

HOUSING NOW

Vancouver and Abbotsford CMAs

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: September 2014

Highlights

- The trend measure of Vancouver housing starts moved higher in August
- Multiple-family home construction trended higher relative to single-family units
- The pace of new home sales (absorptions) edged higher compared with last year

Figure 1

* Seasonally adjusted annual rate

Source: CMHC

¹ The seasonally adjusted annual rate (SAAR) is a monthly figure for starts adjusted to remove normal season variation and multiplied by 12 to reflect annual levels. By removing seasonal ups and downs, seasonal adjustment allows for a comparison from one season to the next and from one month to the next. Reporting monthly figures at annual rates indicates the annual level of starts that would be obtained if the monthly pace was maintained for 12 months. This facilitates comparison of the current pace of activity to annual forecasts as well as to historical annual levels.

Housing Market Overview

Housing starts in the Vancouver Census Metropolitan Area (CMA) were trending at 20,271 units in August, compared with 18,339 in July, according to Canada Mortgage and Housing Corporation (CMHC). The trend is a six-month moving average of the monthly seasonally adjusted annual rates (SAAR) of housing starts.

Actual housing starts were up in August with 2,291 new homes starting construction, compared to 1,530 units during the same month last year. Although starts increased for all home types, apartment starts accounted for most of the growth this month. New projects in Richmond, Burnaby and Vancouver contributed more than seventy per cent of the apartment starts in August.

So far this year, a total of 13,004 new homes were started in the Vancouver CMA, a modest increase from 12,211 starts during the same period last year. The number of single-detached and town home starts grew at the fastest pace. There were 209 more single-detached homes started year-to-date and 374 more new town homes, while apartment construction increased by 162 units.

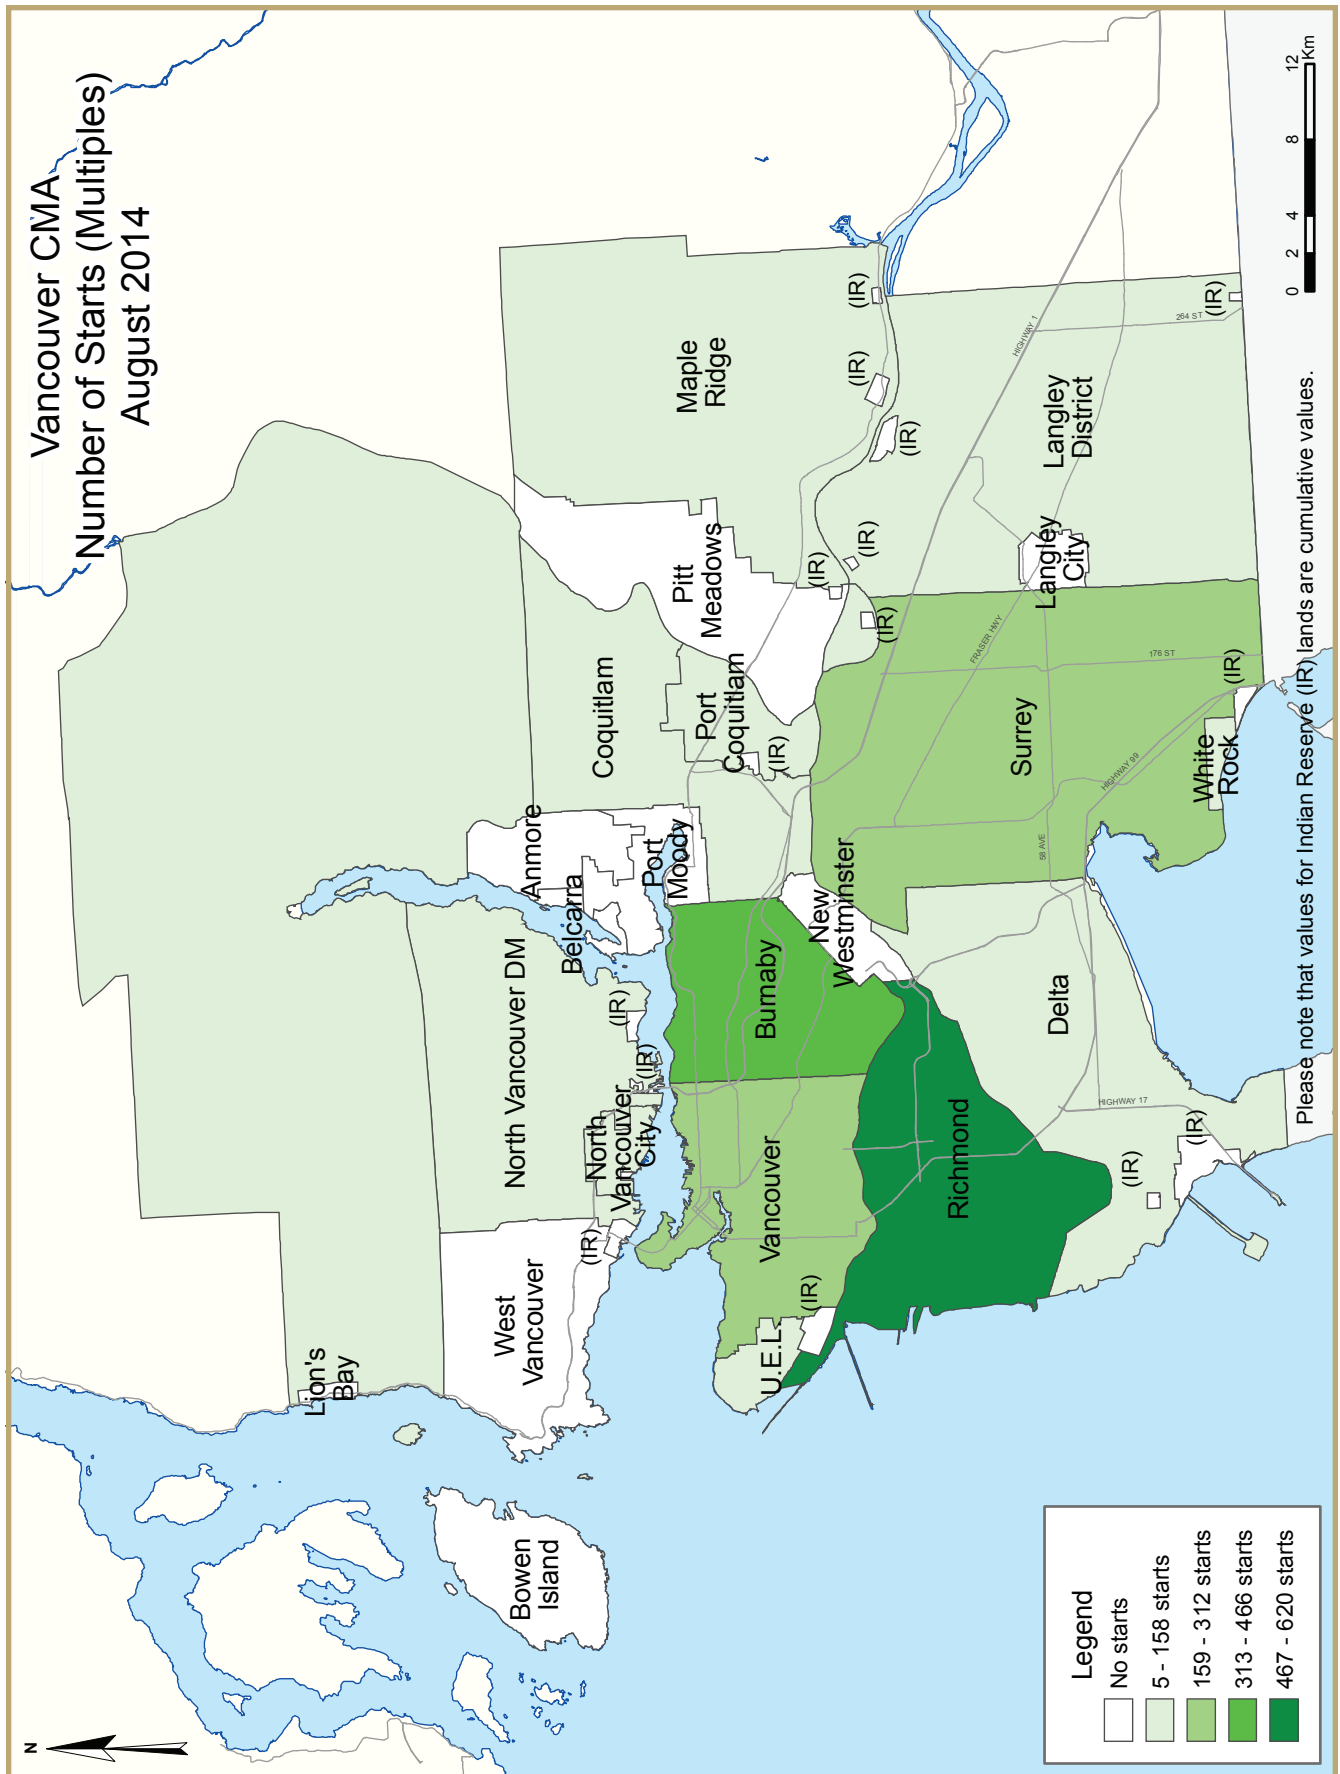

Much of the growth in single-detached home starts was concentrated in Burnaby, Richmond and Surrey, while Delta and White Rock registered more moderate growth. Increases in townhouse construction in Burnaby, Delta and Langley drove most of the up-tick in total townhouse starts in the CMA. Growth in apartment starts was concentrated in Richmond, the Tri-Cities and New Westminster, although the City of Vancouver had the highest absolute number of apartment starts during the first eight months of 2014.

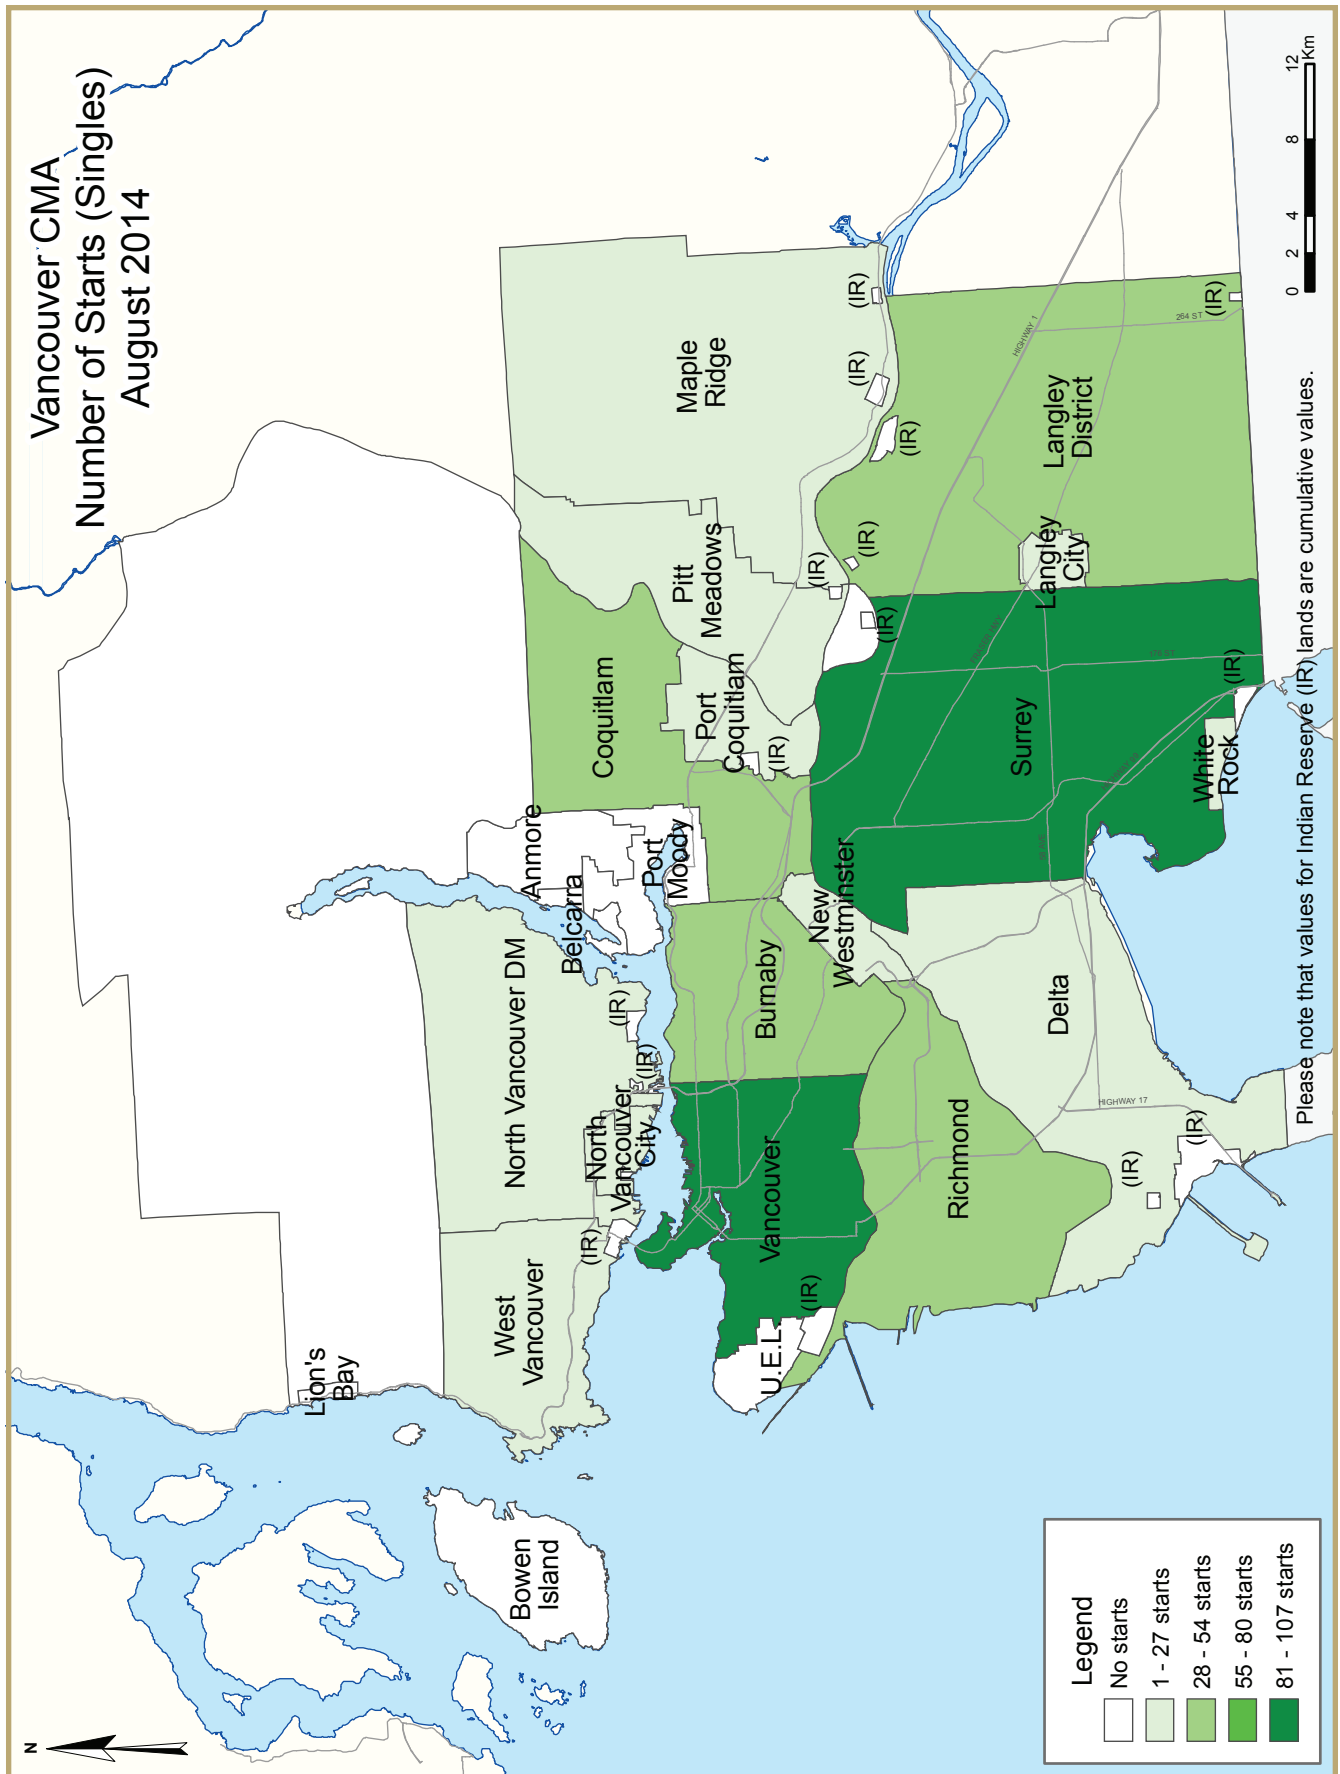

The total number of homes under construction in August moved to 25,077 from 23,145 a year earlier. An increase in the number of apartments and town homes underway offset a decline in the number of single- and semi-detached homes. Approximately half of the units under construction were in the Cities of Vancouver and Burnaby, with another thirty per cent in Surrey, Richmond and the Tri-Cities.

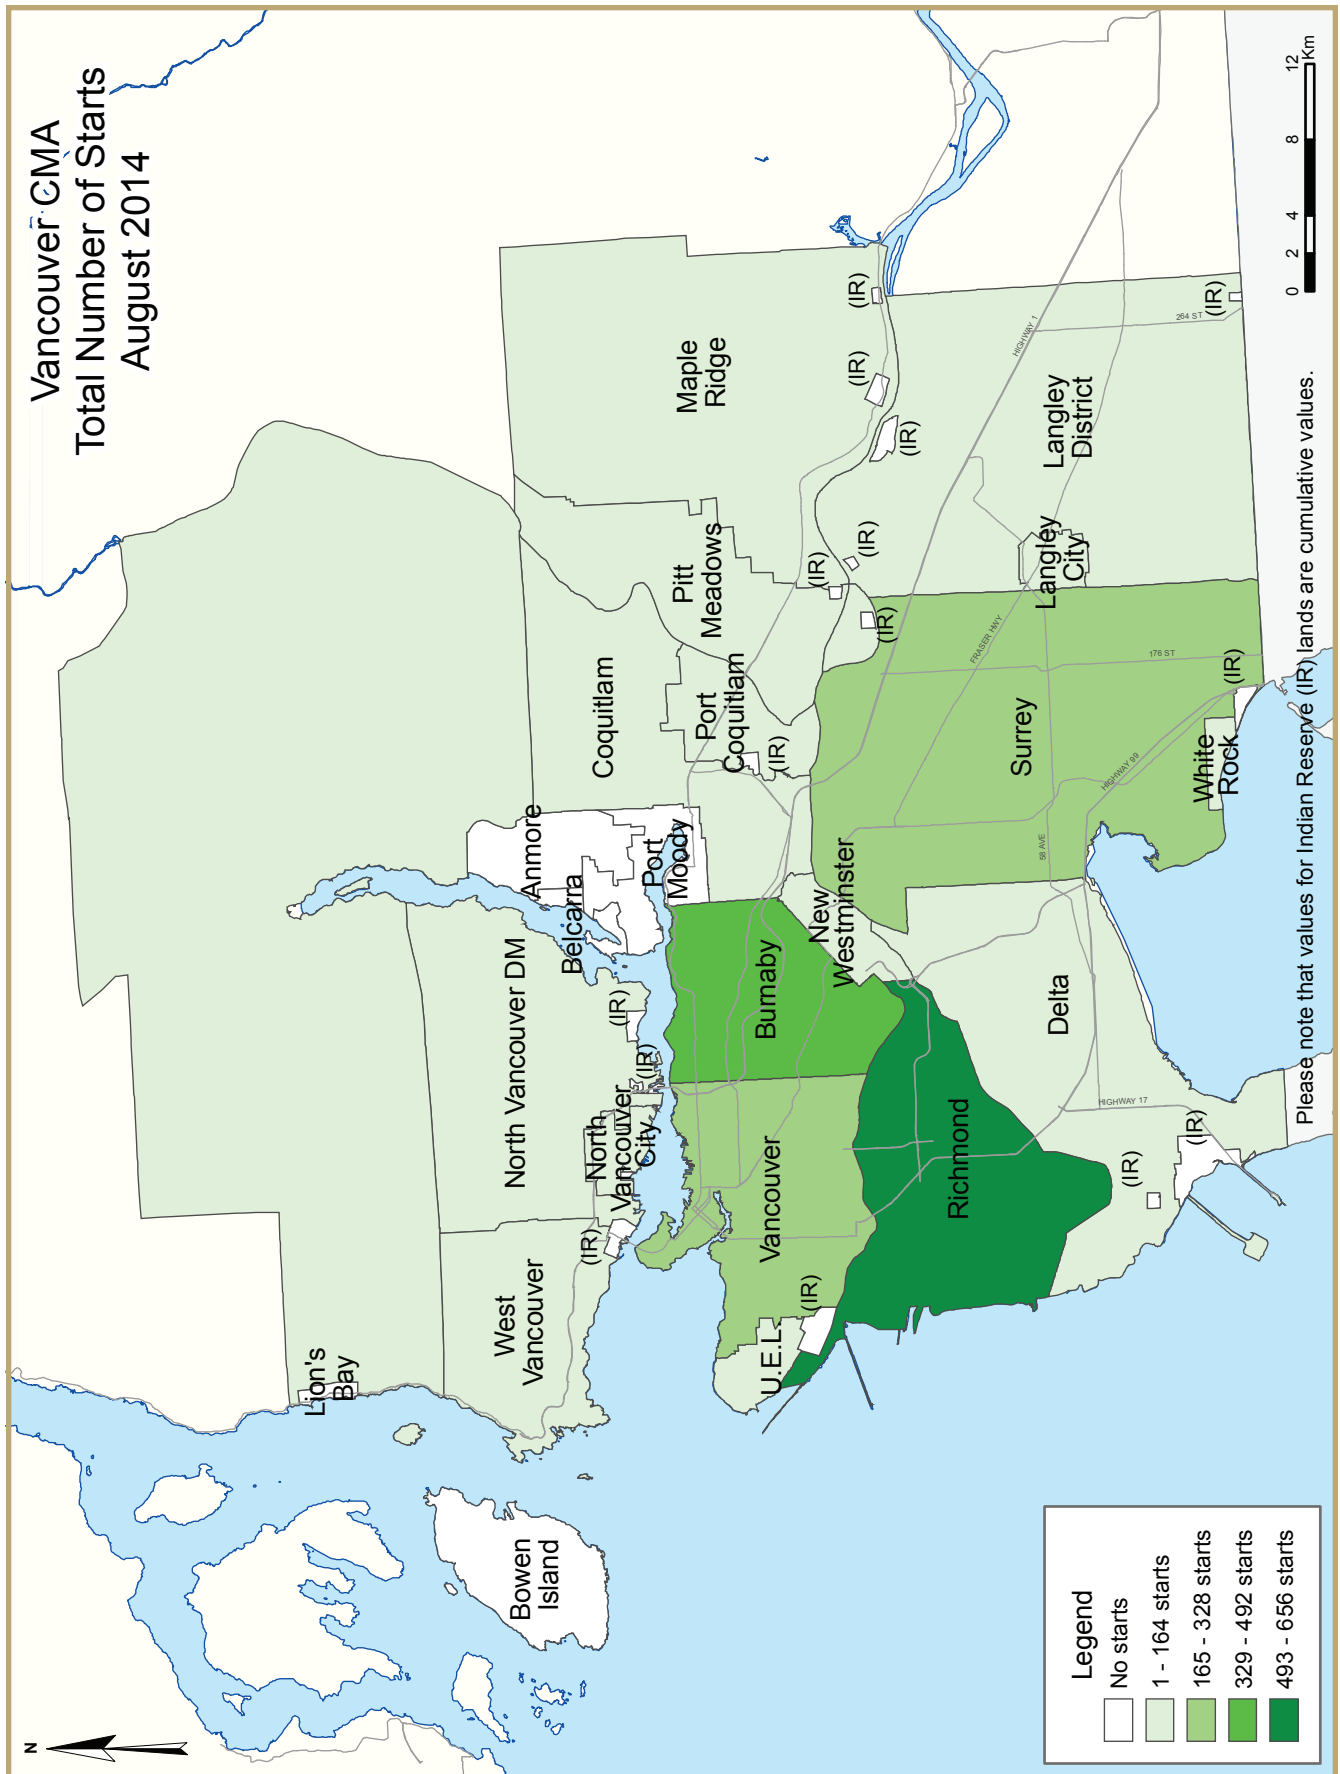

Year-to-date, new home sales (absorptions) edged marginally higher, with increases recorded for all home types except apartment condominiums. Total absorptions increased slightly in most areas of the Vancouver CMA, with the exception of some areas of the Cities of Vancouver and Burnaby, North and West Vancouver, Surrey, White Rock and Maple Ridge / Pitt Meadows.

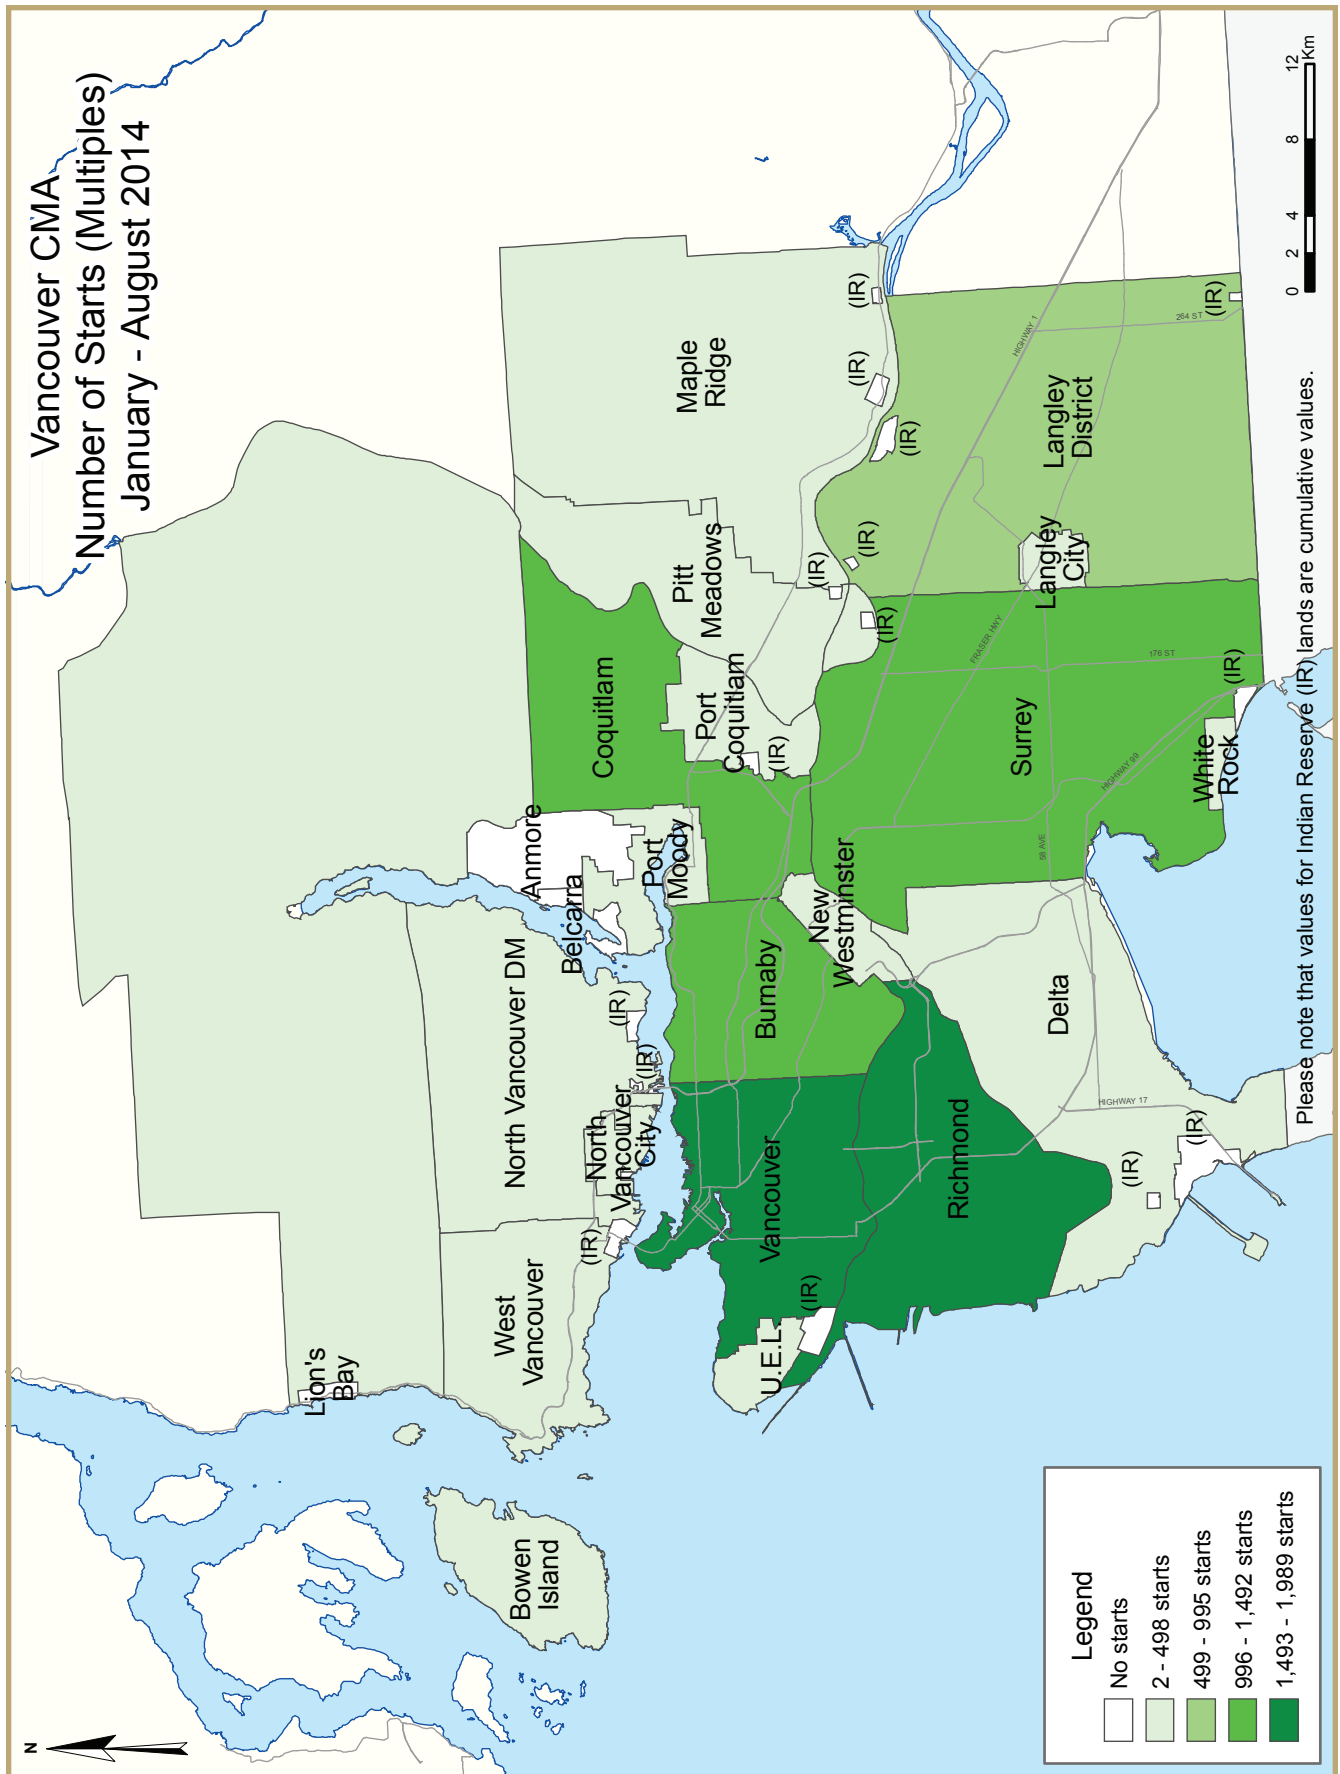

The modest increase in total absorptions combined with a seven per cent decrease in completions during the first eight months of the year, moved the standing inventory of completed and unabsorbed new homes lower as of August 2014. All home types followed this trend.

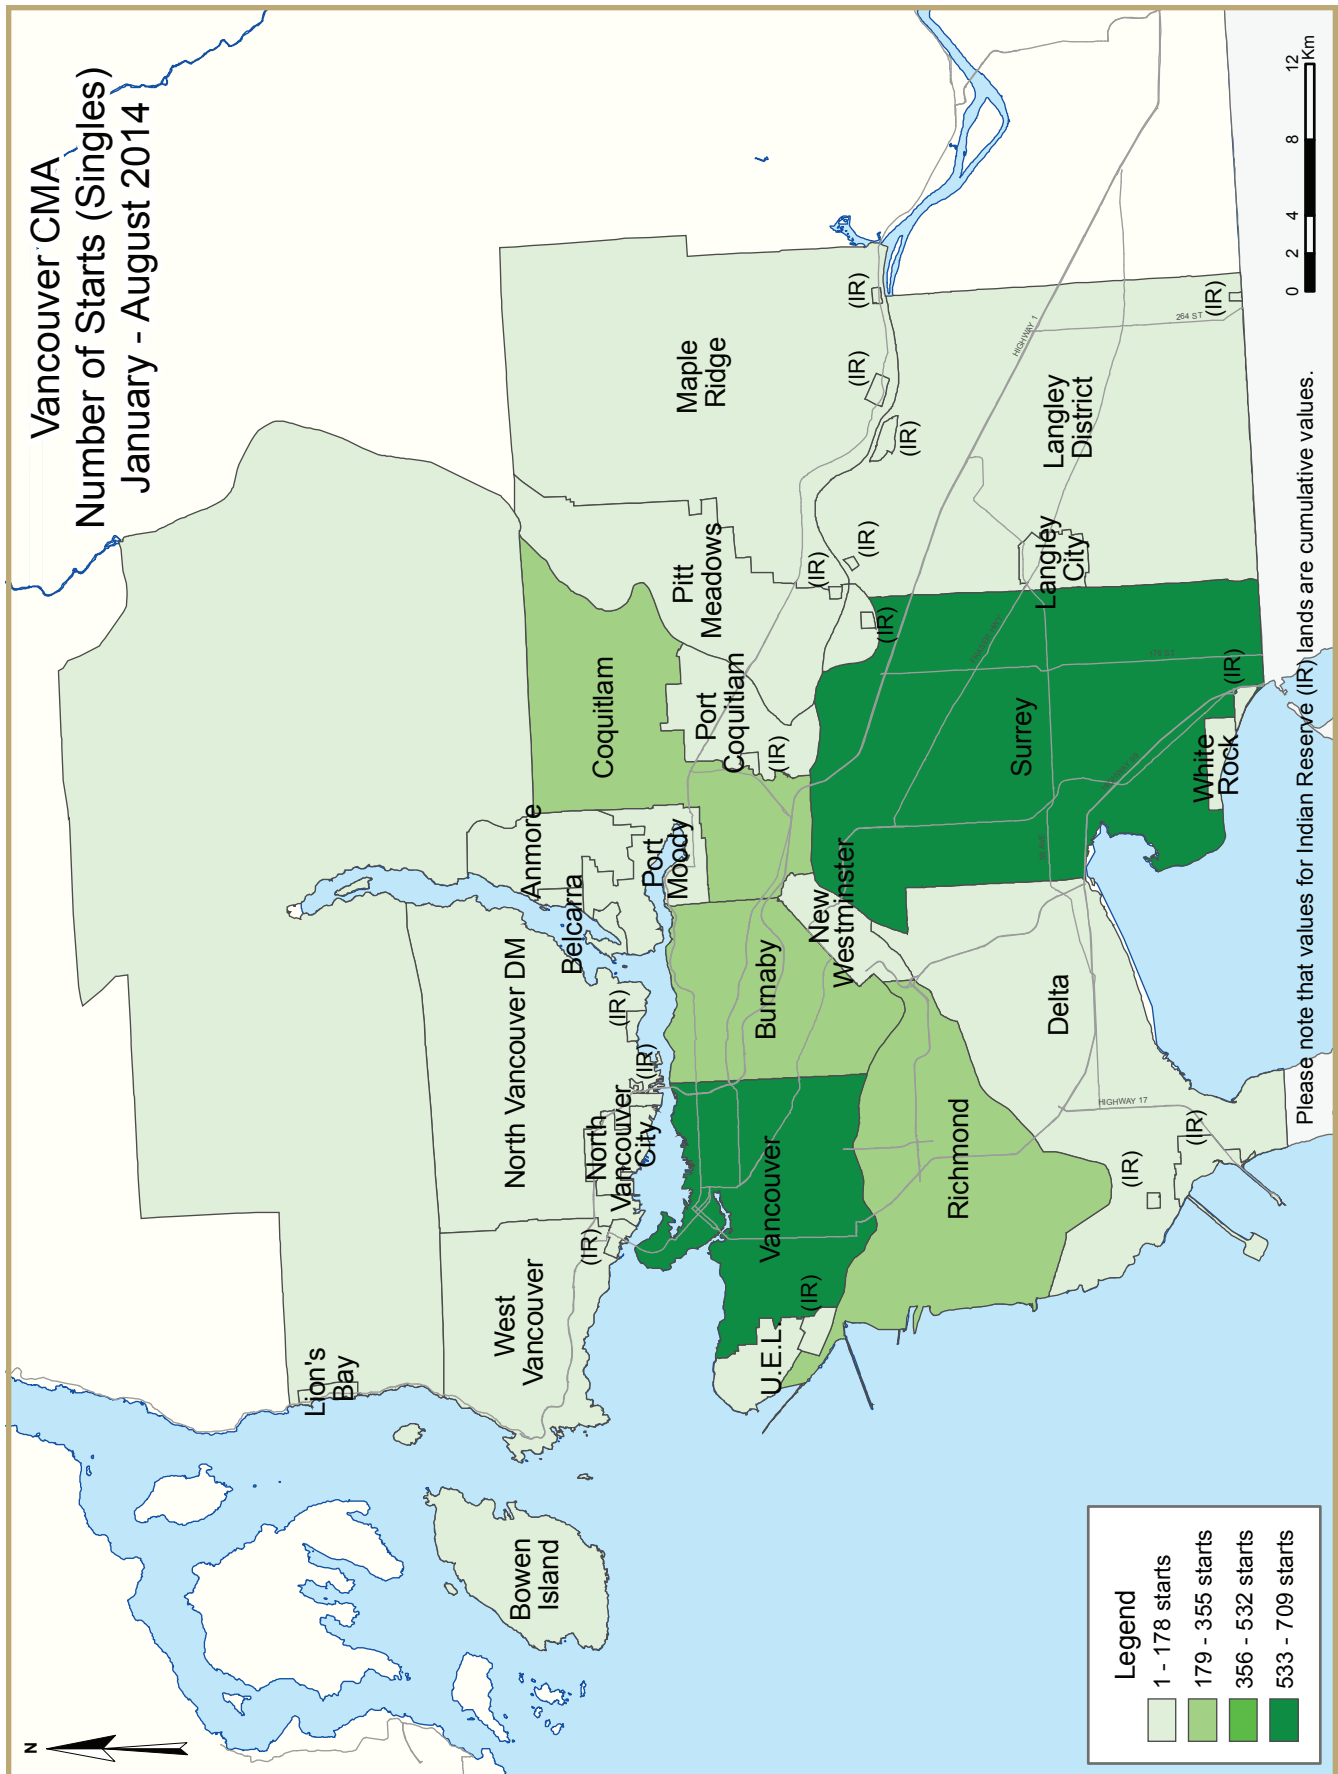

Housing starts in the Abbotsford-Mission CMA were trending at 622 units in August from 568 units in July.

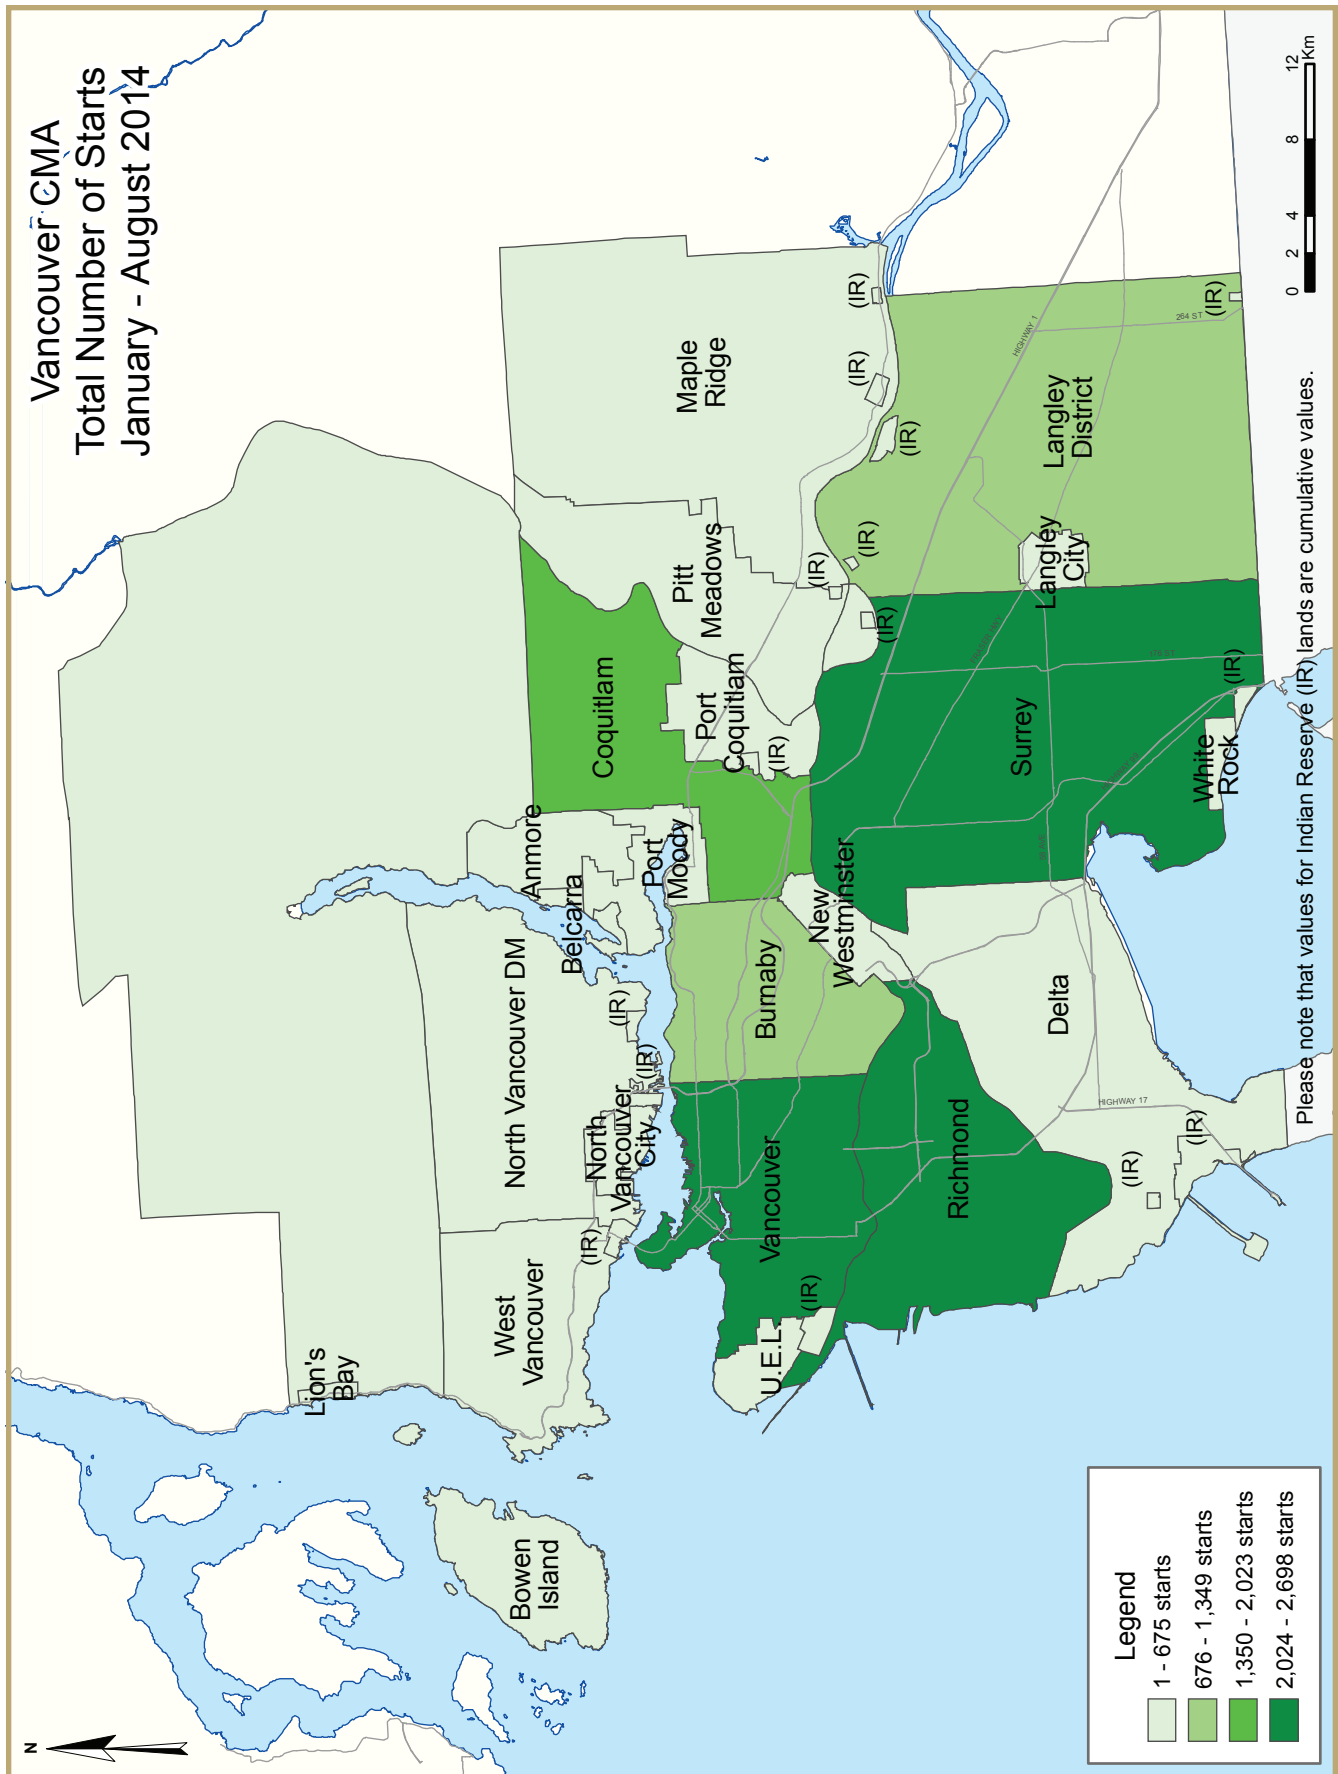

HOUSING NOW REPORT TABLES

Detailed data available upon request

Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

Source: CMHC (Starts and Completions Survey)

Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

Source: CMHC (Starts and Completions Survey)

Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

Detailed data available upon request

Effective January 2013, single-detached houses with an attached accessory suite are recorded as one unit "Ownership, Single" and the accessory suite as one unit "Rental, Apt + Other". In 2012 and prior years, these structures were recorded as two units, "Ownership, Freehold, Apt + Other" in some markets, including the Vancouver CMA and Abbotsford-Mission CMA. This adjustment provides national consistency.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2011 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modeled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
