Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has added new uses on Clearfield sunflowers to the product label of Odyssey WDG Herbicide, containing technical grade imazamox and imazethapyr. The specific uses approved in Canada are detailed on the label of Odyssey WDG Herbicide, *Pest Control Products Act* Registration Number 25111.

A corresponding maximum residue limit (MRL) was proposed in the consultation document published on 25 May 2011, Proposed Maximum Residue Limit PMRL2011-11, *Imazamox*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRL was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRL takes legal effect as of the publication date of this document and replaces the MRL previously established for imazamox.

#### **Established Maximum Residue Limit for Imazamox**

<b>Common Name</b>	<b>Residue Definition</b>	<b>MRL (ppm)</b>	<b>Food Commodity</b>
Imazamox	2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1 <i>H</i> -imidazol-2-yl]-5-(methoxymethyl)-3-pyridinecarboxylic acid	0.3*	Sunflower seeds

\* The MRL replaces the 0.05 ppm MRL previously established for sunflower seeds.

A complete list of all pesticide MRLs established in Canada can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
