

# HOUSING NOW

## Montréal CMA

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: December 2014

## Highlights

- The steady pace of housing starts recorded in November resulted from the strong activity in the rental housing segment.
- With the exception of Laval, all sectors of the CMA posted gains in residential construction for the first eleven months of this year over the same period last year.
- On the resale market, transactions fell by 1 per cent in November compared to the same month in 2013.

\*SAAR<sup>1</sup>: Seasonally Adjusted Annual Rate

<sup>1</sup> All starts figures in this release, other than actual starts and the trend estimate, are seasonally adjusted annual rates (SAAR)—that is, monthly figures adjusted to remove normal seasonal variation and multiplied by 12 to reflect annual levels. By removing seasonal ups and downs, seasonal adjustment allows for a comparison from one season to the next and from one month to the next. Reporting monthly figures at annual rates indicates the annual level of starts that would be obtained if the monthly pace were maintained for 12 months. This facilitates comparison of the current pace of activity to annual forecasts as well as to historical annual levels.

## New home market

Housing starts in the Montréal census metropolitan area (CMA) were trending at 19,741 units in November, compared to 18,592 in October,<sup>2</sup> according to Canada Mortgage and Housing Corporation (CMHC). The trend is a six-month moving average of the monthly seasonally adjusted annual rates (SAAR) of housing starts.

The trend in housing starts in the Montréal CMA was up for a third straight month. The steady pace of housing starts recorded in November resulted from the strong activity in the rental housing segment. In this regard, construction got under way on three large retirement homes, the significant size of which partly accounted for the jump in starts this past month. However, this one-time hike should be followed by a slowdown in construction in the coming months.

According to the actual data, total housing starts for the first eleven months of the year revealed an increase of 23 per cent over the same period in 2013. In fact, 17,226 dwellings were started in the Montréal metropolitan area from January to November. Multi-unit housing construction climbed by 32 per cent year over year for this period. Conversely, single-detached home building slowed down (-11 per cent).

All large geographic sectors of the CMA showed increases in housing starts for the period from January to November, with the exception of Laval, which registered a decrease of 22 per cent from the corresponding period in 2013. Builders in this sector

Figure 2

Source: CMHC

seem to have focused their energies on clearing their inventories of new condominiums this year. Consequently, fewer new condominium projects were started. The other sectors all posted gains: 50 per cent on the Island of Montréal, 18 per cent on the South Shore and in Vaudreuil-Soulanges and 6 per cent on the North Shore. The increase in activity on the Island of Montréal was largely attributable to the start of construction on some large condominium projects in downtown Montréal. The many seniors' and co-operative housing starts were the main reason for the increases in the other large sectors of the CMA.

## Resale market

According to the latest Centris® housing statistics from the Quebec Federation of Real Estate Boards (QFREB), 2,590 sales were registered in the Montréal CMA in November 2014, for a decrease of 1 per cent from the same period in 2013. Transactions fell by 4 per cent in

the case of single-family houses and remained stable for condominiums. However, plex sales jumped up by 17 per cent this past month over a year earlier.

Supply grew significantly over the same period. In the Montréal metropolitan area, total active listings rose by 8 per cent in November over the same month in 2013. In fact, plexes posted the greatest increase in supply (+13 per cent). Active listings also rose for single-family homes and condominiums, but to a lesser extent (by about 7 per cent in both cases).

Among the geographic sectors of the Montréal CMA, only the North Shore and the Island of Montréal recorded increases in sales this past month over a year earlier, with gains of 3 per cent and 1 per cent, respectively. The other sectors registered decreases, with transactions falling by 1 per cent on the South Shore, by 3 per cent in Laval and by 19 per cent in Vaudreuil-Soulanges.<sup>3</sup>

<sup>2</sup> The stand-alone monthly SAAR was 29,380 units in November, up from 19,776 in October.

<sup>3</sup> It should be noted that transaction volumes are relatively smaller in Vaudreuil-Soulanges than in the other sectors.

The year-to-date figures for the first eleven months of 2014 also showed a slowdown in demand and an increase in supply on the market. Several factors contributed to the easing, including employment, which has been losing steam since the beginning of the year,<sup>4</sup> and the movement to homeownership, which has also been slowing down.

The softer resale market conditions led to weak growth in prices. For the first eleven months of the year, the median prices of both single-family houses and condominiums rose by 1 per cent over the same period in 2013. The median price of plexes, for its part, rose by 2 per cent.

---

<sup>4</sup> Particularly full-time employment among people aged from 25 to 44.

## METHODOLOGY

### Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2011 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modeled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

### Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

## STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

## DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

## INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

**Freehold:** A residence where the owner owns the dwelling and lot outright.

**Condominium (including Strata-Titled):** An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

**Rental:** Dwelling constructed for rental purposes regardless of who finances the structure.

## GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions.

## CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
