The following standard symbols are used in Statistics Canada publications:

.. figures not available.
- nil or zero.
-- amount to small to be expressed.
P preliminary figures.
r revised figures.
x confidential to meet secrecy requirements of the Statistics Act.

Due to rounding, the sums of individual items may not agree exactly with the totals.

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

.. données indisponibles.
- nêant ou zéro.
-- nombres infimes.
P données préliminaires.
r données révisées.
x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Les chiffres ayant été arrondis, il se peut que la somme des postes ne corresponde pas au total donné.
Exports lower. - Total exports of wheat (including flour in terms of wheat) from the four traditional major exporters during August 1976 - February 1977 have amounted to 1,085.0 million bushels, 14% less than the August 1975 - February 1976 level of 1,259.7 million and 16% more than the ten-year (1965-74) average for the same period of 935.1 million bushels. During the first seven months of the 1976-77 Canadian crop year shipments from Canada, United States and Australia registered lower exports this year than last, while those from Argentina were higher.

Shipments from the four traditional major wheat exporters during August-February 1976-77 with comparisons, appear in the following table.

La baisse des exportations. - Les exportations de blé (y compris la farine exprimée en équivalent de blé) des quatre grands exportateurs traditionnels ont été de 1,085.0 millions de boisseaux au cours des mois d'août 1976 - février 1977 soit 16% inférieures que les chiffres de 1,259.7 millions pour la même période en 1975-76 et 14% plus que la moyenne atteinte au cours des même mois de la décennie 1965-74 qui était de 935.1 millions. Pendant les sept premiers mois de la campagne agricole canadienne de 1976-77 les exportations du Canada, des États-Unis et de l'Australie ont indiqué une diminution des exportations pendant l'année courante, comparées à celles d'un an auparavant tandis que ceux de l'Argentine ont marqué un accroissement.

Les expéditions provenaient des quatre grands exportateurs traditionnels de blé d'août-février 1976-77 sont présentées dans le tableau comparatif suivant.

Wheat Supplies increased. - Total supplies of wheat remaining in Canada, Australia, United States and Argentina at March 1, 1977 for export and for carryover at the end of their respective crop years, amounted to 2,573.4 million bushels, 43% above the 1,799.7 million at the same date in 1976. Increases in supplies were registered in each of the four major exporting countries over those of a year ago. Supplies on or about March 1, 1977 in millions of bushels, were held as follows, with last year's comparable figures in brackets: Canada, 740.8 (479.4); Australia, 329.8 (327.8); United States, 1,317.1 (896.6); and Argentina, 185.7 (95.9).

(1) Includes receipts at primary, process, interior terminal elevators and platform loadings. - Y compris les quantités reçues aux élévateurs primaires, de conditionnement, de terminus et grains chargés à un quai.
Farmers' Marketings by Crop Districts 1975–76. - Farmers in the Prairie Provinces and certain areas of British Columbia marketed 525.4 million bushels of wheat during the 1975–76 crop year according to revised figures compiled by the Economics and Statistics Division of the Canadian Grain Commission.

In the following tables, farmers' deliveries are shown by the marketing channel employed, i.e. through primary elevators, directly to process elevators, as well as platform loading and interior terminals. Deliveries to primary elevators are, in turn, broken down by provinces and crop districts.
