COAL AND COKE STATISTICS

JULY 1966

Monthly coal and coke statistics are designed to provide current information on the production, consumption and stocks of coal and coke in Canada. Industrial consumers' consumption and stocks are reported regionally for the provinces of Ontario and Quebec. Groups of economic regions have been used to divide the two provinces geographically. The map which appears in this publication shows the location of the economic regions. A list of the counties forming these economic regions is on the reverse side.

July production of coal amounted to 524,274 tons, a decrease of 17.6% from the July 1965 production of 636,589 tons. Landed imports were 1,703,474 tons compared with 1,488,674 tons in the same period last year. Exports (compiled by External Trade) for July 1965 amounted to 101,314 tons.

Domestic shipments of coal as reported by mine operators decreased to 587,878 tons in July 1966 from 638,988 tons in July 1965 and total shipments decreased to 649,064 tons from 749,338 tons in the same period.

In order to expedite the collection and compilation of returns, the industrial consumers' survey is confined to firms which consume a minimum of 1,000 tons per annum. In July 1966 consumption of coal and coke by industrial consumers amounted to 1,410,894 tons a decrease of 6.9% compared with the corresponding period last year. During the same period, industrial consumers' stocks increased to 5,067,626 tons from 3,931,387 tons.

The amount of coke available in Canada decreased to 382,165 tons from 389,858 tons in July 1965.
