (Life Saving Equipment Regulations, Large Fishing Vessel Inspection Regulations)	Yes 3 are required, unless ship is certified to carry ≤ 12 passengers and is < 500 gt, then carry 2 (new requirement for ships on home-trade voyages, class III).
	Yes 3 are required if ship is certified to carry > 12 passengers and is > 5 gt.
Reserve Source of Energy	Yes
	Yes if ship is ≥ 20 m, is carrying more than 6 passengers, or is a tow-boat.

DSC: digital selective calling
EGC: enhanced group calling
NBDP: narrow band direct printing

Additional requirements: emergency procedures card, operating and routine maintenance manuals, consumable spare parts, radio publications, time piece, weather facsimile (Arctic), spare antennas (some ships ≥ 20 m).

4.2.4 Guidance for Masters in Distress Situations and Alerting of SAR Authorities

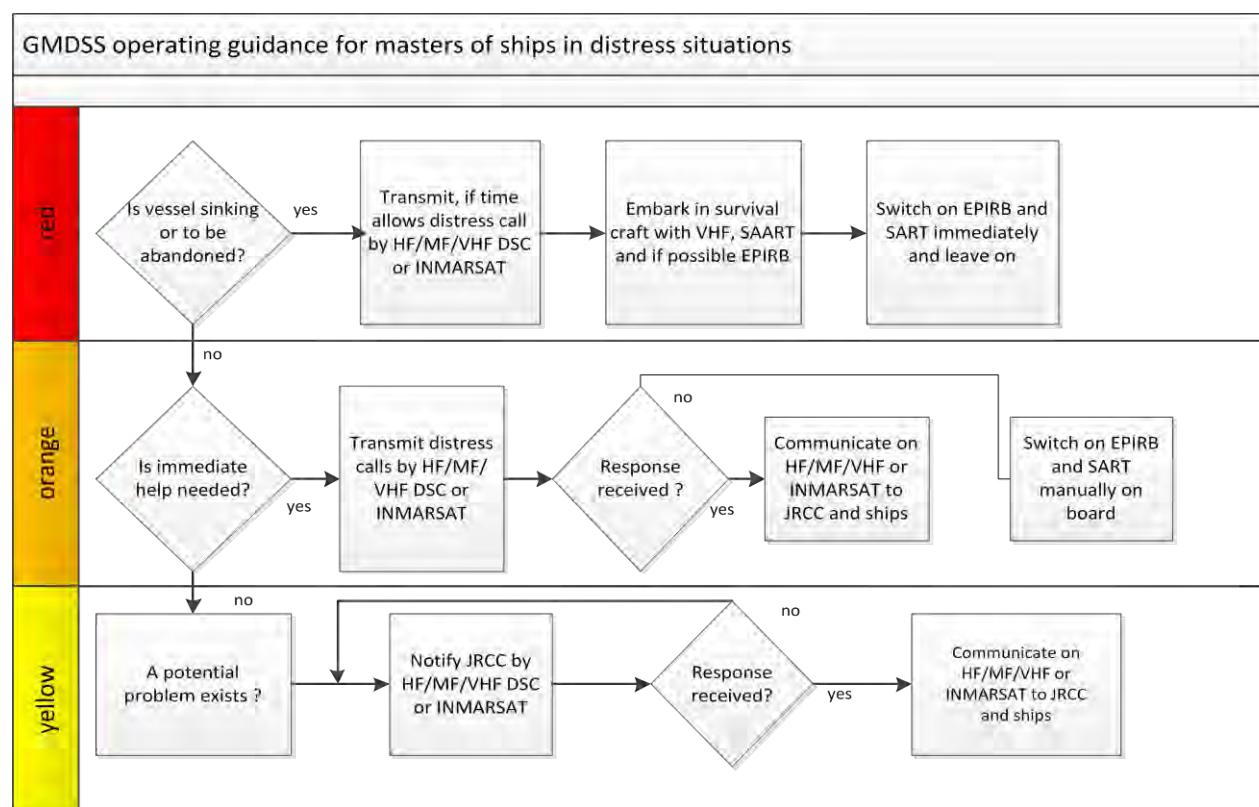

In 1992, the International Maritime Organization (IMO) prepared a flow chart providing GMDSS operating guidance for masters of ships in distress situations (COM/Circ.108). It was recommended that this chart be displayed on the ship's bridge.

Later, another circular (MSC/Circ.892) was prepared to strongly emphasize the importance for ships to alert SAR authorities at the earliest possible moment in any situation that may involve a danger to life or that has the potential of developing into such a situation.

The following is for the mariner's information and guidance:

- GMDSS Operating Guidance for Masters of Ships in Distress Situations and;
- Alerting the Search and Rescue Authorities

Figure 4-6 - GMDSS Operating Guidance for Masters of Ships in Distress Situations

- EPIRB should float-free and activate automatically if it cannot be taken into survival craft.
- Where necessary, ships should use any appropriate means to alert other ships.
- Nothing above is intended to preclude the use of any and all available means of distress alerting.

RADIO DISTRESS COMMUNICATIONS			
	Digital Selective Calling (DSC)	Radiotelephone	Radiotelex
VHF	Channel 70	Channel 16	
MF	2187.5 kHz	2182 kHz	2174.5 kHz
HF4	4207.5 kHz	4125 kHz	4177.5 kHz
HF6	6312 kHz	6215 kHz	6268 kHz
HF8	8414.5 kHz	8291 kHz	8376.5 kHz
HF12	12577 kHz	12290 kHz	12520 kHz
HF16	16804.5 kHz	16420 kHz	16695 kHz

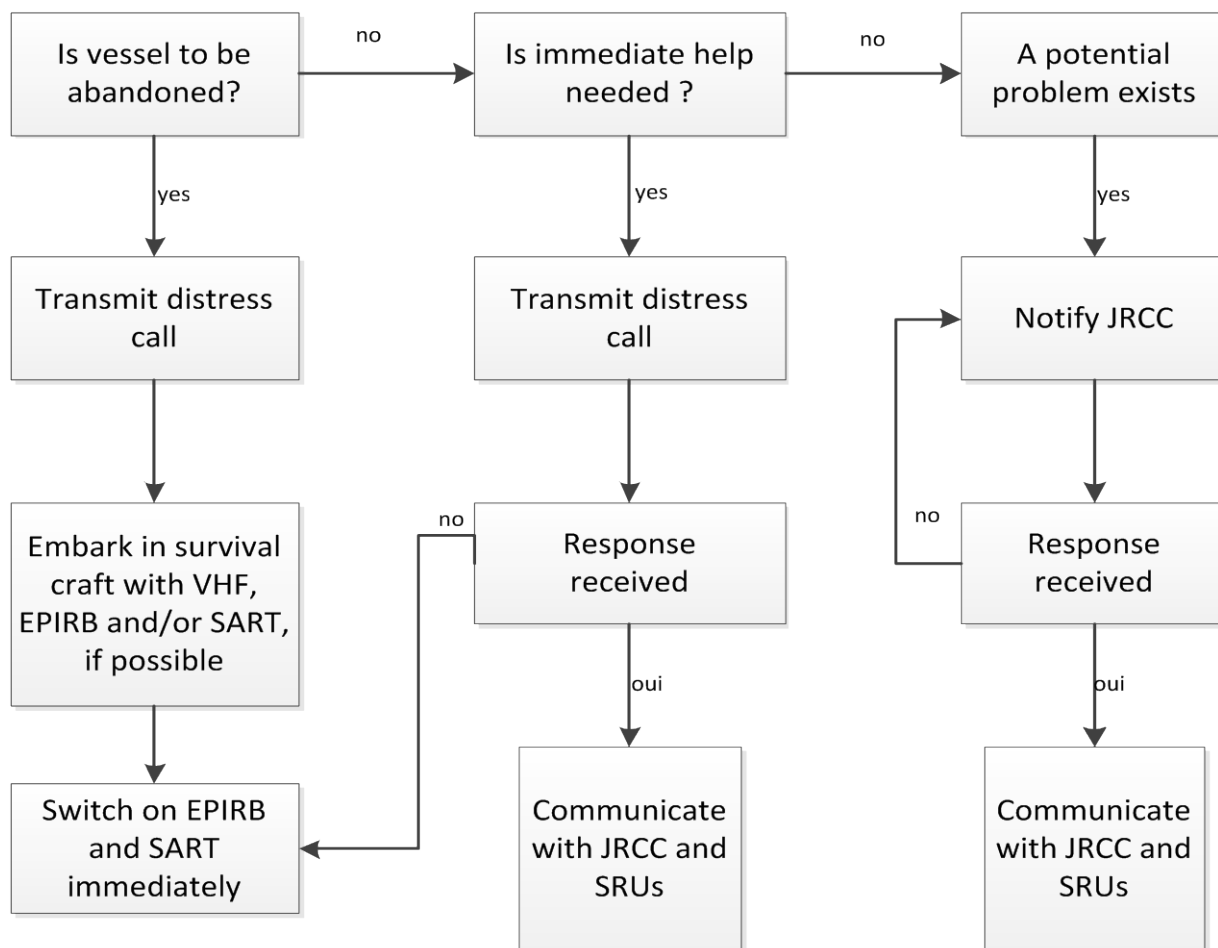

4.2.4.1 Alerting the Search and Rescue Authorities (MSC/Circ.892)

- 1) The need for the earliest possible alerting of the search and rescue (SAR) co-ordination authority to maritime emergencies cannot be over-emphasized
- 2) It is essential to enable shore-based facilities to respond without delay to any situation which constitutes, or has the potential to constitute, a danger to life. Time lost in the initial stages of an incident may be crucial to its eventual outcome. It cannot be regained.
- 3) Factors to be considered include position (in relation to hazards and to shore-based or other SAR units); time of day; weather conditions (actual & forecast); the number of persons at risk or potentially at risk; specific assistance required, etc.
- 4) It is always best to consider the 'worst case scenario' and to alert the SAR organization accordingly. Depending on the circumstances, the co-ordinating authority may choose to alert or despatch SAR facilities as a precautionary measure and/or to reduce transit times. If assistance is not subsequently required, any such positive response can be easily curtailed. But time lost through delays in notification can never be regained.
- 5) It is therefore essential that the SAR co-ordinating authority be informed immediately of:
 - i. all maritime SAR incidents;
 - ii. any situation which may develop into a SAR incident; and
 - iii. any incident which may involve or lead to danger to life, the environment or to property which may require action from the SAR services and/or other authorities.

Operating guidance for masters of ships in distress or urgency situations [to be considered in conjunction with IMO publication 969 - GMDSS Operating Guidance for Masters of Ships in Distress Situations (COM/Circ.108 of 23 January 1992)]

- 6) The following diagram shows standard procedures for distress/urgency message routing. It is for guidance only, and does not preclude the use of any and all available means of distress alerting.

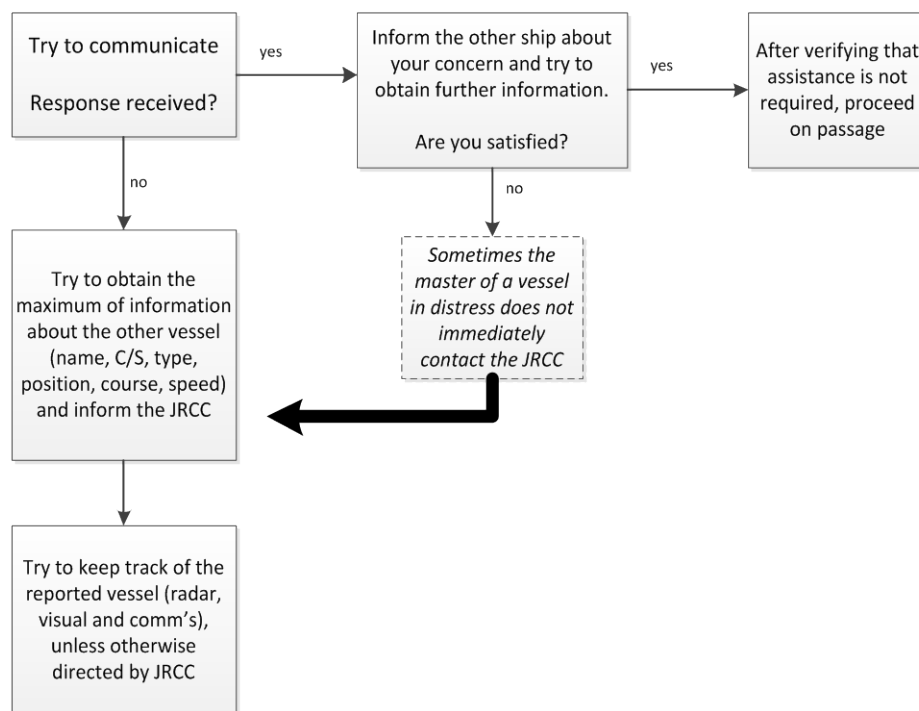

Figure 4-7 - Operating Guidance for Masters of Ships in Distress or Urgency Situations

Operation guidance for masters of ships observing another vessel apparently in danger

- 7) The following diagram shows suggested procedures for reporting concerns about the safety of another vessel (fire, smoke, adrift, navigating towards a danger, etc.).

Figure 4-8 - Operation Guidance for Masters of Ships Observing Another Vessel Apparently in Danger

Note : For local JRCC contact information refer to section SEARCH AND RESCUE IN CANADIAN AREAS OF RESPONSIBILITY (Part 4 of this publication)

4.2.4.2 False Distress Alerts and Distress Relay Alerts

The GMDSS has been in force for ships on international voyages since February 1, 1999, following its seven-year phase-in. During this time, considerable experience was gained internationally in the operation of the GMDSS. While the GMDSS has proven its overall effectiveness, the high number of accidental distress alert activations and the inappropriate and unintended Digital Selective Calling (DSC) distress relay alerts have detracted from the efficiency of the system. Excessive false alerts and distress relay alerts can create an unnecessary burden and workload for SAR services. They may also cause confusion and undermine mariner's confidence in the GMDSS. They could potentially have a serious impact on real distress situations.

With the aim of minimizing the number of false alerts and distress alert relays, the following information is provided:

- 1) "Instructions for Mariners and Others on How to Cancel a False Alert" (appendix to IMO Resolution A.814(19) entitled Guidelines for the Avoidance of False Distress Alerts).
- 2) "Procedure for Responding to DSC Distress Alerts by Ships" (COMSAR/Cir.25).

4.2.4.3 Instructions for Mariners and Others⁴ on How to Cancel a False Distress Alert⁵

[Appendix to IMO Resolution A.814 (19)]

DSC

1 VHF

1. switch off transmitter immediately⁶
2. switch equipment on and set to Channel 16; and
3. make broadcast to « All Stations » giving the ship's name, call sign and MMSI number, and cancel the false distress alert.

Example

All Stations, All Stations, All Stations
This is NAME, CALL SIGN
MMSI NUMBER, POSITION

Cancel my distress alert of
DATE, TIME, UTC
= Master NAME, CALL SIGN,
MMSI NUMBER, DATE, TIME UTC

2 MF

1. switch off equipment immediately⁷ ;
2. switch equipment on and tune for radiotelephony transmission on 2182 kHz; and
3. make broadcast to « All Stations » giving the ship's name, call sign and MMSI number, and cancel the false distress alert.

Example

All Stations, All Stations, All Stations
This is NAME, CALL SIGN
MMSI NUMBER, POSITION.

Cancel my distress alert of
DATE, TIME, UTC,
= Master NAME, CALL SIGN,
MMSI NUMBER DATE, TIME UTC.

3 HF

As for MF, but the alert must be cancelled on all the frequency bands on which it was transmitted. Hence, in stage 2.2 the transmitter should be tuned consecutively to the radiotelephony distress frequencies in the 4, 6, 8, 12 and 16 MHz bands, as necessary.

4 Inmarsat-C

Notify the appropriate JRCC to cancel the alert by sending a distress priority message via the same CES through which the false distress alert was sent.

NAME, CALL SIGN, IDENTITY NUMBER,
POSITION
Cancel my Inmarsat-C distress

⁴ Appropriate signals should precede these messages in accordance with the *ITU Radio Regulations* Chapter N1X.

⁵ [Appendix to IMO Resolution A.814 \(19\)](#)

⁶ This applies when the false alert is detected during transmission.

⁷ This applies when the false alert is detected during transmission.

alert of DATE, TIME UTC
= Master +

5 EPIRBs

If for any reason an EPIRB is activated accidentally, the ship should contact the nearest coast station or an appropriate coast earth station or JRCC and cancel the distress alert.

6 General

- 6.1 Notwithstanding the above, ships may use any means available to them to inform the appropriate authorities that a false distress alert has been transmitted and should be cancelled.
- 6.2 No action will normally be taken against any ship or mariner for reporting and cancelling a false distress alert. However, in view of the serious consequences of false alerts, and the strict ban on their transmission, Governments may prosecute in cases of repeated.

4.2.5 Procedure for Responding to DSC Distress Alerts by Ships⁸

(COMSAR/Circ.25)

1. Introduction

The Sub-Committee on Radiocommunications and Search and Rescue (COMSAR) decided that Digital Selective Calling (DSC) relays of distress alerts on all shipborne DSC equipment should be reduced and prepared a procedure for responding to VHF/MF and HF distress alerts, given in flow diagrams 1 and 2 which follow, recommending that it be displayed on the ship's bridge as A4 size posters. It also prepared the following guidance.

2. Distress relays

- 2.1 Radio personnel serving on ships should be made aware of the consequences of transmitting a distress relay call and of routing a DSC distress relay alert to other than coast stations (CS).
- 2.2 The number of unintended activations of DSC distress alerts and DSC distress relay alerts creates extra work load and confusion to (M) JRCCs and also causing delay in the response-time. The original distress alert from a ship in distress should not be disrupted by other ships, by transmitting a DSC distress relay alert.
- 2.3 Recommendation ITU-R M.541-8 on Operational procedures for the use of DSC equipment in the Maritime Mobile Service identifies only two situations in which a ship would transmit a distress relay call (distress relay alert):
 - i. on receiving a distress alert on a HF channel, which is not acknowledged by a coast station within 5 minutes. The distress relay call should be addressed to the appropriate coast station (Annex 1, paragraph 3.4.2 and Annex 3, paragraph 6.1.4); and
 - ii. on knowing that another ship in distress is not itself able to transmit the distress alert and the Master of the ship considers that further help is necessary. The distress relay call should be addressed to "all ships" or to the appropriate coast station (Annex 3, paragraph 1.4).
- 2.4 In no case is a ship permitted to transmit a DSC distress relay call on receipt of a DSC distress alert on either VHF or MF channels.

⁸ [COMSAR/Circ.25](#)

- 2.5 Distress relay calls on HF channels should be initiated manually.
- 2.6 Compliance with operational and technical provisions above would prevent transmissions of inappropriate distress relay calls.

3. All coast stations call

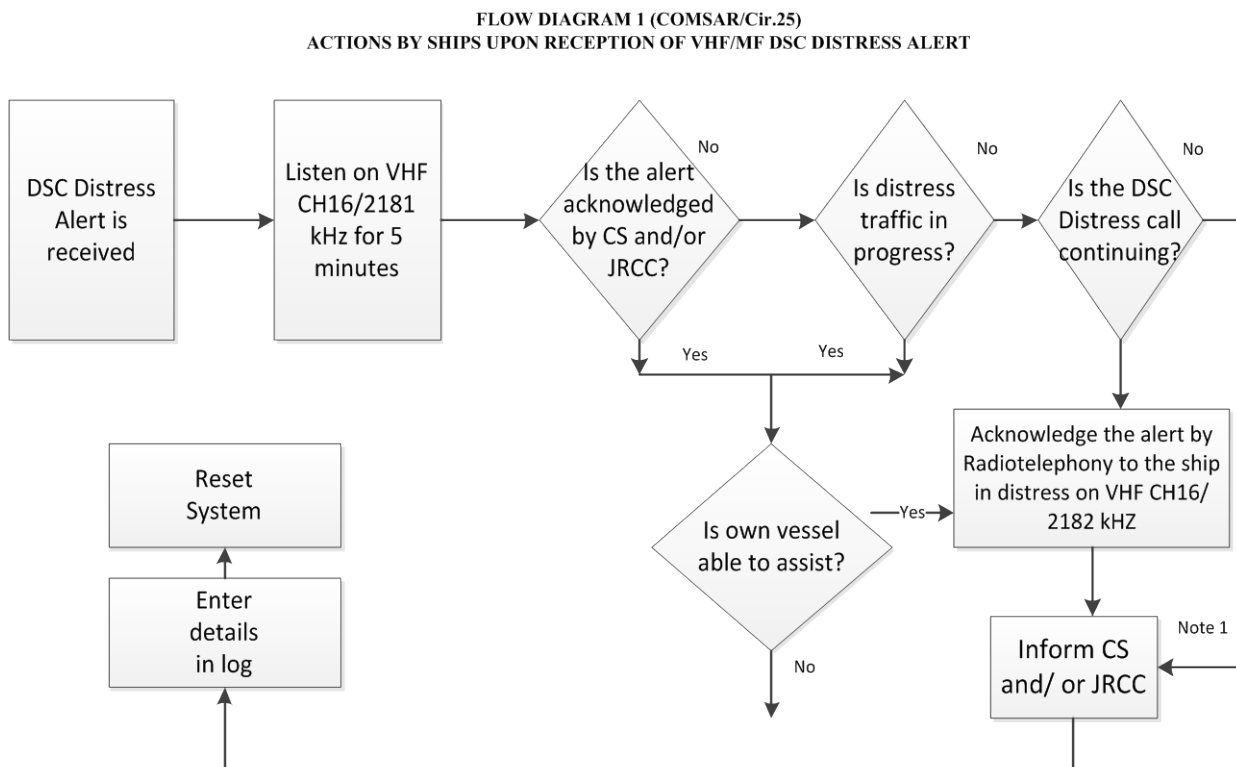

- 3.1 Recommendation ITU-R M.493-9 on DSC systems for use in the Maritime Mobile Service provides for "group calls" an address consisting of the characters corresponding to the station's Maritime Mobile Service identity (MMSI) and a number of administrations have already assigned a "group call" MMSI to their coast stations in addition to the coast station's individual MMSI.
- 3.2 By multilateral agreements, a "group call" MMSI could be assigned to all coast stations of a specific region, e.g., an JRCC area and could comply with IMO's requirement without need of introducing further modifications to GMDSS equipment.
- 3.3 An alternative method to implement an "all coast stations" call without the need to modify Recommendation ITU-R M.493-9 could be to define one MMSI world-wide as an address for all coast stations, in accordance with Nos. S19.100 to S19.126 of the ITU Radio Regulations. However, this solution would also require a modification of the setup at each coast station participating in the GMDSS.

4. Authorization

It should be noted that on ships, distress alerts, distress acknowledgements and distress relay calls can only be transmitted with permission of the Master of the ship.

5. Flow diagrams

- 5.1 The simplified flow diagrams 1 and 2 describe actions to be taken aboard ships upon receipt of distress alerts from other ships. Administrations should give wide distribution of these flow diagrams to ships and training institutions.
- 5.2 Member Governments are invited to bring the above guidance and the attached flow diagrams to the attention of their shipowners, seafarers, coast stations, JRCCs and all others concerned.

Figure 4-9 – Flow Diagram 1 (COMSAR/Cir.25)**REMARKS:**

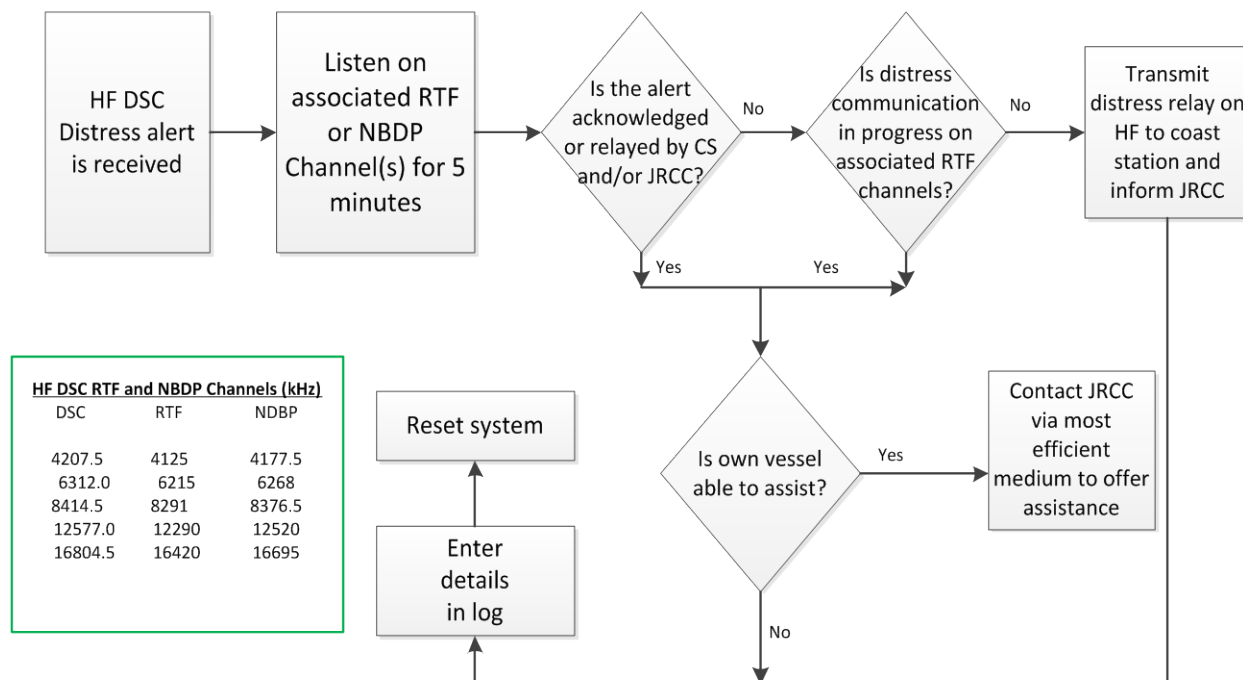

Note 1: Appropriate or relevant JRCC and/or Coast Station shall be informed accordingly. If further DSC alerts are received from the same source and the ship in distress is beyond doubt in the vicinity, a DSC acknowledgement may, after consultation with a JRCC or Coast Station, be sent to terminate the call.

Note 2: In no case is a ship permitted to transmit a DSC distress relay call on receipt of a DSC distress alert on either VHF channel 70 or MF Channel 2187.5 kHz

CS = Coast Station JRCC = Joint Rescue Co-ordination Center

Figure 4-10 – Flow Diagram 2 (COMSAR/Cir.25)

**FLOW DIAGRAM 2 (COMSAR/Cir.25)
ACTIONS BY SHIPS UPON RECEPTION OF HF-DSC DISTRESS ALERT**

REMARKS:

Note 1: If it is clear the ship or persons in distress are not in the vicinity and/or other crafts are better placed to assist, superfluous communications which could interfere with search and rescue activities are to be avoided. Details should be recorded in the appropriate logbook.

Note 2: The ship should establish communications with the station controlling the distress as directed and render such assistance as required and appropriate.

Note 3: Distress relay calls should be initiated manually.

CS = Coast Station **JRCC** = Joint Rescue Coordination Centre

Figure 4-11 - Distress and Safety Radiotelephone Procedures

Transport Canada

DISTRESS AND SAFETY RADIO TELEPHONE PROCEDURES

TO BE DISPLAYED BESIDE RADIO TELEPHONE

Name of ship:

MMSI number:

DISTRESS PROCEDURES

For use only when in grave and imminent danger and IMMEDIATE ASSISTANCE is required.

1. Send DSC Alert
2. Send distress call on VHF CH16
3. Activate EPIRB

1. Send DSC Alert

Ensure radio is switched on. Press and hold the red "distress" button for 5 seconds.

2. Send distress call on VHF CH16

Switch to VHF CH16 and transmit distress call and message:

MAYDAY MAYDAY MAYDAY

THIS IS _____ (Vessel name 3 times)

MAYDAY followed by vessel name and MMSI number

POSITION _____

NATURE OF DISTRESS _____

AID REQUIRED _____

NUMBER OF PERSONS ON BOARD _____

If outside of VHF coverage, send the distress message on 2102 kHz or use other suitable means of communication.

3. Activate EPIRB

Activate EPIRB (or PLB) by following directions printed on beacon body.

Take EPIRB with you to the survival craft.

Ensure EPIRB is vertical, with antenna pointed upward.

BEFORE DEPARTING

- Have you left a call plan with a responsible person ashore?
- Does your voyage plan take into account adverse weather, navigational hazards and fuel requirements?
- Have you verified that your radio equipment is operational?
- Have you charged and checked any batteries used to power radio equipment for emergency communications?
- If equipped with VHF-DSC (Digital Selective Calling), do you have a valid MMSI number and have you connected the call to your GPS?
- If equipped with an EPIRB, have you registered your EPIRB with the Canadian Coast Guard?
- Do you have suitable visual distress signals aboard? (flares, signaling light, etc)

EARLY ALERTING OF SAR

Transport Canada strongly recommends you report, without delay, any situation that has the potential to constitute a danger to life. Time lost in the initial stages of a potential distress incident cannot be regained and may be critical to the situation. See example for URGENCY (PAN PAN) message.

DISTRESS, Urgency and Safety Signals

MAYDAY means a mobile unit or person is threatened by grave and imminent danger and requests immediate assistance.

MAYDAY RELAY means the calling station is relaying a distress message in behalf of a mobile unit or person who is not heard by shore and imminent danger.

PAN PAN means the calling station has a very urgent message to transmit concerning the safety of a mobile unit or a person.

SECURITE means the calling station has an important navigational or meteorological warning to transmit.

Canceling a False VHF-DSC Distress Alert

Transmit on VHF CH16. All stations. All stations. All stations. this is _____ West. (vessel name) MMSI number _____, position _____ North, _____ West. Cancel my distress alert at date and time. This is _____ (vessel name) MMSI number _____, Out.

EXAMPLE OF DISTRESS PROCEDURE (MAYDAY)

Press distress alert button followed by distress message "MAYDAY, MAYDAY, MAYDAY. This is NONSUCH, NONSUCH, NONSUCH. MAYDAY NONSUCH, NONSUCH, NONSUCH. Ship has taken on water and is in danger of capsizing. I require immediate assistance. 4 persons on board, are taking to West, Over."

EXAMPLE OF URGENCY PROCEDURE (PAN PAN)

"PAN PAN, PAN PAN, PAN PAN. St. John's Coast Guard Radio, St. John's Coast Guard Radio. This is NONSUCH, NONSUCH, NONSUCH. MMSI 316999999, 5 miles East of Cape Bonaville, 5 persons on board, we have taken on water in lazarette and are presently trying to pump out excess water, Over".

* MMSI 316999999 is a fictitious MMSI number. For details of the Maritime Search and Rescue System, visit: www.sar.gc.ca

4.2.6 AMVER - Automated Mutual-Assistance Vessel Rescue System

Note: A 96-hour pre-arrival report to U.S. ports is required under 33 CFR 160.

The AMVER System, operated by the United States Coast Guard, is a maritime mutual assistance program that provides important aid to the development and co-ordination of search and rescue (SAR) efforts in the oceans of the world. Merchant vessels of all nations making offshore passages of more than 24 hours are encouraged to send sail plans and periodic position reports to the AMVER Centre in Martinsburg, WV. There is no charge for these radio messages when they are sent through MCTS Centres. Information from these messages is entered into a computer that generates and maintains dead reckoning positions for participating vessels throughout their voyages. The predicted locations and SAR characteristics of all vessels known to be within a given area are furnished upon request to recognized SAR agencies of any nation for use during an emergency. Predicted vessels' locations are disclosed only for reasons related to maritime safety.

AMVER is a free and voluntary program. An AMVER participant is under no greater obligation to render assistance during an emergency than a vessel that is not participating. Benefits to shipping include:

- a) improved likelihood of rapid aid in emergencies;
- b) reduced number of calls for assistance to vessels not favourably located; and
- c) reduced time lost for vessels responding to calls for assistance. An AMVER participant is under no greater obligation to render assistance during an emergency than a vessel that is not participating.

Details of AMVER System operations may be obtained from AMVER Maritime Relations Office, U.S. Coast Guard, Battery Park Building, 1 South Street, New York, NY 10004-1499 (Telephone: 212-668-7764, Fax 212-668-7684). AMVER instructions are also available at Coast Guard Captain of the Port and Marine Safety Offices in major United States coastal ports. The instructions are published in the following languages: Chinese, Danish, Dutch, English, French, German, Greek, Italian, Japanese, Norwegian, Polish, Portuguese, Spanish, and Swedish. Requests for instructions should state the language desired if other than English. AMVER Website: <http://www.amver.com/>.

Ship Station (Radio) Technical Regulations, 1999 now specify compulsory participation in AMVER for certain ships when departing on an offshore voyage of more than 24 hours duration.

The provisions apply to all Canadian ships and to all non-Canadian ships engaged in the coasting trade of Canada. Of this group, the following are exempted:

- a) fishing vessels engaged in fishing;
- b) ships operated by the Canadian government on law enforcement duties;
- c) vessels whose voyages will be within the waters of an Arctic Shipping Safety Control Zone, Hudson Bay, James Bay or Ungava Bay; and
- d) vessels in other waters provided their voyages are within VHF or MF coverage areas.

It should be noted that the above exemptions do not amount to a prohibition; and that all other ships proceeding on an offshore voyage of more than 24 hours duration are encouraged to participate in AMVER.

4.2.6.1 To Participate

Any merchant vessel of one thousand gross tons or more on a voyage of greater than twenty-four hours to anywhere on the globe is to be part of the AMVER system. International participation is voluntary regardless of vessel's or company's flag, country of origin, or destination.

4.2.6.2 The Information Reported

Information voluntarily provided by vessels to AMVER is kept strictly confidential and is protected by the Coast Guard (USA). It will be released only for safety purposes.

4.2.6.3 What and When You Report

- a) Sail plan message should be sent on or before departure.
- b) Position Reports should be sent within twenty-four hours of departure and subsequently no less frequently than every forty-eight hours until arrival.
- c) Arrival Reports should be sent immediately prior to or upon arrival at the Port of Destination.
- d) Reports are to be sent during the Radio Officer's normal duty hours.
- e) At the discretion of the vessel, reports may be sent more frequently than the above schedule, as, for example, in heavy weather or under other adverse conditions.

4.2.6.4 Report Format

As previous AMVER participants will note, the format described below represents a change which serves two purposes: First, the new format will permit the automated data processing system to enter your information into AMVER more accurately and efficiently. Second, the new format conforms to the International Maritime Organisation (IMO) proposed standard, thus reducing the number of different formats in use. As other systems also adopt the IMO format, we will have moved closer to a single format worldwide.

4.2.6.5 AMVER System Communications Network

The following methods are recommended for ships to transmit AMVER Sail Plan, Position, Deviation and Arrival reports. Details are available on the AMVER Website at <http://www.amver.com/>.

Electronic Mail via the Internet: AMVER address: amvermsg@amver.com

AMVER/SEAS "Compressed Message" via Inmarsat-C via TELENOR: AMVER address: NOAA telephone number entered in the ADDRESSBOOK. For information, please see the instruction sheet for your brand of Inmarsat-C transceiver. AMVER/SEAS software can be downloaded from the Internet at http://www.aoml.noaa.gov/phod/goos/seas/amverseas_software.php

or requested from:

TELENOR Satellite Services
1101, Wootton Parkway
Rockville, Maryland 20852
1-301-838-7800

Email: customercare@telenor.com

HF Radiotelex Service of U.S. Coast Guard Communications Stations: Full information on how to send AMVER messages this way can be found at: <http://www.navcen.uscg.gov>

HF Radio at no cost via Coast Guard Contractual Agreements with the following companies:

- a) Mobile Marine Radio (WLO)
- b) Mobile (WCL)
- c) Marina Del Ray (KNN)
- d) Seattle (KLB)

Telex: AMVER Address: (0) 230 127594 AMVERNYK

Telefax: To the USCG Operations Systems Centre in Martinsburg: 1-304-264-2505

If messages are relayed through Canadian Coast Guard Ships no ship charge will be assessed. All AMVER messages forwarded via the stations listed should be addressed to AMVER Halifax, rather than COAST GUARD New York, to ensure that no charge is applied in delivery.

4.2.6.6 AMVER Voyage Report Types

There are four types of AMVER Reports - Sail Plan, Arrival, Position, and Deviation Reports.

- a) Reporting format. Each line of AMVER Report text starts with a line identifier. Line identifiers are "AMVER" or a single letter. The line identifier and the data items on the line are each separated from each other by a single slash ("/"). Lines are terminated by two slashes ("//").
- b) Reporting data. AMVER participants need to be familiar with four types of reports - Sail, Arrival, Position, and Deviation Reports. Note that AMVER permits sail plan and departure to be combined into a single report. AMVER accepts sail plan information separately - for example, several days prior to departure. Report identifiers are as follows:

AMVER/SP//	Sail Plan & Departure
AMVER/PR//	Position Report
AMVER/FR//	Final Arrival Report.
AMVER/DR//	Deviation Report.

- c) Details. Paragraph IX includes a discussion of each report type. Each example is followed by an explanation. Note that not all the lines in the example are necessary for each type of report. The required and optional lines are discussed in each section.

4.2.6.7 Other Required Information

AMVER also needs other information, which might be useful in an emergency. This includes data such as the ship length, communications equipment, radio watch schedule, speed, rig, and so forth. This information is collected separately once, by completion of the Search and Rescue Questionnaire (SAR-Q) found on the AMVER website at <http://www.amver.com/> which is then retained in the automatic data processing system, periodically validated, and used only for search-and-rescue purposes.

4.2.6.8 Release of Information

All voluntary information collected under these instructions will be only released to recognized search-and-rescue authorities. Information regarding vessels required to participate in AMVER will be forwarded to the U.S. Maritime Administration, via the keyword MAREP on the Y-Line.

4.2.6.9 Description of Voyage Reports

An example and explanation of each of the four types of AMVER reports follows. Numbers in parentheses refer to footnotes at the end of the section.

Sail Plan & Departure Report. The “L” lines contain routing and “turnpoint” information needed by AMBER. AMVER needs data about every intended turnpoint, but also accepts information about any points along the intended track, even though they might not be turnpoints. Turnpoint information is needed by AMVER to maintain plot accuracy.

Footnotes:

- 1) All times must be expressed as a six-digit group giving date of month (first two digits), hours and minutes (last four digits). Only Coordinated Universal Time (i.e. Greenwich Mean Time) is to be used. The six-digit date-time-group is to be followed by either Z or GMT. The month is optional, and may be added, if appropriate. The first three digits of the English-language month are used. The following examples are acceptable:

290900Z 290900 Z 290900Z DEC

- 2) Port latitude longitude refers to the geographic position of the pilot station. Both port name and geographic position are required from U.S. flag vessels.
- 3) Latitude is a four-digit group expressed in degrees and minutes, and suffixed with "N" for north or "S" for south. Longitude is a five-digit group expressed in degrees and minutes, and suffixed with "E" for east or "W" for west.

For example: C/4000N/03500W//

- 4) The "L" lines contain most of the sail plan information. As many "L" lines as needed may be used. The "L" lines contain routing data to each of the intermediate points, and to the destination. Data about all turnpoints are required, unless the voyage will follow a great circle with no delays at intermediate points. In addition to turnpoint information, data about other points along each leg are useful. Following, is the information desired for each intermediate point: navigation, method, leg speed, latitude, longitude, port or landmark name ETA estimated time of departure.

For example:

```
L/RL/125/0258N/07710W/ABACO/111200Z//
L/RL/125/0251N/07910W/NWPROVCHAN/112145Z//
L/RL/125/0248N/08020W/120255Z//
L/RL/125//
```

NAVIGATION METHOD IS REQUIRED. It is either "GC" for great circle, or "RL" for rhumb line.

LEG SPEED is useful, but is not required. See footnote (6).

LATITUDE LONGITUDE IS REQUIRED. See footnote (3).

PORT OR LANDMARK NAME is useful, but is not required.

ETA IS REQUIRED. See footnote (1).

ESTIMATED TIME OF DEPARTURE IS REQUIRED, if the ship will lay over at the intermediate point.

A final NAVIGATION METHOD is required to route the ship to its destination. A final LEG SPEED is useful, but not required.

- 5) True course is a three-digit group.
- 6) Speed is a three-digit group in knots and tenths of knots. For example, 20.5 knots would be written as 205, without a period or decimal point.
- 7) If the optional "V" line is used, one or more of the following is required:
- | | |
|---------|---------------------------|
| /MD/ | for physician |
| /PA/ | for physician's assistant |
| /NURSE/ | |
| /NONE/ | |
- For example: V/DOCTOR/NURSE//
- 8) Any information provided in the Remarks line will be stored in the AMVER's automatic data processing system for later review. However, no immediate action will be taken, nor will the information be routinely passed to other organizations. The remarks line cannot be used as a substitute for sending information to other search-and-rescue authorities or organizations. However, AMVER will, at the request of other SAR authorities, forward remarks line information to the requesting agencies.
- 9) Next report information is not currently used by the AMVER System, but is expected to aid in future development.

4.2.7 Differential Global Positioning System (DGPS)

Since May 2000, Full Operational Service (FOS) of the Canadian Coast Guard DGPS service has been available from 19 DGPS stations located on the East and West coasts of Canada and parts of the Great Lakes. DGPS corrections are broadcast from medium frequency (MF) radiobeacon transmitters located to cover selected marine areas and waterways. The broadcasts are in accordance with international standards for radiobeacon DGPS services. DGPS provides continuous precise positioning of better than 10 metres for 95% or better of the time (provided that suitable DGPS receiver equipment is utilized, properly installed and maintained).

Additional information on the use of the DGPS service will be announced through Notices to Mariners. General information is also available from the Canadian Coast Guard Website: http://www.ccg-gcc.gc.ca/eng/CCG/DGPS_Home.

The corrections from the DGPS service are calculated at the reference station in the NAD 83 coordinates. To process the information properly, DGPS receivers should be adjusted to the WGS 84 setting. Although WGS 84 and NAD 83 are essentially the same (only a few centimetres difference), it is highly recommended that all DGPS receivers be set to WGS 84 to take full

advantage of the precision of DGPS. When utilizing charts other than NAD 83, DGPS latitude and longitude positions must be adjusted to the appropriate datum using the information contained in the charts.

The table that follows provides information on existing DGPS broadcasts. A list of United States Coast Guard (USCG) DGPS transmitters providing coverage in Canadian waters may be obtained directly from the USCG. <http://www.navcen.uscg.gov/>

Figure 4-11, Figure 4-12 and Figure 4-13 show the nominal coverage from existing broadcast stations. Users should be aware that coverage is subject to short and long term variations due to environmental and seasonal conditions.

4.2.7.1 Canadian Coast Guard DGPS Broadcasts

Table 4-16 - St. Lawrence River and Atlantic Coast

Station Name	Location NAD 83	Frequency & Transmission Rate	IALA Reference Station ID	IALA Radio Beacon ID	Remarks
St.-Jean sur Richelieu, Que.	45°19'N 73°19'W	296 kHz 200bps	312, 313	929	Full operational service.
Lauzon, Que.	46°49'N 71°10'W	309 kHz 200bps	316, 317	927	Full operational service.
Rivière du Loup Que.	47°46'N 69°36'W	300kHz 200bps	318, 319	926	Full operational service.

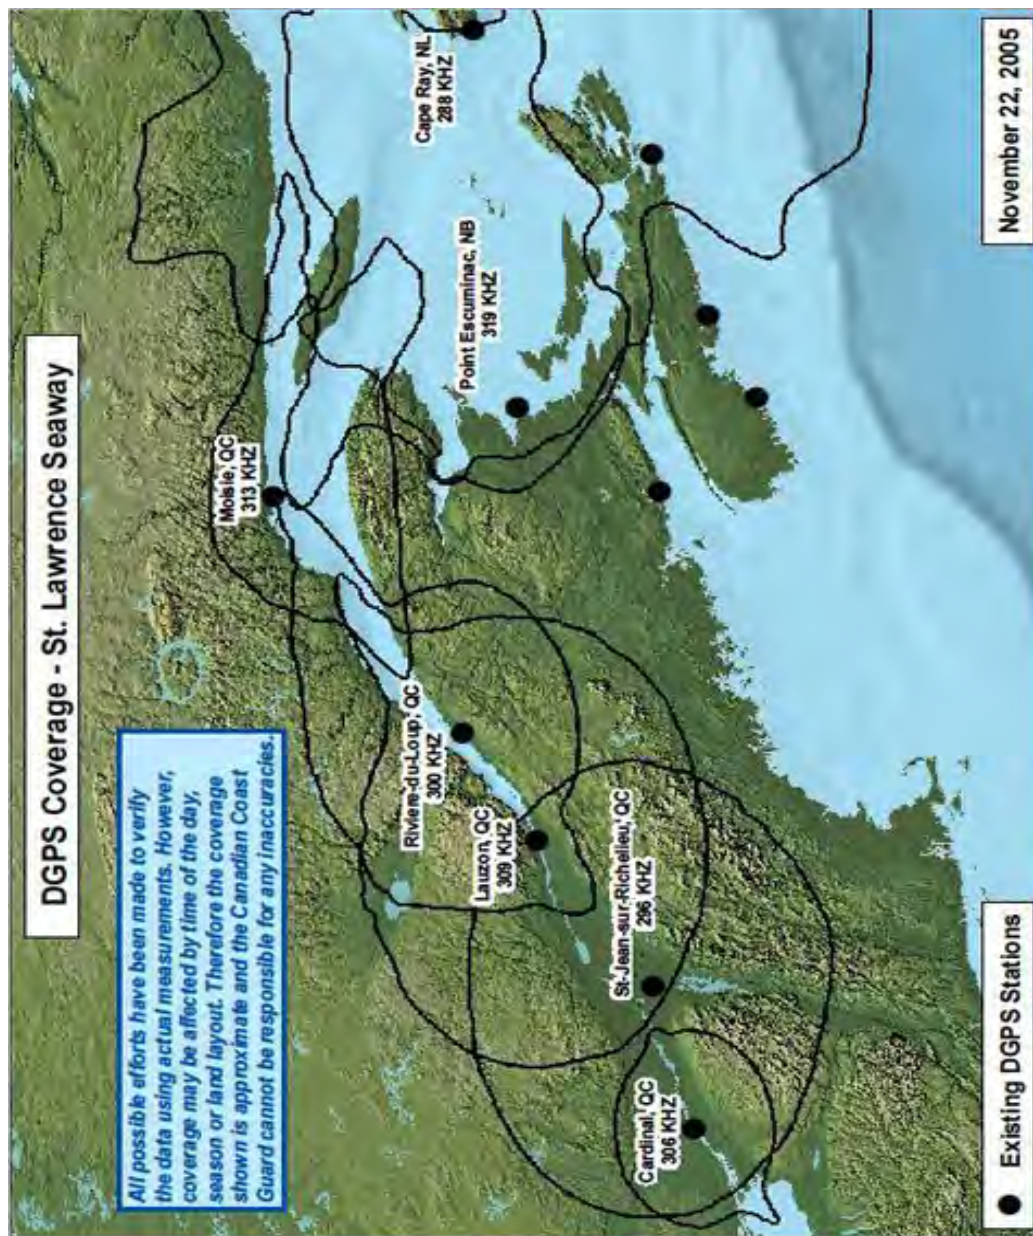

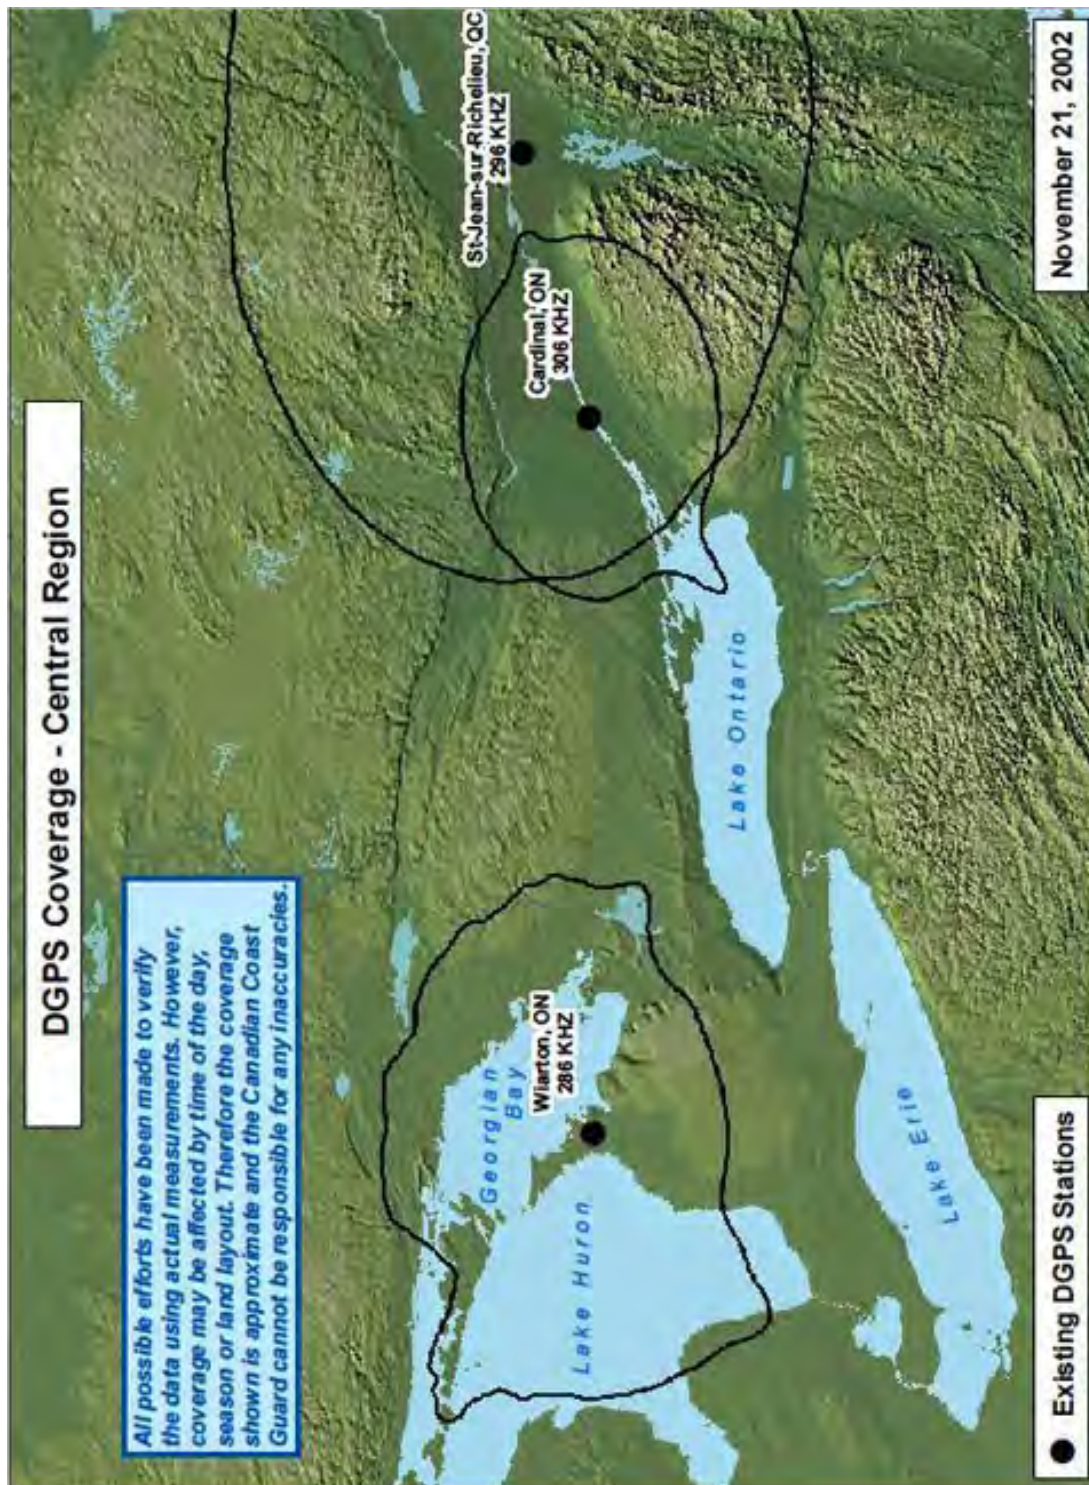

Figure 4-14 - DGPS Coverage - Central Region

4.2.8 Pre-Arrival Information Report (PAIR)

Note: pursuant to the Marine Transportation Security Regulations, the following pre-arrival information requirement does not apply to vessels operating solely on the Great Lakes or to the portions of a vessel's voyage on the Great Lakes after pre-arrival information has been given prior to its entrance into the St. Lawrence Seaway, neither, to fishing vessels, pleasure craft and government vessels.

The master of the following vessels, engaged on a voyage from a port in one country to a port in another country:

- a) SOLAS vessel of 500 tons gross tonnage or more or is carrying more than 12 passengers;
- b) NON-SOLAS vessel that is more than 100 tons gross tonnage, other than a towing vessel;
- c) NON-SOLAS vessel that carries more than 12 passengers; or
- d) NON-SOLAS vessel that is a towing vessel engaged in towing a barge astern or alongside or pushing ahead, if the barge is carrying certain dangerous cargoes.

shall ensure their vessel does not enter Canadian waters unless the master submits their pre-arrival information to a Canadian Marine Communications and Traffic Services (MCTS) centre before entering Canadian waters.

All pre-arrival information must be provided at least 96 hours prior to entering Canadian waters unless the total duration of the voyage before entering Canadian waters is less than 96 hours in which case the notification must be provided at least 24 hours prior to entering Canadian waters.

If the duration of the segment of the voyage before entering Canadian waters is less than 24 hours, vessels are required to send a pre-arrival report as soon as practicable before entering Canadian waters but no later than the time of departure from their last port of call.

The Pre-Arrival Information must be sent to one of the addresses below:

- a) Vessels planning to enter Canadian waters inbound to a Canadian port on the West Coast shall send pre-arrival information to the Canadian Coast Guard Regional Marine Information Centre (RMIC) via one of the following methods listed below:
Email: Offshore@rmic.gc.ca
Inmarsat: telex 04352586 "CGTC VAS VCR"
any Canadian Coast Guard MCTS Centre, free of charge; or
directly to CVTS Offshore by Fax: (604) 666-8453.
- b) Vessels planning to enter Canadian waters inbound to a Canadian port on the East Coast including a Canadian or American port in the Great Lakes shall send pre-arrival information to ECAREG Canada via one of the following methods listed below:
Halifax MCTS Centre
Facsimile - (902) 426-4483
Telegraphic Identifier - CCG MRHQ DRT
Email: hlxecareg1@innav.gc.ca
- c) Vessels planning to enter Canadian waters inbound to a Canadian port within the Canadian Arctic Zone shall send pre-arrival information to NORDREG Canada via one of the following methods listed below:
Iqaluit MCTS Centre
Telephone: 867-979-5724

Facsimile: 867-979-4264
Telex (Telefax): 063-15529
Telegraphic Identifier: NORDREG CDA
Email: iganordreg@innav.gc.ca
Operational from approximately mid-May to late December

Prescott MCTS Centre
Telephone: 613-925-4471
Facsimile: 613-925-4519
Email: iganordreg@innav.gc.ca
Operational from approximately late December to mid-May

It is the responsibility of the Master of the vessel to ensure all information provided to the Government of Canada (Transport Canada) in the pre-arrival information is complete and accurate. Masters of vessels subject to the *Marine Transportation Security Regulations* (as described above) failing to submit or submitting an incomplete or inaccurate pre-arrival information risk subjecting their vessel to control actions such as, but not limited to: inspection, detention, redirection or expulsion from Canadian waters.

Vessels can obtain a blank template of the 96 hour pre-arrival report by sending an email to 96@tc.gc.ca.

The Master of a vessel shall ensure that the following pre-arrival information in respect of the vessel is reported:

- a) its name;
- b) its country of registry;
- c) the name of its registered owner;
- d) the name of its operator;
- e) the name of its classification society;
- f) its international radio call sign;
- g) its International Ship Security Certificate, Canadian Vessel Security Certificate or ship security compliance document number;
- h) its International Maritime Organization number, if it is a SOLAS ship;
- i) the date of issuance, date of expiry and name of the issuing body of its International Ship Security Certificate, Canadian Vessel Security Certificate, or ship security compliance document;
- j) confirmation that the vessel has an approved vessel security plan;
- k) the current MARSEC level;
- l) a statement of when its last 10 declarations of security were completed;
- m) details of any security threats to the vessel during the last ten calls at marine facilities;
- n) a statement as to whether the vessel consents to tracking by the Canadian Government;
- o) details of any deficiencies in its security equipment and systems, including the communication systems, and the way in which the master of the vessel intends to correct them;
- p) if applicable, the name of its agent and their 24-hour telephone and facsimile numbers;
- q) if applicable, the name of the vessel's charterer;
- r) its position and time at which it reached that position;
- s) its course and speed;

- t) its destination and estimated time of arrival at its destination;
- u) the name of a contact person at the marine facility that it will visit and their 24-hour telephone and facsimile numbers;
- v) the following information in respect of its last ten marine facilities visited:
 - i) the receiving facility;
 - ii) the marine facility visited;
 - iii) the city and country;
 - iv) the date and time of arrival, and
 - v) the date and time of departure;
- w) a general description of the cargo, including cargo amount; and
- x) if applicable, the presence and description of any dangerous substances or devices on board.

If the master reported pre-arrival information more than 24 hours before entering Canadian waters, the master of a vessel shall ensure that the vessel does not enter Canadian waters unless the master reports any change in that information 24 hours before entering Canadian waters to the MCTS Centre in accordance with the instructions set out in the most recent edition of the Canadian Coast Guard *Radio Aids to Marine Navigation*.

It is recommended that a complete copy of the vessel's Interim International Ship Security Certificate (IISCC), International Ship Security Certificate (ISSC), Interim Canadian Vessel Security Certificate (ICVSC), Canadian Vessel Security Certificate (CVSC) or Ship Security Compliance document, and any pages containing the Endorsement information, is to be included with the Pre Arrival Information Report.

4.3 SERVICES

4.3.1 Notices to Shipping

Notices to Shipping (NOTSHIPS) issued for the Atlantic, Great Lakes and Arctic areas of Canada are assigned an alphanumeric designator. The alphanumeric designator consists of an alpha character which identifies the Canadian Coast Guard Notices to Shipping issuing authority. The alpha character is followed by a number commencing with the number 001 on January 1 each year and subsequently increasing with each new notice until years end. Alpha designators utilized in Canadian Notices to Shipping are as follows:

A – Arctic
C – Central
M – Maritimes
N – Newfoundland
Q – Quebec

4.3.1.1 Broadcast NOTSHIPS

Broadcast times and radio frequencies for NOTSHIP broadcasts by Canadian Coast Guard Marine Communications and Traffic Services centres are listed in PART 2 of this publication.

4.3.1.2 Written NOTSHIPS

A Written NOTSHIP contains information which is anticipated to remain in effect for an extended period of time. These notices have previously been broadcast in full for an initial period of 48 hours and then placed, for an additional period of 5 days, on the Active NOTSHIP List which lists

the NOTSHIP number and provides a brief description. Written NOTSHIPS bear the same number as the corresponding broadcast NOTSHIP.

Written NOTSHIPS are available as listed below:

Table 4-18 - Distribution of Written Notices to Shipping

Designator	NOTSHIP Authority	Email	Internet
A	Central & Arctic Region	X	http://www.ccg-gcc.gc.ca/eng/CCG/Notship
C		X	
M	Maritimes Region		http://www.ccg-gcc.gc.ca/eng/CCG/Notship
N	Newfoundland & Labrador Region		http://www.ccg-gcc.gc.ca/eng/CCG/Notship
Q	Québec Region		http://www.ccg-gcc.gc.ca/eng/CCG/Notship http://www.marinfo.gc.ca/

Masters are reminded of the regulatory requirement to report any danger, potential danger or hazard to navigation which they may encounter. Reports should be forwarded to the appropriate MCTS Centre as soon as possible to ensure the widest distribution to mariners through broadcast NOTSHIPS.

4.3.1.3 Information Updates

Notices to Mariners contain information which serves to correct charts and related publications. Up-to-date information is available to vessels inbound for Canadian waters on any changes which have occurred between the date of issue of the most recent monthly edition of Canadian Notices to Mariners held on board. Vessels wishing to avail themselves of this service should send their request directly to *ECAREG* or *NORDREG Canada*. Requests may also be routed via any MCTS Centre as listed in PART 2 of this document.

When making this request the following information shall be included:

- a) ship's name and call sign;
- b) present position, destination and intended route;
- c) most recent monthly edition of Canadian Notices to Mariners held on board; and
- d) list of recent Notices to Shipping held on board.

Ice information, ice routing and icebreaker assistance may be obtained through the Eastern Canada Traffic System (ECAREG CANADA) or the Arctic Canada Traffic System (NORDREG CANADA). Refer to Notice Number 6 of the Annual Edition, Notices to Mariners or the publication "Ice Navigation in Canadian Waters" for additional information.

4.3.2 World-Wide Navigational Warning Service (WWNWS)

4.3.2.1 NAVAREAS XVII and XVIII: Navigational Warnings

The Canadian Coast Guard has assumed the responsibility of NAVAREA coordination for NAVAREAs XVII and XVIII as part of the World-Wide Navigational Warning Service (WWNWS). The service was declared to be in "Full Operational Condition" as of June 1, 2011.

NAVAREAs XVII and XVIII warnings are broadcast in the English language using the following rectangular areas until SafetyNET Inmarsat-C or mini-C Maritime terminals operating in the arctic waters have been updated:

NAVAREA XVII	NAVAREA XVIII
82°00N 175°00E	82°00N 120°00W
82°00N 120°00W	82°00N 035°00W
62°00N 120°00W	62°00N 035°00W
62°00N 175°00E	62°00N 120°00W

Reception of rectangular addressed messages should be automatic providing the ship's position is inside the addressed area. However, mariners should check their manufacture's operation manuals to obtain information on the setting of their EGC equipment to receive relevant SafetyNET messages.

NAVAREA XVII (POR): 11:30 UTC and 23:30 UTC

NAVAREA XVIII (AOR-W): 11:00 UTC and 23:00 UTC

During the Arctic navigational season, NAVAREA XVII and XVIII warnings applicable to the Canadian Search and Rescue boundaries for waters North of 70 degrees latitude are broadcast (with limits to coverage area and reliability) using High Frequency Narrow Band Direct Printing (HF-NBDP) on 8416.5 kHz at 03:30 UTC and 15:30 UTC. Refer to Iqaluit MCTS, PART 2, for details about the broadcast content.

Comments concerning the reception of NAVAREA XVII and XVIII broadcasts, especially above 75°N, would be appreciated and sent to:

NAVAREA XVII and XVIII

Prescott MCTS Centre

Telephone: 613-925-0666

Facsimile: 613-925-4519

E-mail: navarea17.18@innav.gc.ca

4.3.2.2 NAVAREAS IV AND XII

The United States of America is responsible for NAVAREAs IV and XII.

NAVAREA IV covers the North Atlantic Ocean West of 35°W and north of 7°N. NAVAREA IV warnings are broadcasts over the AOR-W satellite at 10:00 UTC and 22:00 UTC. Ice reports for the North Atlantic are broadcast at 12:00 UTC. NAVAREA IV warnings are broadcast over NBDP from: Boston (NMF) at 01:40 UTC on 6314 kHz, 8416.5 kHz, and 12579 kHz (FIB) and at 16:30 UTC on 8416.5 kHz, 12579 kHz, and 16806.5 kHz (FIB).

NAVAREA XII covers the North Pacific Ocean east of 180° and north of the equator, plus the area north of 3° 25'S and east of 120°W. NAVAREA XII warnings are broadcasts over the POR satellite at 10:30 UTC and 22:30 UTC. These messages are broadcast over NBDP by Honolulu (NMO) at 03:30 and 17:30 UTC daily, on 8416.5 kHz, 12579 kHz, and 22376 kHz (FIB).

Consult the publication NP283 (2) *Admiralty List of Radio Signals*, Volume 3, Part 2, for the listing of all NAVAREA Coordinators and broadcast schedules.

The NAVAREA warning system should normally be sufficient for the ships which proceed along the main oceanic routes of an Area. However, in some waters knowledge of the coastal warnings may prove necessary.

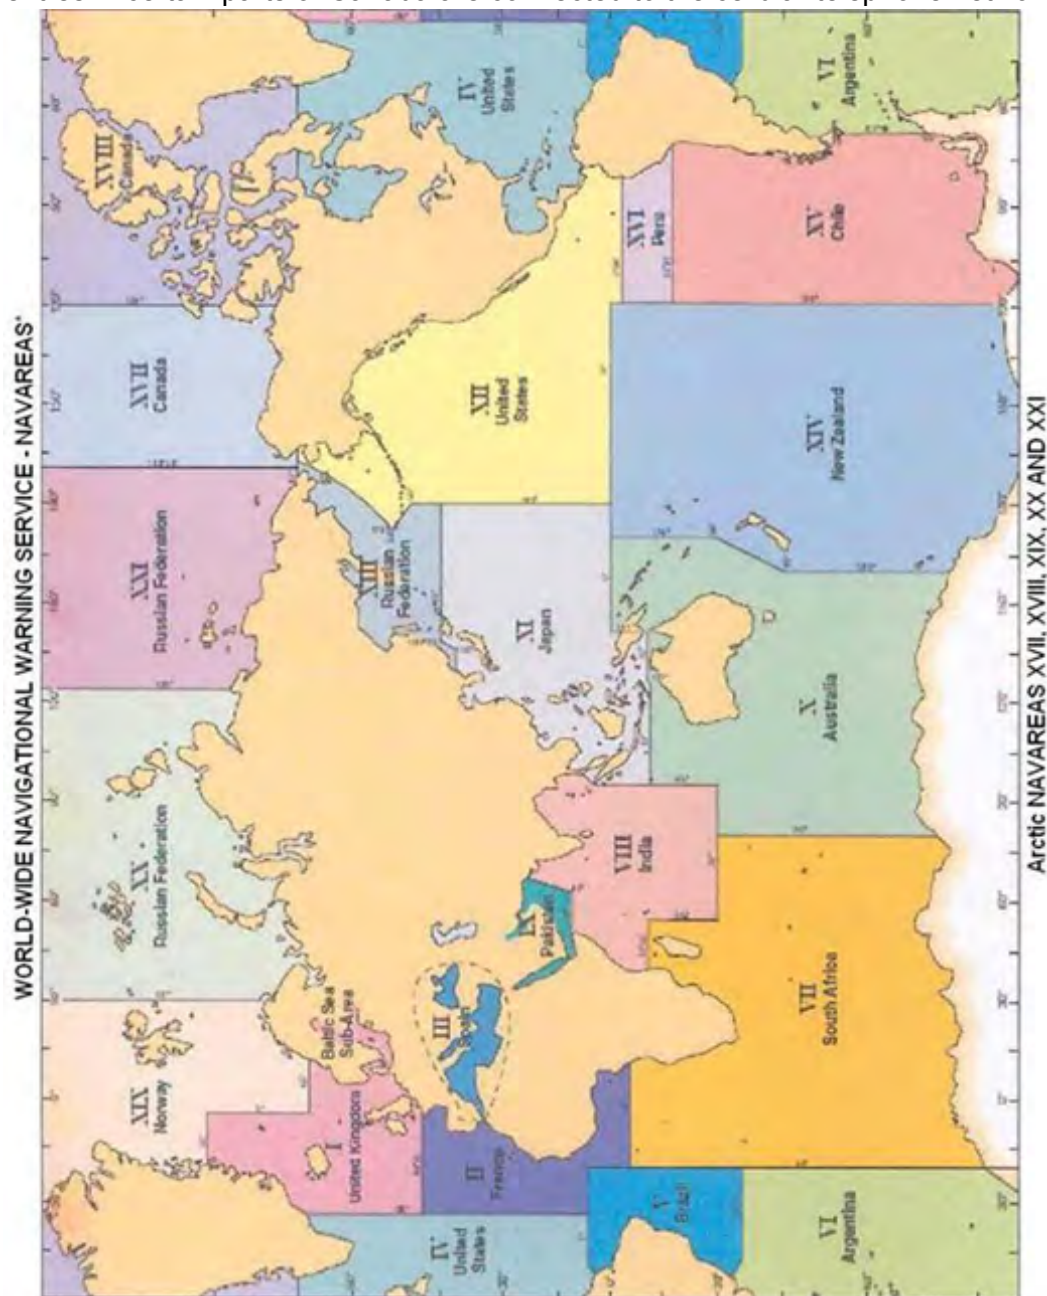

4.3.2.3 Subject Matter for NAVAREA Warnings Messages

The following subjects are considered suitable for broadcast as NAVAREA warnings. This list is not exhaustive and should be regarded only as a guideline. Furthermore, it presupposes that sufficiently precise information about the item has not previously been disseminated in a Notice to Mariners:

- a) casualties to lights, fog signals and buoys and other aids to navigation affecting main shipping lanes;
- b) the presence of dangerous wrecks in or near main shipping lanes and if relevant, their marking;
- c) establishment of major new aids to navigation or significant changes to existing ones when such establishment or change might be misleading to shipping;
- d) the presence of large unwieldy tows in congested waters;
- e) drifting hazards including derelict ships, ice, mines, containers and other large items;
- f) areas where search and rescue (SAR) and anti-pollution operations are being carried out (for avoidance of such areas);
- g) the presence of newly-discovered rocks, shoals, reefs and wrecks likely to constitute a danger to navigation, and, if relevant, their marking;
- h) unexpected alteration or suspension of established routes;
- i) cable or pipe-laying activities, the towing of large submerged objects for research or exploration purposes, the employment of manned or unmanned submersibles, or other underwater operations constituting potential danger in or near shipping lanes;
- j) the establishment of research or scientific instruments in or near shipping lanes;
- k) the establishment of offshore structures in or near shipping lanes;
- l) significant malfunction of radio-navigation services and shore-based maritime safety information and radio services;
- m) information concerning special operations which might affect the safety of shipping, sometimes over wide areas, e.g. naval exercises, missile firings, space missions, nuclear tests, ordnance dumping zones, etc. It is important that where the degree of hazard is known, this information is included in the relevant warning. Whenever possible, such warnings should be originated not less than five days in advance of the scheduled event and reference may be made to relevant national publications in the warning;
- n) acts of piracy and armed robbery against ships;
- o) tsunamis and other natural phenomena, such as abnormal changes to sea level;
- p) World Health Organization (WHO) health advisory information; and
- q) security-related requirements, in accordance with the requirements of the International Ship and Port Facility Security Code only.

Figure 4-15 - World-Wide Navigational Warning Service - NAVAREAS

MCTS Centres in certain parts of Canada are connected to the cellular telephone network system

where cellular telephone users can, in an emergency situation only, dial *16 or #16 (dependent upon the service provider) on their cellular telephone to access a MCTS Centre in order to obtain assistance.

Mariners are cautioned that a cellular telephone is not a good substitute for a marine radio because the maritime mobile radio safety system in the southern waters of Canada is based principally on VHF communications. Furthermore, VHF has the advantage that a call can be

heard by the closest MCTS Centre(s) and by ships in the vicinity which could provide immediate assistance. On the other hand, the telephone cellular network is a party-to-party system and the benefit of the broadcast mode in an emergency situation cannot be obtained.

Mariners are reminded that the use of marine radio distress frequencies to obtain assistance in an emergency situation is the best option and that cellular telephone should be used only as an alternative should the VHF radiotelephone set not be available. Standard distress alerting equipment, such as marine radio and EPIRBs should never be replaced by cellular phone alone.

Note: Details of this service may be obtained by contacting local cellular telephone companies; however, mariners are cautioned that not all cellular telephone companies provide this service.

4.3.4 Direction Finding (VHF/DF) Service

MCTS Centres in certain parts of Canada are provided with VHF/DF equipment, primarily to determine or confirm the bearing, from a DF facility, of a vessel requiring assistance in a distress or other emergency situation. In addition, an estimated line of position from a DF facility can be provided to vessels that are uncertain of their locations. Location of VHF/DF facilities will be found in the appropriate centre listings in Part 2 of this publication. The intent of this service is not to provide a navigation service. Positions must be regarded as estimates only. Mariners are cautioned that any information provided shall be used at their own discretion.

4.3.4.1 Direction Finding Bearings

Any MCTS Centre will, on request, transmit signals that will enable a ship to take a radio bearing with its own direction finder. It is pointed out to masters of ships fitted with direction finding equipment employing DF loops that serious error may result in bearings taken if metallic material or equipment (poles, wires, winches, etc.) are erected in proximity to the DF antenna equipment after calibration.

Masters of ships are urged to exercise caution in the use of commercial radio broadcasting stations as radio beacons. Bearings taken on such stations may be very inaccurate owing to errors caused by coastal refraction and the calibration of the Direction Finder employed may vary considerably due to the wide difference in frequencies used, (i.e. the standard broadcast band spreads over approximately 1060 kHz). In addition, it is advisable to make certain that the position of the broadcast transmitter (not the studio) is accurately known before using it as a navigation aid.

4.3.5 Sail Plan Service

All small craft operators, including those making day trips, are encouraged to file a Sail Plan with a responsible person. This person should be instructed to call the Joint Rescue Coordination Centre (JRCC) or Maritime Rescue Sub-Centre (MRSC) if the vessel becomes overdue. The telephone number can be found at the front of most telephone books and should be included with the Sail Plan. In circumstances where it is not possible to file a Sail Plan with a responsible person, a Sail Plan may be filed by telephone, radio or in person, with any Coast Guard MCTS Centre. While at sea, masters/operators who have filed a sail plan with a MCTS Centre are encouraged to file a daily position report during long trips. Upon your return, be sure to close (or deactivate) the sail plan you filed earlier. Forgetting to do so can result in an unwarranted search for you.

The information to be provided should be in accordance with the listing below.

- a) vessel identification (boat's name and licence number);
- b) sail or power;
- c) vessel size and type;
- d) colour of hull, deck, and cabin;
- e) type of engines;
- f) other distinguishing features;
- g) radios and channels monitored (MF / HF / VHF);
- h) Maritime Mobile Service Identity (MMSI);
- i) satellite and/or cellular telephone number;
- j) description of life rafts or small boats available;
- k) number and type of flares;
- l) number of lifejackets PFDs and/or survival suits;
- m) other safety equipment;
- n) name, address, and telephone number of vessel owner;
- o) other information;
- p) date and time of departure;
- q) number of people on board;
- r) departure point;
- s) route and stop-over points;
- t) destination;
- u) estimated date and time of arrival at destination; and,
- v) telephone number of an emergency contact person.

4.3.6 Search and Rescue in Canadian Areas of Responsibility

The Canadian Forces (CF) in co-operation with the Canadian Coast Guard has overall responsibility for coordination of federal aeronautical and maritime Search and Rescue (SAR) activities in Canada, including Canadian waters and the high seas off the coasts of Canada. The CF provides dedicated SAR aircraft in support to marine SAR incidents. The Canadian Coast Guard coordinates maritime SAR activities within this area and provides dedicated maritime SAR vessels in strategic locations. Joint Rescue Coordination Centres (JRCC) are maintained at

Victoria, B.C., Trenton, Ont. and Halifax, N.S. These centres are staffed 24 hours a day by Canadian Forces and Canadian Coast Guard personnel. Each JRCC is responsible for an internationally agreed upon designated area known as a Search and Rescue Region (SRR). In addition, a Maritime Rescue Sub-Centre (MRSC), staffed by Canadian Coast Guard personnel is maintained at Québec, QC to coordinate local marine SAR operations.

Joint Rescue Coordination Centre (JRCC) / Maritime Rescue Sub-Centre (MRSC)

JRCC Halifax, NS

4.3.6.1 Canadian Coast Guard Auxiliary

The Canadian Coast Guard Auxiliary (CCGA) is an association of approximately 4500 dedicated volunteers operating close to 1300 vessels to support the Canadian Coast Guard in Marine Search and Rescue.

For more information on maritime SAR services in Canada, refer to Section 28 of the Annual Edition of Notices to Mariners, published by the Canadian Coast Guard, Marine Navigation Services.

4.3.7 Marine Communications and Traffic Services Message Service

4.3.7.1 Messages No Longer Accepted:

- a) ships' business messages;
- b) private messages.

4.3.7.2 Messages Handled Without Charge by MCTS Centres:

- a) messages pertaining to weather or ice information and ice routing;
- b) messages concerning aids to navigation;
- c) AMVER Messages, addressed AMVER HALIFAX;
- d) radiomedical messages;

- e) messages reporting pollution;
- f) messages addressed to a port or a member of the Canadian Coast Guard that involve a report of a ship movement, position or condition;
- g) messages addressed to a Joint Rescue Co-ordination Centre (JRCC) or Maritime Rescue Sub-Centre (MRSC);
- h) pilotage messages;
- i) official Naval messages;
- j) quarantine messages addressed to "Quarantine"; and
- k) messages requesting a doctor to meet a ship on arrival.

4.3.7.3 Weather Messages

Weather reports in the international meteorological code, made at the standard synoptic hours of 00:00, 06:00, 12:00 and 18:00 UTC, are solicited from ships of all nationalities which have been recruited by their own national weather service, or other weather services, to make weather reports on a regular basis. These reports should be made and transmitted to the nearest MCTS Centre, irrespective of the ship's position. In fact, reports made close to, or even within sight of land, are equally important to reports made offshore, due to the greater variability of weather conditions in proximity to a coastline.

4.3.7.4 Pollution Messages

All vessels plying Canadian and adjacent waters are requested to report oil slicks or pollution of any type to the nearest MCTS Centre.

4.3.7.5 Medical Advice Messages

Masters of ships may obtain medical advice by addressing a radiotelegram to "Radiomedical" and routing it via the nearest MCTS Centre which will refer the message to the nearest medical authority and transmit the reply to the ship.

4.3.7.6 Quarantine Messages

1. In the following circumstances only, the person in charge of a vessel shall, by radio, at least 24 hours prior to the vessel's estimated time of arrival at its port of destination, notify or cause the notification of a quarantine officer at the quarantine station designated in paragraph (3) for that port of the occurrence:

Where, in the course of a voyage of a vessel,

- a) a member of the crew or a passenger on board the vessel exhibits one or more of these signs or symptoms:
 - i. appears obviously unwell;
 - ii. cough with blood;
 - iii. fever or chills (profuse sweating, unusually flushed or pale skin, shivering);
 - iv. shortness of breath or difficulty breathing;
 - v. repeated coughing;
 - vi. diarrhea;
 - vii. headache;
 - viii. recent confusion;
 - ix. skin rash;

- x. bruising or bleeding without injury; and
- xi. death.

That person(s) should be isolated in order to minimize the exposure of crew and passengers.

- b) the person in charge of the vessel is, during the period:
 - i. of four weeks preceding the estimated time of arrival of the vessel; or
 - ii. since he last submitted a declaration of health as required by section 16, whichever is the lesser, aware of any instance of illness among the crew or passengers that he suspects is of a communicable nature and may lead to the spread of disease.
 - c) a certificate establishing that the vessel has been de-ratted or exempted from de-ratting procedures has expired or is about to expire.
2. At the same time, the person in charge of a vessel shall, by radio, provide the quarantine officer with the following information:
- a) the name and nationality of the vessel;
 - b) the ports called at during the voyage of the vessel;
 - c) the nature of the cargo on board the vessel;
 - d) the number of persons comprising the crew of the vessel;
 - e) the number of passengers on board the vessel;
 - f) the port of destination of the vessel and the name of the vessel's owner or, if the owner is not in Canada, the name of the vessel's agent in Canada;
 - g) the condition of all persons on board the vessel and details of any death or illness occurring during the voyage;
 - h) whether the body of any person is being carried on the vessel;
 - i) the estimated time of arrival of the vessel at the port of destination; and
 - j) the date and place of issuance of any de-ratting certificate or de-ratting exemption certificate applicable to the vessel.
3. For the purposes of paragraph (1), the quarantine station for vessels bound for
- a) a port in the Province of Nova Scotia, New Brunswick, Prince Edward Island, or Newfoundland is the Halifax Nova Scotia Quarantine Station at 902-873-7659 (24 hour phone line) or by email at quarantineeast@phac-aspc.gc.ca if notification is 48 hours or greater prior to arrival;
 - b) a port in the Province of Québec or any Canadian port via the St. Lawrence River, is the Montréal Québec Quarantine Station at 514-229-2561 (24 hour phone line) or by email at quarantineeast@phac-aspc.gc.ca if notification is 48 hours or greater prior to arrival;
 - c) a port on Hudson Bay is the Calgary Alberta Quarantine Station at 403-221-3067 (24 hour phone line) or by email at quarantinewest@phac-aspc.gc.ca if notification is 48 hours or greater prior to arrival.

When circumstances outlined in paragraph (1) require vessels bound for any St. Lawrence River or Great Lakes port to notify the quarantine officer, this should be done preferably 48 hours prior to arrival at Québec City or, if not preceding past Québec City, 48 hours prior to arrival at destination. To ensure prompt and efficient service, messages should be sent through an east coast MCTS Centre.

4. The person in charge of a vessel who wishes to change his port of destination after receiving instructions from the quarantine officer shall notify him of such change and request new instructions.

4.3.7.7 Pilotage Messages

For detailed information on Notices to Obtain Pilot, Notices of Departure, Notices of Move, Optional Notices and Required Information, please refer to Section 23 of the latest Annual Edition of Notices to Mariners, published by the Canadian Coast Guard, Marine Navigation Services.

4.3.7.8 Official Naval Messages

For detailed information on Naval Messages to Canadian and Commonwealth ships in Canadian areas, please refer to Section 39 of the latest Annual Edition of Notices to Mariners, published by the Canadian Coast Guard, Marine Navigation Services.

4.3.8 Icebreaking and Ice Routing Services

4.3.8.1 Ice Navigation in Canadian Waters

The nautical publication "*Ice Navigation in Canadian Waters*" is published by the Canadian Coast Guard in collaboration with Transport Canada, Canadian Ice Service, and the Canadian Hydrographic Service. *The Charts and Nautical Publications Regulations* require this publication to be carried on board if the vessel is making a voyage during which ice may be encountered.

The publication is available to download, free-of-charge, from http://www.ccg-gcc.gc.ca/ice_home/Ice_Publications/Ice-Navigation-in-Canadian-Waters

There are a variety of icebreaking and support services available to ships transiting Canadian ice-covered waters. Ice Operations Centres are in operation seasonally as ice conditions dictate. These centres work in conjunction with Marine Communications and Traffic Services centres to provide up-to-date ice information, to suggest routes for ships to follow through or around ice, and to co-ordinate icebreaker assistance to shipping.

Ice Operations Centres are in contact with icebreakers at all times and monitor progress of shipping within their area of responsibility. In addition, Environment Canada's Canadian Ice Service (CIS) has fully qualified Ice Service Specialists and ice reconnaissance aircraft who are involved with Ice Operations Centres on a full-time basis throughout the ice navigation season. The Coast Guard Icebreaking Superintendents have a complete and current picture of the prevailing ice conditions in their area and the anticipated trend of conditions and are therefore well equipped to provide reasoned advice on the best routes to pursue.

To obtain the maximum benefit from the service, it is essential that Masters report to the Canadian Coast Guard before their ships enter waters where ice may be encountered. These initial reports and subsequent position reports from ships will ensure a continuing watch on the ship's progress by the Canadian Coast Guard Ice Operations Centres and, in the event icebreaker support becomes necessary, this can be provided with a minimum of delay. There are a limited number of icebreakers available to support shipping. Masters are encouraged to follow the recommended route with which they are provided. They may also assist and support this service by providing reports on the ice they encounter.

4.3.8.2 Joint Industry-Government Guidelines

Recognizing that special risks of ice damage may exist in certain waters off the East Coast of Canada during winter and spring months and that these may affect safety and contribute to marine pollution, the *Joint Industry-Government Guidelines for the Control of Oil Tankers and*

Bulk Chemical Carriers in Ice Control Zones of Eastern Canada (JIG) – TP15163 were developed and have been in effect since November 1979.

These Guidelines apply to all laden oil tankers and to tankers carrying liquid chemicals in bulk when proceeding through an active Ice Control Zone in Eastern Canadian waters and fishing zones south of 60° North. The Canadian Coast Guard may declare any ice control zone to be an active Ice Control Zone and promulgate this information via Notice to Shipping and Notices to Mariners. When proceeding through an active Ice Control Zone, all ships to which the Guidelines apply should have on board a copy of the guidelines and at least one "Ice Advisor", who meets the requirements as prescribed in JIGs.

The following may be contacted for information on ice control zones:

Ice Atlantic

Canadian Coast Guard Ice Operations Centre
P.O. Box 5667
St. John's NL A1C 5X1
Telephone: 709-772-2078 / 1-800-565-1633
iceatl@dfo-mpo.gc.ca

For ice routing contact ECAREG at:
Telephone: 902-426-4956
hlxecareg1@innav.gc.ca

Ice Montreal

Canadian Coast Guard Ice Operations Centre
Telephone: 1-855-201-0086 / US-Canada line: 1-844-672-8037

<http://www.tc.gc.ca/eng/marinesafety/tp-tp15163-menu-4025.htm>

4.3.9 Canadian Hydrographic Service

4.3.9.1 Conversion of Charts to North American Datum 1983 (NAD 83)

The Canadian Hydrographic Service is converting navigational charts to the North American Datum 1983 (NAD 83).

NAD 83 is considered equivalent to the World Geodetic System 1984 (WGS 84) recently adopted as the horizontal datum for world-wide use. The advantage of the new datum is its compatibility with the NAVSTAR (GPS) satellite positioning system.

The difference in the position of the same point when quoted on the former NAD 27 and the new NAD 83 is up to 60 metres on the Atlantic coast, about 110 metres on the Pacific coast and almost zero near Chicago although there can be local discrepancies from these approximations.

Horizontal positions obtained from satellite receivers are based on NAD 83 (WGS 84) and must be converted to the horizontal chart datum (if not NAD 83) before being used.

A note has been added to nearly all existing charts indicating the datum on which the chart is based, and providing the increase or decrease required to convert the latitude and longitude from NAD 83 to the chart datum.

New Charts and New Editions being produced are now almost always based on NAD 83.

Note: Latitude and longitude positions given in this publication are in NAD 83 unless otherwise indicated.

4.3.10 Inspection of Radio Apparatus

The Canadian Coast Guard, on behalf of Transport Canada, is responsible for the conduct of ship radio inspections pursuant to the *Canada Shipping Act, 2001*. Queries concerning the standards governing inspections of radio apparatus fitted in ships for safety purposes may be sent to:

Program Manager, Ship Radio Inspection
Fisheries and Oceans Canada
Canadian Coast Guard
200 Kent Street, 7th Floor, Station 7S001
Ottawa ON K1A 0E6
Inquiries: InfoPol@DFO-MPO.GC.CA

Owners and masters of Canadian ships, that are required to be fitted with a radio installation under the provisions of the *Canada Shipping Act, 2001* are reminded that:

The master of a ship, other than a Safety Convention ship, shall ensure that the ship station is inspected by a radio inspector

- a) within the 30 days before the ship puts to sea for the first time, if the ship is:
 - i) 20 m or more in length,
 - ii) a tow-boat, or
 - iii) carrying more than 12 passengers on a voyage any part of which is in a VHF coverage area or more than five miles from shore;
- b) at least once every 48 months, in the case of a ship referred to in paragraph (a) that is certified for home-trade voyages, Class IV, or minor waters voyages, Class II; and
- c) at least once every 12 months, in the case of a ship referred to in paragraph (a) that is certified for voyages other than a home-trade voyage, Class IV, or a minor waters voyage, Class II.

The master of a ship that is required to be inspected under the *Agreement between Canada and the United States of America for Promotion of Safety on the Great Lakes by Means of Radio, 1973* need not comply with paragraphs (1)(b) or (c), but shall ensure that the ship station is inspected by a radio inspector before the ship enters the Great Lakes Basin for the first time and at least once every 13 months thereafter while continuing to navigate in the Great Lakes Basin.

A non-Canadian ship which does not have a valid Radio Safety Certificate on board may be detained by a port Customs Officer until a valid certificate has been obtained.

A fee for the conduct of ship radio inspections is levied in accordance with the *Ship Radio Inspection Fees Regulations*. The fee is payable upon completion of the inspection.

Applications for radio inspections of Canadian ships should be filed with the Canadian Coast Guard. The form entitled: Application for Radio Inspection, Compulsory Fitted Ships (82-0643) should be used for this purpose. Such request by owners, agents or masters should be received

by the Canadian Coast Guard at least three working days in advance of the date requested for inspection.

The owners, agents or masters of Canadian ships requiring radio inspection while outside of Canada should make application by fax or letter to:

Transport Canada
Director General
Marine Safety Directorate
Tower C, Place de Ville
330 Sparks Street
Ottawa ON K1A 0N8

Telephone: 613-998-0610
Facsimile: 613-954-1032

Non-Canadian ships (except Liberian ships) may obtain a cargo Ship Safety Radio Certificate (GMDSS) in Canada. Applications should originate with the owners, ship agents or masters of the ships concerned and be supported by confirmation from the Consul or other official representative of the country in which the ship is registered. Confirmation shall be in writing. It is the responsibility of the owner, agent or master to contact the Consul or official representative and arrange to submit the necessary confirmation to the local Canadian Coast Guard inspection office. Where time is limited, a verbal request for an inspection may be accepted from the Consul or official representative (a person who has a document from an Administration giving him the official power to act on their behalf), provided that the confirmation is submitted later.

Applications for radio inspections of Canadian ships wintering in US Great Lakes ports should be made by the owners, agents or masters on FCC form 809 and filed directly with the FCC Field Engineering office nearest to the port of which the inspections are desired. Copies of form 809 are available from any of the FCC offices serving the Great Lakes.

4.3.11 Radio Station Licensing and MMSI Numbers

To obtain further information on radio station licensing and Maritime Mobile Service Identity (MMSI) numbers contact Industry Canada at: <http://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf01742.html> or locate the nearest Industry Canada office through the local telephone directory.

4.3.12 Application for a Radio Inspection of a Compulsorily Fitted Vessel

 Fisheries and Oceans Canada Coast Guard		Pêches et Océans Canada Garde côtière	
APPLICATION for a RADIO INSPECTION of a COMPULSORILY FITTED VESSEL			
Name of Vessel		Port of Registry	
Gross Tonnage		MMSI	
Length		Call Sign	
Official Number		IMO Number	
Agent: Name, Address, Telephone Number		Check if appropriate to this inspection New vessel or first inspection? <input type="checkbox"/> Change of Voyage? <input type="checkbox"/> Change of Certificate Type? <input type="checkbox"/>	
		Radio Services Representative: Name & Telephone Number	
Check appropriate Vessel type <input type="checkbox"/> Cargo <input type="checkbox"/> Fishing <input type="checkbox"/> Tank <input type="checkbox"/> Fish Processing <input type="checkbox"/> Government Search & Rescue <input type="checkbox"/> Passenger <input type="checkbox"/> Drilling Unit <input type="checkbox"/> Tow-Boat <input type="checkbox"/> Oil and Gas Standby Vessel		Inspection Requested - Date: _____ Time: _____ Port, dock or quay, at which survey is to be conducted	
Application is hereby made for a radio inspection for the ship indicated above in accordance with Canadian Law and International Convention or Treaty as applicable. If after inspection the radio apparatus is found to comply with the requirements, it is requested that the following document(s) be issued. Please check all appropriate boxes.			
<input type="checkbox"/> RADIO INSPECTION CERTIFICATE (Sea Coast of Canada)			
<input type="checkbox"/> RADIO INSPECTION CERTIFICATE (Great Lakes Basin)			
<input type="checkbox"/> CARGO SHIP RADIO SAFETY CERTIFICATE (SOLAS) <input type="checkbox"/> Renewal Survey <input type="checkbox"/> Periodical Survey			
<input type="checkbox"/> REPORT OF INSPECTION concerning a radio installation on board a passenger ship engaged in international voyages.			
<input type="checkbox"/> LETTER OF CERTIFICATION concerning a radio installation on board a Non-Convention cargo ship to allow Customs Clearance for an international voyage.			
VOYAGE TYPE: <input type="checkbox"/> I, <input type="checkbox"/> II, <input type="checkbox"/> III or <input type="checkbox"/> IV		Home Trade <input type="checkbox"/> Minor Waters <input type="checkbox"/> I or <input type="checkbox"/> II <input type="checkbox"/> Inland Waters <input type="checkbox"/> I or <input type="checkbox"/> II <input type="checkbox"/> Foreign <input type="checkbox"/> International <input type="checkbox"/>	
		Sea Area: <input type="checkbox"/> A1 <input type="checkbox"/> A2 <input type="checkbox"/> A3 <input type="checkbox"/> A4	
CONDITIONS OF INSPECTION:			
a) Transport Canada is responsible for the conduct of ship radio inspections pursuant to the <i>Canada Shipping Act</i> . The Minister of Transport has appointed Canadian Coast Guard Radio Inspectors to carry out radio inspections. b) An application for inspection shall be submitted to the Canadian Coast Guard office nearest to the desired port of inspection at least 3 working days in advance of inspection date. c) When an inspection is requested of a ship registered elsewhere than in Canada, the application must be accompanied by a letter from the Consul or another official representative of the Administration concerned in accordance with Regulation 13, Chapter 1, SOLAS 1974, or Protocol 1988. d) The ship's electrical power shall be available and a person with authority to operate the radio station shall be on board at the date and time determined for the inspection. e) Fees are payable as outlined in the <i>Ship Radio Inspection Fees Regulations</i> (SRIFR)			
_____ Date		_____ Signature of Agent or Master	
76-000-000-PF-JP-001 (12-2004)		82-0643	

4.3.13 Marine Telephone Service

4.3.13.1 General

This service enables a person aboard a ship to speak directly to any person ashore, or vice versa. The service is an extension of the public telephone system to ships at sea through MCTS Centres. Long distance ship-to-shore calls may only be made as collect calls or charged to a telephone company calling card/pre-paid card. Refer to Part 2 to find MCTS Centres that provide the marine telephone call service.

4.3.13.2 Placing a Marine Telephone Call

Ship to Shore

- a) Listen to make sure that the MCTS Centre is not busy with another ship.
- b) Call the MCTS Centre and when communication has been established give the following:
 - i. name of the city being called;
 - ii. name and/or telephone number of the person being called;
 - iii. name of the caller or the number of the caller's telephone company credit calling card (if applicable).
- c) When the call is completed, sign off, using the name and call sign of the ship.

Shore to Ship

- d) Dial the appropriate MCTS Centre.
- e) Give the MCTS Officer the name of the person and ship being called.

Receiving a Marine Telephone Call

- f) When you hear your ship being called, reply, giving your ship's name and call sign.
- g) At the end of the conversation, sign off by announcing the name and call sign of your vessel.

4.3.13.3 Radiomedical Calls

Mariners may obtain medical advice by calling a MCTS Centre and requesting to be connected to a medical professional. The Canadian Coast Guard will connect the vessel to an appropriate medical professional via the Marine Telephone System.

For mariners who wish to make their own arrangements for medical advice, radiomedical services are available in numerous languages to vessels flying any flag at any location through the International Radio-medical Centre (CIRM) in Rome, Italy. This centre is staffed 24/7/365 by specially trained physicians and radio operators who also have access to specialists in all medical branches. The CIRM can be contacted via the following means:

Telephone 39 6 54223045
Mobile GSM 39 348 3984229
Facsimile 39 6 5923333
Telex 043 612068 CIRM I
Email telesoccorso@cirm.it
Web: <http://www.cirm.it/>

PART 5 ENVIRONMENT CANADA'S MARINE AND ICE WARNING AND FORECAST PROGRAMS

5.1 BACKGROUND

Environment Canada's Meteorological Service of Canada (MSC) is the agency responsible for delivering Canada's weather service. The MSC offers a broad range of products and services that are designed to help mariners make informed decisions on how weather will affect them. The Canadian Coast Guard also plays an important role in disseminating forecasts and warnings, and in collecting and relaying weather information from volunteer observers and ships.

The constant stream of data coming from both automated and manned coastal observation stations, as well as ships and weather buoys, is supplemented by satellite imagery, weather radar and a full set of numerical weather products adapted for marine operations.

5.2 MARINE WARNING PROGRAM

Warnings of extreme weather events that pose a threat to life and property at sea such as strong winds, freezing spray, high coastal waters, squall lines and other localized phenomena shall be issued for the offshore economic zone including the St. Lawrence Seaway and major inland waters.

Major inland waters are defined as having significant marine activity and where time to reach safe harbour is comparable to the marine weather warning lead time. The criteria for issuing weather warnings is based on national guidelines, but determined regionally to account for regional climatology and the nature of the regional marine community. The following table describes the warning program:

Table 5-1 - Synoptic Warnings

Synoptic warnings *	Warning criteria
Strong wind warning ⁽¹⁾	Winds ⁽²⁾ 20 to 33 knots inclusive occurring or expected to occur in any portion of a marine area including any portion defined by a local effect or an "except" statement.
Gale warning	Winds ⁽²⁾ 34 to 47 knots inclusive occurring or expected to occur in any portion of a marine area including any portion defined by a local effect or an "except" statement.
Storm warning	Winds ⁽²⁾ 48 to 63 knots inclusive occurring or expected to occur in any portion of a marine area including any portion defined by a local effect or an "except" statement.
Hurricane force wind warning	Winds ⁽²⁾ 64 knots or above occurring or expected to occur in any portion of a marine area including any portion defined by a local effect or an "except" statement.
Freezing spray warning	Ice accretion rate of 0.7 cm/hr or more occurring or expected to occur in any portion of a marine area including any portion defined by a local effect or an "except" statement.

Notes:

*These warnings are included in the body of the text forecast.

1. The strong wind warning program is active on a regional basis as required for coastal and inland waters during the recreational boating season. A warning is not required when the wind is described using the range 15-20 knots. This range is normally used for greater accuracy.
2. Gusts are excluded from the definition.

Range: With the exception of Note (1) above, when a range is used to describe the wind speed, the upper value of the range determines the warning category.

Table 5-2 - Localized Warnings

Localized warnings/watches *	Warning criteria
Squall watch	Advance notice of conditions that are favourable to the development of squalls.
Squall warning	Wind gust \geq 34 knots associated with a line or an organized area of thunderstorms.
Tornado watch	Advance notice of conditions that are favourable to the development of Tornados.
Tornado warning	Evidence of tornado formation (radar, report from a reliable source, etc.) over a marine area, or an existing tornado moving from land to an adjacent marine area.
Waterspout watch**	Advance notice of conditions that are favourable to the development of cold-air waterspouts.
High water level warning	Issued to warn mariners and coastal populations of potentially hazardous impacts due to abnormally high water levels or waves along coastal areas.
Special marine warning/watch	Used to describe conditions other than those defined above that may have potentially hazardous impacts on navigation.

Notes: * These warnings/watches are delivered using separate messages.

** Waterspout warnings are not issued.

Ice warnings: refer to the Canadian Ice Services, Section 5.15.

5.3 MARINE AND ICE FORECAST PROGRAM

Marine forecasts are issued for the offshore economic zone including the St. Lawrence Seaway and major inland waters.

For sea ice, ice forecasts are issued for offshore marine areas as well as the Great Lakes. The production schedule is detailed in each regional section of this chapter. The forecast program includes the following bulletins:

Table 5-3 - Marine Forecast Program

Forecast or bulletin name	Details
Technical marine synopsis	Provides the positions and trends of the main weather systems for the forecast period covering Days 1 and 2.
Marine forecast (or Regular marine forecast)	Provides information on: synoptic warnings, wind, visibility, precipitation and freezing spray. It may include air temperature as appropriate. Valid for Days 1 and 2.
Recreational boating marine forecast	Tailored to the needs of recreational boaters, it is available on a seasonal basis and only in specific regions.
Marine weather statement	Issued when deemed necessary, it provides additional information on potentially high impact marine conditions.
Wave height forecast	Provides information on significant wave heights for Days 1 and 2 (not available for northern and Arctic lakes or inland waterways).
Extended marine forecast	Meant for longer-range planning purposes, it provides an extended marine wind outlook for Days 3, 4, and 5.
Iceberg bulletin	Provides information on distribution of icebergs valid for the time of issue of the bulletin.
Ice forecasts	Provides information on hazardous ice conditions for Days 1 and 2.

Forecast or bulletin name	Details
NAVTEX ¹	International Maritime Organization (IMO)-compliant NAVigational Telex bulletin issued with each regular marine forecast or ice forecasts in a standardized abbreviated format - see 5.8.1 for Abbreviations.
MAFOR ¹	This is a specialized coded marine forecast produced for Québec and Ontario regions.

Note (1): More details on NAVTEX and MAFOR are provided at Section 5.8 and 5.9).

5.3.1 Monitoring the Forecast

Forecasts are monitored, and amended as necessary, to reflect unexpected or changing weather conditions according to criteria based on the following principles:

- a) when safety or security is at risk;
- b) when inconvenience to the marine community will be extensive; or
- c) when the product could adversely affect the credibility of the marine forecast program.

5.3.2 Marine and Ice Forecast Areas

Marine forecasts and ice forecasts are issued for marine and ice areas as outlined in the regional maps. The sizes and boundaries of these areas are determined regionally based on the following considerations:

- a) marine traffic density;
- b) the ability to forecast to the proposed resolution;
- c) the degree to which, climatologically, marine weather varies; and
- d) the ability to distribute the information effectively to the marine community.

5.3.3 Current Conditions

Current weather data is available to Canadians for their local area. The frequency and quality of the data will be consistent with the standards established by the World Meteorological Organization (WMO). The data may include, as appropriate:

- a) wind speed and direction;
- b) atmospheric pressure;
- c) sky conditions;
- d) precipitation type;
- e) restrictions to visibility;
- f) wave height; and
- g) current temperature.

General information on current sea-ice will be provided to the marine community once a week to provide an adequate planning tool for those considering entering ice-encumbered waters.

5.3.4 Emergency Response

Meteorological support is provided during emergencies and includes the provision of meteorological information and forecasts. In the case of a pollution event, Environment Canada

adheres to the “polluter pay” policy for the provision of all services. Where agreements are in place, Environment Canada will make its distribution systems available to transmit vital information during emergency situations.

5.3.5 Delivery of Marine Warning and Forecast Services

Delivery of marine warning and forecast services to mariners navigating waters within Environment Canada's forecast areas of responsibility is primarily by mass communication in order to reach the greatest number of mariners through the standard communications technologies available to mariners. The following principles apply, regardless of the specific available technologies:

- a) Marine forecasts and warnings comprising the meteorological Maritime Safety Information (met MSI) issued by Environment Canada will be made available to the marine community via the Canadian Coast Guard Marine Communications and Traffic Services according to established procedures within the framework of the Global Maritime Distress and Safety System (see RAMN Part 4 Section 4.2.1 General Procedures – Systems – GMDSS).
- b) Internet access via the World-Wide Web. All forecast and warning information will be found at the following address: http://www.weather.gc.ca/canada_e.html Mariners should note, however, that the internet is *not* part of the Maritime Safety Information system and should never be relied upon as the only means to obtain the latest marine forecasts and warning information. Access to the internet may be interrupted or updated information delayed without prior notice.
- c) Marine and Environmental Advisories, Watches and Warnings are distributed through various mechanisms including partnerships with national and regional media distributors and local emergency measures organizations.
- d) In addition to the aforementioned mediums, basic services to mariners and Canadians in general shall also be delivered by mass distribution in partnership with media, relying on current and developing technologies in radio, television, newspaper and the Internet. These distribution mechanisms represent the primary methods by which most Canadians receive their weather information, now and in the future.

5.4 VOLUNTARY OBSERVING SHIP (VOS) PROGRAM

The VOS program has been discontinued within Canada. Environment Canada currently supports the Automated Voluntary Observing Ship program (AVOS) program and will support visiting VOS ships from other jurisdictions on a “best efforts” basis. Contact your regional PMO for further information.

5.5 BUOYS PROGRAM

In order to complement the observational network, Environment Canada operates a network of buoys across the country. This data becomes part of the collection of weather reports sent to the distribution network and is used to improve marine forecasting. The location, WMO identifiers and names of the Environment Canada buoys are given in the regional annexes.

Mariners are requested to use caution when approaching buoys as mooring chains are normally not detectable from a ship and can be damaged or even severed if there is contact. Such a mishap could possibly result in the buoy going adrift thus requiring a costly effort to recover the platform. Please keep the regional PMO informed of any incidents involving buoys.

Buoy locations: Buoy positions are described in each specific regional annex.

5.6 MAREP (MARINE REPORTING PROGRAM)

MAREP gives mariners the opportunity to informally report local weather conditions and to receive up-to-date weather forecasts and warnings. MAREP stations are generally operated on a semi-volunteer basis by a member of the marine community who is concerned about marine safety. The stations operators are in regular contact with the Marine Weather Forecaster of the area.

Since the program is informal, the individuals at the stations do not provide a 24-hour service, but are likely available during day-time and early evening hours.

5.7 PORT METEOROLOGICAL OFFICERS (PMOs)

In addition to a variety of other duties, PMOs also act as a liaison between Environment Canada and ships involved in the VOS and AVOS programs. This is to encourage vessels to report weather and ice conditions, to instruct observers about procedures and the use of code; to supply observing forms, handbooks (free of charge); to calibrate equipment; and, in some cases, to install, on loan, meteorological or oceanographic instrumentation. The PMO is also responsible for recruiting new vessels to participate in the AVOS program.

If a PMO visits your ship, feel free to ask questions about observing and coding, and reporting weather and ice conditions. Inform the PMO of any concerns you may have with forecasts, warnings, or facsimile products, especially if you have specific problems. The PMO will contact the appropriate party for investigation. Keep the PMO informed of your contact information.

5.7.1 Port Meteorological Officers (PMOs)

5.8 NAVTEX

MSC will provide Canadian Coast Guard with marine forecast information in NAVTEX format for coastal and offshore areas of responsibility based on IMO standards. Marine forecast information provided will include:

- a) warnings (Winds & ice accretion);
- b) synopsis (major features); and
- c) forecasts (wind, visibility, ice accretion, wave height).

Each bulletin will contain a WMO telecommunication header, a valid period, notes on parameters used within the bulletin, a synopsis section, a weather forecast section and a wave forecast section. Below is a sample of a partial NAVTEX produced for Canadian Coast Guard MCTS Sydney. Note that NAVTEX will make use of abbreviations: this is necessary in order to comply with the physical limitations of the NAVTEX system. In the example, text in superscript indicates how abbreviations are used.

NAVTEX service sample (518 kHz)

5.10 NORTHERN CANADA

Includes: Western and Eastern Arctic, Hudson Bay & Major Inland Lakes of Manitoba, Northern Saskatchewan and Northwest Territories.

5.10.1 Marine Weather Forecast Program

The Prairie and Arctic Storm Prediction Centre (PASPC), which is jointly located in Edmonton and Winnipeg provides marine weather forecasts in support of Arctic marine activity during the open water season from summer into parts of the fall. Wave height forecasts are provided for salt water areas. The PASPC-Edmonton forecast area encompasses Lake Athabasca, Great Slave Lake, the Mackenzie River, as well as the waterways of the Western and High Arctic, and Baffin Bay.

The PASPC-Winnipeg provides marine forecasts for Hudson Bay, Hudson Strait, Foxe Basin, Ungava Bay, and Davis Strait. Marine forecasts are also provided for Lake Winnipeg (north and south basins), Lake Manitoba and Lake Winnipegosis during the open water season in support of pleasure and commercial activities.

The forecast program for the Manitoba Lakes continues through the winter months as a public rather than a marine forecast in aid of commercial ice fishing. Minimum and maximum temperatures along with wind chill are included in the forecast.

Table 5-23 - Production Schedule - Text Format

Forecast name	Issue Time	Time Zone	Marine region
Technical marine synopsis	06:30, 18:30	MDT / MST	Central Arctic
	04:45, 16:45	EDT / EST	Hudson Bay and Eastern Arctic
Marine forecast	08:00, 16:30, 21:30	CDT/CST	Manitoba
	05:00, 17:00	MDT / MST	Inland waters (Lake Athabasca, Great Slave Lake, the Mackenzie River)

Table 5-24 - Production Schedule - NAVTEX Format (refer to Part 2 for the MCTS broadcast schedule).

MCTS Centre	Name	Header	Issue Time
Iqaluit VFF	NAVTEX	FQCN36 CWNT	05:30, 17:30 EDT / EST

Marine Weather Warnings (refer to Table 5-1 - Synoptic Warnings)

Note the following particulars:

	Warning Types	Comments
1	Strong wind warning	Applies to Manitoba Lakes, Lake Athabasca, Great Slave Lake and Mackenzie River

5.10.2 Weather and Ice Messages

Ship weather and ice reports in the international meteorological code, taken at the standard synoptic hours of 00:00, 06:00, 12:00 and 18:00 UTC are solicited from ships of all nationalities which have been recruited by their national weather service, or other weather services. These reports should be transmitted directly to the circuit using Inmarsat. Alternatively, the observation should be passed to the nearest Canadian Coast Guard MCTS Centre, irrespective of the ship's position. Reports made close to, or even within sight of land, are as important as reports made offshore, due to the greater variability of weather conditions in proximity to a coastline. Such reports contribute to the overall knowledge of Arctic weather from both a real-time operational perspective and from a climate perspective.

The PASPC welcomes weather, sea, and ice observations from the lakes. Real-time observations, and those up to a few hours after the event, are most valuable. Relay observations to 1 800 66STORM (1-800-667-8676).

Table 5-25 - Buoys - Buoys Deployed During the Open Water Season

WMO#	Location/Information	LAT (deg)	LONG (deg)
45140	Lake Winnipeg South Basin (moored buoy)	50.48 N	096.44 W
45141	Great Slave (moored buoy 25 nm northeast of Hay River)	61.1 N	115.19 W
45144	Lake Winnipeg North Basin (moored buoy)	53.15 N	098.15 W
45145	Lake Winnipeg between North and South Basins	51.24 N	096.420 W
45150	Great Slave (moored buoy - immediate west of Inner Whaleback Rocks)	61.55 N	113.45 W

The Great Slave Lake buoys are deployed in early July and retrieved in late September or early October. They provide hourly wind, air temperature, surface water temperature, and wave data.

The Lake Winnipeg South Basin buoys are deployed annually in May or June, and retrieved in October. They provide hourly wind, air temperature, surface water temperature, and wave data.

5.10.3 Weatheradio Canada

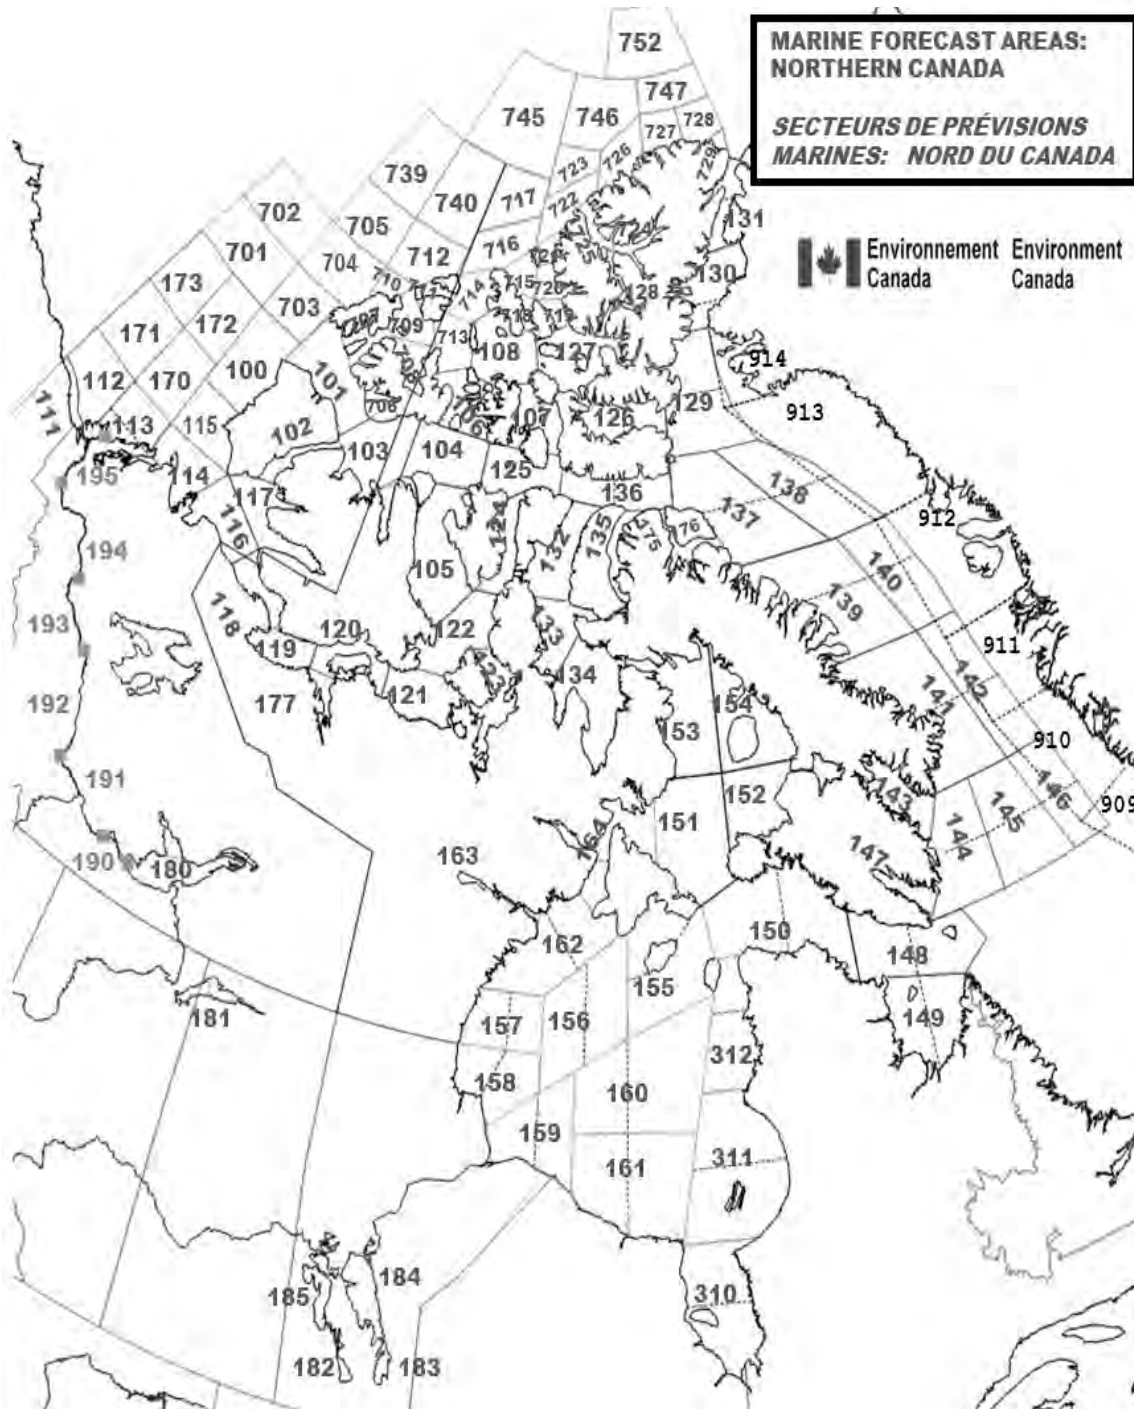

Weatheradio is a public service designed to make weather information available over VHF or FM radio continuously. Weatheradio is dedicated to transmitting up to the minute weather reports and forecasts directly to all users including the marine community.

Environment Canada Weatheradio operates several stations serving Northern region. These are:

Station	Call Sign	Frequency (MHz)	Effective Radiated Power (Watts)	Location
Arviat	CKO583	162.400	27	Arviat
Behchoko	CHR950	162.475	302	Behchoko

5.10.5 Marine Forecast Service to METAREAs XVII and XVIII

Environment Canada's METAREAs Forecast Program began in 2011. The boundaries of METAREA XVII are as follows: from 67°N 168° 58'W to 90°N to 67°N 120°W then back to 67°N 168° 58'W. The boundaries of METAREA XVIII are as follows: from 67°N 120°W to 90°N to 67°N 35°W then back to 67°N 120°W.

Marine forecast service to METAREAs XVII and XVIII is tailored to ensure compliance with the relevant standards for this type of service within the framework of the Global Maritime Distress and Safety System (GMDSS).

Marine weather and wave height forecast, and sea-ice conditions, are issued twice-daily for sections of METAREAs XVII and XVIII (see map).

Figure 5-2 - Marine Forecast Areas: METAREAs

5.10.6 Serviced Forecast Zones

Environment Canada provides marine weather and wave height forecasts, and sea-ice conditions, to the following marine zones within METAREAs XVII and XVIII:

Forecast service to U.S waters within METAREA XVII is provided by the National Weather Service. Forecast service to Greenlandic waters within METAREA XVIII is provided by the Danish Meteorological Institute. Further information may be obtained by contacting these agencies directly.

Detailed information regarding the geographic locations and boundaries associated with the METAREAs forecast zones may be obtained by contacting the Meteorological Service of Canada at the following:

Telephone: 709- 256-6612
Facsimile: 709- 256-6627
Email: metareas17.18@ec.gc.ca

Additional information may be obtained by consulting the Joint Commission on Oceanography and Marine Meteorology (JCOMM) web site at <http://weather.gmdss.org> or by consulting the Canadian Coast Guard notices to mariners (NOTMAR) web site at <http://notmar.gc.ca>.

5.10.7 METAREAs Forecast Transmission:

During the navigation season meteorological Maritime Safety Information (met MSI) consisting of marine weather warnings and forecasts for sections of METAREA XVII and XVIII south of 75 degrees latitude will be broadcast via Inmarsat-C SafetyNET. Scheduled broadcast times are:

METAREA XVII (POR) at 03:00 UTC and 15:00 UTC daily.

METAREA XVIII (AOR-W) at 03:00 UTC and 15:00 UTC daily.

Messages will be transmitted to a rectangular addressed area until Inmarsat-C or Mini-C terminals operating in Arctic waters have been updated. Users should note that meteorological MSI received by their sat-C terminals may be labeled as navigational MSI.

During the navigation season meteorological MSI for sections of METAREA XVII and XVIII north of 70° N will be broadcast via High Frequency Narrow Band Direct Printing (HF NBDP) on 8416.5 kHz from the Canadian Coast Guard Marine Communications and Traffic Services (MCTS) Centre in Iqaluit NU. Scheduled broadcast times are 03:30 UTC and 15:30 UTC daily. Mariners should note that actual HF service provision dates will be announced by Canadian Coast Guard Notice To Shipping.

Mariners navigating northern or Arctic waters may also obtain METAREAs forecast bulletin via internet by accessing Environment Canada's "Datamart" web page. However, users are cautioned that the internet is not part of the GMDSS MSI system and should never be relied upon as the only means to obtain the latest marine forecast and warning information. Access to the internet may be interrupted from time to time, or updates may be delayed. Mariners are advised to refer to the appropriate GMDSS-approved marine communication systems such as Inmarsat-C SafetyNET, HF NBDP, or international NAVTEX for the latest information. When accessing Environment Canada's Datamart web page please ensure the page you are viewing is updated and not from your web browser's cache. If in doubt, use your web browser's Refresh or Reload button to update the web page.

5.11 NEWFOUNDLAND AND LABRADOR

5.11.1 Marine Weather Forecast Program

The Newfoundland and Labrador Weather Office (NLWO) in Gander provides year-round marine weather and wave height information for the waters around Newfoundland and Labrador out to approximately 250 nm and the waters of the Gulf of St. Lawrence, and for other specific bodies of water.

5.11.2 The Regular Program

This consists of a full 24 hours, 7 days a week weather watch, warning and amendment service provided by the Newfoundland and Labrador Weather Office in Gander. The regular marine forecast covers the period out to midnight of the following day (days 1 and 2). An extended marine wind outlook covering the next 3 days (days 3, 4, and 5) is also produced.

Wave height forecasts are produced twice a day and cover the period out to midnight of the following day.

Table 5-36 - Production Schedule – Text Format:

5.11.3 Marine Weather Observations and Forecast Bulletins

Observations available on the Environment Canada Weatheradio network are updated hourly and include a series of coastal stations extending around the coast of Newfoundland and Labrador to the Maritimes and into the Gulf of St. Lawrence, as well as offshore buoys. Marine forecast bulletins are updated at regular intervals or whenever necessary. These bulletins are available on MSC's Automated Telephone Answering Device (ATAD), as well as Weatheradio and Canadian Coast Guard's Continuous Marine Broadcast (CMB).

5.11.4 Weatheradio Canada

Weatheradio is a public service designed to make weather information available over VHF or FM radio continuously. Weatheradio is dedicated to transmitting up to the minute weather reports and forecasts directly to all users including the marine community.

There is 1 main station in the Newfoundland and Labrador region:

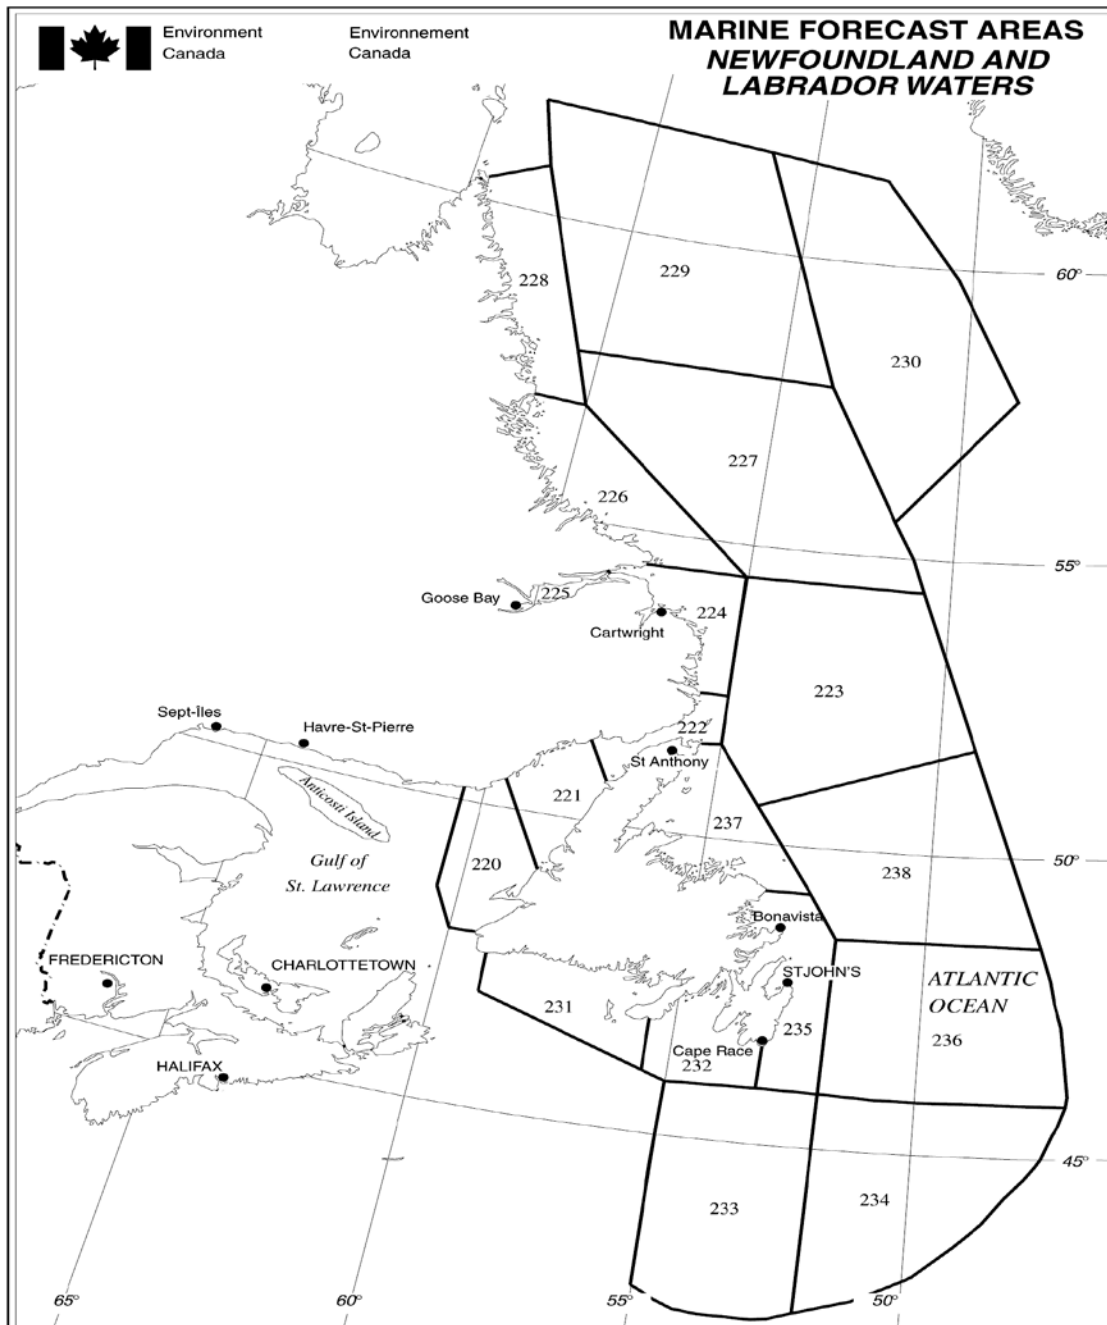

Stations	Call Sign	Repeaters
Gander	XLM 616	15

Frequencies in use: 162.400 MHz and 162.550 MHz.

Broadcasts can be received over most coastal areas of Newfoundland and southern Labrador, and include marine weather and ice warnings, regular marine and wave height forecasts, and synopses. Hourly updated observations from coastal stations and offshore buoys are all incorporated in the broadcast. Further information regarding EC's Weatheradio network can be obtained via the Internet at

<http://www.ec.gc.ca/meteo-weather/default.asp?lang=En&n=792F2D20-1>.

Figure 5-3 - Marine Forecast Areas: Newfoundland and Labrador

5.11.5 Marine Forecast Areas

Cap Whittle	LaScie	St John's
Cap Race	Makkovik	St-Pierre
Cartwright	Marticot Island	Stephenville
Chevery	Mary's Harbour	Twillingate
Daniel's Harbour	Nain	
Englee	Natashquan	

Observations will be broadcast only when available.

Hourly updated observations from coastal stations and offshore buoys may also be available on Weatheradio.

5.12 MARITIMES REGION

5.12.1 Marine Weather Forecast Program

The Atlantic Storm Prediction Centre (ASPC) in Dartmouth NS provides year-round marine weather and wave height information for the waters around the Maritimes to approximately 250 nm offshore, and the waters of the Gulf of St. Lawrence, as well as for other specific bodies of water.

5.12.2 The Regular Program

This consists of a full 24 hours, 7 days a week weather watch, warning and amendment service, including a detailed forecast for Halifax Harbour. The regular marine forecast covers the period out to midnight of the following day (days 1 and 2). An extended marine wind outlook covering the next 3 days (days 3, 4, and 5) is also produced.

Wave height forecasts are produced twice a day and cover the period out to midnight of the following day.

5.12.3 The Recreational Program

The recreational program covers the waters of Bras d'Or Lake in Cape Breton during the summer season (May 1 to October 31) and is provided as a service to recreational boaters. Recreational forecasts are issued 3 times a day.

Table 5-40 - Production Schedule - Text format:

Forecast Name	Issue Time	Time Zone	Marine Region
Technical marine synopsis	03:00, 10:00, 15:30, 20:00	ADT/ AST	Maritimes
Marine Forecast	03:00, 10:00, 15:30, 20:00	ADT/ AST	Maritimes
	03:00, 10:00, 15:30, 20:00	ADT / AST	Halifax Harbour and Approaches
Recreational boating marine forecast	03:00, 10:00, 15:30	ADT / AST	Bras d'Or Lake
Marine weather statement	As needed		
Wave height forecast	05:00, 17:00	ADT/ AST	Maritimes
Extended marine forecast	03:00, 15:30	ADT/AST	Maritimes

Table 5-41 - Production Schedule - NAVTEX Format (refer to Part 2 for the MCTS broadcast schedule):

MCTS Centres	Name	Header	Issue Time
Saint John VAR	NAVTEX	FQCN33 CWHX	03:00, 05:00, 10:00, 15:30, 17:00, 20:00 ADT / AST
Sydney VCO	NAVTEX/1	FQCN34 CWHX	03:00, 05:00, 10:00, 15:30, 17:00, 20:00 ADT / AST
	NAVTEX/2	FQCN34 CYQX	03:00, 06:00, 10:00, 15:30, 18:00, 20:00 ADT / AST

Marine Weather Warnings (refer to Table 5-1 - Synoptic Warnings)

Note the following regional particularities:

	Warning Types	Comments
1	Strong wind warning	This warning is indicated in the forecast for coastal waters of the Maritimes and for the Halifax Harbour and the Bras d'Or Lakes. Issued between April 15 and November 15.

5.12.4 Marine Weather Observations and Forecast Bulletins

Observations and forecast bulletins are available on MSC's Automated Telephone Answering Device (ATAD) and Weatheradio. Observations are updated hourly and include a series of coastal stations extending from the coast of Maine around the Maritimes and into the Gulf of St. Lawrence, as well as offshore buoys. Marine forecast bulletins are updated at regular intervals or whenever necessary and are available on Weatheradio and the Canadian Coast Guard's continuous marine broadcast.

5.12.5 Canadian Hurricane Centre

The Canadian Hurricane Centre (CHC) is co-located with the Atlantic Storm Prediction Centre. It becomes operational when a storm system of tropical origin enters or threatens to enter the designated response zone (north of 36°N and west of 41°W) within 3 days. The CHC may begin to issue bulletins on a semi-regular basis up to 5 days prior to the expected tropical weather event so as to maintain consistent and informative messaging on the storm, and also as a tool for early contingency planning for the relevant emergency response agencies.

During the CHC's operational phase bulletins are issued at regular 6-hour intervals. These bulletins include information statements for Public and Media notification, and technical messages for use by MSC and Canadian Forces weather offices. Bulletins are issued at 3-hour intervals when the storm's impacts are occurring within MSC's forecast areas of responsibility, including offshore waters.

Table 5-42 - Moored Buoys - Positions North-West Atlantic Ocean:

WMO#	Name	LAT (deg)	LONG (deg)
44137	East Scotia Slope	42.234 N	62.018 W

44150	La Have Bank	42.505 N	64.018 W
44251	Nickerson Bank	46.444 N	53.392 W
44255	NE Burgeo Bank	47.267 N	57.336 W
44258	Halifax Harbour Approaches	44.502 N	63.403 W

5.12.6 Weatheradio Canada

Weatheradio is a public service designed to make weather information available over VHF or FM radio continuously. Weatheradio is dedicated to transmitting up to the minute weather reports and forecasts directly to all users including the marine community.

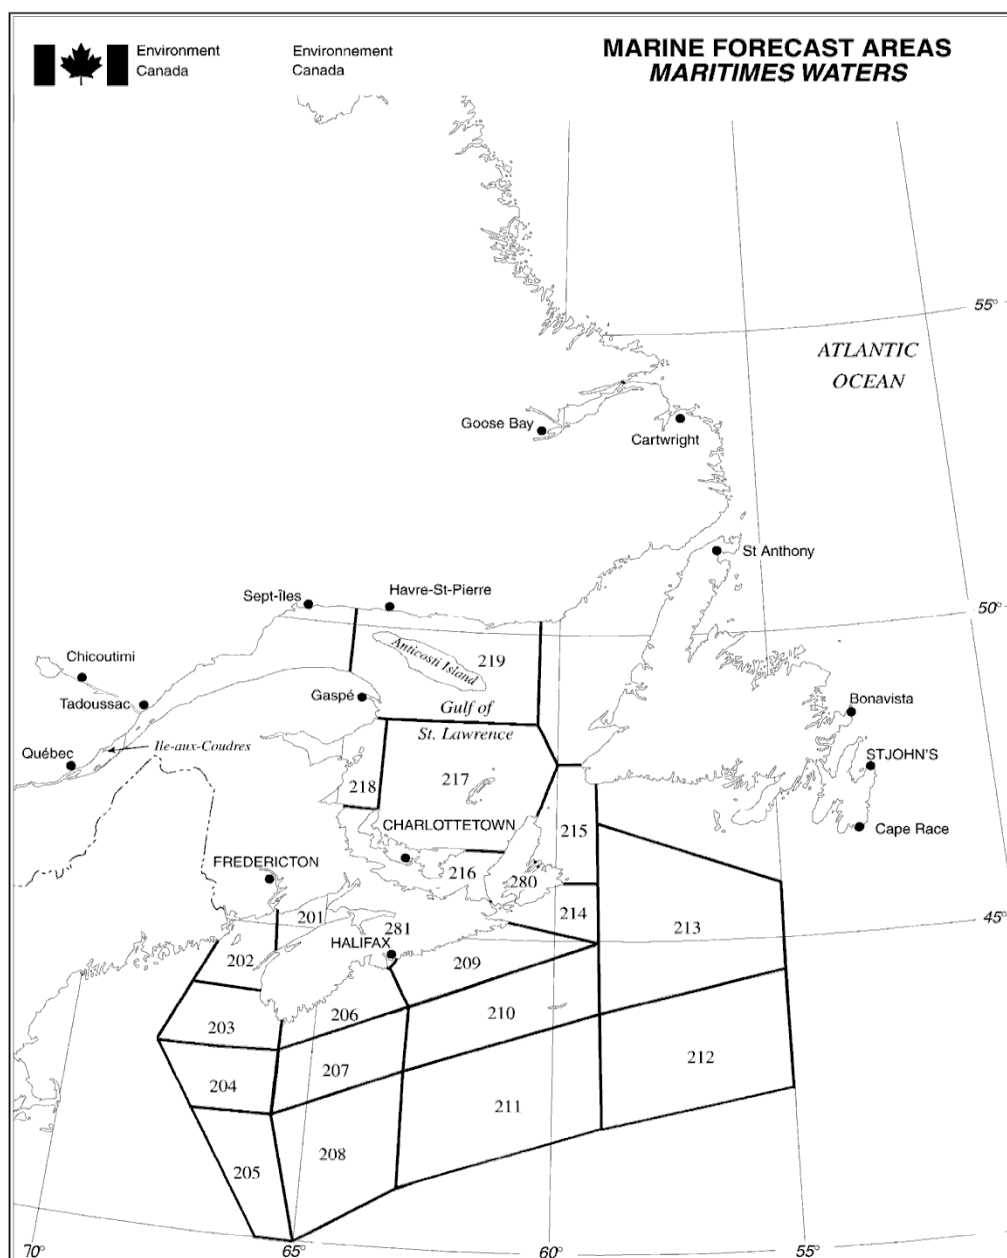

There are 2 main stations in the Maritimes region:

Stations	Call Sign	Repeaters
Moncton	XLM 466	8
Halifax	XLK 473	14

Frequencies in use: 162.400 MHz, 162.475 MHz, 162.500 MHz and 162.550 MHz.

Broadcasts can be received over most coastal areas of New Brunswick, Nova Scotia and Prince Edward Island. Broadcasts include marine weather and ice warnings, and marine forecasts including wave heights, and synopses. Hourly updated observations from coastal stations and offshore buoys are all incorporated in the broadcast.

St. Paul's Island	Pointe Heath (Anticosti)	Sept-Iles
Miscou	Port aux Basques	St. Pierre
Natashquan	Port Menier	

Observations will be broadcast only when available.

Hourly updated observations from coastal stations and offshore buoys may also be available on Weatheradio.

5.13 QUÉBEC REGION

5.13.1 Marine Weather Forecast Program

The program provides weather information for the St. Lawrence waterway and the Saguenay River, as well as for other specific lakes or navigable waterways.

5.13.2 The Regular Program

Area of coverage includes the St. Lawrence waterway between Cornwall*, Ontario, and Anticosti Island (65°W), and the navigable waterway of the Saguenay River between Saguenay and Tadoussac (see map areas 301-309). The program provides a full 24 hours, 7 days a week weather watch, warning and amendment service.

Regular forecasts are issued twice a day from the Québec Storm Prediction Centre in Montréal.

*Time coverage: Year round *St. Lawrence Seaway portion (Cornwall to Montréal) in open season only.*

Wave height forecasts are issued twice a day for marine areas 301, 302, 303 and 305.

5.13.3 The recreational program

Area of coverage is for various inland lakes and navigable waterways (See map areas 380 to 386). The recreational program is active from May to October. Also provided is a full 24 hours, 7 days a week squall warning service during the summer months (refer to Table 5-2 - Localized Warnings).

Table 5-45 - Production Schedule – Text Format

Forecast Name	Issue Time	Time Zone	Marine Region
Technical marine synopsis	03:00, 15:00	EDT/ EST	St. Lawrence and Saguenay rivers
	06:00, 18:00	EDT / EST	Eastern Hudson Bay
Marine forecast	03:00, 15:00	EDT / EST	St. Lawrence and Saguenay rivers
	06:00, 18:00	EDT / EST	Eastern Hudson Bay
Marine weather statement	As needed		
Wave height forecast	03:00, 15:00	EDT/EST	St. Lawrence River
	06:00, 18:00	EDT / EST	Eastern Hudson Bay
MAFOR	03:00, 15:00	EDT / EST	St. Lawrence and Saguenay rivers
Extended marine forecast	06:00, 18:00	EDT / EST	St. Lawrence and Saguenay rivers
	06:00, 18:00	EDT / EST	Eastern Hudson Bay

Table 5-46 - Production Schedule - NAVTEX Format (refer to Part 2 for the MCTS broadcast schedule)

MCTS Centre	Name	Header	Issue Time
Rivière-au-Renard VCG	NAVTEX/1	FQCN37 CWUL	03:00, 15:00 EDT / EST
	NAVTEX/2	FQCN37 CWHX	03:00, 05:00, 10:00, 15:30, 17:00, 20:00 ADT / AST
	NAVTEX/3	FQCN37 CYQX	03:00, 06:00, 10:00, 15:30, 18:00, 20:00 NDT / NST

Marine Weather Warnings (refer to Table 5-1).

Note the following regional particularities with respect to the regular programs:

	Warning Types	Comments
1	Strong wind warning	Issued between April and October only. Regular program only.

5.13.4 Marine Weather Observations and Forecast Bulletins

Environment Canada operates a network of coastal and insular weather observing stations as well as one weather buoy. Hourly weather reports from these stations are available continuously on Environment Canada's Weatheradio (see Weatheradio Canada below) and on request from the Canadian Coast Guard MCTS Centres (refer to Marine Weather Observations). Marine forecasts are updated at regular intervals or whenever necessary and are available on Weatheradio and Canadian Coast Guard's continuous marine broadcast.

5.13.5 Buoy Position St. Lawrence River

In order to complement its network of coastal and insular weather observing stations, Environment Canada operates one weather buoy on the St. Lawrence River. Mariners are requested to use caution when approaching the buoy as mooring chains are normally not detectable from a ship and can be damaged or even severed if there is contact.

WMO#	Name	LAT (deg)	LONG (deg)
45138	Mont Louis	49.543°N	065.760°W

5.13.6 Weatheradio Canada

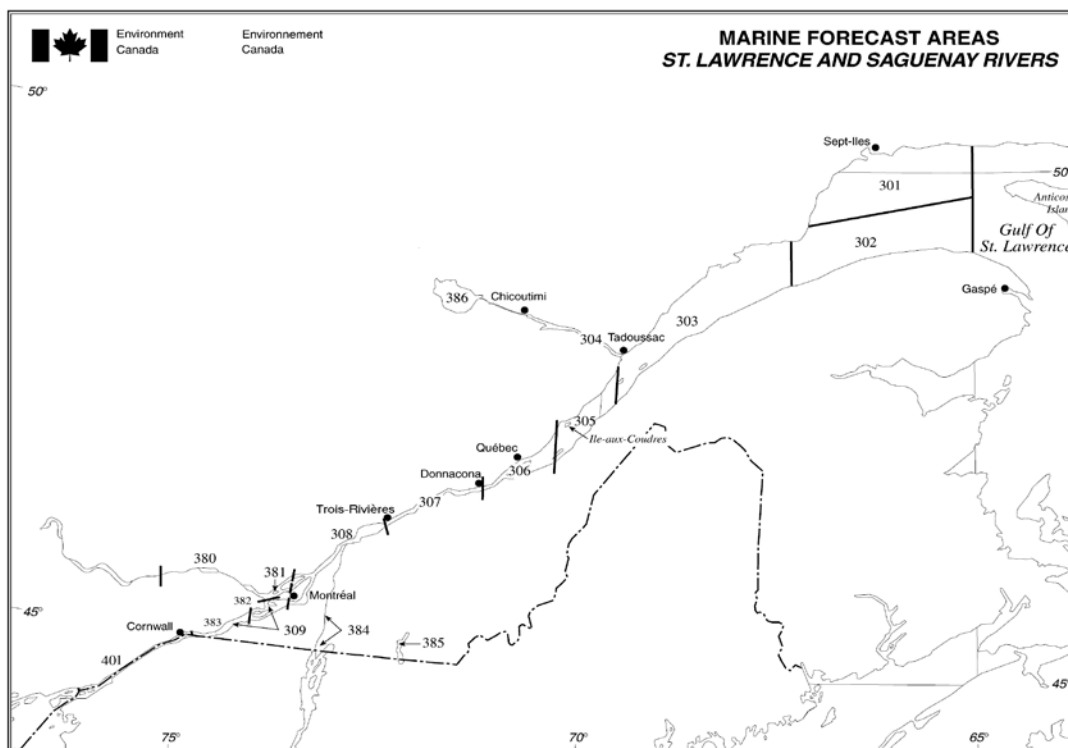

Weatheradio is a public service designed to make weather information available over VHF or FM radio continuously. Weatheradio is dedicated to transmitting up to the minute weather reports and forecasts directly to all users including the marine community. The table below lists all the Weatheradio stations under the responsibility of Environment Canada - Québec region broadcasting marine forecasts and weather reports, showing the stations and frequencies:

Stations	Frequency (MHz)	Stations	Frequency (MHz)
Montréal	162.550	Prevert	162.475
Trois-Rivières	162.400	Rivière-au-Renard	162.475
Québec	162.550	Gaspé (Pudding Stone)*	162.550
Baie St-Paul	162.400	Carleton	162.500
Grand-Fonds	162.475	Mingan*	162.400
Mont Valin	162.550	Kegaska*	162.475

Stations	Frequency (MHz)	Stations	Frequency (MHz)
Rimouski	162.550	Harrington Harbour*	162.550
St-Cléophas	162.400	Blanc-Sablon*	162.400
Sept-Îles(Pointe Noire)	162.550	Magdalen Islands*	162.550

* Also broadcast marine forecasts issued from Environment Canada – Atlantic region (refer to the Maritimes Region and the Newfoundland and Labrador Region).

Figure 5-5 - Marine Forecast Areas: St.Lawrence and Saguenay Rivers

5.13.7 Marine Forecast Areas

Table 5-47 - Québec Waters

St Lawrence/Saguenay		Major inland waters	
Number	Area Name	Number	Area Name
301	Pointe-des-Monts to Anticosti - northern half	384	Richelieu and Northern Lake Champlain
302	Pointe-des-Monts to Anticosti - southern half	385	Lake Memphrémagog - northern half

304	Saguenay to Tadoussac		
305	Isle-aux-Coudres to Tadoussac		
306	Donnacona to Isle-aux-Coudres		
307	Trois-Rivières to Donnacona		
308	Montréal to Trois-Rivières		
309	Cornwall to Montréal		

Table 5-48 - Marine Weather Observations – St. Lawrence and Saguenay Rivers

Area Name	Area Name	Area Name
Baie-Comeau	Île Charron	Pointe Claveau
Cap-Chat	Île d'Orléans (St François)	Pointe-des-Monts
Cap Rouge	Île Rouge	Port Alfred
Dorval Airport	Île St-Quentin	Rivière-au-Renard
Île aux Grues	Lauzon	Sept-Îles
Île Biquette	Mont-Joli	St-Hubert Airport

Reports are broadcast only when available.

5.14 GREAT LAKES INCLUDING ST. LAWRENCE RIVER TO CORNWALL

5.14.1 Marine Weather Forecast Program

The program provides marine weather information for the navigable waterway between Cornwall and Thunder Bay, and for other specific lakes or navigable waterways. Note that the program is applicable only to waters that lie on the Canadian side of the Canada-U.S. border.

5.14.2 The Regular Program

In addition to the Great Lakes, the area of coverage includes the waterway between Cornwall and Thunder Bay and is in effect year round except for the St. Lawrence Seaway portion where the service is only offered during the navigation season. The marine areas include: Lake Superior, Whitefish Bay, Lake Huron, Georgian Bay, Lake St. Clair, Lake Erie, Lake Ontario, and the St. Lawrence Seaway from Kingston to Cornwall. Note that the marine forecast applies to either the entire lake or the specified body of water comprising the forecast area of responsibility. The program provides a full 24 hours, 7 days a week weather watch, warning and amendment service. Synopses, regular marine and wave height forecasts are issued 3 times a day from the Ontario Storm Prediction Centre in Toronto.

5.14.3 The Recreational Program

Marine forecasts tailored to the needs of recreational boaters are issued during the recreational boating season 3 times a day for Lake Simcoe, Lake Nipissing, Lake of the Woods, the North Channel and Lake Nipigon. The season runs from May 1 to November 30.

Table 5-49 - Production Schedule - Text Format

Forecast Name	Issue Time	Time Zone	Marine Region
Technical marine synopsis	03:00, 10:30, 18:30	EDT / EST	Great Lakes and the Ontario portion of the St. Lawrence River
Marine forecast	03:00, 10:30, 18:30	EDT / EST	Great Lakes and the Ontario portion of the St. Lawrence River
Recreational boating marine forecast	05:00, 11:30, 17:30	EDT / EST	Lake of the Woods, Lake Nipigon, North Channel, Lake Nipissing, Lake Simcoe
Marine weather statement	As needed		
Wave height forecast	03:00, 10:30, 18:30	EDT / EST	Great Lakes only
MAFOR	03:00, 10:30, 18:30	EDT / EST	Great Lakes and the Ontario portion of the St. Lawrence river
Extended marine forecast	03:00, 18:30	EDT / EST	Great Lakes and the Ontario portion of the St. Lawrence River

Table 5-50 - Production Schedule - NAVTEX Format (refer to Part 2 for the MCTS broadcast schedule):

MCTS Centres	Name	Header	Issue Time
Prescott VBR	NAVTEX	FQCN38 CWTO	03:00, 10:30, 18:30 EDT/EST
Thunder Bay VBA	NAVTEX	FQCN39 CWTO	03:00, 10:30, 18:30 EDT/EST

Marine Weather Warnings (refer to Table 5-1 - Synoptic Warnings).

Note the following regional particularities with respect to the regular program:

	Warning Types	Comments
1	Strong wind warning	Issued April-Nov. and applies to Canadian waters only

5.14.4 Buoys

In order to complement the observational network, Environment Canada operates a network of buoys around the Great Lakes. This data becomes part of the collection of weather reports used to improve marine forecasting. Mariners are requested to use caution when approaching buoys as mooring chains are normally not detectable from a ship and can be damaged or even severed if there is contact, which could result in the buoy becoming adrift and a costly recovery of the platform. Please keep the regional Port Meteorological Officers informed of any incidents involving buoys.

Table 5-51 - Canadian Buoys

WNO#	Name	LAT (deg)	LONG (deg)
45132	Port Stanley	42.467 N	81.216 W

45012	Lake Ontario	43.619 N	77.405 W

5.14.5 Weatheradio Canada

Weatheradio in this region comprises a very comprehensive network of stations covering the Great Lakes area. Frequencies in use are: 162.400 MHz, 162.475 MHz, and 162.550 MHz. Broadcasts include marine warnings and forecasts as well as inland warnings and forecasts. Hourly updated observations from coastal stations and buoys are also incorporated in the broadcast.

Note: Weatheradio Canada automatically alerts users to severe weather warnings. If receivers are equipped with suitable alert devices they will emit a loud continuous tone and/or flashing light when a warning is issued.

(1) Reports are broadcast only when available. Reports from platforms such as buoys or ships are also broadcast when available.

5.15 CANADIAN ICE SERVICE (CIS)

5.15.1 Ice Forecasts

Ice forecasts are produced where there is marine activity. The intent is to advise users of ice conditions including warnings that are in effect or that could develop during the day, the evening and the following day, in marine areas. Forecasts also provide a point by point description of the ice edge.

The iceberg bulletin is produced once a day. The purpose is to convey routine, general information on the iceberg distribution off the Canadian East Coast. The bulletin provides the estimated limit of all known icebergs and a general description of the number of icebergs for each marine area.

Table 5-55 - Production Schedule - Ice bulletins Text Format:

Forecast Name	Issue Time	Time Zone	Marine Region
Iceberg bulletin	11:00	EDT/EST	East Coast Waters
Ice forecasts	10:00	EDT/EST	Western and Central Arctic
	11:00	EDT/EST	Hudson and Foxe
	11:00	EDT/EST	Eastern and Northern Arctic
	10:00	EDT/EST	Gulf of St. Lawrence
	10:00	EDT/EST	East Newfoundland and Labrador waters
	12:00	EDT/EST	Great Lakes

Table 5-56 - Production Schedule - NAVTEX Format (refer to Part 2 for the MCTS broadcast schedule):

**Ice NAVTEX FICN36 is being broadcast from MCTS Iqaluit since November 20, 2013.*

Table 5-57 - Ice Warning Criteria

	Warning Name	Warning Criteria
1	Ice Pressure warning	Reported or forecast strong ice pressure.
2.	Rapid Closing of Coastal Leads warning	Rapid closing of coastal leads is expected to occur. Leads are corridors of mainly ice-free water surrounded by pack ice.
3.	Special Ice Warning	When one tenth or more of grey-white ice or older is expected to move into areas when that ice is not normally present, or... For any unusual or significant ice event that may present a hazard to navigation.

5.15.2 Ice Program

Ice forecasts are issued for daily, monthly and seasonal time scales.

5.15.3 Ice Reports or Observations

Ice reports from ships or aircraft are normally relayed through MCTS Centres for broadcast. These reports are all assimilated in the daily ice charts produced by CIS.

5.15.4 Ice Charts

Current ice charts are produced daily. The area covered by the chart depends on the time of the season and these charts are normally broadcast at times specified in tables below.

Once a week, CIS produces Regional ice charts. These charts are intended to be used as a planning tool rather than a tactical support tool and are available on the CIS Website at <http://www.ice-glaces.ec.gc.ca/> and through commercial communication lines. They are not broadcast through MCTS Centres.

5.15.5 Ice Beacons

In order to better track the ice drift or to verify ice models, CIS deploys a few ice beacons yearly. While most beacons are only reporting their positions, a few are equipped with barometric pressure sensors.

5.15.6 Weatheradio Canada

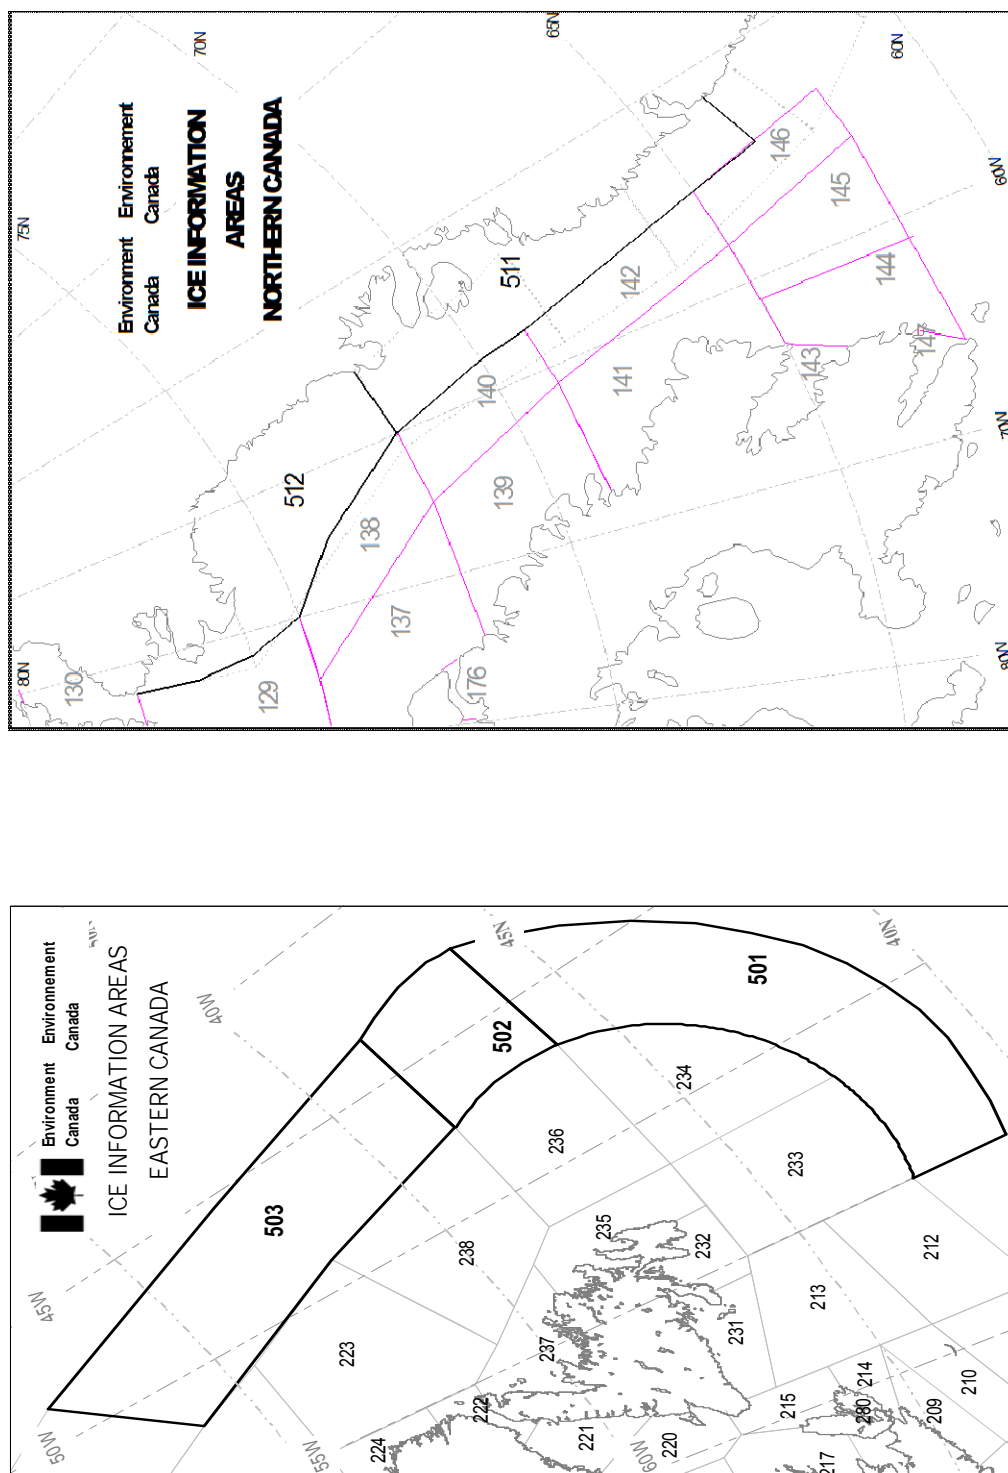

Ice forecasts and warnings are not broadcast via Weatheradio, however, mariners planning operations in waters impacted by hazardous ice conditions may obtain details regarding ice conditions by consulting the CIS Website at <http://www.ice-glaces.ec.gc.ca> / or by contacting their regional MCTS Centre. Detailed ice information may also be obtained through consultation with an Environment Canada meteorologist using the "Weather One-on-One" 1-900 service at 1-900-565-5555. For cell phone users and credit card billing call 1-888-292-2222. User fees apply.

5.15.7 Ice areas

Areas for which ice forecasts apply are identical to the marine forecasts areas. In addition to these, ice forecasts will cover Lake Michigan, and may cover 3 areas along the East Coast (501 to 503).

- 501 Tail of the Grand Banks
- 502 Flemish
- 503 Southeast Labrador Sea
- 541 Lake Michigan

Figure 5-7 - Ice Information Areas: Eastern and Northern Canada

5.15.8 Ice charts

The following list describes ice charts produced to support marine activities which are available for broadcast. All available charts can be transmitted or re-transmitted on request. MCTS broadcast times are found in PART 2.

Table 5-58 - Ice Charts Listing

Ice Charts	Broadcast Site	Season
Iceberg limit	MCTS Sydney	Year round
Gulf of St. Lawrence	MCTS Sydney	Winter
Northeast or East Newfoundland Waters	MCTS Sydney	Winter
Southeast Newfoundland Waters	MCTS Sydney	Winter
Labrador Coast	MCTS Iqaluit	Summer

METOC Halifax (CFH): The Canadian Forces Fleet MetOc Broadcast service (radioteletype and radiofacsimile) was placed in abeyance effective September 2, 2010. The Canadian Forces Fleet

MetOc Broadcast may be reinstated and ceased without warning as necessitated by military operational requirements. When notified, MCTS will issue a Notice to Shipping concerning reinstatement or cessation of this service. Broadcasts intended for North Atlantic waters North of 35N and West of 35W. Radiofacsimile transmission commences with a 30 second break followed by a 30 second signal.

Table 5-59 – Canadian Coast Guard and Canadian Forces Fleet MetOc Radio Facsimile Stations

Name	Call Sign	Modulation	Index of cooperation	Power	Frequencies (kHz)	Drum Speed
MCTS Iqaluit	VFF	J3C (FM)	576	1 KW	3251.1, 7708.1 (USB)	120 RPM
METOC Halifax	CFH	J3C (FM)	576	6 KW	4271, 6496.4, 10536, 13510	120 RPM
METOC Halifax	CFH	J3C (FM)	576	10 KW	122.5	
MCTS Sydney	VCO	J3C (FM)	576	5 KW	4416, 6915.1	120 RPM

For correct reception of this broadcast on WMO standard facsimile recorders requiring 2300 Hz for White and 1500 Hz for Black, 1900 Hz centre frequency, radio receivers should be tuned in the UPPER SIDEBAND MODE or USB: add 1.9 to the indicated USB frequencies for FSK frequencies.

5.15.9 Facsimile Broadcast

Upon authorized request from Canadian Coast Guard, C-GCFR can transmit observed conditions via satellite fax. Vessels must make a request through the Canadian Coast Guard to receive it.
