HOUSING MARKET INFORMATION

HOUSING NOW Greater Sudbury CMA

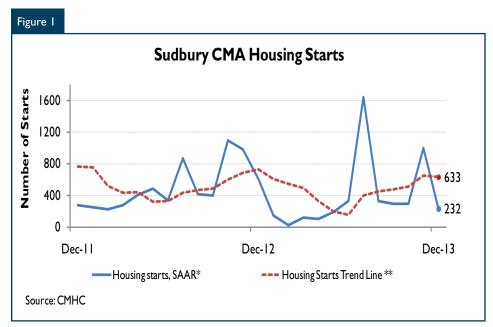

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: First Quarter 2014

Highlights

- Total housing starts remained weaker in fourth quarter.
- New apartment construction had another strong quarter.
- Seasonally adjusted MLS[®] sales edged lower by nine percent as compared to third quarter.
- For the year, the average MLS® price grew at a slower pace than in 2012, increasing only by two percent.

^{**}The trend is the six month moving average of the monthly SAAR¹ for housing starts.

¹ SAAR is a monthly figure for starts adjusted to remove normal seasonal variation and multiplied by 12 to reflect annual levels. By removing seasonal ups and downs, seasonal adjustment allows for a comparison from one season to the next and from one month to the next. Reporting monthly figures at annual rates indicates the annual level of starts that would be obtained if the monthly pace was maintained for 12 months. This facilitates comparison of the current pace of activity to annual forecasts as well as to historical annual levels.

New Home Market

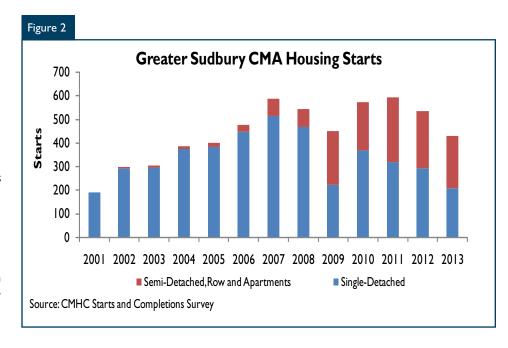

Housing starts in the Greater Sudbury Census Metropolitan Area (CMA) were trending at 633 units in December. The trend is a six-month moving average of the monthly seasonally adjusted annual rates (SAAR) of housing starts. The trend declined slightly in December, but was still higher than total actual starts for the year due to strong starts activity for multi-family homes from July to December.

Foundations were laid for 125 units in the fourth quarter of 2013 in Greater Sudbury ending the year with a total of 431 housing starts. This represents an overall decline of 20 percent from the previous year. Sluggish starts activity in the first half of 2013 was bolstered by large gains in the latter half of 2013. This increase was led by multi-family new construction with a start-up of 188 apartment units.

Except for apartment units, other types of multi-family units, such as semi-detached and row starts, remained well below 2012 starts levels for these types of homes. Though the 28 starts of semi-detached units were above the five year average, the seven row starts were lowest in the last five years.

A decline in commodity prices caused by challenges in the global economy, new regulations for junior miners and the lack of new capital investment in mining industry kept the local economy under pressure throughout 2013. Nonetheless, other industries, especially in service-producing sector, grew in 2013 and helped stabilize the employment level and the housing market in the Greater Sudbury area.

Slower new construction activity of single-family homes was seen in

the last three months of the year. Seasonally adjusted fourth quarter starts were 47 units as compared to 56 units in the third quarter. Similarly, total single-family starts were 208 in 2013, a decline of 29 percent from a year earlier. Despite the slower pace of construction in 2013, the year-to-date average price of newly completed single-detached homes in Greater Sudbury has increased by 11 percent from same period last year to \$427,291.

Starts activity for more pricey single-family homes was subdued in the latter part of 2013 due to exhaustion of demand from move-up buyers in the 45-64 age group. Younger age groups, traditionally representing first time buyers, seem to prefer more affordable existing homes vs. higher priced newly built single family homes.

Elsewhere in Northeastern Ontario, Sault Ste Marie and Timmins closed 2013 with strong numbers due to an increase in starts activity recorded in multi-family homes. On a year-overyear basis, starts were up 48 percent in Sault Ste Marie and 18 percent in

Timmins. Conversely, North Bay total starts were down 46 percent on a year-over-year basis.

Resale Market

MLS® sales lost momentum in the fourth quarter, with a seasonally adjusted quarterly sales drop of nine percent. This drop was partially due to pre-emptive purchases in the third quarter in anticipation of a long- term interest rate increase by those holding pre-approved mortgage contracts. However, these speculations did not materialise. MLS® sales moderated. Total MLS® sales for the year dropped by eight percent in Greater Sudbury.

On the supply side, lower new listings numbers helped mitigate the impact of slower demand in the fourth quarter. In the fourth quarter, the seasonally adjusted sales-to-new listings ratio remained slightly above the upper boundary of the balanced range.

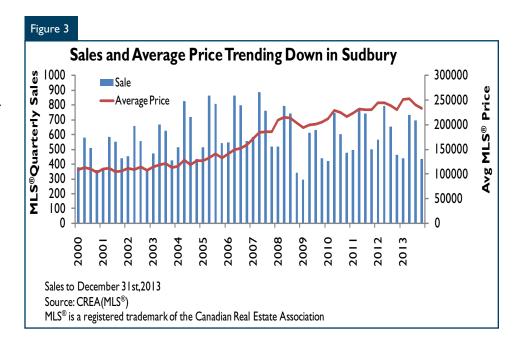

The resale market was dominated by move-up buyers in the first two quarters of 2013, driving average MLS® prices up by five percent. This growth in average price was due to proportionately more sales in the higher price ranges of \$200k and above.

First time home buyers, keen to lockin interest rates amid speculation of interest rate increases, generated higher demand for more affordable homes in the latter half of 2013. This resulted in the softening of the average MLS® price in the last two quarters.

Despite a decline in the last two quarters of 2013 in the first half of 2013, gains in resale average price were strong enough to generate an annual increase of two percent in 2013.

All other Northeastern Ontario cities, such as Sault Ste Marie, Timmins and North Bay, had slower fourth quarter MLS® sales. Seasonally adjusted MLS® sales declined by three, five and eight percent respectively in the fourth quarter as compared to third quarter.

Nevertheless, Sault Ste Marie ended the year with one percent growth in sales in 2013. Timmins and North Bay

recorded six percent and nine percent decline in MLS® sales respectively.

Despite slower demand, the seasonally adjusted sales-to-new listing ratios in Sault Ste Marie, Timmins and North Bay remained comfortably within the balanced range in the fourth quarter.

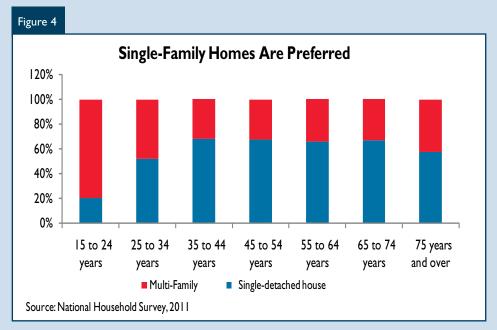

Stalled growth of average MLS® price in the fourth quarter in Sault Ste Marie, Timmins and North Bay did not

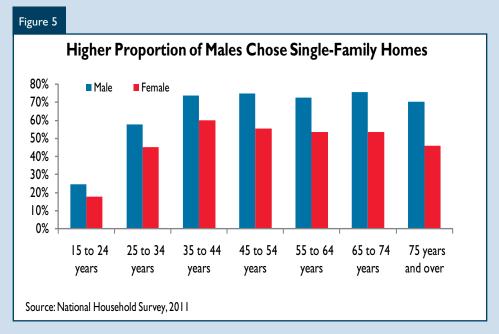

deter annual price growth in these cities. Average MLS® prices in 2013 grew by 2.9 percent, 2.7 percent and 2.5 percent respectively.

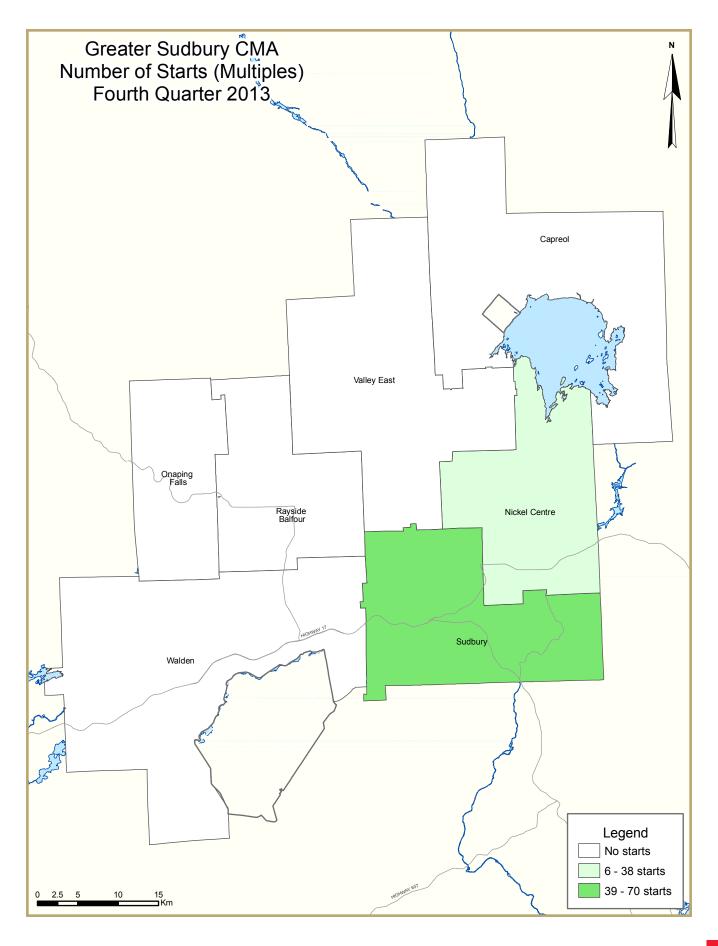

Single-Family Home is Most Preferred Dwelling Type in Greater Sudbury

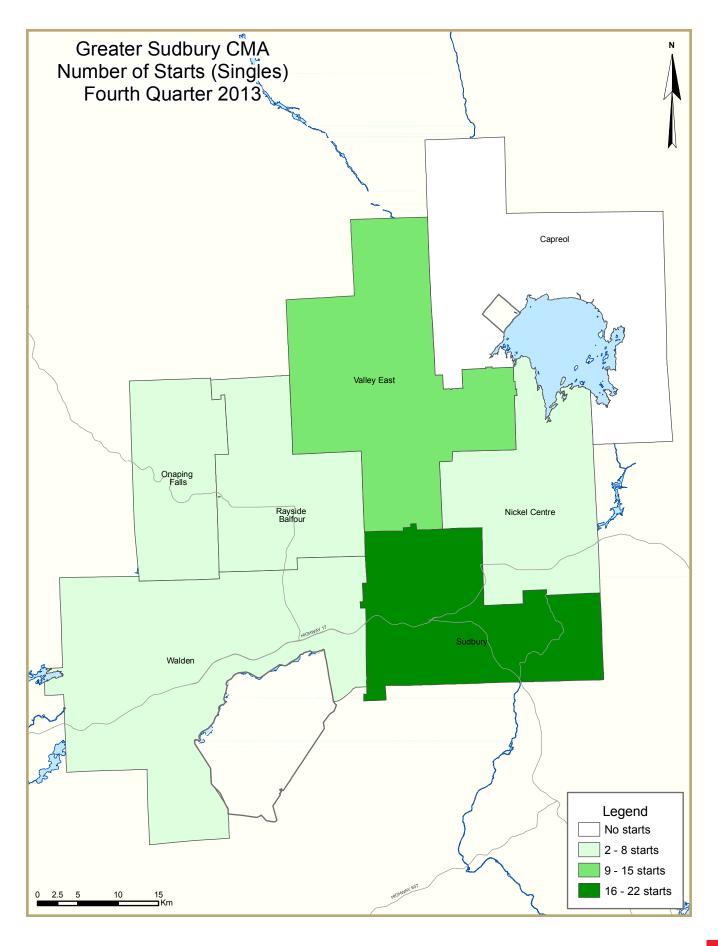

According to 2011 National Household Survey (NHS), except for the younger age group of 15-24 year olds, all of the primary household maintainers in Greater Sudbury preferred a single-family home. A primary household maintainer is defined as the first person in the household, identified as someone who pays the rent or the mortgage, the taxes, or the electricity bill for the dwelling. More than 50 percent of the homeowners in the 25 years and older age group chose singlefamily dwelling as their home.

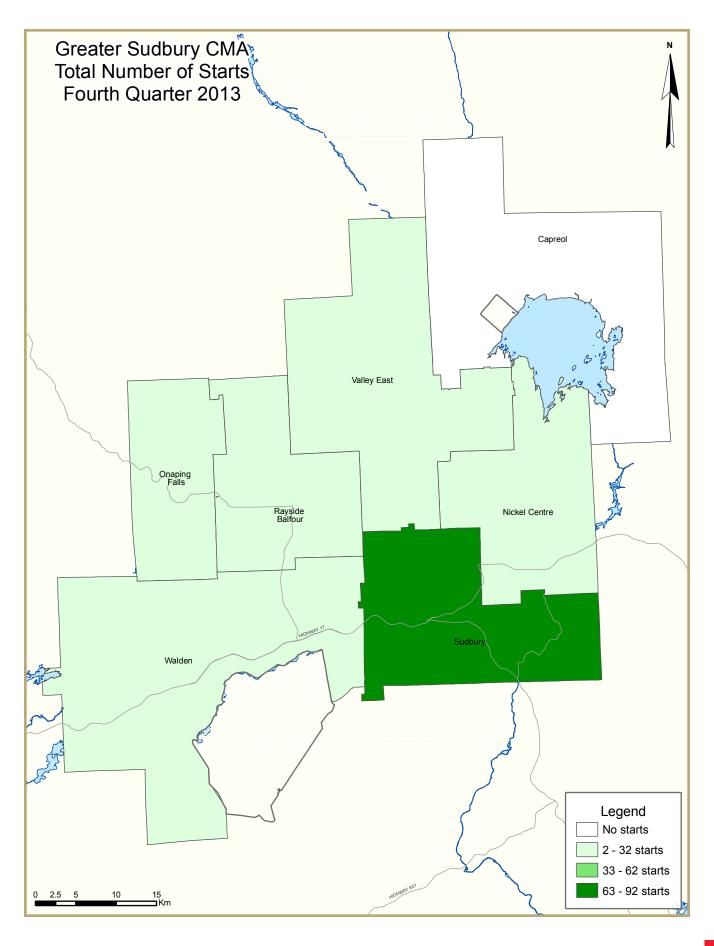

The preference for single-family homes was not the same when looked at across genders. Single-family homes attracted a lower percentage of female primary household maintainers as compared to males. For example, 75 percent of male primary household maintainers in the 45-54 year age group preferred single-family homes as compared to 56 percent of females in the same age group. This trend was consistent across all age groups.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2011 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modeled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A "dwelling unit", for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A "start", for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units "under construction" as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A "completion", for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term "absorbed" means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A "Single-Detached" dwelling (also referred to as "Single") is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A "Semi-Detached (Double)" dwelling (also referred to as "Semi") is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A "Row (Townhouse)" dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term "Apartment and other" includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The "intended market" is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A "Rural" area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada's 2006 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.

For more information, visit our website at www.cmhc.ca or follow us on Twitter, YouTube and Flickr.

You can also reach us by phone at I-800-668-2642 or by fax at I-800-245-9274.

Outside Canada call 613-748-2003 or fax to 613-748-2016.

Canada Mortgage and Housing Corporation supports the Government of Canada policy on access to information for people with disabilities. If you wish to obtain this publication in alternative formats, call 1-800-668-2642.

The Market Analysis Centre's (MAC) electronic suite of national standardized products is available for free on CMHC's website. You can view, print, download or subscribe to future editions and get market information e-mailed automatically to you the same day it is released. It's quick and convenient! This permission consists of the right to use the content for general reference purposes in written analyses and in the reporting of results, conclusions, and forecasts including the citation of limited amounts of supporting data extracted from this publication. Reasonable and limited rights of use are also permitted in commercial publications subject to the above criteria, and CMHC's right to request that such use be discontinued for any reason.

Any use of the publication's content must include the source of the information, including statistical data, acknowledged as follows:

Source: CMHC (or "Adapted from CMHC," if appropriate), name of product, year and date of publication issue.

Other than as outlined above, the content of the publication cannot be reproduced or transmitted to any person or, if acquired by an organization, to users outside the organization. Placing the publication, in whole or part, on a website accessible to the public or on any website accessible to persons not directly employed by the organization is not permitted. To use the content of any CMHC Market Analysis publication for any purpose other than the general reference purposes set out above or to request permission to reproduce large portions of, or entire CMHC Market Analysis publications, please contact: the Canadian Housing Information Centre (CHIC) at chic@cmhc.ca; 613-748-2367 or 1-800-668-2642.

For permission, please provide CHIC with the following information: Publication's name, year and date of issue.

Without limiting the generality of the foregoing, no portion of the content may be translated from English or French into any other language without the prior written permission of Canada Mortgage and Housing Corporation.

The information, analyses and opinions contained in this publication are based on various sources believed to be reliable, but their accuracy cannot be guaranteed. The information, analyses and opinions shall not be taken as representations for which Canada Mortgage and Housing Corporation or any of its employees shall incur responsibility.
