

HOUSING NOW

Vancouver and Abbotsford CMAs

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: July 2014

Highlights

- Total housing starts in the Vancouver Census Metropolitan Area (CMA) trended lower in June;
- A decline in multiple-family starts in the Abbotsford-Mission CMA pushed the trend measure of total housing starts lower in June; and
- MLS® resales continued to grow during the first 6 months of 2014 in both the Greater Vancouver Real Estate Board (REBGV) area and the Fraser Valley Real Estate Board (FVREB) area.

Figure 1

* Seasonally adjusted annual rate
Source: CMHC

¹ The seasonally adjusted annual rate (SAAR) is a monthly figure for starts adjusted to remove normal season variation and multiplied by 12 to reflect annual levels. By removing seasonal ups and downs, seasonal adjustment allows for a comparison from one season to the next and from one month to the next. Reporting monthly figures at annual rates indicates the annual level of starts that would be obtained if the monthly pace was maintained for 12 months. This facilitates comparison of the current pace of activity to annual forecasts as well as to historical annual levels.

Vancouver CMA New Housing Market

Total housing starts in the Vancouver Census Metropolitan Area (CMA) were trending at 18,413 units in June compared to 19,000 in May. The trend is a six-month moving average of the monthly seasonally adjusted annual rates (SAAR) of housing starts.

The actual number of new homes started during the first half of 2014 totalled 9,105 units, up five per cent from 8,672 units in the same period a year ago (Figure 1).

The number of multi-family starts so far this year increased year-over-year by approximately five per cent to 7,107. The majority of these units were started in the cities of Burnaby, Richmond, Coquitlam, Surrey and Vancouver. In addition, 16 per cent of total starts and 15 per cent of completions were rental units. Rental starts have comprised at least 10 per cent of the total on a monthly basis in the past year, an increase from previous years (Figure 2). More than half of these rental starts have been in the cities of Vancouver, Surrey, Richmond and North Vancouver,

Meanwhile, at 1,998 units, single-detached housing starts were 6 per cent higher than they were in the first two quarters of last year. Completed and unabsorbed single-detached units decreased by 20 per cent to 1,085 as the number of absorbed units increased by 21 per cent to 1,975.

Abbotsford-Mission CMA New Housing Market

The six-month moving average trend for housing starts in the Abbotsford-Mission CMA was 521 units in June, down from 706 units in May. Single-detached starts, at 200 homes, were lower by only four units compared to the prior month. However, multiple-family starts were trending at 320, down from 502 units in the previous month.

The actual number of homes started in the Abbotsford-Mission CMA in June 2014 was 19, bringing the total for the first half of the year to 256 housing starts. At 160 units, multiple-family starts were almost half of what they were for the first half of 2013. On the other hand, single-detached starts totalled 96 units, 14 per cent higher than last year. Meanwhile, 77 per cent of the 626 units under construction and nearly two-thirds of the 291 units that were completed were multiple-family units.

Greater Vancouver MLS[®] Market²

In the areas covered by the Real Estate Board of Greater Vancouver (REBGV), there were 16,944 sales during the first half of the year, an increase of 22 per cent compared to the same period last year. This marked the first time in 12 years that sales continued to rise on a consecutively monthly basis from January to June. Low mortgage rates together with a decrease in the unemployment rate and strong migration levels have supported demand for housing. While the year-over-year growth appears significant, it is important to note that the first half of 2013 was a very weak point for the MLS[®] market. However, the total number of sales in the first half of 2014 remained seven per cent lower than the 10- year average level. More than 75 per cent of these sales happened in the cities of Vancouver, Richmond, Burnaby, North Vancouver, and Coquitlam. Compared to last year, demand has shifted from Vancouver

Figure 2

Source: CMHC

² MLS[®] is a registered certification mark of the Canadian Real Estate Association (CREA)

West, Burnaby and Coquitlam towards Vancouver East and Port Coquitlam.

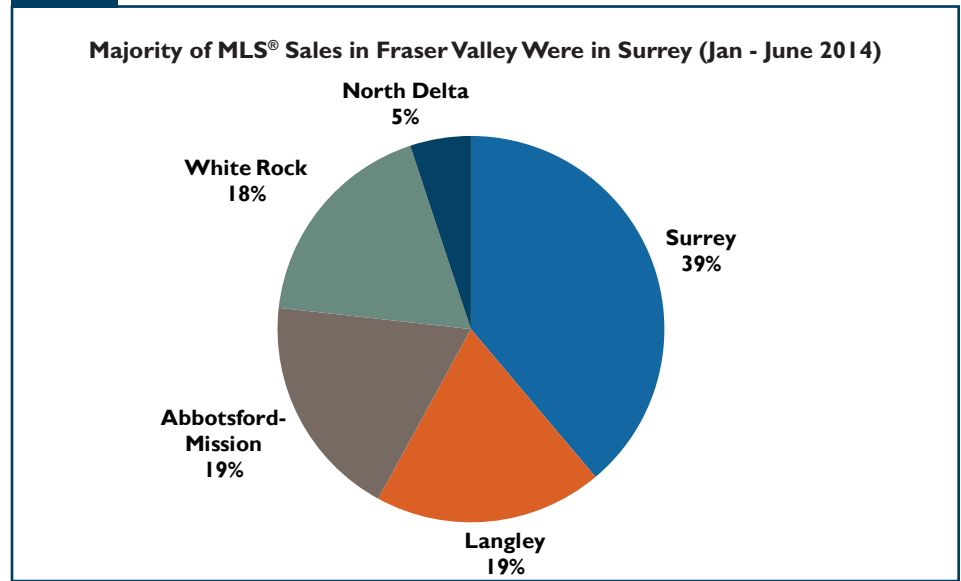

The aggregate average MLS® home price moved higher during the first half of 2014. Year-to-date sales of single detached housing accounted for 43 per cent of the total, compared to 41 per cent in 2013. In addition, year-to-date sales of single-detached homes with a price tag of more than \$1.5 million increased by 10 per cent compared to last year. These are some of the reasons behind the increase in average MLS® price to \$811,084, seven per cent higher than the average price during the same period in 2013.

Year-to-date, the number of active listings has decreased on a consecutive monthly basis and the average monthly level in June was 7 per cent lower than it was in 2013. However, home sellers are still listing their properties and the number of new listings in the first 6 months increased 5.5 per cent compared to last year. As a result of the increase in sales and a lower level of listings, market conditions in Greater Vancouver for most of this year were in balanced territory.

Fraser Valley MLS® Market

Building on the trend started in the second half of 2013, MLS® sales in the areas covered by the Fraser Valley Real Estate Board (FVREB) continued a positive growth trajectory, rising 19 per cent year-over-year to reach 7,508.³ Surrey, with 39 per cent of all FVREB sales, had the highest share of sales compared to other Fraser Valley communities (Figure 3). Most of the demand year-to-date has been for ground-oriented housing, with single-detached house sales comprising 58 per cent of the total,

Figure 3

Source: MLS® Data

followed by townhouses with 24 per cent of sales. Compared to the first six months of 2013, there was an increase in sales of single-detached housing and townhouses by 17 per cent and 24 per cent, respectively. Apartment home sales also rose by seven per cent over the same period. As a result of this strong increase in demand, the average MLS® price during the first six months of 2014 was five per cent higher for single-detached houses and townhouses, and three per cent higher for apartments, compared to the same period last year.

³ Fraser Valley Real Estate Board covers markets in North Delta, Surrey, South Surrey / White Rock, Langley, Abbotsford, and Mission.

SPOTLIGHT: Household Growth and Housing Demand

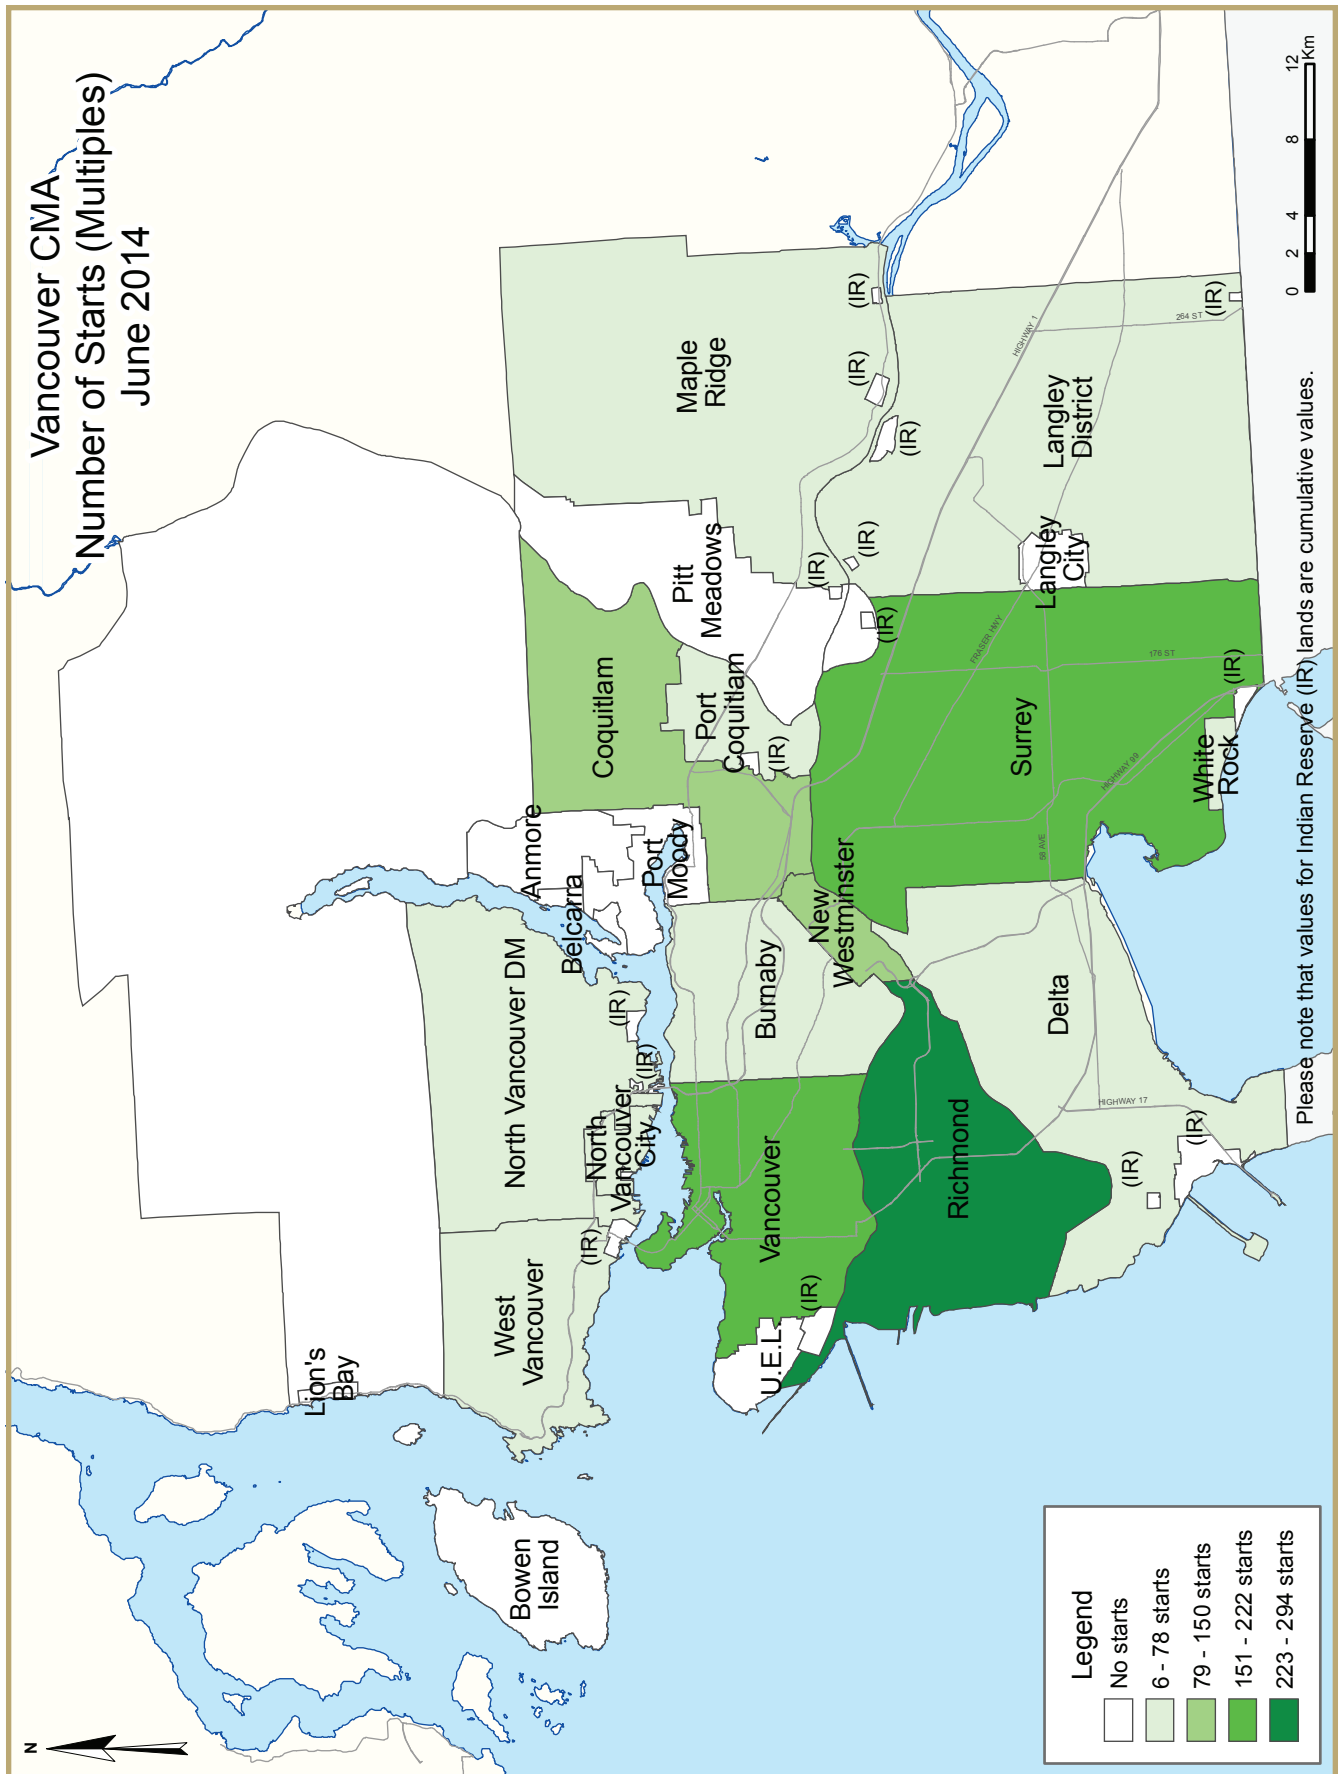

According to BC Stats, from 2004-2013 the number of households in the Vancouver CMA increased by an average of approximately 16,500 per year and is expected to grow by 17,500 per year for the next five years. The historical 10 year average pace of 17,650 starts per year is well-matched to accommodate the new households added each year.

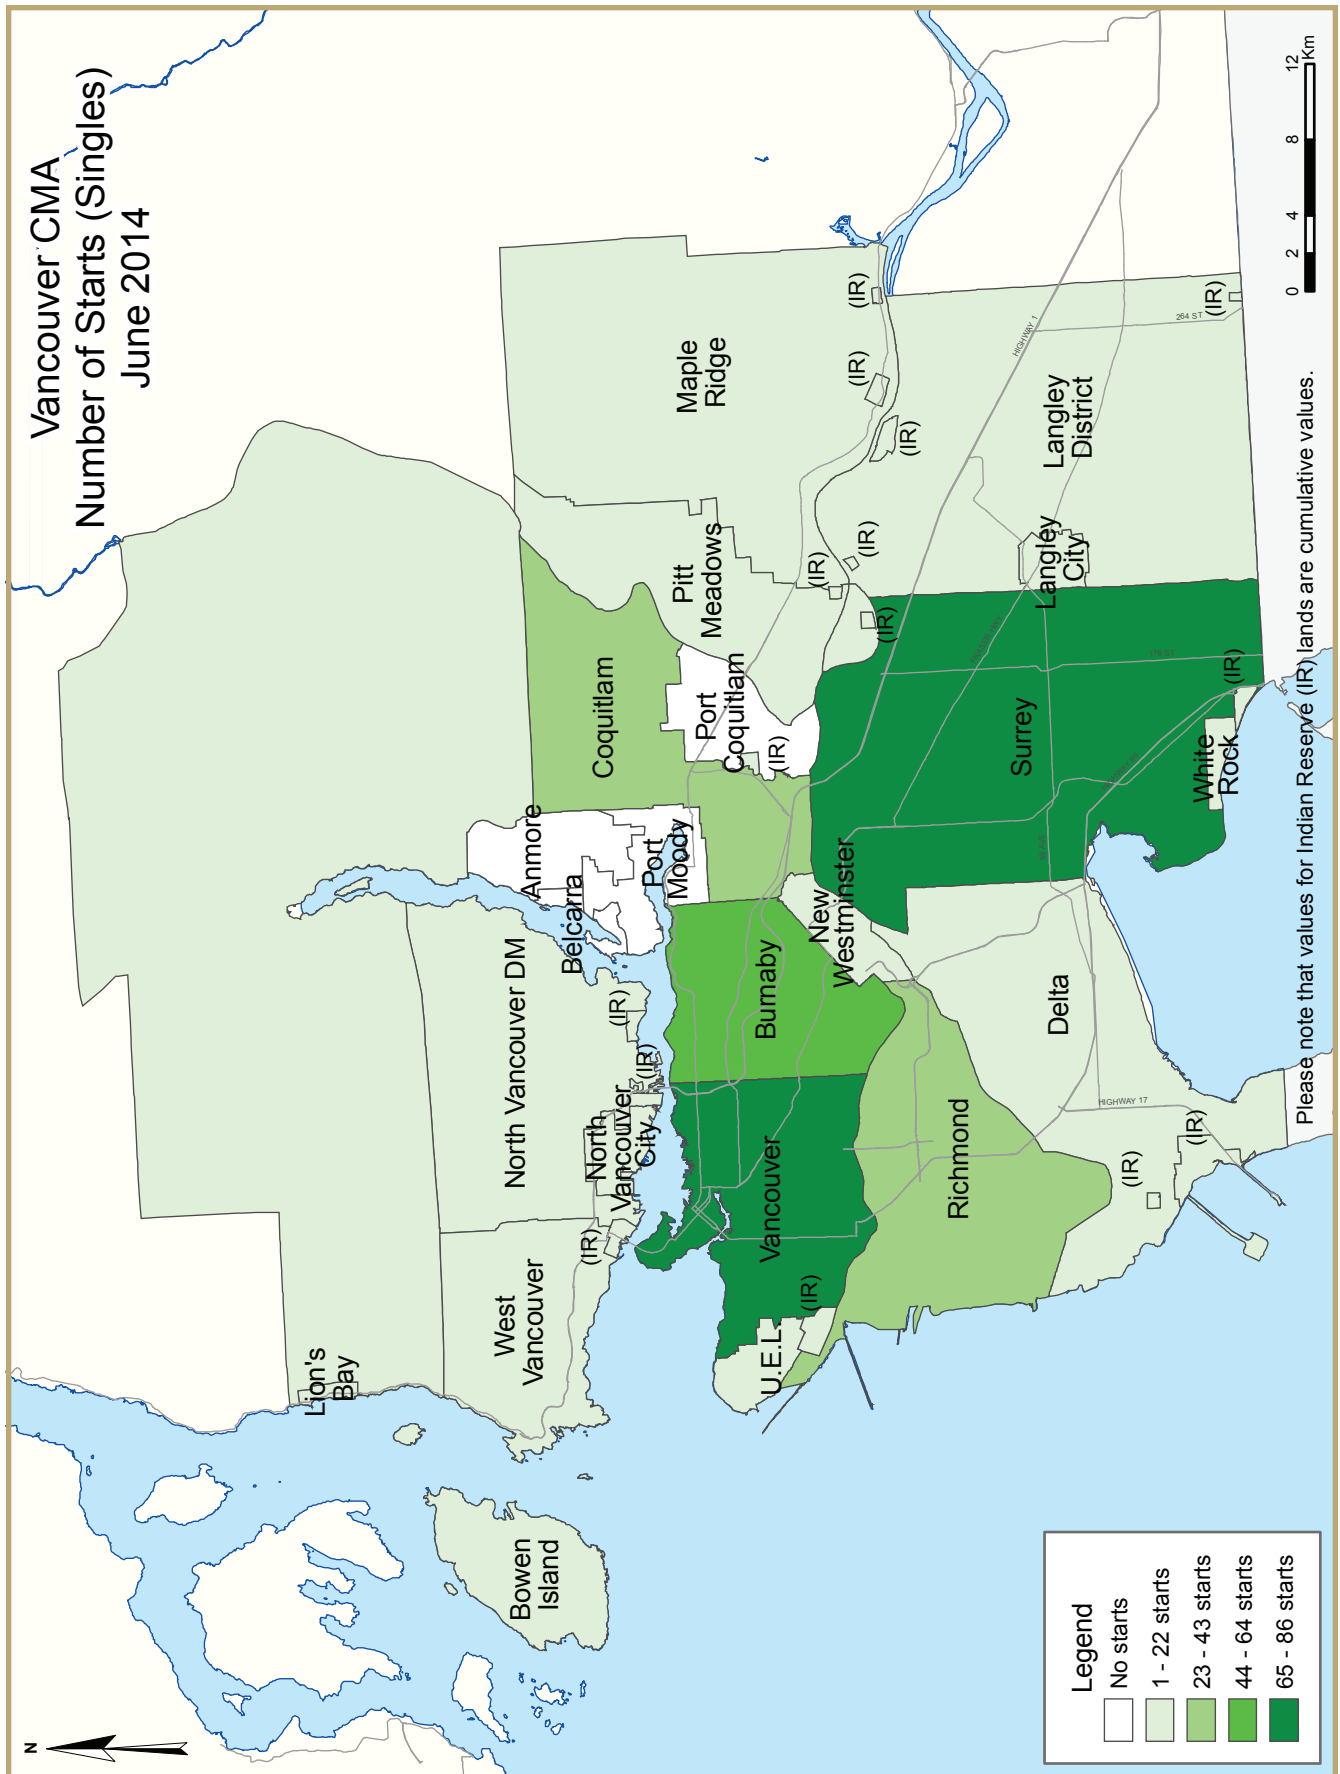

In 2011, Statistics Canada released census results which revealed that in the Vancouver CMA, close to 60 per cent of households were occupied by 1 or 2 people (Figure 4). It's interesting to note that 34 per cent of these households were renters and the rest were home owners. In addition, approximately 50 per cent of the occupied private dwellings were 0-2 bedrooms with the rest being 3+ bedrooms. In 2013, 64 per cent of starts were condominiums, which are usually 0 to 2 bedroom units geared to meet housing demand in the future.

Detailed data available upon request

Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

Source: CMHC (Starts and Completions Survey)

Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

Source: CMHC (Starts and Completions Survey)

Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

Detailed data available upon request

Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

Table 1.1: Housing Activity Summary of Abbotsford-Mission CMA
June 2014

	Ownership						Rental		Total*

Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2011 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modeled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
